CANADIAN NATIONAL RAILWAYS.

LICENSE TO LAY PIPE UNDER RIGHT-OF-WAY.

Approved as to form A.R. Mac L.

PERMISSION is hereby given by the Grand Trunk Pacific Railway Company (hereinafter called the "Company") to His Majesty The King in right of the Dominion of Canada represented herein by the Superintendent General of Indian Affairs (hereinafter called the "Licensee") to lay one 4 inch pipe under the Company's right-of-way at a point near Fort Fraser Station, British Columbia, as shown by the red line on the plan hereto annexed (which is hereby declared to be a part hereof), to be used only for the purpose of conveying water to Fraser Lake Indian School:

ON THE FOLLOWING TERMS, which the Licensee hereby accepts and agrees to perform and abide by:-

1. The said pipe shall be of the Canadian Society of Civil Engineer's standard, properly fastened at the joints and the top of said pipe shall be below the frost line and not less than four feet below the base of rail.

2. All work in connection with the laying, maintaining, renewing and repairing of said pipe and the continued supervision of the same, shall be performed by, and all costs and expenses thereby incurred be borne and paid by the Licensee, but no

work at any time shall be done in any manner so as to obstruct, delay or in any way interfere with the operation of any of the trains or traffic of the Company or any other Railway Company using the said railway.

3. The Licensee shall at all times maintain the said pipe in good working order and condition and so that at no time shall any damage be caused to the property of the Company, or any of its tracks be obstructed or the usefulness or safety of the same for railway purposes be impaired or the full use and enjoyment as heretofore by the Company, or any other Railway Company using the said railway, be in any way interfered with.

4. Before any work of laying, renewing or repairing the said pipe is begun, the Licensee shall give to the Local Superintendent of the Company at least ninety six (96) hours' prior notice thereof in writing so as to enable the Company to appoint an inspector to see that the work is performed in such a manner as in all respects will comply with this License. The wages of such inspector shall not exceed eleven dollars ($11.00) per day, to be paid by the Licensee, such payment to cover both wages and expenses. PROVIDED that the Company may at any time at the cost of the Licensee repair said pipe,or any part thereof, without notice to the Licensee should the Company's superintending official deem such repairs necessary or expedient, and the Company will render a bill to the Licensee for the cost of

such work, based on reasonable rates to be fixed by the Company and the Licensee shall pay the same forthwith.

5. The Licensee shall not have any claim against the Company for loss or damage by whomsoever caused to the property of the Licensee, whether due to the negligence of the Company, its employees, agents or otherwise.

6. The Licensee shall indemnify and save harmless the Company of and from all damage or injury which may be caused to or sustained by the Company's roadbed, or any part thereof, or any of the rolling stock or other property of the Company, by reason of anything done or omitted to be done whether negligently or otherwise or in any manner based upon or arising out of or connected with this License and the Licensee shall indemnify and save harmless the Company from all claims, demands, actions, suits or other proceedings by whomsoever made, brought or prosecuted in any manner based upon, arising out of, or connected with this License, or anything done or left undone or maintained in any manner hereunder and notwithstanding that the same may be caused by or attributable to the negligence of the Company, its servants or otherwise.

7. The Licensee shall pay to the Company for the privileges hereby given the sum of one dollar ($1.00) per annum and the said rental shall be due and payable in advance on the first day of November in each year during the continuance hereof.

8. This License may be cancelled at any time upon one month's notice in writing signed by any

superintending official of the Company being given to the Licensee. Upon the expiry of the notice period the Licensee shall disconnect the pipe and remove the same from the Company's property, and upon failure of the Licensee to do so forthwith the Company may remove said pipe at the cost of the Licensee.

9. Neither this License, nor any right or interest thereunder is subject to any assignment or sub-lease without the consent in writing of the Company.

10. Should any default be made by the Licensee in the payment of any money or the performance of any work or the fulfilment of any condition due hereunder the Company may cancel this License forthwith without notice and may disconnect said pipe or remove same from the right-of-way, and may collect the cost of such disconnection or removal from the Licensee.

INDIAN OFFICE

R

DEPT. OF INDIAN AFFAIRS FEB 12 1924 ARCHITECT.

DEPT. OF INDIAN AFFAIRS FEB 11 1924 RECORDS

At Fort Fraser P.O.

February 5 19 24

Sir.-

In connection with the new water system at the Fraser Lake Indian School and facilities for fighting fire I have been in consultation with the Principal, Rev Father Coccola and we decided it was very desirable that at least two and preferably three hydrants should be installed on the outside of the building.

I am advised by Mr Skelton, the foreman in charge of the present work, that these could be very easily installed at the inspection joints already provided in the pipe line.

I may state that the boilers are fired with wood largely, and there has to be a large supply kept on hand and there is more or less danger of fire during the hot summer days from this source. Even a fire within the building might be more conveniently fought from the outside.

I would therefore urge the Department to favourably consider this suggestion and have instructions given to enable the hydrants to be installed.

I have the honour to be, Sir,

Your obedient servant

W. J. W. Allan

Indian Agent

The Secretary
Department of Indian Affairs
Ottawa.

163-1-5

DEPARTMENT OF INDIAN AFFAIRS
FEB 11 1924
REGISTRY

INDIAN OFFICE

R

Prick P.1

At Fort Fraser P.O.

February 5 1924

Sir.-

Referring again to your letter of Sept 19/23 No 163/1/5/ I beg to report further progress in connection with the installation of the new water system at the Fraser Lake Indian School as follows;-

The concrete slab has been laid in the pump house the pumps installed and water was delivered at the school on the 20th of January. Work is now proceeding on the storage tank,the heavy framed timber support above concrete foundation is all completed and the outside housing of the tank is well under way. When the housing is completed the tank timbers(all on the ground) will be assembled and the connection made with the pipe line which is all completed to the tank site.

At the lake shore work is proceeding to connect the lake water with the seepage bed and reservoir. This has been the most difficult undertaking of the whole system but with the lake at its very lowest point success is now assured. The foreman advises me that he expects to have the iron pipe rolled into position within two weeks when an abundant supply of water will be available at any season of the year.

Trusting you will consider this progress satisfactory

I have the honour to be, Sir,

Your obedient servant

W. J. W. Allen.

R

Sir:-

I beg to acknowledge receipt of your letter of January 21st. No. 163-1-5 and in respect to certain Vouchers sent in for payment in connection with the water system being put in at the Fraser Lake Industrial School by R. Moncrieff , Contractor. I beg to submit herewith all the receipted accounts for Voucher No. 1026 submitted on December 15th. which I trust are satisfactory.

I am submitting also another Voucher No. 1056 with accounts all receipted. The Voucher mentioned in your letter, No. 1039 and amounting to $3335-22, receipted accts. will be sent forward in a few days as I have one account which I have not yet got a receipt for. As soon as this is received it will be forwarded on . However I am of the opinion that it will be perfectly satisfactory and perfectly in order to forward a cheque to Mr. Moncrieff covering this Voucher as I can assure you that everything is in order.

I have the honour to be, Sir,

DRUGS—(Continued)

8 oz. Carbolated Vaseline.
1 qt. Picric Acid Solution.
100 tab. Recognized Antiseptic, for washing wounds, e.g., Bi-chloride of Mercury.
100 tab. Eusol (Dakin's Sol.), powder or tablet form.
16 oz. Burn Dressing, e.g., Bicarbonate of Soda, mixed with Vaseline (3%).

The above must be in bottles or containers, plainly labelled, and the specific purpose for which the contents are to be used marked thereon.

DRESSINGS

1 lb. package Absorbent Cotton.
5 yds. Sterile Gauze.
2 doz. Sterile Gauze Bandages, assorted sizes.
1 doz. Cotton Bandages, assorted sizes.
2 doz. Triangular Bandages.
1 spool 2½-in. Adhesive Plaster, 5-yd. length.
1 spool 1-in. Adhesive Plaster, 3-yd. length.
½ doz. Splints, assorted sizes.

(4) Every employer employing fifteen or more workmen in a place of employment situate more than five miles from the office of a medical practitioner, shall at all times maintain in or about such place of employment one person possessing a certificate of competency to render First Aid to the injured.

(5) Every employer operating a railway, logging railway or tramway shall provide and maintain at the place of employment of each gang of less than ten men the following First Aid supplies:—

1 pair Small Scissors.
1 (1oz.) bottle Tincture Iodine.
2 (1 oz.) packages Absorbent Cotton.
2 (1 yd.) packages Sterile Gauze.
6 Bandages—two 1-inch, two 2-inch, two 3-inch.
1 spool, 1 inch by 3 yards, Adhesive Plaster.
1 tube Borated Vaseline.
1 (2 oz.) bottle of Boracic Tablets.
2 Eye Droppers.

(6) Every employer employing 50 or more workmen at a place of employment more than five miles from a hospital, shall provide a First Aid room and equipment as specified in Paragraph 3 hereof.

(7) Every employer shall provide proper attention and immediate transportation to a hospital where the necessary treatment is available, in all cases where injured workmen are in need of hospital treatment.

(8) The foregoing requirements shall be supplied at the expense of the employer.

(9) A minimum First Aid kit as above described or First Aid equipment satisfactory to the Board, shall accompany the crew in charge of every railway train, and every vessel.

(10) The Board may direct or approve of any addition to, or reduction or variation in the First Aid service or appliances above prescribed, or may in any case not above provided for, prescribe such First Aid service and appliances as it deems warranted.

FIRST AID SERVICE REGULATIONS

Pursuant to the "Workmen's Compensation Act," the Workmen's Compensation Board hereby makes the following First Aid requirements, the same to take effect on and after the 18th day of September, 1922.

(1) Every employer having more than [illegible] and less than fifty workmen, shall provide and maintain at the place of employment, or at each place of employment if he has more than one, a First Aid kit or box containing the following supplies, with such additional quantities as may be reasonably necessary to provide First Aid to injured workmen, and same shall be available during all working hours, without cost to them. The said kit or box shall be in charge of some suitable person.

MINIMUM FIRST AID KIT

A Standard First Aid Manual.

INSTRUMENTS

1 pair Scissors.
1 pair fine Tweezers.
2 Eye Droppers.
1 Camel's Hair Brush.
1 White Enamel Wash Basin.

DRUGS

2 oz. 4% Boracic Acid, for eye wash.
1 (2 oz.) Bottle of Boracic Tablets.
2 oz. Alcoholic Iodine, half strength (for external use).
1 Bottle, 100 tablets, Bi-chloride of Mercury.
1 (8 oz.) Bottle Saturated Solution Picric Acid.
1 (8 oz.) Bottle 10% Balsam-Peru in Castor Oil.

Each of the above must be in bottles or containers, plainly labelled, and the specific purpose for which the contents are to be used, marked thereon.

DRESSINGS

6 (1 oz.) packages Absorbent Cotton.
3 (1-yard) packages Plain Sterile Gauze.
12 Sterile Gauze Bandages, assorted sizes.
1 roll (1 inch 1 yard) Adhesive Plaster.
1 roll (2 inch 5 yards) Adhesive Plaster.
6 Splints (assorted sizes).
2 packages Raw Cotton (padding for splints).

(2) Every employer having more than fifty and less than one hundred workmen, shall provide and maintain at the place of employment, or in each place of employment if he has more than one, a First Aid kit or box containing the following supplies, with such additional quantities as may be reasonably necessary to provide First Aid to injured workmen, and same shall be available to workmen during all working hours, without cost to them. The said kit or box shall be in charge of some suitable person.

MEDIUM FIRST AID KIT

A Standard First Aid Manual.
1 Carrying Stretcher.

INSTRUMENTS

1 pair Scissors.
1 pair Fine Tweezers.
2 Eye Droppers.
1 Camel's Hair Brush.
2 doz. Safety Pins, assorted.
1 Tourniquet.
1 Graduated Medicine Glass.
1 Porcelain or White Enamel Wash Basin.

DRUGS

2 oz. 4% Boracic Acid, for eye wash.
2 oz. Aromatic Spirits of Ammonia.
1 (2 oz.) Bottle Boraric Tablets.

DRUGS—(Continued)

2 oz. Alcoholic Iodine, half strength (for external use).
1 tube Carbolized Vaseline.
1 (8 oz.) bottle 10% Balsam-Peru in Castor Oil.
1 bottle, 100 tablets, Bi-chloride of Mercury.
1 (8 oz.) bottle Saturated Solution Picric Acid.

Each of the above must be in bottles or containers, plainly labelled, and the specific purpose for which the contents are to be used, marked thereon.

DRESSINGS

6 (1-oz.) packages Absorbent Cotton.
3 (1-yard) packages Plain Sterile Gauze.
12 Sterile Gauze Bandages, assorted sizes.
3 Triangular Bandages.
1 roll Adhesive Plaster (1 inch by 1 yard).
1 roll Adhesive Plaster (2 inches by 5 yards).
Light board material, for splints.
6 Assorted Splints.
3 packages Raw Cotton (padding for splints).

(3) Every employer having 100 or more workmen shall at all times have available for immediate use a satisfactory vehicle, or other satisfactory means of transportation, to convey all injured workmen to the nearest hospital where the necessary treatment is available, and every such employer shall provide and maintain as convenient as possible to the place of employment, an Emergency First Aid Room, which shall be painted white and kept absolutely sanitary at all times. This room shall be in charge of a person possessing a certificate of competency to the satisfaction of the Board, to render First Aid to the injured, and shall be provided with the following equipment and supplies in such quantities as may be reasonably necessary to provide First Aid to the injured during all working hours, without cost to them.

FIRST AID ROOM EQUIPMENT

A Standard First Aid Manual.

FURNITURE

Hot and cold water.
1 Porcelain or White Enamel Wash Basin.
1 Emergency Operating Table.
1 Sterilizer.
1 Cabinet for Surgical Dressings.
1 Porcelain or White Enamel Foot Bath.
1 Enamelled Refuse Pail.
A metal box or grip fitted with emergency dressings, to be used by First Aid attendant when required to attend injured men in factory or place of employment who cannot be immediately removed to First Aid Room.
1 Couch or Bed.
1 Carrying Stretcher.

INSTRUMENTS

2 Scissors.
2 Dressing Forceps.
6 Eye Droppers.
6 Camel's Hair Brushes.
6 doz. Safety Pins, assorted.
2 Steel Probes.
1 Silver Forceps.
1 Tourniquet.
1 Graduated Medicine Glass.

DRUGS

8 oz. Boracic Acid, for eye wash (4%).
8 oz. Aromatic Spirits of Ammonia.
2 doz. Boracic Tablets.
8 oz. Alcoholic Iodine, half strength (for external use).

Ottawa, February 19th. 1924.

Dear Sir.

I have to thank you for your very kind letter of the 14th. instant expressing your appreciation of the work done by this Department in connection with the Fraser Lake industrial school. I am very pleased that the water system promises to be so satisfactory. I shall keep in mind your requirements in regard to accommodation for stock, grain products, and for the housing of farm employees.

Yours very truly,

Deputy Superintendent General.

Rev. N. Coccola,
Industrial School,
Fraser Lake, B.C.

R

Dear Mr. Scott:-

Seldom if ever has it been my good fortune to write a letter,which affords me such real pleasure,as does this occasion It is therefore with a feeling of distinction,that I choose this opportunity to convey my sentiments towards you in particular and the Department of which you are the efficient head in general.

Under your able administration you have given a large amount of thought to this Institution of which I am the local incumbent and just at present we are once again experiencing the exemplification of your untold consideration for our Indian children at Fraser lake in the way of the up-to-date water system now installed.

As you are aware work started last fall under the management of Mr. Moncrief, who substituted to one Mr. R. Skelton and I wish to say that I do not think,that the work could have been put in better hands.He Mr. Skelton was assisted by Indians with two exceptions andthe work was rushed at such a rate,that on the declining days of last month water at the great joy was pumped direct from the lake into the main building.

The equipment on the lake shore is efficient in every way while the house is most picturesque .The water filtering through a sand and gravel bed and coming from three hundred feet from water edge gives an abundant supply and is of the very best.

The tank and tower on the hill is being rushed to completion and

.....192

we confidently expect that that the water supply will be taken from it with the next few weeks.

On the completion of the work I doubt if any place in this fair Dominion can be found a water system superior to the one which your Department is now installing for this Institution.

While we are most greatfull for all that you have done and are doing I am ever mindfull, as I am certain you are, of the pressing needs of a barn and proper accomodations for the working men for the coming summer.

Last year we cut sufficiant fodder to feed 22 head of cattle and five horses, besides thrashing some 575 bushels of grain, all of which had to be placed in a stack as we had no barn room.
You will readly see how badly we need this building and in such a time as to take of the fall harvest. This year our harvest will be much larger as a greater portion of the farm will be under cultivatio, I would earnestly pray you to have the barn and employees quarters erected in proper season.

Once again asking you to accept my sincere appreciation to which I have the honor as well as the pleasure to include each and every ward beneath our roof

I am very gratefully yours

M. Coccola

Ottawa, Feb. 12, 1924.

Sir:-

Replying to your letter of the 5th instant suggesting that hydrants be installed on the grounds outside of the Fraser Lake Indian School for fire protection, I have to request that you furnish me with an estimate of the cost of having these hydrants installed.

You might also state what you consider the best means of having the work done. It will of course have to be withheld until the Spring.

Your obedient servant,

J. D. McLean.

INDIAN OFFICE

DEPT. OF INDIAN AFFAIRS
MAR 17 1924
RECORDS

At Fort Fraser, B.C.

R

March 10th. 1924.

DEPT. OF INDIAN AFFAIRS,
MAR 18 1924
ARCHITECT.

Sir:-

Referring to your letter of February 12th. No. 163-1-5 and in the matter of the application to install hydrants at the Fraser Lake Industrial School; I beg to say that I am now in a position to furnish an approximate estimate. The engineer at the school recommends three hydrants with 200 feet of 4 ply hose, two play nozzles, 4 hose wrenches, one hose reel on wheels.

The hydrants would cost about.....$85-00 each.
The hose about $1-00 per foot..
The nozzles $10-00 each...
Hose wrenches $1-00 each....
Hose reel on wheels. $52-00....
Housing for hose reel. $50-00
Freight about $10-00.
Installing hydrants etc....about $100-00.
Or a total cost of about $770-00 inclusing 10% added for emergencies.

I would be glad if the Department would give this matter their consideration. The work I might say could be done at almost any time. There is very little frost in the ground now. I would be glad to have your instructions in this matter.

I have the honour to be, Sir,
Your obedient servant,

W. J. McA. Allan.

Indian Agent.

The Secretary,
Department of Indian Affairs,
Ottawa.

163-1-5

INDIAN OFFICE

Architect

At Fort Fraser, B.C.

R February 28th. 19 24.

Sir:-

I beg to advise you of the following:- When I was up at the Industrial School the other day it was pointed out to me that the guttering on the edge of the roof of the building becomes clogged with snow and ice; the pipes running from various portions of the gutter become filled with ice and then the water overflows running down the pipes and freezing to the brick walls. There was quite a large amount of ice accumulated around each of the overflow pipes when I was there. I called Mr. Skelton in consultation in the matter and we came to the conclusion that if this condition was allowed to occur that in another year or two the portions of the brick walls would become very much deteriorated and it was decided to recommend to the Department that the whole of the guttering around the roof and overflow pipes be entirely removed. Perhaps the architects of the Department might know of some better solutuon of the trouble and if so it should be applied before another winter comes or the wall will certainly be injured. Discolouration is now in evidence where the ice thaws and breaks away. I would be glad if the Department would take this matter into consideration and issue instructions to remove the trouble before another winter.

I have the honour to be, Sir,
Your obedient servant,

W.J.W. Allan.

Indian Agent.

The Secretary,
Department of Indian Affairs,
Ottawa.

Sir:-

I am in receipt of a number of accounts sent by you at the beginning of this month, for work and materials supplied in connection with the new water system at the Fraser Lake Industrial School.

As these accounts were not accompanied by any correspondence or statement, I am returning them to you for certification. Be good enough to forward them with a detailed statement to Mr. McAllan, Indian Agent at Fort Fraser, B.C., who should be requested to return them to me as early as possible with the proper certified vouchers, as was previously done with similar accounts which were submitted last month.

Your obedient servant,

DEPARTMENTAL ENGINEER.

163-1-5

Ottawa, April 8, 1924.

Sir:

In reply to your letter of the 10th instant advising me of the necessity of installing three fire hydrants outside the Fraser Lake Industrial School, together with 200 feet of fire hose with nozzles, reels, and other required accessories, at an approximate cost of $800.00, I beg to say that you are authorized to purchase the above mentioned articles on a competitive price basis, and arrange for the installing of the hydrants where already provided for on the water mains outside the building.

It is understood that the merchants who are to be invited to furnish quotations should be supplied with uniform specifications of the various articles to be ordered.

Your obedient servant,

J. D. McLean.
Assistant Deputy & Secretary.

W. J. McAllan, Esq.,
Indian Agent,
Fort Fraser,
B.C.

163-1-5

DEPARTMENT OF INDIAN AFFAIRS

CANADA

Ottawa, March 21, 1924.

Memorandum: Mr. Scott.

The Department was advised by Indian Agent McAllan of Fort Fraser, that it is very desirable that the Fraser Lake Industrial School be provided with reliable fire protection.

After consulting with the Principal of the School it was considered that the installation of three water hydrants with 200' of hose would be sufficient to provide adequate protection against fire. The cost of this apparatus and its installation would amount to approximately $800. The apparatus would be installed on the outside of the building, and, in case of fire, would be very useful as fire is sometimes more conveniently fought from the outside of the building than the inside.

Providing funds are available I beg to recommend that this request be given favourable consideration.

DEPARTMENTAL ENGINEER.

Mr. Scott.

You have asked me to prepare a memo to the Minister requesting authorization for the above mentioned expenditure. Before I do this I beg to advise you that the necessary authority has already been obtained on the 10th of September last, for the complete installation of a water supply system, including an adequate fire protection system, at an estimated cost of $10,000 which amount would also provide for the installation of three hydrants referred to in my memorandum.

R

Sir:- I beg to acknowledge receipt of your letter of March 13th. No. 163-1-5 and in the matter of removing the eaves troughs from the Industrial School at Fraser Lake. I had a conversation over the phone with the Principal and he says that he is not able to undertake the work as there will be some high scaffolding to do and he has not men available to do the work. I would suggest that Mr. Skelton who is presently working on the water system be requested to undertake the work as he was Foreman when the school was erected and is thoroughly acquainted with the character of the work and would take all necessary precautions to remove the eaves troughs without accident and without damage to the building. I would be glad of your further instructions in the matter.

I have the honour to be, Sir,
Your obedient servant,

W. J. McAllan.

R

Sir:-

Attached please find progress accounts amounting to $1344-62 in favour of R. Moncrieff in connection with the installation of the new water system at the Fraser Lake Industrial School.

In connection with this work I may say that the whole system is now almost completed. I think an additional $500-00 or $600-00 should complete the whole work.

In connection with the account for drain tiles and cement tiles in the Gayer & Connelly account for $69-90 I may say that they were used in the seepage bed connecting the pipe in the lake to the reservoir. I think that possibly that is the only item that needs special explanation.

I have the honour to be, Sir,
Your obedient servant,

DEPT OF INDIAN AFFAIRS
MAY 23 1924
RECORDS

R

Sir.-

Referring to the second last paragraph in your letter of the 7th inst No 163/1/5 requirements of barn would be accommodation for 24head of cattle and six horses.A harness room and feed room for the horse stable. A silo of about 75 tons capacity. Loft to be as roomy as possible for hay and grain crop storage and fitted with hay fork and traveller. If possible a large cellar or basement should be provided beneath the main floor to store roots for cattle feed. Present water system should be connected up with barn- nearest joint about 700 ft distant.- 2 inch galvanized pipe would do.

Site chosen is fairly level but slope for good drainage near by.

Attached are plans of a cattle barn which give a general idea of the class of building required but they would have to be modified to suit the requirements of both cattle and horses,I trust the Department can have this done. The ground measurements of the building would be roughly 35ft by 75 ft.

Trusting I have given sufficient information for your purposes.

I have the honour to be,Sir,

Your obedient serva nt

W.J.W.Allan.

163-1-5

Architect

Indian Office Ft Fraser P.O.

May 16 1924

Sir.-

Answering your letter of the 7th inst No 163/1/5 I beg to state that I have just returned from a consultation with the Rev Father Coccola, Principal of the Fraser Lake Residential School, in which the various matters mentioned in your letter were discussed.

With reference to the plumbing fixtures, also cupboards tables etc it is the Principals desire that these installations should have priority over the erection of a combined carpenter and blacksmith shop and I so recommend, but the erection of the latter should not long be delayed as the Indian parents are demanding more mechanical and technical instruction for the boys and in my opinion they are right,

Re the erection of a barn-the purchase of the various materials and supervision could be jointly undertaken by the Principal and myself provided we could engage the services of a competent and reliable foreman. In this connection I have spoken to Mr Rupert Skelton who has just completed the new water system under Mr Moncrieff. He is waiting for a few days to install the hydrants and outside fire protection system authorised by Department but this work will only keep him a very short time. If the Dept. could wire me to start preliminary work I could retain him- for instance, it would be necessary to connect the present water system with the barn for which nearly 700ft of 2 inch galvanized pipe sunk 5 ft in the ground would be necessary. Perhaps foundation work could be started while plans for superstructure were being prepared. Kindly wire me in this matter as competent men are difficult to get and being absent so much from the work I would not care to be responsible for its proper fulfillment unless I had confidence in the man in charge. With an efficient foreman the work could be satisfactorily handled on a day labour basis.

Barn items are made the subject of a separate letter ~~herewith attached~~. accompanying plans sent under separate cover.

I have the honour to be Sir.-

Your obedient servant

W. J. W. Allan.

Sir,—

Mr R. Moncrieff has forwarded to me the enclosed accounts accompanied by a copy of your letter to him of April 18th. No. 163-1-5C. I may say that these accounts are all represented in Voucher No. 1026 submitted under date of Dec. 15th. 1923. (See letter accompanying same of that date), when asking for a progress payment for Mr. Moncrieff. The accounts themselves were sent in from this office under date of February 4th. to be attadhed to Voucher No. 1026 and were mentioned in the first part of the letter accompanying Voucher No. 1056 in favour of R. Moncrieff, also dated Feb. 4th. I realize that these should have been the subject of a special letter. They are herewith re-submitted as a duplication of Voucher No. 1026. I trust these accounts are now all in order.

I have the honour to be, Sir,
Your obedient servant,

W.J.McAllan.

Indian Agent.

The Secretary,
Department of Indian Affaits,
Ottawa,

ACCOUNTANTS BRANCH
MAY 10 1924

P.S.

It is evident the Department has retained the duplicates of these accounts at Ottawa.

ACCOUNTANTS BRANCH JUN 30 1924

Ottawa, June 28, 1924.

DEPT. OF ... JUL ... ARCHITECT.

Sir:-

With reference to the barn required for the Fraser Lake School, I beg to advise you that plans and specifications are being prepared and tenders will be invited.

I would ask you to please advise me if there are contractors at Fort Fraser, who would submit a tender for this barn. I would also be glad to have your recommendation as to where advertisements should be placed when inviting tenders.

Your obedient servant,

J. D. McLean.
Asst. Deputy & Secretary.

W.J. McAllan, Esq.,
Indian Agent,
Fort Fraser, B.C.

INDIAN AGENT'S OFFICE

DEPT OF INDIAN AFFAIRS
JUN 18 1924
RECEIVED

IN YOUR REPLY REFER TO
No. .....
ALSO
TO DATE OF THIS LETTER

Fort Fraser, B.C.

June 12th. 1924. 19

R

Sir,—

Referring to your letter of March 11th. 1924, No. 163-1-5, granting authority to purchase certain building material for an ice house and wood shed at the Fraser Lake Industrial School. I beg to state that when the authority was received the Principal had already commenced work and had purchased considerable material, as it was necessary to have the building ready to receive the ice before the thaw took place. I therefore decided to allow the Principal to purchase the rest of the material required for the building. Some I think had been paid for and it was decided that the best plan would be to allow him to pay for the whole thing and send in accounts covering the $800-00 allowed by the Department for material for the building. The whole cost of the material amounted to much over $1000-00. The whole cost of the building including labour is well over $2000-00.

One of the accounts submitted contains an item for interest. Evidently Father Coccolo had not paid the bill within the time limit. I am instructed by the Principal to say that if it is contrary to the practice of the Department to pay interest on an overdue account he is quite willing that the Department should deduct this item, of interest from the account. Trusting the Department will favourably consider this account even although the instructions in your letter were not; for reasons already stated carried out,

I have the honour to be, Sir,
Your obedient servant,

P.S. Attached also please find a letter in connection from the Rev. Principal, W.J.McA.

W.J.McAllan.
Indian Agent.

The Secretary,
Department of Indian Affairs,
Ottawa.

INDUSTRIAL SCHOOL

Fraser Lake. -:- B. C.

L. J. C. et M. I.

May 16th. 1924 192

W.J.McAllan Indian Agent,
Fort Fraser .B.C.

Re Ice or Meat house,Wood shed combined with an Upstairs.

Dear Sir:-

The building marginally quoted for which the Department allowed an expenditure of $800.00 for the material is touching to completion.

The construction 20 x 52 stands on cement post four feet in the ground that is below frost,beautifully painted and entirely in harmony with other buildings.

The total cost of the building is estimated at $2200.00.

The Meat house 20 x 22 has three ply of lumber with space of 6 inches and tarred paper between.The Ice room is lined with galvanized iron on each side of the ice space of 30 tons capacity.

The Meat room is 8 x 10 with walls 9 feet high with a ventilator in the ceiling,the doors are air thight and we hope that the difficulty we had in past Summers to keep meat for days is over.

The Wood shed is 20 x 30 with an Upstairs which could be used for carpenter shop or for bed room for the employees during the Summer months,to that purpose we put in it a brick chimney.The steps leading to the entrance of the said Upstairs are on the outside.

I had to employ a skilful mechanic besides the foreman and the boys to assure complete satisfaction to the Department and myself.

Enclosed find bills for materials of the construction.

Amount $800.18.

Stuart Lake Indian Agency MAY 24 1924 B. C.

Yours Sincerely,
N. Coccola
L.N.Coccola O.M.I.
Principal.

Sir,—

Referring to Voucher No. 1178 dated July 7th. amounting to $198-00 in favour of Rupert Skelton, Metchosin, P.O., B.C. and being his own salary and wages paid in the installing of the hydrants at the Fraser Lake Residential School. I might say that Mr. Skelton has already paid the wages of E.D.Vinnedge and therefore the full amount of the cheque for $198-00 should be sent to Mr. Skelton.

I have the honour to be, Sir,
Your obedient servant,

W.J.McAllan.

ACCOUNTANTS

Sir,—

I beg to acknowledge receipt of your letter of June 28th. No. 163-1-5 and in reply that plans and specifications for the barn at the Fraser Lake Indian Residential School and being prepared.

Regarding probable tenderers for the work in this district I might mention the names of T.P.Smithers of Vanderhoof and N.D. Sjolander of Fort Fraser. The tenders should be advertised at Prince George, Prince Rupert and Vancouver. I think that that would cover the situation thoroughly.

I have the honour to be, Sir ,
Your obedient servant,

W.J.W. Allan.

Indian Agent.

July 10 1924

Sir,—

In explanation of Voucher No 1185 in favour of Rupert Skelton amounting to $27.00 and herewith attached I beg to say that some days after the system was completed and the elevated tank filled to its capacity, water was observed showing on the surface of the pipe line midway between the reservoir and the tank. I instructed Mr Skelton to have the pipe uncovered for inspection at the point when it was discovered that there was a gum seam flaw in the pipe which had blown out. The flaw was very small and entirely local and was repaired by caulking and the application of a rubber patch, the whole secured by a regular wood stave three hoop clamp. The repair was thoroughly tested before the excavation was filled.

I have the honour to be, Sir,

Your obedient servant

W. J. Wallace.

L. J. C. et M. I. LEJAC :P.O. B.C. JULY12-1924 192

Dear Sir-

Letters from your Department have in every case lead me to believe that the barn would be started in late spring or early summer. It is now the mid-July and nothing is done as yet.

I need not to draw your attention to the imperative necessity of this building, the absence of which greatly impeds the development of this Institution .

The majority of our children are young and milk is a daily necessity for them but how to supply them with it when we have accommodation for only six cows, the rest of the stock having to winter outside for the seven months of cold weather in this northern climate.

Owing to early frosts cement work should be completed by mid-September to insure good and lasting work.

Pardon me for bringing your attention to this urgent subject.

Your obedient

servant

H. Coccola

Sir,—

I beg to advise you that it will be necessary before cold weather comes on to install two stoves of heating purposes at the school; one in the pump house and one in the tank above the school.

The pump house stove I estimate to cost about $20-00. The one in the tank would nee d to be a large one and I have quotations from Marshall Wells for a suitable stove to cost $60-00. These two stoves with stove pipes would cost in the neighborhood of $90-00.

I would like your authority to make these purchases and to have the stoves installed.

I have the honour to be, Sir,

Sir,—

I beg to enclose herewith Voucher No. 1210 for $1400-60 in favour of R. Moncrieff, Contractor, being 10% on the total progress payments in connection with the new water system at the Fraser Lake Indian Residential School.

The Department was furnished with reports from time to time as to the progress of this work. I may say that it is giving entire satisfaction. All the material used was of a very substantial nature. The pumping plant is well able to handle everything that will be required of it in any emergency. I therefore have pleasure in recommending that the 10% payment be now made to the Contractor, Mr. Moncrieff.

I have the honour to be, Sir,

DEPARTMENT OF INDIAN AFFAIRS

CANADA

Ottawa, Aug. 29,
1 9 2 4.

MEMORANDUM:

Mr. Scott.

Plans and specifications have been prepared and tenders invited for the barns required for the new Fraser Lake Indian Res. School.

The tenders closed at noon yesterday, and the following have been received.

Brown & Robb, Burns Lake, B.C. $9,500.

E. C. LaTrace, Prince Rupert, BC $5,250.

A.P. Anderson, Prince Rupert, BC $4,976.

All of the above firms have submitted with their tender the required deposit security.

As the tender of A. P. Anderson is the lowest and a fair and reasonable price for the work, I beg to recommend that it be accepted.

ARCHITECT.

163-1-5C

Ottawa, September 4, 1924.

His Excellency

The Governor General in Council.

The undersigned begs to report that, it having been decided to erect a barn for the Fraser Lake Indian Residential School in the province of British Columbia, tenders were called for, receivable up to noon of the 28th day of August, 1924, and the following were received,-

Brown & Robb, Burns Lake, B.C.	$9,500.00
E. C. LaTrace, Prince Rupert, B.C.	5,250.00
A.P. Anderson, Prince Rupert, B.C.	4,976.00

The undersigned would recommend, pursuant to the requirements of Sub-section 2 of Section 36 of the Public Works Act, that the contract be awarded to the lowest tenderer, Mr. A.P.Anderson, for the amount of his tender as above cited, namely, $4,976.00, the same being reported by the Architect of the Department as a fair and reasonable price for the work, funds for this purpose being available from Parliamentary appropriation.

TENDERS WANTED

SEALED TENDERS addressed to the undersigned and endorsed on the envelope, "Tenders for Combined Cow and Horse Stable for Fraser Lake Indian Residential School, B.C.," will be received up to noon of the 28th day of August, 1924, for the erection of the above mentioned building.

Plans and specifications may be seen at the Post Offices at Prince Rupert and Prince George, at the Offices of the Indian Agent at Ft. Fraser, and the Principal of the Indian Residential School at Fraser Lake and at the Department of Indian Affairs, Ottawa.

Each tender must be accompanied by an accepted cheque on a chartered bank of Canada, for ten per cent of the amount of the tender, payable to the order of the undersigned, (War Bonds of the Dominion or Canadian National Railway Bonds will also be accepted as security, or Bonds and Cheque if required to make up an odd amount) which amount will be forfeited if the person or persons tendering decline to enter into a contract when called upon to do so, or fail to complete the work contracted for.

The lowest or any tender not necessarily accepted.

Sir,—

I beg to acknowledge receipt of your letter of September 17th. No. 163-1-5 confirming your wire of the 11th. instant regarding the acceptance of Mr. A.P.Anderson's tender for the building of the barn at the Fraser Lake Indian Residential School and asking me to co operate with the Rev. Principal in inspecting the construction of this work and to issue certificates of payment etc. This I will endeavour to do to the best of my ability.

I may say that the Rev. Principal is at present at Vancouver undergoing an operation but I have had a letter from him saying that he is recovering and hopes soon to be back again.

Sent Oct 4th JPV

Referring to the last paragraph of your letter in which it is stated that certificate forms are being sent under separate cover ; I beg to say that these have not been received but probably they will come along in the next mail. Kindly make enquiries and if they have not been sent have this matter attended to.

Ottawa, October 7th, 1924.

Sir:

I have your letter of the 29th ultimo, regarding the installation of two stoves at the Fraser Lake Indian Residential School; one in the pump house and one in the tank above the school.

In reply I beg to say it is regretted that your letter of the 21st of August, last, regarding this matter was inadvertently overlooked. If you consider it is essential that these stoves be installed, you may arrange for the purchase and delivery of the same and also for any stove pipe that may be required. They should be installed with a view to a minimum amount of fire risk. If possible, competitive prices should be obtained and the stoves purchased from the firm quoting the lowest price. Properly certified vouchers, in duplicate, should be forwarded covering the expenditure incurred.

Your obedient servant,

J. D. McLean,
Asst. Deputy and Secretary.

INDIAN AFFAIRS: R

The Board had under consideration the following report from the Honourable the Superintendent General of Indian Affairs:

copied

> The undersigned begs to report that, it having been decided to erect a barn for the Fraser Lake Indian Residential School in the province of British Columbia, tenders were called for, receivable up to noon of the 28th day of August, 1924, and the following were received,-
>
> | | |
> |---|---|
> | Brown & Robb, Burns Lake, B.C. | $9,500 |
> | E. C. LaTrace, Prince Rupert, B.C. | 5,250 |
> | A. P. Anderson, Prince Rupert, B.C. | 4,976 |
>
> The undersigned would recommend, pursuant to the requirements of Sub-section 2 of Section 36 of the Public Works Act, that the contract be awarded to the lowest tenderer, Mr. A. P. Anderson, for the amount of his tender as above cited, namely, $4,976.00 the same being reported by the Architect of the Department as a fair and reasonable price for the work, funds for this purpose being available from Parliamentary appropriation.

The Board concur in the above report and recommendation, and submit the same for favourable consideration.

G. E. Kazor
Asst Clerk of the Privy Council.

TO DATE OF THIS LETTER

R

Sir,—

Referring to your letter of Sept 17 No 163-1-5 in connection with the erection of a barn at the Fraser Lake Residential School it would appear to me from the plans that provision has not been made for the draining and flushing of the gutters in either the horse or cattle stalls. The ever accumulating liquids should have a ready getaway at all times, flushing with water is necessary also once a day.

It would not be advisable to have the liquids running out at any or either end of the building where main doors are.

The building stands east and west with cattle stalls east. Ground declines north about one foot in sixteen. I suggest four inch tile drain between cattle and horse gutters, connected up with both and continued under north side footing and beyond for about 70 feet. Subsoil is very hard clay. I have had no time or opportunity to make enquiries as to cost of tiles but think job can be done efficiently for between one hundred and one hundred and fifty dollars. Kindly wire instructions.

I have the honour to be, Sir,
Your obedient servant

W. J. W. Allan.

R.

Sir,—

Referring to your letter of May 7th. #163-1-5 and the last paragraph thereof dealing with my letter of the 28th. of April, and an application to have the eaves troughing removed from the new School building as the overflow pipes were accumulating vast quantities of ice during the winter and endangering the walls of the building. I beg to say that the carpenters are now at work at the school barn and would do what removing is to be done on a bases of current wages for time occupied. The Contractor, Mr. Anderson suggests that instead of removing the whole troughing that the pipes or conduits where they connect with the eaving should only be removed and the apertures plugged with wood or other substance. This would distribute the water and the same end would be attained as if all the troughing was removed. I suggest his plan should be adopted as it will be I think fully as effective as my original suggestion and will entail infinitely less expenditure. Kindly advise by return mail if I may undertake this work.

I have the honour to be, Sir,
Your obedient servant,

W. J. W. Allan.

Sir,—

Referring to your letter of September 17th. No. 163-1-5, in which the Rev/ Principal at the School and myself are asked to be inspectors of the construction on the barn now building . I beg to say that the Rev. Father Coccolo is at present convalesceing at Vancouver and I have asked the Assistant Principal to undertake the duties of inspector along with myself and issue certificates of payment on the work. I be therefore to enclose certificate No. (1), dated Oct. 15th. asking for a payment of $2000-00. 1 in duplicate

I might say that the work is going on well. The most of the material is on the ground, the foundation all in and studding erected for the whole building and part of the rafters in place. I therefore trust that the Department will forward the amount asked for to the Contractor at Prince George, B. C.

I have the honour to be, Sir,

INDUSTRIAL SCHOOL

Fraser Lake. -:- B. C.

L. J. C. et M. I.

October 9th. 1924 192

Rev. Father Plamondon,

Sir

I have inspected the Septic Tank, and find it in first class condition, but an improvement can be made at the end of the Outlet Pipe.

Following is a description in detail.

The first Tank contains 6 ft of water covered with about 3 inches of seam, which is in a state of fermentation, there is about 3 inches of soft sediment at the bottom.

The second portion of the Tank carries 3 ft 4 in. of water, and is free of seam and sediment, the water level is the same in both sections of the Tank, but the depth of the tanks is not equal. The water leaves the outlet pipe at the same rate at which the water enters the Tank and the height of water does not vary.

The Tank is placed at the top of a bank, being well protected from frost. The Outlet Pipe empties about 20 feet below the Tank the end being placed in a bed of natural gravel. Rocks were laid at the end of the pipe and this allows some water to come to the surface where it runs on top about 10 feet before soaking in the ground again, this allow a bad smell to pass off. The greater portion of the water soaks through the gravel to a lower level, this water is perfectly filtered and free from smell.

I would suggest that three short trenches should be dug in the gravel and filled in loose, taking the form of a broad arrow. The gravel at the end of the pipe should be covered with a layer of clay tamped down to prevent the water coming to the surface. Clay for this purpose is available within a few yards of the job. Should this method befollowed the water would be filtered and should be perfectly free from smell.

The natural lay of the ground with a deep layer of gravel gives an opportunity to make a first class filter bed at a very low cost, and makes it possible to dispose of sewerage water for a number of years with an entire absence of smell.

I would suggest that this information be forwarded to the Dept. of Indian Affairs.

(Signed) Yours respectfully,

H. Allen

Engineer.

Recommended Cost of Sept. Tank

RE-Sewerage and Septic Tank.

Sir:-

Referring to your letter of September 5th.Re-reconstruction of Sewage disposal system on account of the lack of proper supervision, I am pleased to advise you that the School Sewerage and Septic Tank have been examined and inspected by our engineer and found to be in first class condition.

There is no man hole on the Sewer line but the distance is short from one Tank to the other.

I enclose a copy of his report and suggestion for improvement at the Outlet Pipe.

MISCUES BY THE JUDGES
MAKE ILLEGAL LIQUOR
SELLING SAFE VENTURE

Marcel Viennet, the man who was convicted by Police Magistrate Shaw, of Vancouver, and sentenced to six months for illegal liquor selling, has regained his liberty. Following his conviction the case came before two supreme court judges without result, but in the end Chief Justice Hunter found something wrong with the court proceedings and the prisoner was given his liberty. In liquor cases it is becoming less important each day whether the accused is guilty of the offense charged, and whether he goes to jail or retains his liberty turns more on the ability of the judicial machinery to function.

DEPT. OF INDIAN AFFAIRS
DEC 9 1924
RECORDS

IN YOUR REPLY REFER TO
No. S-2.
ALSO
TO DATE OF THIS LETTER

Fort Fraser, B.C.

December 2nd. 1924.

R

Sir,

I beg to enclose herewith in duplicate certificate No. 2. in connection with Mr. A.P.Anderson's contract to build the cow and horse barn at the Fraser Lake Residential School. I beg to say that the building is now completed and ready for occupation. The carpenters have all left. Unfortunately the snow came on quicker then we anticipated and it was quite impossible for the Contractor to complete the painting of the roof but that is the only uncompleted portion of the work. This they will do in the spring.

This present certificate calls for $2600-00. This will make a total of $4400-00 paid the Contractor , leaving $576-00 to pay for the painting of the roof of the barn, besides which I suppose the Department will hold the deposit of the Contractor. The labour and material required to complete the contract; that is the painting of the roof would be $160-00. I have therefore to recommend that the payment of $2600-00 be made to Mr. Anderson,.

I have the honour to be, Sir,
Your obedient servant,

W.J.McAllan

Indian Agent.

Ottawa, June 4, 1925.

Sir,-

Replying to your letter of the 21st ultimo regarding the repairs required to the Boiler room roof, I beg to say that the Department approves of this work being done. It is noted that the cost will not exceed $250.

You may also proceed with the building of the carpenter's and blacksmith's shop, as outlined in your letter of the 18th ultimo. It is noted in the Principal's letter that the cost will be $1,200. With reference to the Principal's request that quarters for the employees be provided above the shops, I may say that I am prepared to authorize this extra accommodation, providing the entire building can be erected at a cost not to exceed $1,400.

I am returning herewith the sketches which were forwarded to the Department.

DEPARTMENT OF INDIAN AFFAIRS

CANADA

Ottawa, May 30, 1925.

MEMORANDUM: O K DLS

Mr. Scott.

A letter has been received from the Indian Agent at Fort Fraser, advising that the ice falling on the roof of the boiler room Fraser Lake School has caused considerable damage, and recommends that this portion of the roof be rebuilt with heavier material, also that the eave troughing requires some repairs. He estimates the cost to be approximately $250.00.

I beg to recommend for your consideration that this work be authorized.

Sir,—

COPY

Industrial School,

Lejac, B.C.

May 18th. 1925.

Mr. W.J.McAllan,
Indian Agent,
Fort Fraser, B.C.

Dear Sir:-

After the conversation with regard to the roof over the boiler room broken in by the ice falling from the roof of the main building, I had a carpenter to look at it who said, after inspection, "that the roof was too flat", and "having only a 2"X 4" rafters 18feet long and covered with rubberoid could not stand pressure. "

I asked him what could be done to repaid and consolidate it.

He answered that the only way for a cheap job would be to raise the roof to its level then new rafters 2"X 6", and galvanized roofing should replace the rubberoid and if that is not done at once the old roof will collapse on the pipes and cause much damage.

Shall I bring to your attention the condition of the eave troughs which keep the ice on the edge of the roof and forced the water back between the walls of the central building and the wings so much so that the water damaged the rooms on the first floor.

The eave trough have to be removed before the cracking of the walls will take place.

Yours very truly,
N. Coccolo,
Principal.

May 4, 1925.

Memorandum:

Dr. Scott.

There is no water in the barn at the Fraser Lake Indian Residential School and the stock must cross fields under cultivation to secure a drink. A proper water supply was provided two years ago for this school, but the barn has never been connected up. I wish to recommend that water be placed in the barn, on a day labour basis, under the supervision of the Indian agent. The cost is estimated at $700.

Supt. of Indian Education.

RECORDS

INDIAN AFFAIRS BRANCH
APR 20 1925
REGISTRY

Sir,—

I have received a letter from Rev. Father [illegible] Principal of the Fraser Lake Residential School which I [illegible] in full as follows:-

Re Water To Barn:-

"Having reference to the marginal noted I take this occasion to once again place before you for your consideration the matter of "water in the stable. The necessity of having water in the barn is "most evident as the show is now leaving and the stock must cross "fields on their way to water which are hay lands and I am certain "that you will readily perceive the destruction they are doing,which "could be avoided by bringing the water into the barn. Undoubtly it "is the intention of the Department to do this at some time, if so, "why not at once, which would mean considerable less destruction and "a large amount of unnecessary work.

"To this end I am making the liberty to attach an estimate of "cost of labour and material and would add that I am in a position "to superintend this work if the Department so desires.

"I would suggest that a two inch pipe be run from the water "mill to a point some thirty feet from the barn,at said point, place "a hydrant for fire protection, then reduce to one inch to a point "six feet inside the barn underground, then carry a pipe to ceiling "thence to water troughs, one for the cown and one for the horses. "Pipe so arranged to drain as to prevent freezing. A one inch branch "pipe could be taken from the two inch pipe to supply the engineer's "cottage and other buildings which may be erected in the future.

"Trusting that you will bring this matter to the attention of the Department at once,"I am,

Yours truly,
N. Coccolo,
Principal.

I would strongly recommend that the Department undertake this work as it is really very necessary if the hay lands are to be protected.

I have the honour to be, Sir,
Your obedient servant,

W F Manson
Indian Agent.

The Secretary,
Department of Indian Affairs,
Ottawa.

INDIAN OFFICE

R

DEPT. OF INDIAN AFFAIRS
FEB 24 1925

At Fort Fraser, B.C.

February 16th. 19 25.

Our File No. S-2.

Sir:-

I beg to advise you that yesterday when I was up at the school Father Coccolo drew my attention to the fact that a chicken house was badly needed at the school. A lumber building 16' X 50' would give accomodation for about 300 hens and would not cost a great deal of money. I would be glad if the Department could put in their estimates an amount to cover this matter. However I wish to advise the Department that the Blacksmith Shop and the Carpenter Shop is the first improvement that I want to see erected at the school. But if the Department can see their way clear to put in the estimates a sufficient amount to cover the erection of a chicken house I would be pleased. Kindly give this matter your consideration.

I have the honour to be, Sir,
Your obedient servant,

W.J.McAllan.

Indian Agent.

Sir:-

In Explanation of Voucher No. 1332 for 360-61 in favour of the Canadian National Railways, C/O, The Treasurer at Winnipeg , Man.I beg to say that this is the rental for the current year of the siding at the Indian School at Fraser Lake. This siding is necessary for the receiving of supplies etc. to the school. The railway people have also supplied a small station house there for the convenience of the children and staff coming and going to and from the school. Payment last year for the rental was requisitioned by Voucher No. 1119 dated May 2nd. 1924.

June 2nd 1925

Our File No. 8-5.

Sir:-

Referring again to your letter of May 9th. No. 163-1-5 regarding the extension of the water system to the barn at the Fraser Lake Indian Residential School, I may say that the Principal is now ready to start work. The money to pay for the materials and labour granted by the Department ; namely $700-00 I would respectfully ask you to forward to the Bank of Commerce , Vanderhoof, B.C. to special account of W.F.Manson, Acting Indian Agent, as workmen anyway need to be paid immediately they earn their wages. I may say the Principal is calling for tenders for ~~XXX~~ all material required , also for digging the tranch and I am forwarding him from this office weekly return of labour forms for all labour required. A proper accounting of the $700-00 will be made. All accounts for material and labour will be rendered in duplicate to your office and any unexpended balance returned. Trusting this method will be satisfactory. Please advise me when money is deposited.

I have the honour to be, Sir,
Your obedient servant,

Agreement made in duplicate the tenth day of

September, 1924, A. D.

Between His Majesty King George the Fifth, represented by the Superintendent General of Indian Affairs of Canada (hereinafter called the Superintendent General);

And A. P. Anderson,

of Prince George, B. C. (hereinafter called the Contractor).

The Contractor for himself, his heirs, executors, administrators and assigns, agrees to do in the most workmanlike manner all works and provide all the materials of the best kind shown in the drawings and described in the specifications marked "A" and "B" respectively and signed by the Contractor, and to complete, furnish and hand over to the Superintendent General or to some person by him appointed for that purpose, the

Combined Cow and Horse Barn for the Fraser Lake Indian Residential School, B. C.

and all other work and labour incidental to and necessary for the entire completion thereof, whether specified or shown in the drawings or specifications or not, by the 10th day of November, 1924, A. D.

AND in consideration of the above agreement on the part of the Contractor, the Superintendent General hereby agrees to pay the said Contractor the sum of Four-thousand, nine-hundred and seventy-six ---------- dollars, provided always that the Superintendent General may at any time during the progress or after the completion or alleged completion of the work, appoint an Architect, Engineer or other officer, in which case the certificate of such Architect, Engineer or other officer, that the work is duly completed and of the amount, if any, due to the Contractor, after making such allowances for penalties and for defective or incomplete work, or for extras and deviations as the Architect, Engineer or other officer shall think fair, shall be a condition precedent to any claim by the Contractor under this contract.

AND the Contractor for himself, his executors, administrators and assigns, further covenants and agrees:—

1. That the wages to be paid in the execution of this contract shall be those generally accepted as current in each trade for competent workmen in the district where the work is carried on. If this condition is violated, the Superintendent General may cancel the contract and refuse to accept any work done thereunder.

2. That if the Contractor fails at any time to pay any account for any goods or materials supplied, or money advanced by anyone to the said Contractor for the purposes of this agreement, or to pay the account of any sub-contractor for any work or materials done or supplied for the said works to be constructed under this agreement, and such

account is in either of such cases one month overdue, the Superintendent General may notify the Contractor to pay such account, and if a week elapse and the same be not paid in full, the Superintendent General may pay such account and may charge the same to the Contractor, and the Contractor covenants with the Superintendent General to repay at once any and every sum so paid.

3. That if the Contractor fails at any time in paying salaries or wages of any person employed by him upon or in respect of the said works, or any of them, and any part of such salary is one month in arrear, or if there be due to any such person one month's wages or salary, the Superintendent General may notify the Contractor to pay such salary or wages, and if two days elapse and the same be not paid in full up to date of payment, or to such other date as may be in accordance with the terms of employment of such person, then the Superintendent General may pay to such person his salary or wages from any date to any date and to any amount which may be payable, and may charge the same to the Contractor, and the Contractor covenants with the Superintendent General to repay at once any and every sum so paid.

4. That pursuant to the Statute in that behalf, this Agreement is made subject to the express condition that no member of the House of Commons of Canada shall be admitted to any share or part of this Agreement or any benefit to arise therefrom.

5. That the Contractor shall not assign, transfer or set over this contract or any interest therein to any person or persons whomsoever, without the consent, in writing, of the Superintendent General of Indian Affairs first had and obtained.

IN WITNESS WHEREOF the said Superintendent General of Indian Affairs, acting as aforesaid, and the said A. P. Anderson have hereunto set their hands and seals the day and year first above mentioned.

Ottawa, Canada, October 30 1925

FRASER LAKE RESIDENTIAL SCHOOL

CONSTRUCTION OF OUT-BUILDINGS.

The Rev. Fr. N. Coccola, O.M.I., Principal of Fraser Lake Residential School has sent me his list of requisitions as follows:

1. $225.00 — **New Cellar**: The one built at the opening of the school is altogether too small as the garden is four times the size it was at first. Estimated cost: $225.00.

2. $500.00 — **Piggery**: There is none at present and is therefore needed. Approximative cost: $500.00.

3. $400.00 — **Cow Shed** for the Winter for the loose stock with room for bull and calving cows are needed and would require an outlay of $400.00.

4. **Silo**: As such a construction is needed and no figures are available we leave to the Department to indicate probable cost.

5. $800.00 — **Employees' quarters**: Rev. Fr. Coccola states that an appropriation of $800.00 would be needed to finish the employees' quarters and said sum is also asked from the Department.

Mr. J.D.McLean,
Asst.Deputy and Secretary,
Department of Indian Affairs.

Attention of the Department Architect.

Sir:-

We trashed last Fall some twelve tons of grain. Having no granary we stored it in a corner of the barn, the steam from the stock caused the grain to germinate. You see at once by that the imposing necessity of a granary.

Same must be said for what happened to our roots. It is true 4 years ago we built a small temporary cellar, now that the area ~~cultiv~~ of cultivated land has tripled and we intend to develop it farther on, we need a permanent and larger cellar capable of containing the returns from the garden.

We think that to save expenses and to have things at hand a granary with a cellar underneath communicating with the barn could be built attached to the said barn on the North side according to sketch here enclosed for the cost of $900.00

Please return the sketch.

Hoping that you will give consideration to this matter,

I remain your humble servant.

N. Coccola O.M.I.

Ottawa, February 23, 1926.

Reverend Sir:

I have your letter of the 15th instant, enclosing a plan of a granary and root cellar which is desired for the Fraser Lake Indian Residential School. I note you estimate the cost at $900. Before giving consideration, the Department would be pleased to have a statement from you and one from Mr. Indian Agent Moore, concerning what are the most important needs at your institution this year. At the time our Estimates were prepared, your requirements were listed by the Church representatives as follows: Completion workshop, erection of silo, cow shed, hogpen and root cellar. Certain funds will be available for these purposes. I should be pleased if you and Mr. Moore would make a joint recommendation concerning these improvements, listing them in order of their relative importance and estimating their costs.

The Indian Agent is receiving a copy of this letter for his information and guidance.

Your obedient servant,

J. D. McLEAN

J. D. McLean,
Asst. Deputy & Secretary.

SCHOOLS BRANCH
MAR 16 1926

Sir:-

With reference to your communication of the 23rd. ult. to the Rev. Father Coccolo, Principal of the Fraser Lake Indian Residential School, File No.163-1-5 copy of which I have received I beg to inform you that I have gone into the matters mentioned in your letter with the Rev. Principal and beg to advise as follows:-

In going over the most important requirements of the Fraser Lake School this year I find that a set of new batteries for the lighting plant is the outstanding one. The present batteries which were put in when the school was built have been in constant use for the last five years, apparently these batteries were just large enough to supply the needs of the school alone without taking in the barn or any of the other out buildings, in fact Mr. Allen the Engineer informed me that the batteries have been carrying a maximum load and that when asked to do that their life is considerably stortened. The battery question was brought to my attention last fall by the Principal and after discussing the matter with him and the Engineer we thought that they would last for at least another year, however they have been getting worse during the winter until now they are far from satisfactory and the light in the school is anything but good. To my mind the batteries at present in use are too small and for that matter were too small right from the beginning except for the main building but when we consider that the barn is not lighted by electricity pwing to the fact that the batteries are not strong enough to carry the additional load we can readily see how the fire risk is increased by using oil lamps around hay and straw, in fact during my first visit to the school after my appointment as Indian Agent I mentioned the fact of the barn not being lighted by electricity to Father Coccolo and asked him why it was to which he replied that his batteries could not supply any more lights than were being used in the School Building. I understand that a set of batteries suitable for a plant such as the Fraser Lake Indian School will cost in the neighborhood of $2000-00. This amount may seem large but a new set of batteries will be necessary before next fall and I think it wise to put in a set that

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

Library and Archives Canada / Bibliothèque et Archives Canada
www.collectionscanada.gc.ca

will carry the full load and supply the barn and other out buildings as well, rather than purchasing a set the same size as in use now for it will only mean a repetition of the trouble in another few years as well as not giving power enough to light the barn etc.

The next item in importance is the completion of the Carpenter and Blacksmith Shop started last year and still in an unfinished condition. The amount necessary for this work will be approximately $800-00.

Next in importance is a granary with root cellar underneath . I saw the plans of the proposed granary as submitted by Father Coccolo to the Department and think it a good one and one that should meet with the approval of the Department. No doubt you are aware that a good root cellar is a very important item in an institution such as the Fraser Lake School, especially in a climate such as the one we have in this district. The cost of this granary and rootcellar will be in the neighborhood of $1000-00.

The next item of importance is the erection of a silo and one large enough to fill the want will cost around $400-00 including the cement foundation.

The erection of a hog pen is next in importance and one large enough to house six brood sows with litters and a boar with a feed room at the end should be something along the plan adopted. No estimate on this work has been given.

The completion of the cow shed which was started by Father Coccolo last fall is next in line. This building is close to the barn and is used for young and dry stock to feed and stay in during the winter with free access to water and pasture. To complete this building will cost about $500-00.

In conclusion I would strongly recommend that the above items be granted in the order they are given.

I have the honour to be, Sir,
your obedient servant,

R. H. Moore.

Ottawa, May 5, 1926.

Sir:

With further reference to your S-2 of March 14th, last, please inform me the make of electric light battery at the Fraser Lake Indian Residential School. You should mention the number of cells and indicate if both positive and negative plates, as well as separators, are required for the renewal.

The Principal places the provision of a granary with root cellar, at a cost of $900, as more important to the satisfactory conduct of the school than the completion of the work shop (estimated cost $750.) Please discuss this with him and let me know which of these improvements should be undertaken first.

Your obedient servant,

J. D. McLEAN

S-2

Sir,-

(Incls.)

I beg to acknowledge receipt of your letter of the 15th instant, with inclosures, accounting for an advance of $700.00 which was made to Mr.W.F.Manson last June, and in reply I return herewith the said inclosures. Kindly attach them to a statement which should show the amount of the advance and the expenditure incurred as per receipts, vouchers and cheques. The statement should be in duplicate & certified by you and should be forwarded to the Department together with the other papers.

I have to point out that seemingly the charges for services of pipe fitter and helper are incorrect. Necessary alterations should be made. The Auditor General's office would not accept these vouchers as they stand at present

Yours truly,

F.H.Paget
Chief Accountant.

R.H.Moore,Esq.,
Indian Agent,
Vanderhoof, B.C.

Sir,—

I have for acknowledgement your letter of the 7th. inst. relative to the accounting of $700.00 sent to Mr W. F. Manson last June. I regret having overlooked this matter at the end of the fiscal year and beg to attach hereto the Invoices and receipts for the amount mentioned.

This letter is in reply to your File No. 163-1-5.

Hoping that you will find these accounts all correct and in order.

I have the honour to be, Sir;

Your obedient servant;

L. H. Moore.

Indian Agent.

The Secretary;
Department of Indian Affairs;
Ottawa.

Ottawa, April 7, 1926.

Dear Sir,-

I beg to say that when Mr.Manson was acting in June last as Indian Agent for the Stuart Lake Agency he wrote the Department requesting an advance of $700.00 to defray the cost of the extension of the water system to the barn at the Fraser Lake Indian Residential School. A cheque, No.1111 for $700.00 in favour of the Bank of Commerce, went forward to Vanderhoof on the 11th June to meet expenses.

I have to request that you will be good enough to see that the $700.00 mentioned is accounted for without delay. Proper vouchers should be submitted to the Department.

afm.

Yours truly.

F.H.Paget
Chief Accountant.

Ottawa, March 23, 1926.

Sir:

I have your S-2 of the 15th instant and I note that manual training instruction cannot be given the Fraser Lake Indian Residential School pupils until the shop building is completed and tools are provided. As soon as the new Vote is available, instructions concerning the electric light batteries and completion of the work-shop will be directed to you. I note your estimate of $750 for manual training tools. This seems quite excessive and the Rev. Principal should be informed that the school will have to provide whatever is necessary to commence the instruction in carpentry.

Your obedient servant,

J. D. McLEAN

SCHOOLS BRANCH
MAR 12 1926

Referring to your File No. I63-I-5.

Sir:-

On receipt of your letter of the 23rd ult. File No. I63-I-5, we discussed with our Indian Agent Mr. Moore the most important needs of our Institution.

First. We found the necessity of renewing the battery for the lighting plant.

Last year we noticed that the lights were dim but we hoped to overcome the trouble by overhauling the cells. In doing it we found them to contain a thick sediment and the disintegration of the Positive plates to be too far advanced to allow repair. At present the light is very poor.

This battery when first installed was to supply light for the main building the only one standing then, but when the Laundry and the Chapel were built it became too small for the number of lights in service and was overtaxed.

Now as the light is to be extended to the barn and workshop and other outside buildings the size of the battery has to be increased also. a battery of 320 Ampere Hours would be more economical to operate and should have longer life.

Our engine is IO H.P. Special Electric and our generator is 5 Kilowatt at I25 Volts. The switch board has two Amperage Rheostats and it is so arranged that we could charge the large battery succesfully to supply light for Barn and other buildings all at the cost of about $2000.00.

I suggest that the firm who is to install the new battery should send a competent man electrician and guarantee the work.

Second. The next improvement of importance would be a Granary with Root cellar underneath as per plan sent for about $900.00.

Third. Then the completion of the workshops for about $750.00.

Fourth. A hogpen to cost about $IOOO.00.

Fifth. And last the completion of the cowshed which I began to build last Fall to be finished as to be in harmony with the other buildings with paint and shingle roof, it would cost $600.00.

I have the honor to be,
Your obedient servant,

N. Coccola

Sir,—

I beg to acknowledge receipt of your communication of the 5th. inst. File No. 163-1-5 which refers to the electric light battery at the Fraser Lake Indian Residential School and in reply I beg to advise as follows:-

There is no mark on the batteries which would indicate the make but I have been informed that they were supplied by the Fairbanks Morse Company of Vancouver to the Contractor who built the School and who is alleged to be the cause of the batteries spoiling so soon. The battery consists of 56 cells, 240 amp. hr. The positive and negative plates as well as the separators are all spoiled, I have been thus informed by Mr. Allan the Engineer.As explained in my letter of March 8th. last to the Department. I am satisfied that the batteries at present in use at the School are too small,even they were in first class condition, because they are and have been carrying the maximum load which has a bad effect on any battery and tends to shorten its days of usefulness to a considerable extent. The Rev. Principal has informed me that he has been in communication with an Electrician called Mr. Alex Nash of Prince George on the matter and Mr. Nash has guaranteed to give the Principal satisfaction should he be allowed to install a new set of batteries. It seems desirable that this man should, if at all possible, get the work as he is in business locally and can give better service on that account. I would be pleased if the Department would take this matter into consideration at the earliest possible date and advise what action they wish to take.

Regarding the cost and necessity of providing a granary and root cellar as more important to the satisfactory conduct of the School than the completion of the Work Shop,I beg to inform you that I went into this matter with the Principal and he is still of the opinion that the granary and root cellar should be attended to first. I can easily see the Principal's point in this case as he is naturally looking to the most economical way of operating the school, if the granary and root cellar is completed this summer it means that the Principal will have a place to store

Sir,—

his grain, roots and vegetables for winter consumption, while on the other hand if it is not completed he will have to do the same as he has been doing, viz.buy these comodities wherever he can and at whatever price offered.

On the other hand, completing the Carpenter Shop is just as vital, from the point of view of satisfactory manual training to the boys at the School. As you know this building was started last year and partially completed and while admitting the necessity of the granary and root cellar, I am still of the opinion that the Department should try and finish one job before starting another. So far as the Principal and myself agreeing on which of these buildings should be completed this year I am afraid it cannot be done, for as I have already explained, the Principal is looking at it from one angle and I from another. I am just as anxious as the Principal is to see the granary and root cellar completed but in fairness to the Department and the pupils I think that as the Carpenter Shop was considered to be of first importance last year it should still keep its place.

If the Department could see its way clear to complete both these buildings this year it would be filling a long felt want in the successful operation of the Institution as both buildings are of equal importance depending on which view point one wishes to take.

The Secretary,
Department of Indian Affairs,
Ottawa.

I have the honour to be, Sir,
Your obedient servant,

R. H. Moore

Indian Agent.

163-1-5.

Ottawa, May 31, 1926.

Sir:

I have your S-2 of the 19th instant, with reference to improvements at the Fraser Lake Indian Residential School. The Department will arrange in the immediate future with the Fairbanks-Morse Company, of Vancouver, to ship, freight prepaid, to the Rev. Principal at Endako, positive and negative plates and separators for the present storage battery at the school. Our Architect considers that this battery is large enough, if properly used. You may arrange to have Mr. Alex. Nash, Electrician, of Prince George, install the batteries and see that the system is in good working order. The account for the batteries should be certified by you, after the equipment is received and found to be in satisfactory condition. You should prepare a voucher in favour of Mr. Nash, when the installation is properly completed.

I note that the Rev. Principal urges the provision of a granary and root cellar as more important than the completion of the carpenter shop. You should have him prepare a list of the materials necessary to erect the building, as shown on the plan he submitted to the Department in February, last. The construction is to match the present barn, to which the root cellar and granary would be attached. He should also estimate the cost of the expert labour that will be necessary. It is understood that the school staff and older boys will be expected to give their labour without cost to the Department.

The question of finishing the carpenter shop will stand in abeyance until the cost of the other improvements is determined.

Your obedient servant,

J. D. McLean,
Asst. Deputy & Secretary.

Sir,—

I beg to acknowledge receipt of your letter of the 10th. inst. File No. 163-1-5 in which you informed me that the Canadian Fairbanks-Morse Company , of Vancouver, are being asked to arrange shipment from Winnipeg of a new complete battery., and that I may arrange with Mr. Alex. Nash of Prince George to install the batteries. In this connection I beg to refer you to my letter of the 12th. inst. in which I said that the Rev. Principal and I had discussed this matter and considered it unwise to have one Company supply the batteries and another Company install them and furthermore Mr. Alex. Nash has just left for two months holidays in California, consequently it will be necessary to have the Canadian Fairbanks Company send their own man to install the batteries.

June 12th, 1926

Sir,—

I received a letter from the Secretary of the School Board at Fort StJames with $12-00 enclosed being in payment of two desks with seats taken from the old Indian School at Fort StJames. The Secretary informed me in his letter that in 1922 the Department, through Mr. McAllan then Agent, informed him that they would be pleased to dispose of the desks in question at $6-00 a piece. At that time they purchased 12 and now they find that they need two more. After looking up the matter I find your letter No.285754-5 dated November 15th. 1922 in which authority was given to sell 18 or 20 desks. I am therefore enclosing herewith my personal cheque, the money was paid to me in cash, for $12-00 made out to the Receiver General.

June 12th. 1926

Sir,—

I beg to acknowledge receipt of your letter of the 31st. ultimo File No. 163-1-5 relative to improvements which will be made at the Fraser Lake Indian Residential School, for which I thank you.

I discussed your letter with the Rev. Principal yesterday when I was at the School and we came to the conclusion that it might be unsatisfactory to get the supplies for the batteries from one Company and ask another to do the labour and install the batteries, owing to the fact that in case the batteries were not satisfactory when installed that one could blame the other and the Department would be left , as it were, between two stools. Therefore I would respectfully recommend that the Department instruct Fairbanks Morse to do the installing as well as supplying the new parts for the battery. I would like to point out that the Rev. Principal told me yesterday that there would be about six new jars necessary as well as both positive and negative plates and separators , apparently the jars have been broken , one now and another again, until there are six new ones required at the present time. I would therefore suggest that these six jars be purchased at the same time as the other material.

The Rev. Principal is going to give me a list of the materials necessary to build the granary and root-cellar. The estimated cost of the skilled labour will also be included. In this connection I would like to mention that the school closes on July 20th. next for six weeks and that unless work is got under way very soon we will derive little or no benefit out of the School Staff and older boys for the unskilled labour necessary for the erection of this building.

I note your remarks Re the finishing of the Carpenter Shop which will stand in abeyance for the time being.

I have the honour to be, Sir,
Your obedient servant,

R. H. Moar.

DEPARTMENT OF INDIAN AFFAIRS

OFFICE OF
INSPECTOR OF INDIAN AGENCIES
BRITISH COLUMBIA

DEPT. OF INDIAN AFFAIRS
MAR 7 1927
RECORDS

SCHOOLS BRANCH
MAR 8 1927

P.O. Box 752
KAMLOOPS, B.C.

March 1, 1927.

Dear Sir:-

When I paid my last visit to Fraser Lake School last fall, the Reverend Principal, Father Coccola pointed out to me that the cold storage building was not working very satisfactorily. It is, of course, important that this storage plant works well, as this particular school has to keep considerable quantities of stores on hand at one time, owing to their not being able to purchase locally. The following is an extract from a letter from the Reverend Principal regarding the installation of a refrigerator plant at the school:-

"Knowing as you do the necessity of a refrigerator "plant I wrote to Edmonton and Vancouver for plans. After "much correspondence the Linde Co., of Vancouver are willing "to install a plant for $1465.00, ourselves to supply the "three horse power engine necessary to run it and which we "have on hand. The building to be used will be our present "meat house with some modifications, but that can be done by "our carpenter instructor, and the boys. The advantage of "plant at once is to save putting up ice which costs us $300. "every year. If the Department has not the funds available at present to go ahead with this work, I would like authority "to do the work with my own funds and then be reimbursed by "the Department as soon as the new appropriation is available."

Mr. Moore, Indian Agent, in commenting upon this matter states that he can appreciate the position that the Principal is in, and if there is any possible way that this addition can be made with the present equipment of the school, he would certainly recommend that it be done. Mr. Moore states that when he submitted the estimates for his Agency for 1927-28 to Mr. Commissioner Ditchburn, he included the sum of $1400.00 for a plant of this nature. He states that if the Department would agree to this disbursement and give the Reverend Principal a reasonable assurance that the item in question would be available later on, that the job be commenced right away.

As far as I am concerned, I certainly think that the installation of a refrigerator plant at the school would be a great improvement, and I should certainly like to see it done some time or other. However, I do not wish any of these estimates to upset the possibility of the work commencing on the Lytton School, or the final wing of the Kamloops School. Having in view the fact that the Reverend Principal states that he would save $300.00 every year, some agreement might be made whereby the school, having in view the fact that they are saving this money, contribute something towards the cost, apart from the fact that they are willing to contribute the work, and of course, the cost of running the engine. However, it is not a very large sum in question, and possibly the Department might see fit to pass this estimate.

The Secretary,
Department of Indian Affairs,
OTTAWA, Ont.

Yours truly,
Pragnell
(Geo. S. Pragnell)
Inspector of Indian Agencies.

Ottawa, February 19th, 1927.

Sir,-

I have your letter of the 10th instant, relative to the extra desks required for the use of the Fraser Lake Indian Residential School and explaining the need for this equipment. It is noted that the half-day system is not in use at this school but that the pupils attend classes throughout the day and that you are satisfied that twelve extra desks are necessary. The Department will approve of the purchase of this number of single desks, size No. 4.

The desks at present in use at the school were obtained from the Globe Furniture Company Limited, Waterloo, Ontario. The British Columbia agents of this firm are Messrs. Clines Limited, 1150 Hamilton Street, Vancouver. You may place the order with this firm for the above number and size of single school desks. You should give them full particulars as to shipping directions, etc., and obtain accounts from them, in duplicate, covering the cost. Please arrange with them to include in their price for the supplying of the desks the freight charges and, when the desks have been received, if in good condition, you should certify the same and send to the Department for payment. Please give the matter of the purchase of these desks your early attention.

Your obedient servant,

J. D. McLean.
Asst. Deputy and Secretary.

INDIAN AGENT'S OFFICE

DEPT. OF INDIAN AFFAIRS
FEB 18 1927
RECEIVED

Vanderhoof, B.C.

February 10th. 1927

IN YOUR REPLY REFER TO
No. S-2.
ALSO
TO DATE OF THIS LETTER

FEB 19 1927
CHIEFS BRANCH

Sir,—

I beg to acknowledge receipt of your letter of the 26th. ultimo File No. 163-1-5 for which I thank you.

163-1-10

With reference to the last paragraph of your letter I beg to advise that the half-day system has not been adopted so far at the School. The Principal informs me that owing to the fact that the children first go to School without any knowledge whatever of English that he finds that it is necessary for them to be in the class room twice daily to show any progress at all, he also adds that the majority of them do not remain long enough in the School as the parents always find some reason to get them away as soon as they are big enough to be of any use.

I asked the Principal if it was possible for him to get along without the desks asked for, quoting the remarks contained in the last paragraph of your letter, but he teld me that he requires at least one dozen single desks right away to accomodate the present number of pupils. Consequently I am satisified that the desks are necessary in view of the information given me by the Rev. Principal and I would recommend that twelve desks instead of twenty-four be sent to the Principal as soon as possible.

I have the honour to be, Sir,

Your obedient servant,

D. M. Moore.
Indian Agent.

The Secretary,
Department of Indian Affairs,
Ottawa.

Ottawa, February 9, 1927.

Sir:

I have to confirm the following night letter to you of yesterday's date: -

> "Inspector Pragnell reports that repairs are urgent behind eavetroughs at Fraser Lake School. You may incur expenditure approximately $275 in this connection. Get competitive prices for materials and keep time sheets in duplicate for labour engaged."

Inspector Pragnell states that there is some faulty construction at the Fraser Lake School, and that this is causing considerable trouble and annoyance as well as destruction every spring. He also states that immediately behind the eavetroughs there are certain boards missing, and that on account of the thawing and freezing each spring the eavetroughs fill up and then back up under the eaves and down inside the walls, damaging the plaster. He recommended that, in order to avoid a recurrence of the existing conditions this coming spring, the repairs required to the eavetroughs be immediately carried out. As instructed in the telegram above referred to, you should arrange to have these repairs to the eavetroughs carried out at the earliest possible date that weather conditions will permit.

You should purchase any materials required, after obtaining competitive prices, and you should keep time sheets, in duplicate, for the labour engaged. The total expenditure should not exceed the amount stated. When the work has been completed, please forward properly certified vouchers, in duplicate, covering the cost of the material and time sheets for the labour employed, which should also be certified by you.

Your obedient servant,

J. D. McLEAN

Sir:

I have your letter of the 2nd instant, drawing attention to the condition of the eavetroughs at the Fraser Lake Indian Residential School, and recommending that the necessary repairs be carried out at an early date.

In reply I beg to inform you that we have instructed Mr. Agent Moore, Vanderhoof, by wire to purchase the material required and arrange for the labour in having the work done. He has been authorized to incur an expenditure not exceeding approximately $275.

DEPT. OF INDIAN AFFAIRS
FEB 7 1927
RECORD

DEPARTMENT OF INDIAN AFFAIRS

OFFICE OF
INSPECTOR OF INDIAN AGENCIES
BRITISH COLUMBIA

Immediate

P.O. Box 752
KAMLOOPS, B.C.

February 2,1927.

Sir:-

My attention has been drawn to the fact that there is some faulty construction at Fraser Lake School, that is causing considerable trouble and annoyance as well as destruction every Spring there.

It appears that immediately behind the eaves troughs, there are certain boards missing that should be there. On account of the thawing and freezing, every Spring the eaves troughs fill up and then back up under the eaves and down inside the walls, doing considerable damage to plaster and everything else. It was not notices that these boards were missing until one of the eaves troughs was removed for some purpose or other.

Mr. Agent Moore informs me that he has asked for an estimate and finds that it will run between $250.00 and $300. to have it done. He states that he included this expenditure in his estimates which he sent to Mr. Commissioner Ditchburn last September. He has heard nothing further in the matter and he wants to avoid the recurrence of the flooding and damage to the kalsomine and plaster which occurred last Spring, by dealing with the matter immediately. I consider the matter urgent and should be done straight away, and I shall be much obliged therefore, if you see fit, if you would authorize this. I think it would be best if you would communicate with Mr. Moore direct, probably by wire, as Spring is coming and it should be done before a thaw occurs.

I would have written you before upon the matter, but I have been laid up for the last week, sick with Flu, and could not, therefore, deal with the matter.

The Secretary,
Department of Indian Affairs,
OTTAWA, Ont.

Yours truly,

(Geo. S. Pragnell)
Inspector of Indian Agencies.

GOVERNMENT OF THE DOMINION OF CANADA

Department of Indian Affairs, British Columbia

Stuart Lake AGENCY.

To The Canadian National Railways, Winnipeg, Man.

DATE	DETAIL	AMOUNT
	(Fraser Lake Indian Residential School)	
January 20th. 1926.	(Rental of Siding)	

163-1-5.

Ottawa, January 26, 1927.

Sir:

With reference to the request from the Principal of the Fraser Lake Indian Residential School for classroom supplies and school desks and sewing machines, I beg to say that an order has been forwarded to the Government Stationery Office to send to the Principal's address the classroom material considered necessary.

We are today placing an order with the Singer Sewing Machine Company, here, to supply two machines of the type described in their catalogue as

No. 2 - 5 Drawer Machines, 127 - 3 G.O.

The above firm will notify you from their nearest branch office as to who will supply these machines and when they will be available. You should then furnish them with full shipping directions. They have been requested to forward their account, in duplicate, to you. This account will show the retail price and discount of 40% allowed "on which terms purchase is made". When the machines arrive, you should certify the account and forward it to the Department in order that payment can be made.

With reference to the 24 single school desks asked for, I beg to say that when this school was being furnished seating accommodation was provided for 130 pupils. The per capita grant is for 150 pupils, and the return for the December quarter showed an enrolment of 153 pupils. I would point out, however, that if the half-day system is being carried out in the classroom in the case of the older pupils, the Department considers that there should be an ample number of desks on hand for all the pupils. I shall be pleased to hear definitely as to the need of any more desks being supplied this school. Please state if the half-day system is being carried out in the case of the older pupils.

Your obedient servant,

J. D. McLEAN

Ottawa, January 26, 1927.

Gentlemen:

I have to request that you will arrange to supply two (2) Singer sewing machines for the use of the Fraser Lake Indian Residential School, Endako, B.C. The machines required are described in your catalogue as

No. 2 - 5 Drawer Machines, 127 - 3 G.O.

Please notify Mr. R. H. Moore, Indian Agent, Vanderhoof, B.C., from your nearest branch office concerning who will furnish these machines and when they will be available. Mr. Moore will then give your local representative directions for delivery.

The account for the machines should be made out in duplicate and should show the retail price and discount of 40% allowed, "on which terms purchase is made". Please forward your account to Mr. Moore, who, upon receipt of the machines, will certify the account and send it to the Department for payment.

Ottawa, December 11, 1926.

Sir:

I have your letter of the 29th ultimo, enclosing a voucher in favour of the Canadian National Railways covering the cost of snow cleaning from the spur track on the main line to the Fraser Lake Indian Residential School.

It is noted that there has been no duplication of this account, as it covers the cost of snow removal in January, 1926, and that a bill for the same amount was paid by the Principal for snow cleaning during the month of February, in the same year. A cheque in payment of the account for the snow removal in January is being forwarded.

In connection with the snow cleaning, it is considered that in future payment of the cost of same should be made by the school authorities from their per capita grant or other receipts. I have to request that you will inform the proper railway official for the Division that all accounts for this service should be rendered to the Principal of the school in future.

Your obedient servant,

J. D. McLean,
Asst. Deputy and Secretary.

November 29th. 19 26

DEC 11 1926
SCHOOLS BRANCH

Sir,—

With reference to your letter of the 6th. inst. File No. 163-1-5 and further to mine of the 20th. inst. I beg to attach hereto a Voucher in favour of the Canadian National Railways at Prince George for $5-68 . I am also going to submit a copy of a letter received by me from the Roadmaster of this Division which is in reply to a letter sent in by me on the 20th. inst. and copy of which you have already received. Copy of the letter is as follows:-

"Referring to your S-2 of the 20th. inst.,
"Accounts in this office show the charges "against the spur at LeJac, to $5-68 for January 1926 and the "same for February 1926.
"Although bills are sent out by our accounting "department, I am certain that the bills in question are not duplicated as they appear to be. "

Yours truly,
R.A.Harlow,
Roadmaster."

You will please note from the above letter that there were two accounts sent in for the above amount ,one to Father Coccolo and the other to the Department, and although these accounts were for work performed at two different times yet it seemed strange to me that one bill should be sent to the Principal at the School while the other was sent to the Department. No duplication has been made however and it would seem as if the charge is reasonable.

I have the honour to be, Sir,
Your obedient servant,

R. H. Moore.

R

Sir:

With further reference to your letter of the 6th inst. File No. 163-1-5, and which I replied to under date of November 20th. I would like to advise you that this matter has brought home to me, very forcibly, the fact that some system of "follow up" will have to be adopted by myself in the office to prevent a recurrence of a like nature.

You can readily see that in the case of the above letter, how easy it was for me to overlook the matter altogether, having not received a reply to my first letter to the Roadmaster and it is to prevent such a thing happening again that I am writing you.

I am of the opinion that the Department have a system of their own and which would be applicable to Agency Offices. If so, I would be grateful to have any information you might care to give me on the matter, as well as any suggestions or advise that you might give. I understand that the "Desk Calender Pad System" is very good and would, I think, be just the very thing for the office and if these could be procured from the Department of Printing and Stationery, I am sure that it would supply my requirements. However, I will be guided by your advice and instructions in the matter and any information you might care to give will be gratefully received.

I have the honour to be, Sir,

Your obedient servant,

R. H. Moore.
Indian Agent.

TO DATE OF THIS LETTER

Vanderhoof, B.C.

November 20th. 1926

Sir,—

I beg to acknowledge receipt of your letter of the 6th. inst. File No. 163-1-5 regarding an account from the Canadian National Railways covering the cost of clearing snow from the switch at the Fraser Lake Indian Residential School. I very much regret not having replied to the letter written under date of August 30th. last regarding the same matter but in explanation thereof I am attaching hereto copies of correspondence that I have sent to the Roadmaster of this Division regarding the above account and which I have not as yet received a reply to. Please note that I have sent another letter to him by even mail asking for the desired information as soon as possible.

As explained to the Roadmaster in my letter, I found that on checking the account over with the Rev. Principal at the School we were both of the opinion that the account had been paid by the Principal himself for he informed me that previously he was in the habit of paying this expense himself, consequently I wanted to find out from the Roadmaster if there had been a duplication before sending in a Voucher for the amount or replying to your letter. However, the matter escaped my memory owing to the fact that a reply had not been received from the Roadmaster. I am still of the opinion that the account has been duplicated but as soon as I hear from the Roadmaster I will immediately take whatever action is necessary.

I have the honour to be, Sir,
Your obedient servant,

The Secretary,
Department of Indian Affairs,
Ottawa.

Vanderhoof, B.C.

IN YOUR REPLY REFER TO
No. 8-2.
ALSO
TO DATE OF THIS LETTER

November 20th. 19 26

Sir,—

I wrote you under date of September 15th. last regarding an item of $5-68 for clearing snow at the spur at the Indian School at Fraser Lake during the month of January 1926. As no reply has been received from you to this letter I am again requesting that you look into the matter and advise at the earliest possible date.

A copy of my previous letter is presented herewith:-

"I have received a bill from the Department which was sent to "them by the Canadian National Railways for cleaning snow from "the switch at the Indian School during the month of January "1926. The account amounts to $5-68 and the bill No. is 1256. "In going into this matter witht he Rev. Principal Coccolo he "showed me an account for the same amount which was paid by "him to the Agent at Endako, Mr. Kyle, for work that was "supposed to have been done in February 1926. It seems to us "that this account was duplicated although the number of the "account paid by Father Coccolo was 2355. I would be pleased "if you would kindly look into this matter and if these are "two separate accounts please advise us at your earliest "convenience when the January account will go through for "payment."

Kindly look into this matter at your earliest convenience and advise if there has been a duplication of accounts in this case for it seems to me that there has , for owing to the exceptionally light snow fall last winter I cannot see why it should be necessary to clear the snow off the switch so frequently. An early reply will be appreciated.

Yours truly,

R. Armour.

Vanderhoof, B.C.,

September 15th. 1926.

I have received a bill from the Department which was sent to them by the Canadian National Railways for cleaning snow from the switch at the Indian School during the month of January 1926. The account amounts to $5-68 and the bill No. is 1256. In going into this matter with the Rev. Principal Coccolo he showed me an account for the same amount which was paid by him to the Agent at Endako, Mr .Kyle for work that was supposed to have been done in February 1926. It seems to us that this account was duplicated although the number of the account paid by Father Coccolo was 2355. I would be pleased if you would kindly look into this matter and if these are two separate accounts please advise us at your earliest convenience when the January account will go through for payment.

Yours truly,

R.H.Moore,

Indian Agent.

The Roadmaster,
Nechaco Sub Division,

Ottawa, November 6th, 1926.

Sir:

I have to refer you to official letter of August 30th, last, enclosing an account from the Canadian National Railways covering the cost of snow cleaning on the switch extending from the main line to the Fraser Lake Indian Residential School. The Railway Company is pressing for payment of this account, and if you consider this service has been performed and is a fair charge aginst this Department, you should, as you were instructed to do, prepare and forward a properly certified voucher covering the amount, in order that payment can be made. If you do not consider this a fair charge against this Department, you should inform us of your reasons for not issuing a voucher, and in that case the account which was sent you should be returned.

It is expected that you will carry out these instructions at the earliest possible date.

Your obedient servant,

J. D. McLean,
Asst. Deputy and Secretary.

Sir,—

I beg to acknowledge receipt of your letter dated June 29th. File No. 163-1-5 and your night letter of July 2nd. dealing with the electric light battery and other improvements at the Fraser Lake School.

In connection with the installation of the batteries I am glad to report that the Electrician and Engineer at the School can install the batteries himself in a satisfactory manner. The batteries have already arrived and the work of installation will commence immediately.

Dealing with the erection of the granary and root-cellar I have already obtained competitive prices for the material and given instructions for the delivery of the material immediately to the lowest bidder. I am hoping therefore that the building in question will be under way within the next week and should be completed in lots of time for this year's crop.

I would like to thank the Department for the prompt manner in which they settled the question of these two items and my personal appreciation of the assistance given me at all times.

I have the honour to be, Sir,
Your obedient servant,

Ottawa, June 29, 1926.

Sir:

I have your S-2 of the 12th instant, with reference to the electric battery and other improvements at the Fraser Lake Indian Residential School. I have also your S-2 of the 21st instant in this connection and I note that the local electrician is not now available. I am telegraphing today to the Canadian Fairbanks Morse Company, of Vancouver, asking them to recommend a man in the vicinity of Fraser Lake. You will be advised by telegram, if necessary, concerning the matter.

The Rev. Principal, apparently with a view to expediting the matter, forwarded direct to the Department a list of materials with an estimate of the cost in connection with the proposed granary and root cellar. I telegraphed you today as follows: -

> "Principal, Fraser Lake School, has submitted direct a proposal re new granary and root cellar. You may purchase, after securing competitive prices, the materials listed in his letter sixteenth instant. Estimate should not be exceeded. Department will allow also small grant for skilled labour."

If you examine the estimate in question, you will note that the total cost of the material laid down at the school was placed at $718. It is understood that the school staff and older boys should do as much as possible without cost to the Department.

Your obedient servant,

J. D. McLEAN

Attention: Mr. J. D. McLean,
Asst. Deputy & Secretary

Gentlemen:

Please be referred to your file 163-1-5 relative to bill W-1256 in the amount of $5.68. My records would indicate that payment of this amount was made on December 22, and also on December 27. Apparently the first amount was paid direct by your Office and the latter by your Agent at Endako.

Kindly have your records checked up in this respect, and advise by return.

Yours truly,

A. C. Egan
Comptroller.

163-1-5.

Ottawa, March 8, 1927.

Sir:

I have your letter of the first instant, with reference to the advisability of an early installation of a refrigerating plant at the Fraser Lake Indian Residential School. I note that the Rev. Principal has secured a price of $1465: that the school has an engine to run the plant: that the present cold storage building, with slight modifications, can be used: and that the alterations can be made by the staff and older boys. The Principal's proposal to have the installation made at the present time, so that a saving of approximately $300 per year in the matter of ice supply can be made, commends itself to the Department. Before approving of the scheme, however, and making an offer of reimbursement for this expense, I should be glad if you would let me have without delay literature or other information concerning the nature of the installation proposed by the Linde Company, of Vancouver. When this information is to hand, the Department will be able to give more intelligent consideration and perhaps early decision in the matter.

Your obedient servant,

J. D. McLean,
Asst. Deputy & Secretary.

DEPARTMENT OF INDIAN AFFAIRS
CANADA

April 12, 1927.

Memorandum:

Approved DCS

DR. SCOTT.

A few weeks ago, Mr. Inspector Pragnell strongly recommended a refrigerator plant at the Fraser Lake Indian Residential School. The Rev. Principal wishes to proceed with the installation of an ammonia freezer, at a cost of approximately $1700. The plant, itself, is worth $1465: doors, etc., for the cold storage room, approximately $250. The Principal hopes that the scheme will effect a saving of about $300 a year in the matter of ice supply. Mr. Orr recommends the scheme.

$1600 is available for improvements at this school this year. It is the intention to erect a small hogpen, a silo and a cow shed. In a letter dated the 24th ultimo, the Rev. Principal states that the refrigerator plant is the most urgent of all their requirements. In view of these recommendations, I have to suggest that the Rev. Principal be informed that the Department will give a grant of $1600 if he meets the entire cost and forwards to us receipted accounts. He would be given to understand that the construction of the small outbuildings cannot go forward this year.

Russell Stevens
Supt. of Indian Education.

Vanderhoof, B.C.

March 30th. 1927.

Sir -

I have received a letter from Colonel Pragnell Inspector of Indian Agencies, with reference to the installation of a refrigerator plant at the Fraser Lake Indian Residential School.

Apparently the Department wish certain information on the plant which the Rev. Principal, had in view as a suitable one for the Institution and Instector Colonel Pragnell instructed me to get all the Information that I could from the Principal and forward it direct to the Department and quote your letter to him of March 8th. File No. 163-1-5.

Upon receipt of the Inspector's letter I immediately wrote to the Principal and by last mail I received from him a letter, copy of which I attach herewith, as well as plans specifications etc of the plant proposed.

I would respectfully draw the attention of the Department to the last paragraph of the Rev. Principal's letter wherein he asks for the sketch to be returned as soon as the Department is through with it and hoping that the Department can see its way clear to take this matter into consideration at an early date.

I have the honour to be, Sir,
Your obedient servant,

R. H. Moore.
Indian Agent.

COPY

Industrial School,

Lejac, B.C.

March 24th. 1927.

R.H.Moore, Esq.,
Indian Agent,
Vanderhoof, B.C.

Dear Sir:-

I have just come back from Prince Rupert and find your letters of March 14th. D-2 and March 19th. S-2.

At your request I am enclosing the specifications and tenders of the Linde Co which sums up the correspondence I had with the Company.The reason why I signed them is that if approved by the Department they could be forwarded direct to the head office. We have here another copy of that contract.

I have to say that the present cold storage building with some alterations can be used and our instructor with the older boys may do the greatest part of the work.

We thought at first that we could secure at our saw mills dry shavings for the insulation, but after inquiries, we found that the shavings from the surrounding mills are not perfectly dry. So we will have to use quilts instead. Also two doors and frames will have to be made in Vancouver in order to give sure satisfaction.This of course will again increase the first figures of $1465-00 a little. The engine we have on hand has been used for some time and as a matter of prudence some parts will have to be renewed. We will have to buy about 3000 feet of lumber for the insulation walls that will cost approximately one hundred dollars.

Will you kindly point out to the Department that amongst the various improvements needed around here, that is; silo, piggery, cow shed, installation of electricity in the outside buildings, completion of the building for the employees' quarters, refrigerator plant, this last one is the most necessary and the most urgent of all.

We would like the Department to return the sketch showing the dimentions of the proposed plant.

Yours truly,

N. Coccolo, O.M.I.

Ottawa, April 14, 1927.

Sir:

I have your S-2 of the 30th ultimo with enclosures, including a copy of a communication from the Rev. Principal, relative to a refrigerator plant at the Fraser Lake Indian Residential School. This scheme commends itself to the Department and I have to advise the Rev. Principal to proceed with it, on the understanding that when it is entirely complete and in satisfactory running order, if he presents receipted accounts for the activity, the Department will make a grant of $1600. All bills are to be paid by the Rev. Principal and receipts should be forwarded, in duplicate, for our attention. I am enclosing the sketch requested by Father Coccolo.

Please inform the Rev. Principal that he must not connect up this refrigerator plant in any way with the electric lighting system or generator, i. e., the power must be provided by gas engine. When the request is made for the Department's grant, the papers that I am returning should be redirected to the Department.

Your obedient servant,

J. D. McLEAN

April 3, 1919.

Memorandum,-

Hon. Mr. Meighen.

I had an interview the other day with Colonel C. W. Peck, V.C., M.P., on the subject of erecting a building for the boarding school at Stuart Lake. The erection of a residential school for these Indians was promised them during a visit which they made to Ottawa in the year 1906. The Department of Fisheries had been having a great deal of trouble with them, on account of their methods of taking fish, and a promise and an arrangement was finally arrived at, and one of the items in the understanding or agreement was the provision of this residential school. In the first place we postponed it until the Grand Trunk Pacific should be completed, shortly after the war broke out, and we made that an excuse for a further postponement. Now Bishop Bunoz, the Roman Catholic Bishop of that diocese, is insistent that we should put up the school at once, and, by so doing, implement our promise to the Indians.

Colonel Peck is anxious to be able to send a favourable reply to the Bishop, who has communicated with him. I am in correspondence with the Indian Agent of the district on the subject of the proper location of the school, and the cost of materials, etc., and will submit a further report.

I would beg to recall our conversation of a short time ago, when you decided to recommend provision of funds for four new residential schools, one each for the

four denominations interested in Indian education. The Roman Catholic school was to be erected on the Peigan reserve, Southern Alberta. In consideration of the definite promise that has been made, it might be held that we should erect the Stuart Lake school first, although the conditions at the Peigan reserve are almost insupportable. The building of a school in this remote district is sure to be a heavy expense, but the Bishop is now very urgent about it, and I think it would be as well if you were to allow me to include an item in the Estimates for this school as well as $20,000.00 or $30,000.00, with which we might make a start and put in the foundation this summer.

I say.

Duncan C. Scott

Prince Rupert, B.C. CANADA May 31st.1919 +

Mr.Duncan C.Scott,Deputy Superintedent General of Indian Affairs
Ottawa.

Dear Mr.Scott,-

I would be very thankful if you would let me know at your earliest convenience whether work will be started on the Fraser Lake school this Summer as I would to take account of this in my programme of visitation in that section of my diocese.

I must state that I was amazingly surprised to hear that through political pull, another school had been placed on the Estimates in preference to Fraser Lake school.After all the promises I had that the Fraser Lake school would be the first built after Kuper Island I would never have expected such a treatment;besides the fact,the undeniable fact(and I know British Columbia) that there is no other school so necessary for the good of the Indians and so strictly due to them by the Government of Canada as the school of Fraser Lake which has been put off for the last nine years and whch may to have to make room now for rebuilding another which is almost like a palace compared to Stuart's Lake.

Respectfully yours

+ E. [illegible] Rupert's
Bp.

Memorandum:

MR. PRATT.

With reference to your memorandum of the 4th instant, regarding construction work last year at the Fraser Lake Indian Residential School, I have to report that a new granary, a new root cellar and the completion of the carpenter and blacksmith shops were the only building activities undertaken by this Department. The materials were purchased, after competitive prices, by the Indian Agent, and the work was done on a day labour basis, under the supervision of the Rev. Principal. I understand a little expert labour was engaged.

The Rev. Principal, at the expense of the school management, erected three small outbuildings during the year, the total cost of which was approximately $750. The outbuildings referred to are a post office, a recreation room and an implement shed.

June 2, 1920.

Memorandum:

Honourable Mr.Meighen.

I beg to report that it was owing to your direction that tenders were asked for the erection of a boarding school building for the Indians of Stuart Lake, in the Babine agency, B.C.

I attach hereto a report from the Architect on the tenders received. The lowest is that of R.Monorieff, of Vancouver.

The Architect makes the recommendation that the building should be finished in brick veneer, which would make the cost $174,400.00. Our estimated cost of the building was $175,000.00.

In submitting this matter for your consideration, I would make the following remarks:-

This school was promised to the Indians in 1906, on their agreeing to do away with aboriginal methods of fishing which had brought them into collision with the fisheries overseers. The erection of the building was postponed from time to time for two main reasons: first, it was decided to wait until the Grand Trunk Pacific was built, and second, to wait until the war was over. The obstacle which now may be considered to lie in the way of the fulfilment of the promise is the excessive cost at the present time.

The proposed building is shorn of all luxuries and is completely economical. All that is provided in the Estimates is $80,000, and the vote will not bear any additional charge for this building. It will, therefore, be necessary to

have a supplementary appropriation of $95,000.00.

As it would be a disappointment to the ecclesiastical authorities who have been conducting the school for some years in temporary quarters if the work is not gone on with, I would ask for your best consideration. I may suggest that perhaps under all the circumstances, the best plan would be to submit the tenders with a full memorandum to His Excellency in Council, recommending the acceptance of the tender and the provision of the necessary amount.

Duncan C. Scott

DEPARTMENT OF INDIAN AFFAIRS
CANADA

OFFICE OF THE
DEPUTY SUPERINTENDENT GENERAL
OTTAWA

February 5th. 1920.

MEMORANDUM

Hon. Mr. Meighen -

Stuart Lake Roman Catholic Boarding school building.

Plans and specifications for the above building are now ready and I have a telegram from Col. Peck, M.P., asking whether we have advertised for tenders. Col. Peck is very much interested in the erection of this school and he and Bishop Bunoz expect that we will advertise for tenders immediately. Before doing so I wish to say that we have prepared plans for a building to accommodate 150 pupils. Due economy has been shown and the construction is in no way extravagant or beyond our needs for that number of pupils.

This school is to be erected on an Indian reserve on the south side of Fraser Lake, midway between the stations of Fraser Lake and Encomb, B.C. Our architect estimates the cost of the building as it stands at not less than $149,000.00. In my memorandum on the estimates, submitted on the request of Sir Henry Drayton that we should cut them down, I mentioned that we had simply asked for the same amount as last year and of this amount I had allotted $80,000.00 for the building at Stuart Lake. I do not think it proper even to advertise without letting you know the situation. If we advertise and find that our estimate is correct we will have to decide to provide for the difference before letting the contract.

If you think well I will ask for tenders and upon their receipt you can give the matter further consideration and come to a decision.

Duncan C. Scott

Deputy Superintendent General.

Dear Bishop Bunoz,

I have your letter of the 31st. ultimo. I will be very pleased to let you know at the earliest possible moment whether the Government has decided to place in the estimates an item to enable us to begin the Fraser Lake school building this summer.

I am quite unable to reply to the closing sentences of your letter as you did not advise me particularly as to what school or locality you referred to.

Yours sincerely,

Duncan C. Scott

Deputy Superintendent General.

163-1-5

DEPARTMENT OF INDIAN AFFAIRS
CANADA

OFFICE OF
INDIAN AGENT

DEPT. OF INDIAN AFF.
AUG 15 1927
RECORDS

Vanderhoof, B.C.

August 8th. 1927.

S-2.

Sir:-

With reference to your letter of April 14th. last. File No. 163-1-5 relative to the installation of a Refrigerator Plant at the Fraser Lake Indian Residential School and which you authorized an expenditure of $1600-00 for. I beg to attach herewith receipted accounts in duplicate, as well as a letter from the Rev. Principal, amounting to $1814-68.

You will please note what the Principal has to say regarding some other accounts which he is not going to ask the Department to pay owing to the fact that the accounts actually received from the Linde Company amounts to more than authority was actually given for. In talking this matter over with the Rev. Principal and asking for an explanation as to why the amount was so large he informed me that at the time he wrote me,(copy of this letter was forwarded to the Department under date of March 30th. last,) regarding the approximate cost of the Plant he did not figure that the quilting , doors etc and the freight on same would be so high, in fact it amounts to $322-15 and he thought that $100-00 would cover the cost and another $100-00 the cost of the lumber for the partitions, but he is not including the charges for the lumber or piping which would add another two or three hundred dollars to this cost.

1600 only

You will also please find the papers in connection with the Plant enclosed as requested in the last sentence of your letter above noted.

I have the honour to be, Sir,
Your obedient servant,

R. H. Miller
Indian Agent.

RHM/L.

The Secretary,
Department of Indian Affairs,
Ottawa.

Mr. R.H. Moore
Indian Agent Vanderhoof .B.C.

Dear Sir:-

I take the liberty to enclose the principal bills paid for the Refrigeration plant.
There are many others from Fairbanks-Morse Co. for pipes underground to bring water to the plant,which I am keeping, but I consider myself fortunate if the Department would refund what has been paid to the Linde Co.

Just had a word that Mr. Scott Simpson Indian Agent of Cassiar died last month. He was a great friend of mine and naturally feel very sorry.

Yours sincerely

W. Osceola Gen.

Proposal and Specification

To Industrial School,

Lejac, B.C.

We propose to supply, crate where necessary, and deliver

~~XXXXXXXXX~~ to Lejac, B.C.,

Refrigeration Plant on the "Linde System."

consisting of the following principal parts:—

One (1) vertical twin ammonia compressor,
One (1) double pipe ammonia condenser,
One (1) liquid ammonia receiver,
One (1) oil trap,
Pipe coils and valves,
Congealing tanks,
Mains,
Ammonia,
Delivery and erection.

All in accordance with detailed Specifications given hereinafter.

AMMONIA COMPRESSOR

(Vertical Enclosed Linde Type)

To be supplied of our vertical enclosed self-oiling type having one single acting cylinders.

Cooling Power—The compressor when working in connection with condenser and refrigerator of equal capacity, has a cooling power equal to one refrigerating tons per day, when operating at 200 revolutions per minute, and in accordance with the standards of the American Society of Refrigerating Engineers.

Construction—Of this compressor is such that the connecting rods as well as the main bearings are enclosed in the hollow base of the compressor, but easy of access by removing the front cover of the base. The cylinders being cast separate are securely and accurately bolted to the compressor base, therefore can be easily removed and replaced.

Cylinders—To be water-jacketted, each cylinder to have a diameter of 3½ inches and a stroke of 4 inches.

Safety Heads—Each cylinder to be supplied with a safety head so that in case any foreign matter, or a rush of liquid should enter the cylinders, the safety heads will lift, thereby preventing as far as possible any damage.

Valves (patents pending)—Are so constructed that they can be readily withdrawn and examined by removing the cylinder covers. The valves are guaranteed to work mechanically silent. Spares will be supplied.

Pistons—To be supplied of our double trunk construction, accurately turned and fitted with metallic rings.

Connecting Rods—To be supplied of steel with anti-friction metal bearings. The construction to be such that both bearings can be easily adjusted after removing the compressor base cover.

Crankshaft—To be made of steel and to pass through a stuffing box on the compressor base.

Flywheel—To be supplied turned and faced suitable for belt drive and to be 24 inches in diameter by 4 inches face, and to weigh about 200 pounds.

Lubrication—The compressor base is made hollow and filled with a special nonfreezing oil so that the main bearings and connecting rods are running in oil. The base cover is fitted with an oil gauge.

Oil Trap—One to be supplied by us.

Scale Trap—One to be supplied by us.

Relief Valve—One to be supplied of the automatic safety type to prevent damage in case of excessive pressure due to failure of water supply, etc.

Packing—Compressor gland to be provided with flexible, semi-metallic packing.

AMMONIA CONDENSER

(Double Pipe)

To be of our latest Double Pipe Type, and to consist of one sections, each section to contain two double pipes about 12 feet long over all.

Construction—The Construction of this double pipe condenser is that a $1\frac{1}{4}$ inch water pipe is placed inside of a special 2 inch lapwelded ammonia pipe. The water for condensing purposes passes upwards through the $1\frac{1}{4}$ inch pipe and the ammonia gas to be condensed passes downward between the outside surface of the $1\frac{1}{4}$ inch and the inside of the 2 inch pipes. On account of the gas and the cooling water travelling in opposite directions and on account of the small space between the two pipes, the ammonia gas is cooled and liquified quickly.

The 2 inch ammonia pipes are fitted with special ammonia flanges screwed thereon and bolted at each end to special semi-steel flanged return headers and fitted with lead gaskets, thereby securing a tight joint. The $1\frac{1}{4}$ inch water pipes are fitted at each end with unions and connected to return bends.

Where more than one section of condenser is supplied the different sections will be connected at top and bottom by special headers and each section to have a valve on the inlet and outlet, so that each section can be shut off and disconnected from the main system either for inspection or repairs without interfering with the working of the remaining sections.

Stands—Of heavy construction are supplied by us.

Liquid Ammonia Receiver—One to be supplied about 6 feet long by 6" inches in diameter and to be of suitable construction. The receiver to be supplied with inlet, outlet, and drain valves, and to have suitable stands on which to rest.

Receiver will be fitted with safety valve and connections.

Large Cooler

We will supply the following:-

Approximately 192 feet of 1½" ammonia coils with stands.
One expansion valve.
One globe valve.
One 16 gauge galvanized congealing tank about 9' long.
by 2' wide by 2' deep.

Small Cooler

Approximately 96 feet of 1½" ammonia coils with stands.
One expansion valve.
One globe valve.
One 16 gauge galvanized congealing tank about 9' long.
by 1'2" wide by 2' deep.

This allows each room to be operated singly or together as required.

Exclusions.

It is understood that you will supply the following:-

Cartage on equipment from Railway to Industrial School.
Board and room for our Engineer.
Foundations for machinery.
Water and drain connections.
Salt for congealing tanks.

Ammonia Connections—Sufficient ammonia connections to be supplied to connect the various parts of the plant. It is understood that the plant is to be arranged with the various parts adjacent to each other.

These connections to consist of Pipe Mains, Valves, Flanges, Bolts, Nuts and Gaskets, also necessary Bends and Tees. Where possible all mains will be cut and flanged in our shops to facilitate erection. All ammonia pipes under two inches diameter to be extra heavy.

Gauges—Consisting of one high and one low pressure gauges to be supplied by us, mounted on suitable gauge board.

Spanners—To suit each size of nut on the machine to be supplied by us.

~~**Belting**—For driving the various parts of the machinery in connection with this plant to be supplied by~~

Ammonia and Calcium—The first charge necessary for the testing and starting of the plant to be supplied by us . If the ammonia is supplied by us the cylinders remain our property and to be returned to us immediately after plant is erected, otherwise must be paid for by the purchaser within 30 days after the erection is completed.

Drawings—Showing the general arrangement of the plant and of the pipe connections between the various parts to be provided free of charge. Sufficient details are to be given in the drawings to enable the work to be erected. Instructions for starting and working the plant to be supplied by us.

Testing—All parts of the plant will be thoroughly tested by hydraulic or air pressure in our shops before delivery, and if the plant is erected by us, same will be tested after erection by air pressure to assure that all joints are tight and properly made before charging with ammonia.

Delivery—The plant will be delivered F. O. B. our Works freight paid to Lejac, B.C.,
in four weeks from date of order, unless delayed by causes over which we have no control such as Fires, Acts of God, Riots, Strikes, Carriers delay or similar commotions of any kind.

Erection—We to supply one engineer to erect our machinery and plant according to our specification and drawings and we will supply all labour necessary for the assistance of our engineer.

After the erection is completed and the plant started, our engineer will instruct your engineer how to operate the plant.

It is advisable that your engineer or employee who is to run the plant, should assist our engineer in the erection of our machinery so that he becomes thoroughly acquainted with the construction and arrangement of the whole plant.

It is Understood—and agreed that you are to furnish light for our men to work by, to supply necessary timber and scaffolding needed for the erection, and also provide our engineer with suitable places wherein to work and keep the machinery, tools and fittings free from damage.

Responsibility—Our engineers are supplied by us for the erection of our machinery and plant only: if our engineers do other work than specified herein, either on the Purchaser's request or otherwise, it is distinctly understood and agreed that we are not responsible or liable for such work.

Delays—After our engineers have started with the erection and they are delayed by the Purchaser in not having completed the work he has to supply under this contract, it is understood and agreed that for any such delay the Purchaser has to pay us the engineer's wages and all expenses we are put to thereby.

Damages—If while our engineers are erecting our machinery, some part or parts get broken, or if after same has been erected either by ourselves or by the purchaser, and during testing or running any part or parts of our plant are found defective, we shall use our utmost endeavour to replace such part or parts as quickly as possible. It is, however, distinctly understood and agreed that we are not liable for any damage whatsoever resulting from such broken or defective part or parts beyond replacing same free of cost to you.

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

Library and Archives Canada / Bibliothèque et Archives Canada
www.collectionscanada.gc.ca

Testing—Immediately after our engineers have erected and started the plant, they will operate our machinery ~~for one week~~ to show that the plant fulfils our guarantee.

If, after this test is made, or if the erection is done by you, you are unable to obtain the guaranteed results, and if we are informed of this by you by registered letter to our Head Office in Montreal within 60 days after completion of the erection of the plant we agree to have our engineer or engineers make a further test, and should he or they not succeed in demonstrating the full guarantee of the plant, we agree to supply a larger plant which will do the guaranteed work without additional cost to you. It is, however, distinctly understood and agreed upon, that our entire liability is limited to the enlarging of our plant.

If our engineer, or engineers, should show that the plant is capable of accomplishing the guaranteed work under the conditions as stated herein, then you agree to pay to us, his or their salary and expenses in connection with such tests and accept the plant.

It is further understood and agreed upon, that the termination of the above mentioned 60 days constitutes your acceptance of the plant as being in accordance with our guarantee.

Taxation—All local or provincial taxes liable to be levied on outside Companies or their employees to be paid by the purchaser.

Verbal Understanding—It is distinctly understood and agreed that outside of what is stated in this Proposal and Specification there is no verbal understanding of any kind whatsoever.

Proposal and Specification—It is understood that the sizes of the different parts of the apparatus as specified herein may be changed by us if we consider it advisable to do so for the efficient working of the plant or to suit prevailing conditions.

Prices—Prices submitted are for immediate acceptance.

Exclusions—This offer is exclusive of all masons', bricklayers', excavators' and carpenters' work other than specified. Cutting away and making good to walls, ceilings, doors or partitions through which our pipes have to pass. Of any transformer, or electric wiring from transformer to starting boxes or switches for the motors. Of any parts not specified.

Fire Insurance—As soon as the whole or any portion of the above plant is delivered on your premises, you to insure same (with loss payable to us) against loss or damage by fire, in a first class Insurance Company, for the total amount as per contract price, and to keep it fully insured until the full amount for the plant has been paid to us in cash. The receipts for the premium as well as the policy to be delivered to us.

It is understood that all damage or destruction occasioned directly or indirectly by fires, etc., to the plant or any portion of it, on your premises shall be borne by you whether the plant be wholly or only partly erected or be lying unerected and notwithstanding any arrangements as regards terms of payment, and that the value of the plant or such portion of it as may be so damaged or destroyed shall be paid by you to us within thirty days from the happening of such damage or destruction.

Property Rights—It is specially understood and agreed that the title, ownership and right of possession in the said machinery and plant shall not pass from us, notwithstanding its delivery to you, until the whole price thereof shall have been paid to us in cash; and it is further agreed that we shall have the right, in case of default by you in any of the payments as stipulated herein, or any note or notes given by you in connection herewith to take possession of the machinery and plant, and to retain all sums which may have been paid by you to us on account thereof, as a rental charge therefor without prejudice to any rights under this contract or by way of damages. It is furthermore understood and agreed that in case of a judgment obtained against the purchaser that the judgment does not merge or interfere with any of our rights under our lien or property rights.

Guarantee—We guarantee you against all suits at law for infringements of patents.

We undertake to replace free on your premises, any part of our machinery that may fail within twelve months from date of delivery, owing to original defects in the material or workmanship.

We guarantee that the plant when erected according to the drawings supplied by us, and operated in exact conformity with our instructions, shall be capable of doing the following work:

That the compressor has a cooling capacity equal to the melting of one ton of ice in twenty-four hours, according to the Standard of the American Society of Refrigerating Engineers.

Under the following conditions:—That sufficient dry steam, electric current of specified characteristics, or other driving power is supplied by you to run our machinery the necessary hours per day at the specified speed. That sufficient cooling water is supplied to the Condenser at initial temperature of 60° Fahr. That the various rooms and all the cold pipes exposed to the atmosphere are thoroughly and efficiently insulated. That the doors of the cold rooms are not kept open unnecessarily.

Mr. R. H. Moore
Indian Agent
Vanderhoof, B.C.

Dear Sir:-

Herewith I submit the Quarterly Report, ending Sept. 20. 1927.

The pupils enjoyed their holidays, though some of those who spent them at home are not so healthy looking as they were in leaving school, likely for want of proper food or regularity.

As usual we had to go around the camps to gather them, the generality of parents do not appreciate yet the advantage of education, they would rather keep their children with them.

The refrigeration plant has proved satisfactory during the exceptionally hot summer.

We purchased a truck to haul freight from the station so necessary when nigth trains bring perishable goods. A garage for same was also erected.

At present the electric light is extended to the barn and outside buildings.

Having to break new ground we have ordered a tractor with necessary attachments for the purpose, besides it will give our boys a general knowledge of farm implements.

The crops are better than we expected, having had no rain to speak of all this summer. For same cause the potatoes are rather small.

It will take a few weeks more for the pupils to settle down and give entire satisfaction.

Hoping that you will appreciate the efforts made to improve the coming generation in your Agency

Yours truly

N. Coccola o.m.i.

EX'D.

Ottawa, October 22nd, 1927.

Sir:

I have your letter of the 15th instant, informing the Department that there are about 19 school desks at the old Mission school at Fort St. James, the property of the Department, and recommending that they either be transferred to the Fraser Lake Indian Residential School, where they could be utilized, or sold.

In reply I beg to say that if these desks can be used at the Fraser Lake School, you may arrange to have them transferred to that school. The Department would pay the cost of cartage, which it is hoped will be kept as reasonable as possible, and you may forward an account, in duplicate, properly certified, covering the cost of the transportation after the work has been completed.

Your obedient servant,

J. D. McLean,
Asst. Deputy and Secretary.

S-2.

Sir:-

I have been informed that there are about 19 School desks still left at the Old Mission School at Fort StJames the property of the Department and as the building that these desks are in is not quite weather proof I felt that the Department should be notified so that if the Department wishes the desks in qiestion could either be sold to the local schools or shipped direct to the Fraser Lake Indian Residential School where I understand they could be used. If the Department decides on the latter course I would be pleased to receive the necessary authority to move the desks right away before they go through another Winter in a building that is not rain proof. If this authority is granted I would respectfully request that cartage charges on the desks be allowed as the move is about 100 miles by road and would have to be done by motor truck and the sum of thirty-five or forty dollars would be necessary to cover the dray man's charges.

Sir:

I have your letter of the 30th ultimo, enclosing a voucher, in duplicate, covering the fees for the year 1927 on the inspection of the two boilers at the Fraser Lake Indian Residential School, Lejac, B.C.

In this connection I beg to say it is necessary that accounts of this nature be certified by our local Indian Agent for the locality in which the school is situated, and we are forwarding same to him. In future, I shall be pleased if all accounts covering the fees for boiler inspection be rendered to the local Indian Agent in charge of the school at which the work is performed. When the account is rendered by our Agent, with the necessary certificate, payment will be made.

Your obedient servant,

Sir:

I have your letter of the 13th instant, relative to the amount of the cheque received in payment of the account rendered for the inspection of the two boilers at the Fraser Lake Indian Residential School, and claiming a balance of 36 cents thereon.

In reply I beg to say that the account received was for payment of the annual fees at $16.45 for each boiler, or a total of $32.90. From this amount a deduction of 10%, or $3.29, was allowed, leaving the sum of $29.61, and a cheque for this amount was sent. We are unable to ascertain from the account as rendered that any further balance is due.

Your obedient servant,

A. F. MacKenzie.

Dear Sir:-

I beg to submit the reports of our School for the quarter ending June 30.

The health of the pupils has been good. The progress in school satisfactory.

The boys have been helping in the seeding and learning to handle the farm and garden implements.

The girls were kept busy in making clothes, mending and fancy needle work.

We are still waiting to see what the Department is going to do towards the completion of outside buildings &.

Residential School, Lejac, B.C., Aug., 26th. 1929

Mr. R.H.Moore,
Indian Agent,
Vanderhoof, B.C.

Dear Sir:-

Referring to your letter of the 24th. instant I wish to say; in the hope that the new Piggery, in appearance and usefullness, should be in keeping with the other buildings of the Government I had plans made which I am enclosing.

This plans would call for not less than $1500-00. To this amount should be added $250-00 to defray the expense of piping and trenching for water connections.

We are willing to do as much of the labour as possible with manual training Instructor and the boys in order to keep down expenses.

Should the department be willing to adopt any other plan we would be thankful and do our best to carry it out, feeling sure that the Department will never build anything that would be a disgrace to the property.

We are interested in the honour of the Government as well as to the welfare of the Indians.

Yours truly,

Signed:- N. Coccolo

Ottawa, August 14, 1929.

Sir:

I have your S-2 of the 7th instant, with reference to the erection of a hog pen for the Fraser Lake Indian Residential School. $800 is all the Department allows for a hog pen, and a building which can be erected complete for this amount should be built. Construction will be on a day labour basis, under the supervision of Mr. T. P. Smithers, of Vanderhoof. The materials will be purchased by yourself, after consultation with Mr. Smithers.

If a more expensive building is desired by the Rev. Principal, the school management will have to pay the balance of the cost. The expense can be kept at a minimum if the older boys and the manual instructor at the school are employed in the work, without cost to the Department other than the regular salary of the instructor. Labour returns, in duplicate, should be forwarded, showing the receipts of the men engaged. An accountable cheque for this purpose will be directed to you upon application. Materials should be purchased by yourself from the best available sources.

Your obedient servant,

A. F. Mackenzie,
Acting Asst. Deputy & Secretary.

R. H. Moore, Esq.,

SCHOOLS BRANCH
AUG 14 1929

Sir:-

I beg to acknowledge receipt of your letter of the 27th. ultimo, File No. 163-1-5, advising that the sum of $800-00 is available this year to build a hog pen at the Fraser Lake Indian Residential School, and asking for a recommendation as to the best method of arranging for the erection of same.

In this connection I wish to point out that the money available is just about one third of the estimated cost of the building when completed and as this amount will only go a short way towards the building of same, I would recommend that the building this year be done by day labour, with Mr. T.P.Smithers of Vanderhoof in charge. You will please remember that Mr. Smithers was in charge of the work done last year at the School and he proved very satisfactory, hence my recommendation that he be employed again this year. Trusting to hear from you at an early date.

I have the honour to be, Sir,

Your obedient servant,

R. H. Moore.

163-1-5.

Ottawa, September 16, 1929.

Sir:

Mr. Inspector Pragnell, who visited the Fraser Lake Residential School in August, last, makes the following recommendations:

1. That a new root cellar be provided.
2. Fire extinguishers refilled and the boys trained in their use.
3. Stove pipes from the jacket heater, which are in a dangerous condition, having eight bends from the heater to the exit, should be made safer and given better draft.
4. The heater is too close to the gasoline engine to be safe.
5. Steam boiler in laundry too small for work required and should be replaced by a larger boiler.

You should arrange for the purchase of the refills required for the fire extinguishers and see that they are installed and the extinguishers placed in a satisfactory condition and ready for immediate use in case of fire. The older boys should receive instruction in their use, and fire drills should be given the pupils.

Please report regarding the other recommendations of the Inspector, giving an estimate of the cost of any work you would recommend be carried out. Full particulars should be given regarding the root cellar and the replacing of the present steam boiler in the laundry by a larger boiler.

The school authorities should change the present location of the jacket heater and adjust the stove pipes therefrom in order that there will be no danger from fire.

The Department will be pleased to hear from you regarding the matters referred to at an early date.

Your obedient servant,

A. F. MacKenzie.

INSPECTION REPORT ON STUART LAKE AGENCY (NO.7)AUG 26, 1929.

x x x

SCHOOLS

I visited and went over Le Jac Residential school at Fraser Lake. Holidays were on but I met the Principal, Rev. Father Coccola. The crops were excellent. I also saw the new pig pens. The barn was also in first class condition and I saw the new pedigree bull. A new root cellar is badly needed. The Manual training shop is working well and some very good work is being turned out by the boys. I also went over the main building with Mr. Moore and the Principal. The Fire extinguishers want refilling and the boys trained in their use. Mr. Moore is going to test their fire drill when school reopens. The stove pipes from the Jacket heater are dangerous. It is too far to its exit, and takes too many bends, about eight. This can be rectified at little cost, made safer, and with better draft. The heater is also too close to the gasoline engines to be safe. The steam boiler in the laundry is now too small for the work required. It cannot supply enough steam for the washing machines, and drying machines in the laundry, especially in winter, It should be replaced by a larger boiler.

Vancouver, B. C.
August 31st. 1929.

S-2.

Sir:-

In acknowledging receipt of your letter of the 14th. inst. File No. 163-1-5 relative to the erection of a hog pen at the Fraser Lake Indian Residential School, I beg to state that I forwarded a copy of your letter to the Principal so that he would understand fully the views of the Department in the matter. In reply to this I received a letter from the Principal, copy of which I attach hereto, along with the Blueprint of the proposed Piggery, and you will see from these that the amount allowed by the Department is just about half enough, however, I must say that I feel very much the same way about the Building as the Reverend Principal does and would prefer to see a Piggery built that would be in keeping with the other buildings already on the ground. Furthermore, material is much more expensive here than in more accessible places owing to the high freight rates which prevail along this line of Railway, and should we erect an $800.00 building it would not begin to accomodate the number of pigs that are usually kept at the School, and for your information I would respectfully point out that there are on an average of four brood sows with their litters always on hand as well as a Boar and some ready for killing. However, I am also enclosing the blueprint sent by the Principal and I think you will agree with me that the proposed building is not only substantial but will also be a credit to the School and to the Department.

Please do not misunderstand my action in again bringing this question before the Department, but I feel that I would not be doing the right thing to the Department were I to commence building before laying all the facts before you. Consequently, I would respectfully suggest that you please take this matter into consideration again, going over the plans carefully and if possible raise the appropriation by as much again. I fully understand the difficulty that you have to contend with insofar as finding funds to cover all these different improvements, but in case funds are not available this year could the Principal advance an equal amount with the Department on the understanding that he would be reimbursed after April 1st. 1930. ? If so I am sure that he would be willing to go ahead. In closing please allow me to again thank the Department for the many kindnesses and considerations allowed me on behalf of this Agency onpreviousoccasions and it is knowing the consideration you have always given my recommendations before that make me hesitate before asking you to again consider this question. Trusting to hear from you favourably in this regard at your early convenience.

I have the honour to be, Sir:
Your obedinet servant;

The Secretary;
Department of Indian Affairs.

Re: Bill W-4243 - $118.63

Dear Sir:

Would refer you to yours of May 23 and returning attached bill.

Upon receipt of your letter, our Superintendent was instructed by this Office to investigate your contentions very closely. This has been done and am now in receipt of his reply to the effect that practically all of the inward and outward freight from August 1928 to July 1929 was for the Industrial School.

In regard to ties mentioned in your letter, these were for the C.N.R. and if you will peruse your Siding Agreement, you will find clause to the effect that we are at liberty to use spur for our own purposes providing such use does not inconvenience you in any way as far as traffic is concerned.

Under the circumstances both Superintendent and myself are of the opinion that charges as outlined are quite in order. Regret, therefore, that we have no other course but to request that you let us have your cheque in clearance.

Yours truly,

A. C. Egan

S-2.

Sir:-

I beg to acknowledge receipt of your letter of the 16th. ultimo, File No. 163-1-5. relative to certain recommend--ations made by Mr Inspector Pragnell, after he visited the School during the month of August. In this connection I wish to point out that I made a regular visit to the School last week and took the different items, mentioned in your letter, up with the Principal and we arrived at an understanding on each of them, the result of which I would respectfully submit here--with for your consideration.

(1). New root cellar can wait until next year.
(2). Fire extinguisher refills have been ordered by the Rev. Principal and instruction and fire drill are given the children once a week.
(3). The location of the Jacket heater should be moved outside entirely where there is an ideal place for it in an alcove between the main building and the chapel, owing to the fact that I have not got a plan of the school where the alcove in question is shown I am unable to explain its exact location so that you would fully understand, but it is a good location and should be very satisfactory, all it needs is a small room built in brick and roofed which will cost approximately $450.00. There is no other place where the heater can be changed to without having just as much stove pipe and elbows as there are at present owing to the distance away from the chimney.
(4). The steam boiler in the laundry is much too small and we got a price on one that is large enough from the Fairbanks-Morse Co. amounting to $535.00 plus $150.00 for freight charges and pipe connections and fittings. It can be emstalled by the engineer without any cost to the Department and if the Department would kindly take this matter into consideration at an early date and advise what action you wish me to take I would greatly appreciate it as it is getting late in the year and the work should be done as quickly as possible.
(5). I would also respectfully suggest that arrangements be made at an early date to provide Fire Gongs for the school, the one in use at the present time is much too small and can not be heard all through the building. I would recommend that four be purchased, one for each floor, and connected up in such a way that they can be rung from any floor and will ring at once on all the floors. These gongs should be a reasonable size so that they will be heard above any other noises that may be happening. I did not get a price on the gongs but no doubt you gotld get an approximate cost from one of the stores in Ottawa.

Trusting that the several points mentioned in your letter are fully covered so that you will understand them, and that I will hear further in the near future.

Yours obedient servant;

The Secretary:
Department of Indian Affairs.

October 31, 1929.

Memorandum:

OK Dcl

DR. SCOTT.

When Mr. Inspector Pragnell recently visited the Fraser Lake Indian Residential School, he made certain recommendations regarding improvements. I am noting for next year's Estimates the advisability of providing a root cellar and changing the location of the Jacket Heater. There is, however, an urgent need in the laundry. The boiler is too small, and the school management offers to make the installation if the Department will purchase a larger one, at a cost of $535, plus approximately $150 freight charges. There should also be approximately $100 expended on the fire gong system, and, as funds can be found now, I wish to recommend these improvements to your favourable consideration.

Russell A. Serrier

Supt. of Indian Education.

163-1-5.

Ottawa, November 2, 1929.

Sir:

I have your S-2 of the 21st ultimo, with reference to improvements at the Fraser Lake Indian Residential School. The advisability of providing a new root cellar next year has been noted for estimates. I have also placed an item in the estimates for a new space for the jacket heater.

You may purchase a new steam boiler for the laundry, at a cost of $535, plus approximately $150 for freight charges and connections. I note that this can be installed without cost to this Department. Your early attention is requested. You may also provide four suitable fire gongs and have them connected up with the alarms. No unnecessary expense should be incurred in this connection.

Your obedient servant,

J. D. McLEAN

J. D. McLean,
Asst. Deputy & Secretary.

R. H. Moore, Esq.,

EXTRACT FROM REPORT OF MR. R. H. MOORE, INDIAN AGENT, VANDERHOOF, B.C., FOR THE MONTH OF OCTOBER, 1929, ON THE FRASER LAKE INDIAN RESIDENTIAL SCHOOL.

Original on File 163-1-7.

Suggestions:-

That four new fire gongs be procured without delay to be installed in the school, one on each floor. Would suggest that suitable ones be procured either by the Department at Vancouver or Victoria. Mr. Ditchburn could get them as we cannot get those items up here. This has been first report since the school opened this term.

OFFICE OF
INDIAN AGENT

DEPT. OF INDIAN AFFAIRS
JAN 17 1930
RECORDS

Vanderhoof, B. C.

January 11th. 1930.

S-2.

Sir:-

I beg to refer you to your letters of August 14th. and September 11th. last, with reference to the Hog Pen which was to be built at the Fraser Lake Indian Residential School, and would take this opportunity to advise the Department that the building is now complete with the exception of putting down the cement floor and this will be done just as soon as the weather moderates sufficiently that it will be safe to lay the cement. I wish to state that the work was done on this building by the Manual Training Instructor, who I might say is a very competent man, and the bigger boys. That saved the expense of hiring a Mr T.P.Smithers by day labour and made it possible to have the building completed this year. The only outlay for labour was for digging the water mains and sewer trench which amounted to $177.00 and which was paid for by the Reverend Principal at the time and which amount he is asking to have repaid as per attached Voucher. All the material in the building, with the exception of some small items, amounted to $1359.15 for which Vouchers have gone forward and which leaves a balance of $140.85. The Voucher attached for $177.00 will overdraw the amount allowed but I am sending it in and should you not be able to meet the few dollars extra kindly deduct from the amount of the Voucher, but to show you that we did the best we could under the circumstances to keep the expense within the amount allowed and still build a structure that will be in keeping with the other buildings, I am also attaching a letter from the Rev. Principal which is self explanatory.

Your obedient servant;

D. McMoore

Indian Agent.

The Secretary;
Department of Indian Affairs.

Dear Sir:-

The Piggery would have been completed if frost had not prevented the finishing of the concrete floor.

The total cost of material and the digging of trenches for foundatons and water pipes amount to $I.685.40.

The work on the building was done by our men and the boys under the direction of the manual training Instructor.

Here are the details:

Lumber from Fraser Lake Sawmills Co.	$337.37 ✓
Cement from A.P. Andersen	$273.40 ✓
Nails from A.H Ashdown	$ I7.0I ✓
Total	$627.78

This amount was paid direct by the Department

Hog pen equipment from Alberta dairy supplies ,co.

	$73I.37 ✓
Digging trenches for foundations &	$I64.50
Total	$895.87

This amount I paid myself waiting for the Department to refund
Kindly find bills receipted.

The accessories for which I am not sending bills having been paid by our savings from the capita grants:

Pipes galvanized.....	$52.69
Extra lumber and shingles.....	$73.I0
I2 Windows	$43.44
Paints	$I2.52
	$I6I.75

P.D. by school

$627.78
$895.87
$I6I.75

627.78
908.37
1536.15

Yours truly

N. Occola Que!.

Enclosed find the bill of the Instructor

Sir:

I wish to refer to your S-2 of October 21st, last, with reference to improvements at the Fraser Lake Indian Residential School. You may change the location of the jacket heater, providing a small room in brick at an estimated cost of $450. You should purchase the materials to the best advantage and keep time sheets, in duplicate, for any labour engaged. I regret there are no funds for the root cellar at the present time.

DEPT. OF INDIAN AFFAIRS
OCT 8 1930
RECORDS

Vanderhoof, B. C.

S-2.

September 29th. 1930.

Sir:-

In connection with the attached Voucher No. 4352. amounting to $483.62 in favour of the Rev. Father N. Coccolo, O.M.I. I would respectfully refer you to your letter of May 21st. last in which you authorised the sum of $450.00 for this work. Upon receipt of your letter I wrote the Principal acquainting him with the contents, and under date of May 29th. I received a letter from him in which he stated that owing to other work of an important nature that he was not quite ready to proceed, but when convenient he would get prices on the materials etc. and let me know. This happened last May and as nothing had been done about it, so far as I knew, on the 5th. of the present month, I wrote the Principal again pointing out that I had not been advised of what he proposed doing or the prices obtained, and suggesting immediate action be taken so that the work would be completed before the cold weather, I received a reply, to that letter, from the Principal in which he stated "that the surest way to find out the cost was to go ahead and build it, this work has been done and in the near future he would send on bills for labour and material which he had already paid." In due course these arrived and as I thought the carpenter work should have been done by the Manual Training Instructor at the School I wrote the Principal and asked for an explanation why this was not done to which he replied under date of the 25th. inst. copy of which is also attached. I trust that the above explanation will be satisfactory and that a cheque in favour of the Rev. Princi-pal will be sent him in due course.

Your obedient servant;

R. A. Moore

C O P Y

Residential School, Lejac, B.C., Sept. 25. 1930.

Mr.R.H.Moore,
Indian Agent,
Vanderhoof, B.C.

Dear Sir:-

Replying to your letter of the 23rd. S-2 I bring to your attention that the work at the jacket heater was done during the holidays when our boys were away, we had to employ outside labour, our men helping when they were not busy with the harvest. Our Manual Instructor was supervising the work and working at the same time to complete the installation of the Jacket in the shortest time as hot water was always needed. That is what made the cost of the improvement to amount to the enclosed figure.

The help of a competent Plumber was also required to make a safe and sanitary job.

Hoping that these explanantions will make matters clear.

Yours truly,

Signed:-

N. Coccolo, O.M.I.

RECORDS

Vanderhoof, B. C.
June 22nd. 1931.

S-2.

Sir:-

I beg to inform you that I have this day received a letter from the Rev, Principal of the Fraser Lake Indian Residential School, which says in part:

"I have to bring to the attention of the Department that our lighting battery is in bad condition and should be rebuilt as soon as possible. I would suggest that the necessary material be supplied and the work done during the vacation period by our Engineer. We have obtained competitive prices from two firms in Vancouver and the cost of material will be about $500.00. If repairs are delayed it may become necessary to renew the battery."

For the information of the Department I wish to point out that the set of batteries in question was installed at the School in June 1926, and from information I got, I understand that the average life of a set of batteries, such as we have at the School, lasts about six years. The batteries cost $1145.00 at the School siding so that to have them rebuilt will cost almost half of the original cost. If the price of batteries has gone down anything worth while we might be able to get a new set for very little more than it would take to rebuild the old set. However, I can not get that information here without sending out for it, but you might be able to get it in Ottawa, so if you would kindly take the matter into consideration at your early convenience and advise if we may incur the necessary expenditure this year. I might add that when the estimates were made out last summer this battery was in good shape, but they go in a hurry once they start.

Your obedient servant:

R.H.Moore.
Indian Agent.

The Secretary:
Department of Indian Affairs.
Ottawa.

AS I have just found out that a rebuilt battery is just as good as new and will last just as long.

E-1.

Ottawa, June 4, 1931.

Sir:

I have your letter of the 26th ultimo, enclosing copy of a communication from the Principal of the Fraser Lake Indian Residential School, relative to the erection of a new root cellar.

In reply I have to say that our appropriation for the present fiscal year was considerably reduced and funds can be provided for only the more urgent requirements at residential schools. I regret, therefore, that the Department will be unable to provide, this year, the expenditure required in the erection of the root cellar.

Your obedient servant,

A. F. MacKenzie,
Secretary.

Vanderhoof, B. C.

May 26th. 1931.

E-1.

SXX.

Sir:-

I beg to attach hereto a letter received from the Reverend Principal of the Fraser Lake Indian Residential School, which is self explanatory.

In this connection I would respectfully refer you to your letter of May 21st. 1930, File No. 163-1-5 in which you advised that no funds were available for this work last year, or in other words in the estimates of 1930-31. However, I included this amount again in the estimates for 1931-32 which went forward from this Office to Mr Commissioner Ditchburn under date of July 12th. last.

In the above connection I would like to add to the representations made by the Rev. Principal, that the Cellar is a necessity, and I sincerely hope that the Department may be able to see its way clear to have this amount available for the construction of the Cellar this year.

Trusting to have a favourable reply in this connection, so that I may be able to inform the Principal. I might add that the work should be done during the holidays, or at least a start made on it so that it could be completed before the vegetables are taken out of the ground this Fall.

Your obedient servant;

R.H.Moore.
Indian Agent.

The Secretary:
Department of Indian Affairs.

Mr R. H. Moore.
Indian Agent.
Vanderhoof, B. C.

Dear Sir:-

Allow me to remind you of the necessity of a new root cellar at our school, for which application was made in past years. The present cellar, too small, built ten years ago is caving in, repairs were made at different times but now is threatening a complete ruin and dangerous for anyone going in.

We need a larger cellar than the old one, in proportion of the development of farm and garden and the number of pupils at the present time.

To be lasting and convenient the cellar should be in concrete at the cost of about $2000.00.

Hoping that the Department will come to our help.

Yours truly;

Signed: N. Coccolo, O.M.I.

Ottawa, January 12, 1931.

Reverend Sir,-

I inclose herewith an account of $29.61 received at the Department from the office of the Chief Inspector of Boilers, Dunsmuir St., Vancouver, for inspection of boilers at the Indian Residential School, Fraser Lake. If this account is correct, kindly certify it and forward it to the Department in the usual way in order that the matter of payment may receive attention.

Your obedient servant,

A.F.MacKenzie
Secretary.

163-1-5.

Ottawa, December 3, 1931.

Sir:

Mr. Barry, Inspector of Indian Schools for the Province of British Columbia, in a report on his recent inspection of the Fraser Lake Indian Residential School, recommends that 100 yards of half inch wire cable for the hay fork in the hay barn be supplied. He states that the present rope breaks constantly and is a danger to the children working with the hay, and that this cable would cost approximately $50. You may arrange for the purchase and delivery of the above quantity of wire cable.

Mr. Barry also states that one new set of drills for mending farm machinery and one complete set of taps and dies are required for the use of the blacksmith shop, and that the drills would cost approximately $10 and the taps and dies about $15. You may arrange for the purchase and delivery of these tools.

He recommends that a guard rail be placed around the extractor in the laundry to protect the pupils from walking or backing into the moving parts of the machinery. He states that he discussed this matter with the engineer and that the guard rail may be installed before this date, as the necessary materials were available at the school and the engineer was quite able to do the work, which should be carried out without expense to the Department.

You should make the above authorized purchases from indicated sources of supply, obtaining accounts, in duplicate, which you should attached to proper voucher forms, certify in the usual manner and send to the Department for payment.

Your obedient servant,

A. F. MacKenzie,
Secretary.

R. H. Moore, Esq.,
Indian Agent,
Vanderhoof, B.C.

SCHOOLS BRANCH
DEC 3 1931

E X T R A C T from Inspector Barry's Report Regarding His Inspection of the FRASER LAKE INDIAN RESIDENTIAL SCHOOL on October 22nd and 23rd, 1931.

Original on File 163-1-6.

A cement cellar is required for the storage of fruit and vegetables. The old one is not much further use as it has fallen in. A cellar big enough to store carload lots of fruit and vegetables is required. I understand from the Principal that such a cellar will cost between $2000 and $3000 to construct. I wish to recommend that a large enough cellar be authorized; but I do not know just how correct the Principal is in his estimate of the cost. It is, of course, essential that in this cold part of B. C. some satisfactory method of storage of roots, etc., be authorized.

x x x x x x x x x x x x x x x x x x x x x x x x x x x

The Pig Pen has a concrete and rail interior. It has been well built. I have been asked to recommend that tiles be supplied to construct a drain from the Pig Pen to the top of a hill, from which there is a large natural fall in the ground, which would drain off all water. The length of such a tile drain would be about 100 yards. I think that a wooden box drain would be satisfactory here. The important thing is to have it deep and well covered, so that the water in it will not freeze in the winter. This would probably be much less expensive than a tile drain. Some sort of well protected drain is necessary as the water freezes and will not run off. More and more collects in the Pig Pen and this too freezes.

I wish to recommend the supply of 100 yards of half inch wire cable for the hay fork on the Hay Barn. The present rope breaks constantly and is a danger to the children working with the hay. The cable now recommended would cost about $50.00.

In the Blacksmith's Shop the following are required and their supply is recommended:- One new set Drills for mending farm machinery (one sixteenth inch to one inch are required). This set of drills will cost about $10.00. - One complete set of Taps and Dies are also very badly needed, as the old ones are now completely worn out and quite useless. This set will cost about $15.00.

Laundry:- I wish to recommend that a guard rail be placed around the extractor. This will keep a child from walking or backing into the moving parts of the machinery and is, I think, very necessary. The engineer will probably have done this work by now, as we had a talk about its necessity when I was at the school The materials are available at the school and he is quite able to do the necessary work of installing such a guard rail.

EXT.

Ottawa, November 16, 1931.

Sir:

I have your letter of the 6th instant, regarding the repairs required to the drain from the piggery at the Fraser Lake Indian Residential School. In this connection it is noted that you authorized the Principal to dig a drain to a depth below frost level and to supply the necessary lumber, nails, etc.

In reply I have to say that the action taken by you in having this drain placed in a suitable condition is approved. I would request, however, that, in future, before authorizing any expenditure which the Department will be called upon to provide, you first report the matter and receive the necessary authority, except in case of an emergency, when you should report your action, giving full particulars as to the nature of the work authorized and the cost involved.

INDIAN AGENT

DEPT. OF INDIAN AFFAIRS
NOV 12
REGISTRY

Vanderhoof, B.C.

November 6th. 1931.

S-2.

Sir:-

I would respectfully refer you to previous correspondence in connection with the new piggery that was built at the Fraser Lake Indian Residential School about two years ago. At the time no provision was made for a drain to take off the water from the building except for a short distance below it, which answered the purpose for a time but this fall the water is starting to run over the grounds and to insure against disease among the children, I made arrangements with the Rev. Principal to go ahead and dig a drain from the Piggery to a point about 100 yards below which is well out of reach of the School yard and buildings. This drain I arragned to be deep enough so that it would not freeze and would consist of a box drain set at the bottom of the ditch that is now almost dug . All it would cost would be the price of the lumber and nails. We require approximately three thousand feet of 2" rough lumber and one keg of nails. The lumber sells for about $30-00 per thousand and the nails at about $8-00 per keg. $100-00 would cover the job and as it is most important to get the drainage away from the play grounds and buildings, I took it upon myself to order the material so that the work could be completed before the ground freezes. Kindly give me the necessary authority for this expenditure.

Your obedient servant,

R.H.Moore,
Indian Agent.

OFFICE OF
INDIAN AGENT

S-2.

EX'L.

Vanderhoof, B. C.
September 10th. 1931.

Sir:-

I beg to acknowledge with thanks receipt of your letter of the 24th. ultimo, File No. not given, authorising necessary repairs to be made to the Lighting Plant at the Fraser Lake Indian Residential School, and that prices for same be obtained From Richards & Black of Vanderhoof and B. W. Irwin of Fort Fraser. In this connection, I wish to attach hereto certain correspondence given me by the Rev. Principal which explains the matter insofar as he is concerned, and I am taking the liberty to attach hereto voucher No.5291 for the sum of $395.38 in favour of Rev. N. Coccolo.

Insofar as getting prices from the firms above mentioned, I would just like to say that they are small Garage owners and if asked to quote on a job of this kind they would have to order the materials from the Wholesaler, or the Manufacturer as the case might be, have them shipped to LeJac direct where they would be taken over by the Engineer at the School and the necessary repairs made. This is just what the Rev. Principal did, in fact he ordered, as you will see by the letter, from the Manufacturer at exactly the same price that the Garage men could get, (in fact a little better as they usually order from the Wholesaler and would have to pay his profit) with the exception that no profit had to be paid as would have been the case had the order gone through the local garage, for its only natural that they would expect some profit should it only be 10%. The point I wish to make is, this work was done before your letter of authority arrived as the Principal had to assure himself of light for the School before the end of the holidays, hence his hurry in having the work attanded to.

Your obedient servant:

The Secretary:

OCT 27 1932
RECORDS

OFFICE OF
INDIAN AGENT

E-1.

Vanderhoof, B. C.

October 17th. 1932.

Sir:-

Under date of August 26th. last I submitted the Estimates, to the Office of the Commissioner, for this Agency, for the year 1933-34.

In my covering letter sent with the Estimates, I mentioned particularly about a new lighting plant for the LeJac Indian Residential School, attaching a letter from the Rev. Principal on the subject.

Apparently when the present plant was first installed, it was just large enough to carry the load of the School alone, since then the load has been increased every year with new lines being run to the outbuildings etc., so that now the plant is most unsatisfactory. About a year and a half ago, we had the present batteries rebuilt, after five years service, thinking that we would save the cost of a new set,as the cost of rebuilding was only a fraction of the cost of a new set. However, the batteries after about a years running (after being rebuilt) commenced to go down again and would not hold a charge at all, until now the plant has to be run almost day and night to keep them even half charged. This is a very unsatisfactory state of affairs and the light is getting worse and worse. I send a copy of the Rev. Principal's letter now to you and would suggest that if at all possible that arrangements be made this fall to install a new plant large enough to carry the required load, or else buy a new set of batteries. The drawback about installing new batteries is that, the present generator is too small, so that we would only have the same thing to contend with again in the near future. I would respectfully urge that early action be taken in this matter.

Your obedient servant;

The Secretary;
Department of Indian Affairs,
Ottawa.

H.H.Moore.
Indian Agent.

COPY:-

Residential School,

Lejac, B.C. June 30th. 1932.

Mr. R.H.Moore,
Indian Agent,
Vanderhoof, B.C.

Dear Sir:-

Allow me to bring to your attention to the unsatisfactory lighting condition in our school, remarked by Inspector Barry in his inspection last October.

The Battery is worn out., the present engine 10 H.P. Z type by Fairbanks-Morse has been obsolete for 10 years and the 5 K W Generator is too small to chadge a battery rated at 240 Ampere hours.

The cost of a new battery is almost equal to the cost of a Diesel direct connection lighting plant, which a firm is prepared to install in the School for the sum of $2875-00, sales tax extra.

By use of a Diesel Lister Lighting Plant we would need no Battery which cost $2200-00 delivered, we would have better light and save an outlay of about $400-00 per year in battery maintenance and fuel , in fact this is a low estimate of the probable reduction of operation cost.

Yours truly,

Signed:- N. Coccolo, O.M.I.,
Principal.

Kamloops, B.C., June 15th, 1932.

INSPECTION REPORT STUART LAKE AGENCY No. 10.

x x x

I visited LeJac Indian Residential School. There were 163 children there at the date of my visit. I found everything neat and clean and went over the whole school. Fire equipment was in good order and the chemical extinguishers had been properly refilled. The children were having fish, soup, potatoes and bread for dinner, and were getting plenty of milk to drink. The shingle roof of the building should be painted. The Rev. Principal contends that the summer holidays should officially be made two months and Mr. Moore is inclined to agree with him. Apparently, owing largely to long distances travelled to their homes, and the fact that haying in the agency takes place late, it is almost impossible to get the children back at the prescribed time.

Ottawa, March 4, 1932.

Sir:

Referring to that portion of your report for the month of February, last, on the Lejac Indian Residential School, with reference to the fire escapes, I have to say it is noted that these escapes become covered with ice, caused by the snow melting on the roof of the building, and that you recommend a wooden roof be built over the escapes all the way down.

In this connection I have to say that the Department is not prepared to incur the expenditure required in supplying materials to build a roof over the fire escapes. The school authorities should have a member of the staff or some of the older boys keep the ice removed from these fire escapes each day. If this was carried out from day to day, or as occasion demanded it, the condition referred to by you would be overcome.

Your obedient servant,

T. R. L. MacInnes,
Acting Secretary.

SCHOOLS BRANCH
MAR 4 1932
DEPT. OF INDIAN AFFAIRS
MAR 3 1932
RECORDS

E X T R A C T from Indian Agent Moore's Report for the month of February, 1932, regarding the LEJAC INDIAN RESIDENTIAL SCHOOL.

Original on File 163-1-7.

Suggestions:- That more attention be paid to the farm in connection with the school; this could be done by appointing a Farm Manager, who would be capable of lecturing to the pupils in the class room, as well as attending to the general Farm work.

With reference to the fire escapes at the school, I might say that there is no covering of any kind over them and during this season of the year they get covered in ice caused by the snow on the roof of the building melting during the day, freezing in the evening and during the night, the result being that oftentimes the steps are very slippery and there is usually some difficulty in getting the pulleys to work that are on the bottom of the escape and that lifts up off the ground. This is the first year that we ever had any difficulty in this regard and so far as I can see the only way to overcome it would be to have a wooden roof built over the escape all the way down. No doubt the Department have had the same conditions existing at some of the other schools and were able to make certain improvements, which could be done in this case too. I could not give you an estimate of what the work would cost, but I would suggest that if the Department decide to go ahead with the work that I be allowed to take a carpenter to the school and get him to give me an estimate on what work would cost. On second thought, I could use the Manual Training Instructor who should be able to give me a close estimate on what the work would cost, at least the cost of the material, the work could be done by him and some of the older boys.

EX D.

Sir;

Referring to your circular to Principals of Indian Residential Schools dated Feb. 5 No. I-I-5,we note all what it is said about danger of fire.

Our fire escapes are kept in repair,freshly painted. Snow is removed after evey storm,but it is not so easy to to keep them free from ice,the droppings from the eaves and hanging ice from the roof interfere with the blocks to which the fire escapes are attached.What we will have to do is to prevent that trouble.

Fire drill is pratised according to the weather,the fire extinguishers are kept at the strategic places,some of them have been refilled last year.

The night watchman makes the regular rounds,we are all interested in preventing accidents.

Nov. 3, 1932.

Dear Sir,-

Replying to your letter of the 17th with reference to the electric lighting plant for the LeJac Indian Residential School, I beg to say that it is thought that the Department might consider the installation of an additional 3 K. W. generator, also the providing of a 160 ampere hour battery. There will also be required some changes and additions in the switch board for the operating of the 3 K. W. generator in addition to the one that is already installed. Before authorizing the work, however, I would ask you to kindly obtain and forward to the Department prices for this installation from Mr. B. W. Irwin, of Fort Fraser, B.C. and Richards and Black, Vanderhoof.

I would ask you to also kindly furnish me with a list of the maximum number of lights that are in operation at one time, also any other electrical appliances that are being used in the school, such as heaters, motors, etc. When this information is received you will be further advised.

Yours very truly,

A. F. MacKenzie.
Secretary.

R. H. Moore, Esq.,

DEPT. OF INDIAN AFFAIRS
DEC 5 1932
REGISTRY

OFFICE OF
INDIAN AGENT

S-2.

Vanderhoof, B.C.,
November 28th. 1932.

Sir:-

I beg to acknowledge receipt of your letter of the 3rd. inst. File No. 163-1-5 relative to the lighting plant at the Lejac Indian Residential School.

In this connection I wish to inform the Department that I asked Mr. Irwin of Fort Fraser and Mr. Richards of Vanderhoof to quite me prices on the installation of the generator and battery as instructed by you, but both these gentlemen refused to have anything to do with it as they did not consider it practical for them to handle.

In reply to the last paragraph of your letter I wish to inform you that there are 90 lights going at one time in the school, each light of 40 watts. There are, however, 275 light sockets and there are not any other electrical appliances being used.

I am attaching a copy of a letter sent to the Rev. Principal by Mr. Allen, the Engineer at the School, which is self explanatory and which may throw some further information on the matter. Please advise further in this connection what your wishes are.

Your obedient servant,

R.H.Moore,

Indian Agent.

RHM/L.

The Secretary,
Department of Indian Affairs,
Ottawa.

Residential School,
Lejac, B.C.
Nov. 9th. 1932.

Rev. Father Coccolo, O.M.I.,
Principal,
Indian Residential School,
Lejac, B.C.

Reverend Sir:-

With reference to letter No. 163-1-5, referring to lights at this School, I would say that the plan referred to is not practical.

We could not operate a 3 K.W. generator in addition to our 5 K W generator, as out 10 H.P. engine has not power to run them. In its present condition the engine is fully loaded running a 5 K.W. generator.

The engine is a 10 H.P., R.Z.type by Fairbanks Morse, the type has been obsolete for 8 years. The number of lights in use is kept down to the smallest number and will average about 90 lights of 40 watt capacity. The load including loss in lines shows, 35 Amps at 110 volts on the switchboard.

It would be possible to get over our present difficulty by installing a battery of 160 Amp hour capacity, without the 3 K W generator but with the addition of a new switchboard to control charging, this would however be a very temporary arrangement, as we are 600 miles from a reliable source of repair parts (Vancouver and Edmonton) train and mail service will bot allow of any order being filled in less than 10 days. A battery of 160 hour capacity would run out in 3 days and would be dead in 10 days, that is, after standing 7 days after being exhausted. The fact that we have carried on for 11 years without mishap is no guarantee, but only shows we are nearing the time when accidents can be expected.

I cannot recommend dealing with Fort Fraser or Vanderhoof people in this matter as they are not in a position to render service.

I would respectfully urge that our application for Lister equipment be given careful consideration. These plants are as near fool proof as they can be made, and are used all over the world, often being successfully operated by Peons and natives.

The first cost of the Lister Plant is low. The elimination of a battery is good economy. The cost of operation is very low, and the system of using 2 small units of different size will give 3 load variations.

This is good practice.

Yours Respectfully,

Signed:- Harold Allen, Engineer in charge.

Ottawa, December 10, 1932.

Sir:

I have your letter of the 28th ultimo, enclosing copy of a communication from the engineer in charge, relative to the lighting system at the Lejac Indian Residential School. In this connection it is noted that you were unable to obtain prices from the firms from which you were requested to obtain quotations for the installation of a generator and battery.

The Department has no funds available this year to provide the cost of installing Lister equipment. It is hoped, therefore, that the present lighting system can be kept in a condition which will be satisfactory during the balance of the present school year. An amount will be included in our Estimates for the coming fiscal year to cover the cost of new lighting equipment, but no definite assurance can be given as to whether the item will be allowed.

Your obedient servant,

A. F. MacKenzie,
Secretary.

May 13, 1903.

Memorandum:

Honourable Thomas G. Murphy.

Since writing my memorandum of the 2nd of May with reference to the installation of an electric lighting plant at the Lejac Indian Residential School, at Fraser Lake, B. C. I have received a letter from the Indian Agent in which he states that the Principal is prepared to pay $1,500.00 towards the cost of the lighting plant, the total cost of which will be $3,500.00.

The Principal wishes to instal a Lister automatic plant, and has obtained a price from the John Redden Company of Vancouver, the representatives of the Lister Company. The above mentioned figure is their quotation completely installed and tested at the School. I would recommend for your consideration that the installation of this plant be authorised.

This plant is entirely British made, and $3,000.00 is provided in this year's vote for Indian Eduction for this work.

Deputy Superintendent General.

Sir:-

I thank you for your letter of the 12th., inst., File No. 163-1-5 regarding the installation of a new lighting plant at the Lejac Indian Residential School as well as need for a new bake oven and painting of the roofs of the School Buildings.

With reference to the lighting plant, I beg to attach hereto correspondence received this morning from the Rev. Principal which is self explanatory. After perusal please return the letters to me. I would also ask that you write me in this connection after reading the Principal's letter.

Regarding your remarks about the bake oven and the repainting of the roofs, I wish to say that your instructions in this regard will be communicated to the Rev. Principal, but as the Rev. Principal is willing to stand the sum of $1500-00 for the lighting plant I thought that I would wait until I heard from you as to whether or not this offer of the Principal's would make a difference in so far as your decision goes about incurring the expense of the oven and the repainting of the roofs. Please advise me in this connection also.

Your obedient servant,

R.H.Moore,
Indian Agent.

Ottawa, April 12, 1933.

Sir:

I have your letter of the third instant, regarding the providing of new lighting equipment at the Lejac Indian Residential School and also the need of a new bake oven and the repainting of the roofs of the school building.

In reply I have to say that there is an amount included in our Estimates for the current fiscal year for new lighting equipment, but, until the funds are provided by Parliament at its present session, the Department will be unable to authorize the purchase. However, the matter will be kept in mind and you will be advised at a later date.

With reference to the purchase of a bake oven and the providing of a quantity of shingle stain, oil, etc., for the repainting of the roofs, I have to say that we will have no funds available for these services this year. Our Appropriation has been very considerably reduced, and, unless the school authorities themselves can provide the funds to purchase the oven and the shingle stain, etc., required, these items will have to stand over for the present.

Your obedient servant,

A. F. MacKenzie,
Secretary.

Sir:-

I would respectfully direct your attention to your letter of December the 10th., 1932, File No. 163-1-5 relative to the lighting system at the Lejac Indian Residential School, and more particularly to the last sentence of your letter which says in part:- " An item will be included in our estimates for the coming fiscal year to cover the cost of new lighting equipment, but no definite assurance can be given as to whether the amount will be allowed."

In the above connection I wish to point out that this expenditure is an urgent necessity and I sincerely hope that I will receive the necessary authority to purchase the new plant as outlined in the Rev. Principal's letter of January the 30th. last, copy of which was sent to the Department, at an approximate cost installed of $2875-00.

I would also request authority to expend the sum of $450-00 for a new bake oven for the School which is also badly needed, and the sum of $225-00 which is the estimated cost of shingle stain, oil etc. for the repainting of the roofs of the School buildings.

Your obedient servant,

R.H.Moore,
Indian Agent.

B.C. Ref: 33E.1250-4.

6."E" (10).VANDERHOOF.

B.C. 12-6-33.

LEON PRINCE.(INDIAN).FORT ST.JAMES.B.C.

ALLEGED THEFT OF PROPERTY FROM INDIAN SCHOOL.

ASSISTANCE TO INDIAN DEPT.

(1). Adverting to reports dated 30-11-32, 13-1-33, and 11-3-33 forwarded from this office regarding the alleged theft of (16) Window Frames, from an old dis-used Indian School at No. 1. Necoslie Indian Reserve, (13) Frames were returned by Leon Prince, who had been instructed to act as Caretaker by the predecessor of Father Allard.

33E.1250-4.

(2). Continual observation and enquiry has been carried out by Cst. Jennings, B.C.P.Police and Myself on all patrols to the Fort St.James District for the discovery of the remaining (3) Frames. Cst. Jennings reports that whilst on Provincial Police investigations, North of Ft.St.James, he made a close check of the windows in the cabin where the missing Frames were asserted to be by Father Allard, and although these Frames were similar, the search proved futile.

1-51-32.

(3). During visits to Indian Houses at Necoslie Indian Reserve and the surrounding district the people assured me that the Complainant was exceptionally fortunate in having the (13) Frames restored, as all of these would have long since been destroyed by stones from the Indian Children, had not Leon Prince acted as Caretaker to safeguard this, for which he did not receive any payment.

30-11-32.
13- 1-33.
11- 3-33.

D.D.22-6-33.

(4). Leon Prince was emphatic in stating that the remaining (3) Frames had been destroyed several years ago, otherwise they would have been returned by Indians who were assisting in the recovery to the fullest extent. In view of these circumstances, also that Father Allard, the Complainant and only witness who could identify the missing Frames has been transferred to the Arctic Regions, I would respectfully request that this Case be concluded, as it is impossible to prove any charge of Theft in this connection.

Cpl.
L.F.Fielder.Reg.#9521.

163-1-5.

SAM.

Ottawa, October 16, 1933.

Sir:

The Department has received the report of the Engineer of the Public Works Department on his inspection of the boilers and machinery at the Lejac Indian Residential School. He recommends that a solution of 1 lb. sal soda to 3 gallons of clear lime water be used, using one gallon of the solution every three weeks abd blowing two inches of water from the boiler every week, in order to overcome the pitting of the tubes.

With reference to Boiler No. 22461, he stated that one of the tubes started to leak. This tube must be renewed or a bolt tube stopper be used for the next firing season. He recommends that 6 bolt tube stoppers be secured so that, if any tubes started to leak, repairs can be made in a few minutes by the staff, instead of shutting down the plant for perhaps weeks until new tubes can be obtained. The test cocks and water gauge should be overhauled and repacked. The main stop valve should be repacked and the fusible plug renewed.

Regarding Boiler No. 44411, he states that several tubes were leaking at the top tube sheet. These should be re-expanded and will last a little longer. The internal condition of this boiler was very poor. It had the appearance of being badly used. He further states tgat tge boilers at this school have been neglected but that better results are expected with the new engineer.

Concerning the laundry equipment, he recommends that a new pipe guard be placed around the belt end of the washing machine. Materials for the purpose are at the school and the work can be done by the staff.

Fresh water Service. The Engineer reports as follows: "The water supply is pumped from the lake. The pumps are connected together and have independent shutoff valves on the discharge line, but there are no relief valves between the shutoff on the discharge and the pumps. One should be installed, as these valves are closed and the pumps started, a serious breakdown of the pump might occur. At present,

- the pump house

R. H. Moore, Esq.,
Indian Agent,
Vanderhoof,

the pump house, pumps and gasoline engine are in a very dirty condition, which will contaminate the drinking water if not attended to."

Cold Storage. The Engineer states: "The expansion mains have been allowed to get badly corroded and there is an ammonia leak in the Fresh Meat Room. These must be attended to, the mains cleaned off and painted with black Asphaltum."

You should draw to the attention of the Principal the report of the Engineer, regarding the boilers and equipment at this school. He should arrang to have the engineer at the school carry out the repairs and suggestions mentioned. Any cost must be met by the school authorities, from their per capita or other receipts. This Department has no funds available to pay any cost involved.

Your obedient servant,

A. F. MacKenzie,
Secretary.

Public Building,
Victoria, B.C.,
August 31st, 1933.

C.F. Dawson, Esq.,
Dist. Res. Architect,
Dept. Public Works of Canada,
Victoria, B.C.

Dear Sir: Re: Inspection of Boilers and Machinery,
Indian Residential School, LeJac, B.C.

On July 29th and 30th, 1933, I made an inspection of the mechanical plant of this school which consists of:

Two Horizontal return tubular boilers, 60 in. in diameter by 16 ft. long, containing 72 3" x 16' tubes, longitudinal joint, 3 rivetted lap. Nos. 22460 and 22461 B.C., rated at 104 H.P. each and built in 1923, making them ten (10) years old.

One Vertical tubular boiler, 28 in. in diameter by 67 in. high, containing 36 2" x 36" tubes, longitudinal joint, double rivetted lap. No. 44411 B.C., rated at 6.9 H.P. and built in 1929, making it now 4 years old.

Two 3-1/2" x 6" Duplex pumps belt driven by a 10 H.P. Fairbanks-Morse Z Type Gasoline Engine, used for fresh water supply.

One 3-1/2" x 4" Ammonia Gas Compressor, driven by a 3 H.P. Fairbanks-Morse Z Type Gasoline Engine.

One 6 H.P. Fairbanks-Morse Z Type Gasoline Engine, operating the Laundry Machinery.

One 7 H.P. Gasoline Engine, operating the wood cutting plant.

A new Lister cold starting Diesel lighting plant of one 5 H.P. Diesel Engine direct connected to a 2.5 K.W. Generator and one 9 H.P. Diesel Engine direct connected to a 4.5 Generator is being installed.

BOILER NO. 22460.

I gave this boiler a careful hammer test and found that all stays, rivets and plates in good condition. I then gave it a Hydrostatic Test of 40 lbs. per sq. in. and found it quite tight.

The internal condition of this boiler is very fair. There is some pitting started on the plates and tubes, which must be treated.

The test cocks, water gauge and blowdown cock are in good condition. The main stop valve is to be overhauled. The blowdown pipes are fair. The fusible plug is to be renewed. The steam gauge is 1 lb. light. The Safety Valve works freely and blows off at 5 lbs. pressure.

Indian Affairs. (RG 10, Volume 6444, file 881-5, part 4)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

POOR-COPY

Library and Archives Canada / Bibliothèque et Archives Canada
www.collectionscanada.gc.ca

BOILER NO. 22461 B.C.

This boiler is in a similar condition to No. 22460, but the pits are more pronounced. During the Hydrostatic Test, one of the tubes started to leak. An attempt to stop the leak with some patent preparation had been tried but without success. This tube must be renewed, or a bolt tube stopper be used for the next firing season. Owing to the very isolated position of this plant, I would recommend that 6 bolt tube stoppers be procured so that if any more tubes start to leak, repairs can be made in a few minutes by the Staff instead of shutting down the plant for perhaps weeks until new tubes arrive from the Coast. Owing to the pitting, leaky tubes must be expected until the pitting has been arrested. If this had been reported on sooner, measures could have been taken to prevent it.

I would recommend that a solution of 1 lb. Sal Soda to 3 gallons of clear lime water be used, using one gallon of the solution every three weeks and blowing two inches water from the boilers every week.

The test cocks and water gauge must be overhauled and repacked. The main stop valve must be repacked. The fusible plug must be renewed. The Steam Gauge is correct. I have issued a Certificate allowing a steam pressure of 5 lbs. and condition, on account of pitting, fair.

BOILER NO. 44411 B.C.

I gave this boiler a careful hammer test and found that all stays, rivets and plates were in good condition. I then gave it a Hydrostatic Test, but could not complete it as several tubes were leaking at the top tube sheet. These must be re-expanded and will last a little longer.

The internal condition of this boiler is very poor. It has the appearance of being badly used. Steam must have been raised too quickly as the tubes have the appearance of being badly burnt and will require renewing next summer.

The test cocks, water gauge and blowoff cock are in good condition. The Safety Valve works freely by hand.

I must now state that the boilers of this plant have been neglected, but better results are expected with the new Engineer.

I have issued a Certificate allowing a steam pressure of 125 lbs., but condition fair.

LAUNDRY.

It consists of one large double washing machine and one 26" Hydro extractor. These are in good condition, but a new pipe guard must be placed around the belt end of the washing machine. The materials are at the School and the work can be done by the Staff.

FRESH WATER SERVICE.

The water supply is pumped from the Lake. The pumps are connected together and have independent shutoff valves on the discharge line, but there are no relief valves between the shutoff on the discharge and the pumps. One should be installed, as if these valves are closed and the pumps started, a serious breakdown of the pump might occur. At present, the pump house, pumps and gasoline engine are in a very dirty condition which will contaminate the drinking water if not attended to.

COLD STORAGE.

This is of the direct expansion type. The expansion mains have been allowed to get badly corroded and there is an ammonia leak in the Fresh Meat Room. These must be attended to, the mains cleaned off and painted with Black Asphaltum.

ELECTRIC LIGHT PLANT.

A new plant is being installed, but upon looking at the specifications I noticed that there is no guarantee of performance except a 48-hour run after installation. Owing to the position of this school and the importance of having continuous operation, I should think that a 12 month guarantee would be required.

Yours respectfully,

T. J. Arnall

SCHOOLS BRANCH
AUG 18 1933

Sir:-

I have the honor to inform the Department that my attention has been called by the Engineer of the Public Works Department, Mr. Arnall, who recently inspected the Lejac Indian Residential School boilers and plant, to the fact that work has commenced on the installation of a Diesel Lighting Plant at the School and that he has examined a copy of the specifications for this plant and finds that the Firm supplying the plant, Messrs. John Redden Company, Limited, 1294 Granville Street, Vancouver, B. C., has given no guarantee for a year or any period on this plant except that the Firm undertakes to operate the plant for 40 hours after its installation at the end of which time the Firm's responsibility for the plant's efficiency ceases. Mr. Arnall considers that a clause should have been inserted in the agreement whereby a guarantee would be given for a period of one year from the date of its installation so that any defects therein might be remedied thereunder. In view of the fact that this matter has not been dealt with through this office and I have no copy of the specifications for the above mentioned plant, all I am able to do is to call the Department's attention to Mr. Arnall's representations. It is understood from Mr. Arnall that he mentioned the matter to Dr. McGill during the recent interview with him at Alert Bay and it is possible that Dr. McGill may have taken a note of this.

Your obedient servant,

Chas. C. Perry,
Asst. Indian Commissioner for B.C.

OFFICE OF
INDIAN AGENT
Vanderhoof, B.C.
November 25th., 1933.

S-2.

Sir:-

With further reference to the matter of the installation of the electric lighting plant at the Lejac Indian Residential School, I beg to attach hereto Voucher No. 6986 for $2887-00 in favour of the John Redden Company, Limited, Vancouver, B.C. I also beg to attach hereto a letter which I have received from the Rev. Principal which deals particularly with the offer of his predecessor stating that the School authorities would stand a proportion of the total cost of the plant, their offer being $1500-00. I would respectfully refer you to your letter of June the 9th., last File No. 163-1-5 authorising the purchase of the plant on the understanding that the School authorities would put up the $1500-00. However, the Rev. Principal, the Rev. L.H.Rivet states quite frankly in his letter that they have not got money to do this and furthermore that Father Coccolo did not have the authority to make such an offer, owing to the fact that he knew at the time that a new Principal was to be appointed.

Under the circumstances I am submitting this Voucher in its entirety to the Department for consideration and if possible payment as it will not look well to the Redden Company should payment be withheld. My suggestion would be that the account in question be paid and then to get the School authorities to pay their share as soon as their finances will permit.

I might say in closing that I happen to know that financial conditions at the School are not good, in fact there is an over draft at the Bank and it would appear that all available funds had been expended prior to the date at which the present Principal took charge.

Your obedient servant,

R.H.Moore

L.J.A.C. RESIDENTIAL SCHOOL
PROVINCE OF
BRITISH COLUMBIA

LEJAC RESIDENTIAL INDIAN SCHOOL
NOVEMBER THE 20th. 1933

To Mr. R.H. Moore
Indian Agent

My dear Mr. Moore

Lately you sent me, Father Coccola's letter, in which he said that the Lejac School was ready to pay as much as $1500.00, if necessary, towards the installation of a new electric plant. I was more than surprised; for at that time, Father Coccola was notified, that a new Principal was appointed. Therefore, Father Coccola was not qualified and had no authority at all to make such a promise.

I asked him the other day; where he would have found the money! But no answer. We owe over $4000.00 at present, I have not paid the men for the last month. I had to foot up the bill for a carload of potatoes with my private money; the potato crop in this district has been a complete failure.

You know, my dear Mr. Moore: I am very interested in the school work, I want to cooperate with the Government as far as possible and show results. But I am not going to stand for any foolish promise of my predecessor. If the Government insist and want the Lejac School to pay that $1500.00 towards the Light Plant, Ottawa is better to look for an other Principal.

Yours very truly

L. H. Rivet

OFFICE OF
INDIAN AGENT

Vanderhoof, B.C.

October 27th., 1933.

S-2.

Sir:-

I beg to refere you to your letter of April the 12th. last, File No. 163-1-5 in connection with the Lighting Plant at the Lejac Indian Residential School and also the need of a new bake oven for the same institution.

The Lighting Plant has now been installed and is giving excellent light and results and the cost of operation is small.

With reference to the bake oven, it was found when the School opened after the summer holidays that the present oven was entirely useless in its present state and the Rev. Principal had to make arrangements to have some repairs done to it before the pupils returned to School, the results being that after his mechanic had dismanteled the oven he found the trouble and it was discovered that in so far as the oven proper was concerned it was just as good as the day it was first installed, with the exception of the smoke pipes, dampers and other parts of a similar nature, these were all burned out and the Principal replaced them, had them installed and now the oven is as good as ever and is giving satisfactory service, as it did in the beginning., or when it was new.

All this is leading up to the fact that I beg to attach hereto a Voucher in favour of the Rev. Principal for $53-21 being in payment of the repairs which he put into the oven, He submitted these accounts to me with the request that I forward them to the Department pointing out that by his action it will not be necessary to replace the bake oven for several years, and the Department for that reason will save considerable money owing to the fact that a new oven was included in the estimates this year.

If the Department can see its way clear to pay this Voucher to the Rev. Principal at this time I would be greatly obliged, if not please advise if it could and will be paid next spring as soon as the new estimates are brought down.

Your obedient servant,

R.H. Moore

Dear Sirs:

We installed in the Indian Residential School at Lejac, B.C. two Lighting Plants in the month of September. We sent the invoices forward to Mr. R.H. Moore, Indian Agent, at Vanderhoof, B. C. on October 10th.

As yet, we have not received payment and we trust that this will be received by us shortly.

Thanking you in anticipation of your early attention, we are,

Yours truly,

C.F. Dawson, Esq.,
Dist. Res. Architect,
Dept. Public Works, Canada,
Victoria, B.C.

Dear Sir: Re: Inspection of Boilers & Machinery,
Indian Residential School,
LeJac, Fraser Lake, B.C.

Boiler #22460.

On July 20th, 1934, I gave this boiler a careful internal and external inspection and found all stays, rivets, seams, plates and tubes in good condition.

There were some scale blisters on the tubes and plates, but very slight pitting.

I gave it a Hydrostatic test of 35 lbs. and found it quite tight. The leaky tube reported last year has been renewed. The brickwork is under repair and when finished will be in good condition.

The Safety Valve is set to blow off at the required pressure. The Steam gauge is 2 lbs. light.

I have issued a certificate allowing a steam pressure of 15 lbs. and condition good.

Boiler #22461.

On the same date I gave this boiler a similar inspection and found it in the same condition as Boiler No. 22460. The steam gauge is 1 lb. light.

I have issued a certificate allowing a steam pressure of 15 lbs. and condition good.

Both these boilers are very much improved over last year.

Whilst I was there, the question of hot water for the domestic supply was raised. I recommended that a steam coil be installed in the storage tank and steam be supplied from the main boilers. If this is done, it will help the situation considerably.

COMMISSIONER'S OFFICE
SEP 7 1934
VICTORIA, B. C.

These boilers are high pressure boilers with a special low pressure spring on the safety valves. If new 25 lb. springs were procured and a pressure of 25 lbs. carried on them and a reducing valve installed on the steam heating mains, then all the hot water required in the building and laundry would be available and

. . . . .

ARCHIVES PUBLIQUES
CANADA

POOR-COPY

Library and Archives Canada / Bibliothèque et Archives Canada
www.collectionscanada.gc.ca

most of the excessive load on the laundry boiler would be easily relieved.

Boiler No. 44411.

On the same date I gave this boiler a careful internal and external inspection and found it in very good condition. This boiler has been retubed since my last inspection.

I gave it a Hydrostatic Test of 195 lbs. and found it perfectly tight. This boiler is much too small for the amount of work required and if my suggestions are adopted will last for some years. If not, then a new boiler will be required in a very short time.

I set the safety valve to blow off at 130 lbs. The steam gauge is correct. I have issued a certificate allowing a steam pressure of 130 lbs. and condition good.

Auxiliary Machinery.

The new Lister semi-diesel electric lighting plant is installed and working fairly satisfactory, but considerable trouble is experienced with carbon deposits in the exhaust pipes which necessitates frequent cleaning. With a slight alteration of the exhaust pipe, it will be helped.

This unit is on the small side and will need enlarging in the near future or a peak load unit installed.

All the recommendations of my last report have been carried out, the new guards installed, the water pumps cleaned, etc. In fact, I was very much pleased upon the whole condition of the plant. From appearances, this plant will be in splendid condition in the near future.

Yours respectfully,

T J Arnall

Sir:

I beg to acknowledge receipt of your letter of the 10th instant, enclosing copy of communication received from the Principal of the Lejac Indian Residential School, requesting a new root cellar. It is noted that the estimated cost would be $2,000.

I regret that, owing to lack of funds, it is not possible to authorize such a large expenditure at the present time. The matter has been noted and will receive further consideration when the Department is preparing its Estimates for the fiscal year 1935-36.

If you consider it advisable, you may authorize the Principal to incur an expenditure not exceeding $100 in making urgent repairs to the present root cellar. When submitting accounts covering these repairs, please quote E. R. NO. 2403 as your authority for the expenditure.

Your obedient servant,

A. F. MacKenzie,
Secretary.

INDIAN
RESIDENTIAL SCHOOL.

Lejac, B. C.
Apr. 17, 1934.

Mr. R. H. Moore,
Indian Agent,
Vanderhoof, B. C.

Dear Mr. Moore,

Since taking over the principalship of the Lejac Indian School in August 1933, it has come to my attention that in past years there has been practically no vegetable crops grown on our property. This seems very strange inasmuch as surrounding farmers manage to produce successfully and sufficiently both for their own needs and for marketing. It would therefore, appear that poor management has, in the past, been responsible for the failures along this line.

With so many mouths to feed and so many extra necessities required, it is quite evident that a radical change is needed and the school produce its own necessities of life. I am fully convinced that what others can do so can we with proper care and management. This year I have a certificated gardener in charge of the garden and I am very determined to see my desires accomplished; that is, to have an over supply of vegetables to carry the school over the next winter. We already have 22 acres of ground in preparation for vegetables alone.

However, there will not be much sense in producing the crop if we have no place in which to store it. For that reason I write to solicit aid from the Department in the construction of a new root cellar. As you already are aware, ours is in a very poor condition. It is constructed in a rather haphazard way which will result in its one day caving in and perhaps causing injury to limb or body. Many of the logs used were poplar and as you well know Poplar wood will not stand the weather conditions and soon decay. Besides its improper construction will not allow for our zero weather and only with much difficulty do we manage to keep our vegetables from freezing.

A larger root cellar is also a necessity inasmuch as, as I represent the Department here, they expect me to get results and for the same reason I am determined to see the ambitions of the Department realized and the school's good name re-claimed.

POOR-COPY

www.collectionscanada.gc.ca

At an earlier period in the school's history, the Department contemplated allotting sufficient funds for the erection of a concrete cellar. I disfavor this move because concrete is a conductor of cold and in our northern country such a building would not be advisable. Secondly, a building consisting of the dimensions we require, in concrete would cause the Department an outlay in the vicinity of from 10 to 12 thousand dollars. The same building could be erected from logs properly hewed and seasoned for about two thousand dollars. A properly constructed root cellar will give many years of service and there is no danger of freezing nor cracking caused by the frosts.

The building we will require would be 100 ft. long by 32 ft. wide, dug into the ground and timbered with 6 bins along each side and a 6 ft. aisle in the centre. Each bin will have a separate ventilator extending through the roof which will be 5 ft. above the ceiling.

The school is not in a position to meet the cost of constructing such a building and our present cellar will not suffice for another year. It seems a pity that for lack of accomodation we are compelled to harvest a smaller crop than will supply our own requirements when we have the land, the time, and the ability to produce our own needs.

I would, therefore, greatly appreciate your co-operation in presenting our cause to the Department and, if possible, abtaining their help in our need for a new root cellar.

Very truly yours,

L. H. Rivet O. m. i.

EX'D.

Ottawa, Sept. 21, 1934.

Sir:

The Department is in receipt of the report of the Engineer, Department of Public Works, Victoria, on his inspection, in July, last, of the boilers and machinery at the Lejac Indian Residential School.

The Engineer reports that he found the three boilers at this school to be in good condition.

He draws attention to the question of hot water for the domestic supply. He recommends that a steam coil be installed in the storage tank and steam be supplied from the main boilers. If this is done, it will help the situation considerably.

The Engineer states, further, that if new 25 lb. springs were procured and a pressure of 25 lbs. carried on them and a reducing valve installed on the steam heating mains, then all the hot water required in the building and laundry would be available and most of the excessive load on the laundry boiler would be easily relieved.

The Engineer says that he was much pleased with the whole condition of the plant.

I would request that you draw the suggestions of the Engineer to the attention of the Principal.

OFFICE OF THE
DEPUTY SUPERINTENDENT GENERAL
OTTAWA

DEPT. OF INDIAN AFFAIRS
JUN 28 1935
RECORDS

June 21, 1935.

MEMORANDUM:

The Honourable the Superintendent General,-

The Lejac Indian Residential School, situated at Lejac, in the Stuart Lake agency (Electoral District of Cariboo) B. C., requires a building in which to store flour and other foodstuffs. This school is located in a very inaccessible place and heavy supplies of food have to be carried. A suitable store-room is therefore necessary.

Mr. Phelan, of the Schools Branch, who recently visited this school, states that, if Mr. R. H. Moore, the local Indian Agent, was authorized to incur an expenditure of $1,000 in the supplying of lumber and other building material, a suitable store-house could be built. All labour would be supplied by the school staff. Agent Moore would arrange for the purchase of the materials, from firms on the approved list. Funds for the purpose could be provided in the Appropriation for Indian Education for the current fiscal year.

I would request your authority to incur the expenditure and for the local Indian Agent to arrange for the purchase of the material and submit properly certified accounts covering the expenditure, or that you will submit the names of the firms from whom quotations for the supplying of the building materials should be obtained.

Harold McGill

Deputy Superintendent General.

Expenditure approved; authority to be obtained from firms on list. Agent to be advised accordingly.

June 15, 1935.

DEPT. OF INDIAN AFFAIRS
JUN 20 1935
RECORDS

The Secretary,
Department of Indian Affairs,
OTTAWA, Canada.

Dear Sir, Re: LEJAC RESIDENTIAL SCHOOL.

In company with Mr. Moore, I spent Monday last, the 10th inst., at this School. I must say that this is one of the best Schools I have yet visited. The Principal, from all accounts, has money of his own, and has apparently spent a considerable amount of it for repairs and improvements. He feels that the Department is not supporting him as well as we should. However, I convinced him otherwise.

I authorized Mr. Moore to buy paintto the value of $250.00. This is the only amount specially provided in this year's appropriation for this School.

However, they really require a building to store their flour and other food-stuffs. As you are aware, this School is located in a very inaccessible place and they are obliged to carry heavy supplies of food and, as a result, a suitable storeroom is absolutely necessary. Mr. Moore states that if he were authorized to incur an expenditure of $1,000.00 for lumber and other material, a suitable building could be built. All the labour would be supplied by the School staff. While this amount is not provided in this year's vote, I feel that it is an expenditure that should be incurred - not only because it is required, but also it will show the Principal that the Department wishes to co-operate with him in the splendid work that I feel that he is doing. I should therefore appreciate if you would take up this matter at once,and if the necessary authority can be secured Mr. Agent Moore should be advised. You can depend on Mr. Moore to handle the matter in a proper manner.

The Principal also requested 300 sq. ft. of Battleship Linoleum, and 3 new sewing machines. No doubt you can arrange to have these purchased.

Your obedient Servant,

Sir,-

I beg to acknowledge the receipt of your voucher No. 7761, in favour of Rev. L. H. Rivet, O.M.I., in connection with repairs to the root cellar at the Lejac Indian Residential School.

Before payment can be made to Reverend Father Rivet, it will be necessary to attach to the voucher a receipted account from the person from whom the logs were purchased. You should, also, attach to the voucher a statement showing the names of the men employed and this should be receipted by each of them. Present regulations require the above and payment of the account cannot be considered until they are supplied.

Your obedient servant,

A. F. MacKenzie.
Secretary.

INDIAN RESIDENTIAL SCHOOL.

Lejac, B.C.
Feb. 6, 1935.

Mr. R.H.Moore,
Indian Agent,
Vanderhoof, B.C.

Dear Sir:-

Due to the heavy snow and extreme cold weather of the past month, our present root-cellar was unable to cope with the situation resulting in a loss to the school of a quantity of vegetables.

It was necessary to have some repairs made which amounted to a few hundred dollars and herewith, I beg to make application for the grant of $100-00, as promised by the Department for the maintenance of our present cellar.

Since taking over the principalship some 18 months ago, the cost of all necessary repairs have been borne by the school and we are now unable to shoulder more of the responsibilities.

I trust that you will lend your assistance in obtaining this appropriation and that it may soon be forthcoming.

Yours very truly,

LHR/JM.

Signed:- L.H.Rivet, O.M.I.,
Principal.

Ottawa, July 2, 1935.

Sir:

Mr. Phelan, of this Department, who, accompanied by yourself, recently visited the Lejac Indian Residential School, strongly urges the erection of a building in which to store flour and other foodstuffs. He states you are of opinion that, for an expenditure of $1,000.00, for lumber and other material, a suitable building could be erected and that all the labour would be supplied by the school staff.

The Department will provide an amount, not to exceed One Thousand Dollars ($1,000) towards the cost of supplying the lumber and other material. You should arrange for the purchase of the materials, from firms on the approved list, and you should see that the prices charged are fair and just. I enclose an encumbrance certificate, authorizing the funds, to the amount of $1,000, towards the erection of the store-house. Please obtain itemized accounts, in triplicate, covering the cost of the materials. These, you should attach to proper voucher forms, certify in the usual manner and forward for payment. Please state, on each copy of the voucher, that the expenditure was incurred under authority of E. R. No. 3413. It is to be distinctly understood that all labour will be supplied by the school staff, without expense to the Department. You should see that a satisfactory job is completed in the erection of the building.

E.R. 3413

Mr. Phelan informs the Department that he authorized you to purchase paint, to the value of $250. This expenditure, also, is approved. You should forward itemized accounts, in triplicate, properly certified, covering the purchase.

The Department will place an order here to supply three new sewing machines for use at the school. The accounts, in triplicate, will be sent you. Upon receipt of the machines, if in good condition, you should attach the accounts to proper voucher forms, certify in the usual manner and forward for payment.

Encl.

R

OFFICE OF
INDIAN AGENT

Vanderhoof, B.C., Aug. 6th., 1935.

Sir:-

During the visit of Mr. Phelan to the Lejac Residential School two months ago the Rev. Principal made a request at that time that the Department supply battleship linoleum for the kitchen floor at the School. This floor is cement and apparently it is very hard on the feet of the cooks and it was felt that if linoleum was put down it might correct the situation. I do not remember exactly what Mr. Phelan said but I am inclined to think that he suggested that I write about this for the necessary authority sometime in August. The total cost of linoleum and felt to cover the kitchen floor would be about $67-00, so if you would please take this matter into consideration and if authorised please advise.

Your obedient servant,

R.H.Moore,
Indian Agent.

Ottawa, Sept. 25, 1935.

Sir:

This Department is informed that there is an old engine and generator at the Lajac Indian Residential School, which is not now required. I would appreciate if you would make arrangements to dispose of the above.

For your information, I may say that our Agent, Mr. R. H. Moore, Vanderhoof, B. C., has wired the Department today, as follows: -

> "Received offer of one hundred dollars from Taylor Brothers, Vanderhoof, for old engine and generator at Lejac School. Parts missing off both and of no further use at the school and will lose what little value it now has. Purchasers want to know your decision, by wire."

Mr. Moore is being informed that the matter has been turned over to you.

Your obedient servant,

C. C. Parker,
Acting Secretary.

OCT 8 1935
OFFICE OF
INDIAN AGENT RECORDS

Vanderhoof,, B.C., October 5th. 1935.

Sir:-

I beg to attach hereto a copy of a letter in duplicate which I received from the Principal of the Lejac Indian Residential School, which is self explanatory.

Mr. Phelan will remember that during his visit last spring to the School that this matter was discussed with the Principal and the understanding when he left was that nothing more be done about it until next spring. However, Mr. Barry visited the School this Fall, (the first time in three years) and apparently gave the Rev. Principal hopes that the cellar would be authorised this Fall on his recommendation. Please write me in this regard as Mr. Barry's promises seems to have raised high hopes.

Barry visited Lejac school Summer

Your obedient servant,

R. H. Moore

R.H.Moore,

Ottawa, October 11, 1935.

Sir:

I beg to acknowledge receipt of your letter of the 5th instant, enclosing copy of letter received from the Principal of the Lejac Indian Residential School with reference to the root cellar. As you are aware, the Department has expended considerable money at this school this year, and our Appropriation will not permit supplying the funds required for the erection of the root cellar.

Inspector Barry had no right to encourage the Principal in thinking that the root cellar would be allowed this year.

For your information, I may say that new instructions regarding his duties have recently been issued to Mr. Barry. In future, Mr. Barry will not be required to report on the maintenance and repairs of buildings. The Indian Agent, in future, will be expected to make recommendations in this regard. Mr. Barry will confine his efforts to the assistance of teachers and general inspection of the operation of the schools.

Your obedient servant,

T. R. L. MacInnes,
Acting Secretary.

R. H. Moore, Esq.,
Indian Agent,

LEJAC

INDIAN RESIDENTIAL SCHOOL.

Lejac, B.C.
Sept. 15th. 1935.

Mr. R.H.Moore,
Indian Agent,
Vanderhoof, B.C.

Dear Mr. Moore:-

Inasmuch as the season for harvesting our vegetable crops is close at hand, it is well that we again present out cause for a new root-cellar to the Department. Weather conditions have been most favourable resulting in an abundant yield, which, unless we receive some consideration, will be left a prey to the winter's cold and frosts.

As you are aware, the housing capacity of our present root-cellar is inadequate and will not answer our requirements for space needed to cope with the vegetable returns from our gardens. Also, were it possible to store the entire returns, we could not hope to keep them from freezing and thereby losing the profits of a whole season's labour.

With an ever vanishing hope in view, that we may expect the Department to lend an ear to our cause, we have from year to year repaired and re-repaired our present cellar trusting that the winter would not be too severe. However, after the resulting affects from the past winter we deem it useless to add further expense to a cellar which will not suffice to meet our needs and unless we may expect the necessary aid from the Department it is ridiculous for us to utilize soil in raising vegetables which might otherwise be put to good advantage.

On the recent visit of Mr. Barry, inspector, to our school, he strongly recommended the need of a new and larger root-cellar. With his recommendation going forth I feel certain that our cause will at least meet with success.

On Mr. Barry's suggestion I am taking the liberty of again bringing this matter to your attention and feel confident that I may expect the usual careful co-operation from your part.

Very truly yours,

Signed:- L.H.Rivet, O.M.I.,
Principal.

DEPARTMENT OF INDIAN AFFAIRS
CANADA

OFFICE OF
INDIAN AGENT

Vanderhoof, B.C., September 23rd. 1935.

Sir:-

I would respectfully direct your attention to your letter of July 2nd. last File No. 163-1-5 wherein you authorise the expenditure of certain monies for improvements at the Lejac Indian Residential School. In the second paragraph of your letter you instructed that all labour was to be supplied by the School Staff without expense to the Department. This I can assure you was the intention and the understanding that was arrived at when Mr.Phelan was here but it so happened that the Rev. Principal found it necessary to bring back some of the more advanced Indian boys who were home on holidays to assist on the work on the understanding that they would be paid one dollar per day. While this work was good training for the boys it was not possible to postpone the building of the store room until the School opened again at the end of August as the supplies would arrive about the middle of August and consequently some place had to be prepared, hence the rush. The rest of the labour in connection with the building was done by the School Staff and I would recommend that these boys be paid as per the attached account. If you would have cheques made out in favour of the boys whose names are shown here and sent to the Rev. Principal, I could deliver them to those concerned.

Labour return forms are also attached which I trust you will find satisfactory.

Your obedient servant,

R.H.Moore,
Indian Agent.

RHM/L.

The Secretary,
Department of Indian Affairs,
Ottawa.

Enclsoure.

P.S I may say that all expenditure in connection with the building will be kept within the $1000.00 which is the amount authorised

LEJAC RESIDENTIAL SCHOOL.

Lejac, B. C.
Mar. 30, 1936.

Note
The letter dated from the Dept. last Fall at the time the piggery was burned was explained to the Principal at that time.
K.F.R.

Mr. R. H. Moore,
Indian Agent,
Vanderhoof, B. C.

Dear Sir:

On several occasions in the past, the school has asked the Department for a new root cellar and Piggery. Our need for these two buildings has been explained and re-explained in each requisition but as far as we seem able to get is the mere exacting of a promise that our requirements will receive consideration.

Last fall we stored a sufficient quantity of roots and vegetables to carry the school over the entire season; but with the disadvantages to be gained by storing in a rather improvised cellar resulted in the ruin of at least one third of our crop.

In order to cultivate sufficient vegetables and roots to cover the needs of both the school and the stock, we require more and better storage room and, consequently, as well as a new cellar being sorely needed so also is a larger one.

Due to the loss of our piggery by fire, we deemed it advisable to butcher a number of brood sows we were considering keeping for the purpose of increasing our stock. Housing accomodation is scarce and if the Department does not soon see fit to grant the construction of a new piggery we shall have to dispose of our entire stock of hogs.

The foundation of the burned pig-sty can yet be used to raise a new building upon, while the stanchions, though burned and twisted, can be straightened and will again serve the purpose of serviceable pens. The only extra cost would be the enlarging to accomodate two extra pens.

We estimate that the total outlay, to cover both buildings, will be between $3500 and $4000 and should it occur that the Department's intentions have grown beyond the verge of a promise we should greatly appreciate knowing, at once, so that excavation work may be commenced as soon as the ground thaws.

Trusting to be favored with your co-operation in this matter which means so much to the school, I am,

Very truly yours,
L. H. Rivet O.M.I.

Ottawa, December 4, 1935.

Dear Sir:

I have your letter of the 26th ultimo, with reference to the engine and generator from the Lejac School which was purchased by Taylor Bros., of Vanderhoof.

The Department regrets that Taylor Bros. are obliged to expend a considerable amount in placing this machine in running order. Present regulations do not permit the Department to make any refund to them or provide the cost of a new shaft.

Yours truly,

A. F. MacKenzie,
Secretary.

163-1-5

DEPARTMENT OF INDIAN AFFAIRS
CANADA

OFFICE OF
INDIAN AGENT

Vanderhoof, B.C., November 26th. 1935

DEPT. OF INDIAN AFFAIRS
DEC 2 1935

Sir:-

I would respectfully direct your attention to your letter of October the 31st. ultimo, File No. 163-1-5, relative to the sale of an engine and generator from the Lejac Indian Residential School to Taylor Brothers of Vanderhoof, and to my reply of November the 9th. inst. with attached cheque for $100-00 covering the price offered.

In the above connection I beg to attach hereto a letter received from this Firm and which I trust you will find self explanatory. I might say that I was very much annoyed when I found the condition of the crank shaft of this engine as it was nothing but wanton destruction for any man to hammer a shaft the way this one had just to get the fly wheel off. Unfortunately it was not possible to detect the damage until after the engine was put in running shape with the wheels etc. on. So, naturally Taylor Brothers could not tell whether it was damaged or not. This has been an unfortunate condition as the Firm seem to think that they got the worst of a bad bargain and while they realise that it was their own offer which the Department accepted they are not complaining.

Under the circumstances I would suggest that the Department would go fifty-fifty with Taylor Brothers in the price of a new shaft. Of course I cannot let you know what the shaft would cost as Taylor Brothers have not found out themselves. Please advise in this connection.

Your obedient servant,

R.H.Moore

R.H.Moore,

TAYLOR BROS.

SALES AND SERVICE

VANDERHOOF, B. C.

November 18th 1935

The Department Of Indian Affairs,
Vanderhoof, B.C.

Attn R.H.Moore.

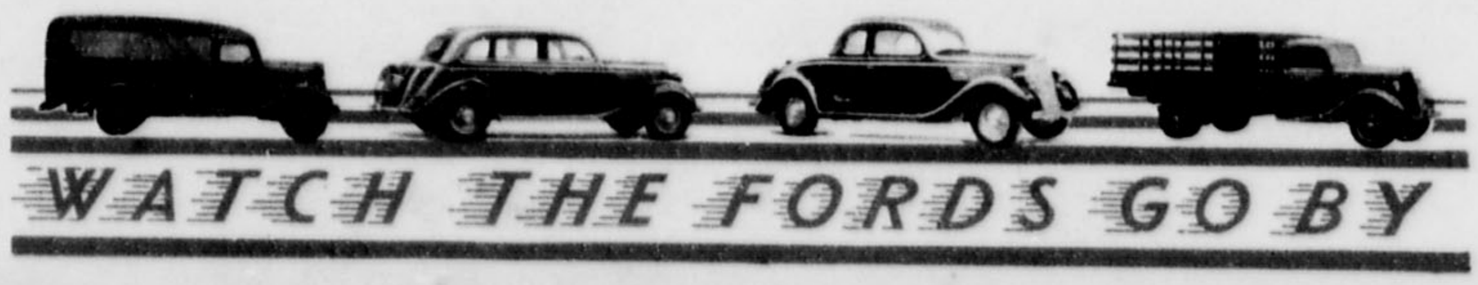

Dear Sir

Recently we purchased from your department a F.M. 10 H.P. type Z engine and a F.M. 5000 watt generator in a knocked down condition it being understood by us that this machine was in running condition before disassembly.

We examined the various parts of this machine as far as was possible allowing of course for a certain amount of replacement of worn bearings, piston rings etc to put the machine in good mechanical condition. A certain amount of the parts had to be taken on good faith since we had not the means of testing.

We have now assembled the motor and find that the crankshaft is sprung evidently done in dissembling, the shaft shows hammer marks which were noticed before but were not considered of serious import since it is hard to believe that any mechanical person would sledge a crankshaft to remove the flywheels but this seems to have been done.

The above condition could not have been detected without putting the shaft in a lathe or assembling the motor and testing since there is not a lathe, of sufficient size to swing this shaft, available in this community and we are unable to tell how much the shaft is out of true but it is sufficient that the bearing on one side cannot be fitted and consequently means the purchase of a new crankshaft since the hammering was done on the side of the crank--arm and has probably thrown the connecting rod also out of line.

Sir:

I have to acknowledge receipt of your letter of the 21st instant, enclosing a communication from the Principal of the Lejac Indian Residential School, in which he reports on the recent fire which resulted in the burning of the piggery and contents.

The loss occasioned the school by the destruction of this building is regretted. The Department will have no funds during the present fiscal year, to provide the cost of erecting a new piggery. When our Estimates are being prepared for the next fiscal year, consideration will be given to providing the funds required in the erection of a new piggery and also a root-house.

OCT 28 1935
RECORDS

Vanderhoof, B.C., October 21st., 1935.

Sir:-

I beg to attach hereto a letter from the Rev. Principal Rivet regarding a fire at the Lejac Indian Residential School recently, and which burned the piggery.

For the information of the Department I wish to advise that I have already investigated the cause of the fire and its oregin, and from information received I feel that it was caused through the chimney being cracked above the ceiling and below the roof. There had been a lot of cooking done for the pigs in the building the day of the fire and I think that the chimney got over heated and possibly smoundering set in somewhere and eventually broke out in flame. I am satisified that no blame can be attached to any one as it was purely an accident.

Noted for Estimates (73) Oct. 31/35. E.M.

Your obedient servant,

R.H.Moore,
Indian Agent.

L E J A C

R E S I D E N T I A L S C H O O L.

Lejac, B. C.
Oct. 18, 1935.

Mr. R. H. Moore,
Indian Agent,
Vanderhoof, B. C.

Dear Sir:

Herewith, I beg to submit the report of the recent fire which resulted in fatal damage to the school piggery.

At 12:25 A. M. on the morning of October 9th. 1935, the blaze was first noticed by one of the employees who immediately gave the alarm.

The school fire alarm system was set into motion and it was at first taken as a night fire drill. Within two minutes the school was cleared of all occupants and upon ascertaining the cause the bigger boys were immediately put to work in an effort to keep the fire under control, while the girls and smaller boys were rushed back into their dormitories.

Within four minutes all forms of fire-fighting apparatus were on the site of the conflagration where boys and employees were working heroically to keep the blaze under subjection.

Much effort and attention had to be centered on the surrounding buildings in order to avert other casualties and only due to the calmness of the weather and the concentration of the fire-fighters were we able to save them.

However, due to the fact that before being noticed, the fire had gotten away to a good start it was impossible to save the piggery from complete demolishment.

Co-incident with the loss of the building were 2 small week old pigs; 4 chickens; and about 4 tons of threshed oats which were being stored in an upper storey of the piggery.

The foundation is still in perfect shape and though the iron stanchions are badly burned and twisted, it is considered they can be straightened and re-used.

This catastrophe leaves the school without housing accomodation for its hogs and it is to be hoped that we may soon be allowed a grant from the Department covering the $1000.00 which is estimated to be necessary to rebuild our loss.

Very truly yours,

L. H. Rivet O. M. I.

EXD.

Ottawa, July 31st, 1936.

Dear Sir:

With reference to your letter of the 24th instant, you may proceed with the repairs at the Lejac Indian Residential School, keeping the cost as low as possible.

When you have completed the work, you should forward accounts and also full particulars regarding the amount of linoleum that you consider necessary, and the Department will then decide if it can be purchased out of the amount provided in this year's Appropriation for the Lejac School, viz., $300.

Yours truly,

T. R. L. MacInnes,
Acting Secretary.

OFFICE OF
INDIAN AGENT

Vanderhoof, B.C., July 24th. 1936.

Sir:-

I beg to acknowledge receipt of your letter of the 17th. inst. File No. 163-1-5 regarding certain improvements which we plan on making at the boys' recreation hall at the Lejac Indian Residential School. In discussing this matter further with the Rev. Principal we felt that the cost of the linoleum would take too much out of the $300-00 approved and there would not be enough left out of it to do the other repairs and make new benches and cupboards. I might say that it is my intention to buy the material for this and have the work done at the school. There is however quite a lot of plastering to be done where the plaster has broken and crumbled away, then of course all of it will have to be kalsomined . In the meantime it might be well to allow the linoleum to stand unordered, unless, of course the Department could see its way clear to providing that over and above the $300-00 allowed.

Your obedient servant,

R. H. Moore

Dear Sir:

With reference to your letter of the 9th instant, please let me know the length and width of the boys' recreation hall. The linoleum for this room will be ordered direct from the Department, as we can secure same at a reasonable cost.

Regarding the new benches and cupboards, is it your intention to buy the material and have these made at the school? If so, you may purchase the material required from firms on the approved list.

Yours truly,

T. R. L. MacInnes,
Acting Secretary.

Sir:-

I would respectfully direct your attention to Official letter of April the 9th. last File No. 163-1-5 relative to the question of repairs and improvements at the Lejac Indian Residential School. In regard to the last paragraph of your letter I wish to advise that after discussion with the Principal we decided that the $300-00 available for repairs should be expended in the boys' recreation hall to provide new benches, cupboards and battleship linoleum on the floor. The Rev. Principal would appreciate an early reply to this request so that the necessary repairs may be made during the summer holidays.

Your obedient servant,

R.H.Moore.

S-2-631.

Ottawa, April 9, 1936.

Dear Sir:

The Department is in receipt of your letter of the first instant, enclosing communication received from the Principal of the Lejac Indian Residential School, requesting authority to proceed with the erection of a new piggery. It is noted, from the Principal's letter, that he estimates the total outlay covering the cost of the building required at $3,500.

The Department realizes that the buildings requested by the Principal are, no doubt, necessary in the best interests of the school, but, at the same time, it must be realized that the Department is unable to proceed with considerable necessary work, due to present economic conditions, which make it impossible for us to secure an appropriation sufficiently large to cover all the expenditures that we are requested to make. It is regretted that the funds for the buildings at the Lejac School could not be provided in the current year's appropriation, but the Principal and yourself will understand that this was due to circumstances over which we have no control.

The only amount available in the current year's appropriation for the Lejac School is the sum of $300.00 for miscellaneous repairs. You might let me know how you consider this amount should be spent.

Yours truly,

A. F. MacKenzie,
Secretary.

Sir:-

I beg to attach herewith a letter just received from the Rev. Principal of the LeJac Indian Residential School which I trust you will find self explanatory.

In the above connection I wish to point out that the information contained in Official Letter of October 31st. 1935 File No. 163-1-5 was conveyed to the Principal at that time. He is however, (as you will note from his letter) very anxious to be advised as soon as possible whether or not it will be possible to have both buildings, root house and piggery, built this year. I can understand this as naturally there would be little use in planting vegetables and roots this Spring unless he knows that he will have someplace to store them next winter.

If you would be kind enough to advise me in this connection as soon as you know what we may expect, I would greatly appreciate your kindness.

Your obedient servant;

R.H.Moore.
Indian Agent.

DEPARTMENT OF INDIAN AFFAIRS
CANADA

OFFICE OF
INDIAN AGENT

Vanderhoof, B.C., February 1st. 1937.

Sir:-

I beg to attach hereto two letters received from the Principal of the Lejac Indian Residential School which I trust you will find self explanatory.

In connection with the one referring to fire equipment I wish to advise that I know from the recent inspection made by myself that the fire hose was replaced and that some of the rest of it, not yet replaced, should be, as it would appear that the material in the pipes just naturally deteriorated; whether from lack of use, or from being stored on the fire rack in a building that might be too warm. The Principal thinks, however, that these two lengths of hose already purchased by the Principal were required and three more lengths should be purchased as soon as possible.

Regarding the rooms for the disciplinarians in the boys' and grils' dormontories, I would recommend that the material necessary to put up thin frame partitions around the beds in the dormentories, be approved. I know that the rooms provided for the disciplinarians have not been used for years but I did not know until a few days ago that they had been comdemned as unfit to sleep in. Who did the condemning I don't know. If the Department can see its way clear to approve of the purchase of the material necessary for this purpose, I would be greatly obliged.

The Principal advises me that the cheque for the Per Capita Grant for the School arrived a few days ago but it was almost $800-00 short. It would appear as if the cheque shoudl have amounted to $7224-00 and the amount received was $6460-00. The Principal has asked me to explain the difference. Please advise me in this connection also.

Your obedient servant,

R.H.Moore,
Indian Agent.

163-1-5

DEPARTMENT OF INDIAN AFFAIRS
CANADA

OFFICE OF
INDIAN AGENT

Vanderhoof, B.C., January 21st. 1937.

Sir:-

I would respectfully direct your attention to official letter of July 31st. last File No. 163-1-5 authorising an expenditure of $300-00 for repairs at the Lejac Indian Residential School. Two Vouchers were submitted for material for these repairs, one in favour of McLennan, McFeely & Prior; Voucher No. 8923 amounting to $200-49 and the other in favour of The Fraser Lake Sawmills, Ltd., Voucher No. 8924 amounting to $99-43, both these Vouchers were paid and with the exception of eight cents , the total amount was used up.

However, the Rev. Father Rivet, then Principal of the School, purchased further material from the Fraser Lake Sawmills to complete the work amounting to $45-45 which the Principal planned to pay for himself rather than leave the work uncompleted. However, before the Rev. Father Rivet could give the matter his attention he was relieved of the Principalship of the School and moved to another part of the Dominion, the result is that this account for $45-45 is still unpaid. I did not know until today that this account was unpaid and consequently have not had an opportunity of discussing the matter with the present Principal to say whether or not he will carry out Father Ribet's intention. Should he not be prepared to do this I would request the Department to advise me if they would assume payment, for really the material was needed and went into the recreation hall at that time.

Your obedient servant,

R.H.Moore,
Indian Agent.

163-1-5

Ottawa, January 9th, 1937.

Dear Sir,-

EX'D.

I have your S-2-310 of the 2nd instant, regarding the request of the Principal of the Lejac Indian Residential School to be provided with a grant towards payment of the salary of a night watchman during the winter months.

In reply I have to say that grants for night watchmen's salaries are only provided in the case of the Indian residential schools where there is a considerable fire hazard. Our funds for this purpose are entirely assigned and it is considered that, with the exercise of reasonable care by the Principal and staff, there should be no danger of fire at this school, as it is a modern, semi-fireproof building. However, should the Principal desire to have a night watchman, the Department would have no objection but we would be unable to provide any part of the cost of salary.

Yours truly,

R. A. Hoey.
Supt. of Welfare & Training.

LEJAC, B.C.

Jan 29th 1937

Mr.R. H. Moore,
Indian Agent,
Vanderhoof, B.C.

Dear Mr. Moore,

You will remember that I called your attention to the fact that the rooms for the disciplinarians in the dormitories for the bys and the girls have not been used for some years as they were found to be unfit for the purpose for which they were ~~intended~~ intended. No outside window, no proper ventilation and no heating are the outstanding objections. At present these in chrage of the dormitories have to content ~~them~~ themselves with curtains round their beds. It would be quite easy without interfering with the necessary air-space for the dormitories, to provide a little room which would over come these inconveniences, give the neccessary privacy to those in charge and remove from the children the temptation to steal little things when an opportunity occurs.

The caprpenter and the boys would do all the work and all that the Dept. would have to pay for would be the actual material used.

I would be glad if you could takr this up with the Department.

Yours sincerely,

W Byrne-Frank OMI

Mr. R. H. Moore,
lndian Agent,
Vanderhoof, B.C.

Dear Mr. Moore,

Shortly after my arrival at the School , 1 made an inspection of the fire-fighting equipment and found that the in fire hose was so worn out that it would not possibly stand up under pressure. Rather than risk being caught unpreparedl decided to order two lengths(50feet each) for the boys dormitories and to ask for permission afterwards. At the same time two fire-alrm bells for the boys' dormtiories were ordered. According to the catalog of McLennan, Mc Feely and Prior of Vancouver, the hose will cost $67.75 and the Bells $12.86..... making a total of $80.61. We still need three more fifty feet lengths of hose with the necessary couplings as we cannot count on any of the old hose.

1 will be glad if you will kindly bring this to the attention of the Department.

Yours sincerely,

W Byrne - Principal

D.I.A.

Dear Sir,-

With reference to your S-2-391 of the first instant in connection with the Lejac Indian Residential School, you may forward the account for fire hose and fire equipment purchased by the Principal. If you consider that the additional hose, viz., 3 - 50 ft. lengths with necessary couplings, is absolutely required, you may arrange for its purchase.

The Department approves your supplying the material required to place thin frame partitions around the beds used by the disciplinarians. It is expected, of course, that you will keep the expenditure as low as possible.

Yours truly,

R. A. Hoey.
Supt. of Welfare & Training.

DEPARTMENT OF INDIAN AFFAIRS
CANADA

OFFICE OF
INDIAN AGENT

Vanderhoof, B.C., February 1st. 1937.

Sir:-

I beg to attach hereto two letters received from the Principal of the Lejac Indian Residential School which I trust you will find self explanatory.

In connection with the one referring to fire equipment I wish to advise that I know from the recent inspection made by myself that the fire hose was replaced and that some of the rest of it, not yet replaced, should be, as it would appear that the material in the pipes just naturally deteriorated; whether from lack of use, or from being stored on the fire rack in a building that might be too warm. The Principal thinks, however, that these two lengths of hose already purchased by the Principal were required and three more lengths should be purchased as soon as possible.

Regarding the rooms for the disciplinarians in the boys' and girls' dormontories, I would recommend that the material necessary to put up thin frame partitions around the beds in the dormentories, be approved. I know that the rooms provided for the disciplinarians have not been used for years but I did not know until a few days ago that they had been comdemned as unfit to sleep in. Who did the condemning I don't know. If the Department can see its way clear to approve of the purchase of the material necessary for this purpose, I would be greatly obliged.

The Principal advises me that the cheque for the Per Capita Grant for the School arrived a few days ago but it was almost $800-00 short. It would appear as if the cheque shoudl have amounted to $7224-00 and the amount received was $6460-00. The Principal has asked me to explain the difference. Please advise me in this connection also.

Lejac Indian Residential School

Under Direction of The Oblate Fathers

LEJAC, B.C.

COMMISSIONER'S OFFICE
JUN 28 1937
VICTORIA, B. C.

June 9th 1937

Mr. R.H.Moore,
Indian Agent,
Vanderhoof, B.C.

Dear Sir,

Referring to the letter of Ma7th. from the Department concerning the pumping system and the sceptic tank, I am now in a position to give you the results of the enquiries I have made.

1. With regard to the pumping system, nothing can be done at the present moment to install the proper piping between the lake and the pumps. This will have to attended to when the lake level drops next fall. In the meantime we have managed to make temporary repairs so that the water is brought in from some distance from the lake shore and the water is therefore fit to use without being boiled.

2.With refarence to the sceptic tank and the proposal to install a grease trap to prevent the soap from the laundry going into the sceptic tank, I have had an opportunity of discussing the whole question with the school engineer and a competent plumber and this is what we would recommend for the consideration of the Department.

i. We would like to have the plans of the sewersystem of the whole school. I suppose these must be in Ottawa.

2. It seems probabl e that drain pipes from the heating system of the school run underneath the sceptic tank and it would be a simple matter to connect the waste pipes from the laundry to these drain pipes and obviate the necessity of havéng a grease trap either inside or outside the building.

3. At present the drain pipe from the heating system is blocked and we hope in a short time to have the trouble located. This willbe done as sson as we have been able to make a few minor repairs to the sceptic tank outlet. If the soppage is due to a cave in, it will require a certain amount of work to find the trouble as the pipes ~~are~~ are two feet lower that then furnase room and are therefore ten or twelve feet below the ground. The Engineer tells me that the pipes from the heating system will have to fixed up anyway before the Bioler Inspector comes , sometime next month. We cannot empty the boilers until we have located and remedied the stoppage.

4. If our information is correct, we would then suggest m coonecting the launry waste pipes with the heating system and if neccessary divert the flow off from the sceptic tank. I am told that this would not be very difficult. The plumber tells me that this is the easiest and best remedy for our present fiffivulties. What we need is the authorisation to have the pipe from the Heating system

POOR-COPY

Lejac Indian Residential School

Under Direction of The Oblate Fathers

LEJAC, B.C.

examined and if necessary, dug up and repaired. There is a distance of about four hundred feet between the boiler room and the sceptic tank and the pipe is blocked some where between these two points. If it is blocked or caved in near the sceptic tank, not much digging will be required. It may be possible to clear the pipes by water pressure but so far we have not succeeded and every attempt we have made to empty the boilers has resulted in the basement of the school being flooded. As I have already pointed out this will have to be looked into ~~immediately~~ even if we do not use this pipe for the laundry water.

I hope I have succeeded in making clear the remedy we recommend. I imagine that it will be quite easy to follow after the plans of the school ~~sewer~~ sewer system have been ~~studied~~ studied.

Yours very sincerely,

W Byrne-Grant OMI

163-1-5

EX'D.

Ottawa, May 7th, 1937.

Dear Sir,-

The Department is in receipt of your letter of the 19th ultimo, enclosing letter received from the Principal of the Lejac Indian Residential School with reference to the pumping system.

After carefully considering the Principal's letter, it is felt that the following improvements to the pumping system should be made at once:-

(1) The tile pipes at present used to convey the water from the iron pipes in the lake to the pumps should be removed and replaced with sealed joint metal pipe.

(2) If further investigation shows that the intake pipe is cut off close to the shore, this pipe should be extended several hundred feet into the lake.

(3) With regard to the laundry and kitchen outlets and the interruption of the normal action of the septic tank, the only remedy is installation of grease traps. Two types of traps are possible:
First, a trap of concrete construction for installation outdoors. Such traps have to be cleaned frequently and, therefore, should be located at a point where the loose earth or cover may be removed and replaced without trouble. Within reason, this trap should be located as far as possible from the building and to the leeward to minimize objectionable

odours which always follow the grease trap cleaning operation.

The second type, and possibly the most economical for this case, is the installation of a metal trap indoors on the waste line of the lines carrying grease or oil. This does not mean the main sewage line but only the branch wastes from the kitchen sink and laundry. If these two sources are united before reaching the main waste, one trap would serve the purpose. These indoor traps offer greater convenience for cleaning and may be used if the odour arising during their cleaning operation is not a serious objection.

It is not possible for the Department to decide which type of trap is the most economical or the most applicable in the case of the Lejac Indian Residential School. This will have to be decided by the Principal and yourself after consulting a competent plumber.

Provision has been made in the current year's appropriation for the sum of $300.00 for miscellaneous repairs at the Lejac Indian Residential School. It is considered that the above work can be done for less than this amount. You may, therefore, proceed with the work on this understanding but, if preliminary estimates show that the cost involved is more than the amount mentioned, you should communicate with the Department before proceeding.

If the above work is done promptly, it is hoped that it will result in an improved quality of water. In the meantime, the water used for drinking purposes should, of course, be boiled.

Yours truly,

R. A. Hoey,
Supt. of Welfare & Training.

RECORDS

Sir:-

I beg to attach herewith a letter received from the Rev. Principal of the Lejac Indian Residential School which I trust you will find self explanatory.

With reference to this matter I wish to advise that it has been discussed off and on once or twice a year for the past three or four years but unfortunately no definite solution could be arrived at, and temporary measures were taken to allow the system to function for the time being.

It would appear now that something definite will have to be done and I personally am not qualified to give an intelligent estimate on what the work will cost, in fact I am not sure that I know just what will be necessary, although I think that if new pipes were laid farther out in the lake that it would answer the purpose and relieve us of all future trouble, providing , of course, that the pipes laid were of the proper material. At all events I think that the best plan would be to have some Contractor from Prince George to look the situation over and give us what he considers the best idea of what would be the right thing to do and its approximate cost.

If you consider that the septic tank should be attended to at the same time you might please advise.

Your obedient servant,

R.H.Moore,
Indian Agent.

Lejac Indian Residential School

Under Direction of The Oblate Fathers

LEJAC, B.C.

April 16, 1927.

Mr. R. H. Moore,
Indian Agent,
Vanderhoof, B. C.

Dear Sir,

You will remember that on more than one occasion we discussed the trouble that we were having with the pumping system for the water supply. Matters came to a head with the spring thaw and we were obliged to make some temporary repairs in order to keep the pump working and to prevent too much ground water getting into the well. In doing this work our engineer discoveredtnat the pipes used to convey the water from the iron pipes in thelake to the pumps were in a very unsatisfactory condition. Apparently the pipes are the ordinary tile pipes used for drainage. They are porous, merely laid end to end witnout any covering for the joints and are therefor no use as protection from contamination from the surface water. (1)

As the overflow from the sceptictank, which is not functioning well, drains in the direction of the pump house and as the surface soil in the vicinity of the pump house is exposed to contamination from various sources, I think it my duty to point out that under present conditions, the water supplied to the school cannot be considered safe, and I would be glad if you would kindly lay this matter before the department at your earliest convience and ask for instructions. (2) It would seem that the first step would be to obtain some chemicals that would make the water fit for drinking and cooking purposes. After the immediate danger has been removed, it would be well to consider having a through orrather a thorough inspection of the in-take system. I understand that several hundred feet of two inch piping have been dragged from the in-take system by the action of the wind and waves. These pipes are now lying at the bottom of the lake. The water pumped to the house is therefortaken near the shore and quite likely to be contaminated. (3)

The engineer is not prepared to say what it would cost to make the necessary repairs. I believe it would be worth while asking the Department to send a competent man who would be able to make a complete report on the water supply and the sceptic tank. I understand that the big trouble in connection with the sceptic tank is that no provision was made for a separate outlet from the laundry and the kitchen, with the result that the soaps and fats going into the sceptic tank as well as the heavy flow of water from the laundry, prevent the normal functioning of the tank, with the resulting contamination of the field below and the foul smell which comes from the tank. I believe that it has been suggested that there would be no trouble from the tank if it were cleaned out at regulars intervals, but experience has proven that this is not the case and the only remedy seems to be to have a separate outlet from the laundry. I do not know whether the foul odors from the tank are dangerous as far as the health of the children is concerned. The boy's playground is near the tank, and they are constantly breathing the contaminated air, and on certain days when (4)

DEPARTMENT OF INDIAN AFFAIRS
CANADA

OFFICE OF
INDIAN AGENT

Vanderhoof, B.C., June 22ndl., 1937.

Sir:-

I beg to acknowledge receipt of your letter of the 7th. ultimo, File No. 163-1-5 relative to the pumping water system, and the sewerage system at the Lejac Indian Residential School.

In this connection I gave your letter to the Rev. Principal of the School and asked that he get a plumber to go over the system thoroughly and advise me the results of their examination and what should be done to remedy the matter. The Principal consequently got a plumber in and after examination and deliberation he wrote me giving the results as he saw it of their examination, as well as a possible remedy.

I might say that prior to the date of receipt of your letter temporary arrangements had been made at the School to guard the water supply, which I personally inspected and found that it was perfectly satisfactory until next fall when the lake level lowers and further work can be done.

In so far as the sewerage system is concerned it was thought that a plan of the whole system at the school would be on file at Ottawa and which the Department might forward to me so that we would not be proceeding with our investigation blindfolded. If this plan does exist and you would be kind enough to send it to me the matter will be further investigated and definite recommendations made later on. The Rev. Principal's letter is enclosed herewith for your information.

Your obedient servant,

R.H.Moore,
Indian Agent.

EX'D.

Ottawa, November 18, 1937.

Dear Sir:-

In reporting on his inspection of the Le Jac Indian Residential School, Inspector Pragnell refers to the necessity of erecting a pig pen. He suggests that material be supplied and that the boys erect the pig pen as part of their manual training.

Please let me have an estimate of the cost of the material that would be needed for this building. I am unable to make a definite promise at the present time, but,on receipt of your reply, an endeavour will be made to provide the necessary funds.

Yours truly,

R.A. Hoey,
Supt. of Welfare & Training.

EXTRACT
ORIGINAL ON
27-163

163-1-5

Kamloops,B.C.,Nov.2,1937.

STUART LAKE AGENCY INSPECTION REPORT NO.16.

x x x

I inspected the Residential School at LeJac.
x x x

Everything seemed, as a whole, very satisfactory at the school, though their farming methods might well be improved. I inspected the kitchen, which was clean and in good order. The children were having for their meal, soup, fish, potatoes, bread and butter.

All fire appliances were in position and in good order. Dormitories were in good order, and lavatories clean. The septic tank, however, is not working properly, and the overflow smells badly. This, I think, is due to the laundry waste flowing through the same system. As 1500 gallons is used on washing days, soap etc., prevents the correct baterial action of the septic tank. The laundry waste could be connected, at not too great cost, with the boiler line overflow which empties over some low lying ground. Further, the iron pipe into the lake, from whence the school obtains its water supply, would seem to have got disconnected. This will mean no water supply in the winter and should be investigated and the necessary repairs made. Possibly ice last winter caused this break.

A pig pen is required on the farm. I should suggest that material be supplied and the boys erect the same as part of their manual training.

Ottawa, October 19, 1937.

Dear Sir:-

The Department is in receipt of your letter of the 5th instant addressed to Indian Commissioner MacKay and enclosing letter from the Principal of the Lejac Indian Residential School with reference to the repairs required to the septic tank and water supply.

It is noted that the total expenditure required for necessary repairs will be $500.00. Authority is granted for you to authorize this amount as it is noted from the Principal's letter that this sum will enable a permanent job to be done.

Yours truly,

R.A. Hoey,
Supt. of Welfare & Training.

DEPARTMENT OF INDIAN AFFAIRS
CANADA

OFFICE OF
INDIAN AGENT

Vanderhoof, B.C., October 6th., 1937.

Sir:-

I would respectfully direct your attention to my letter of June the 22nd. last which was in reply to Departmental letter 163-1-5 and dated at Ottawa May the 7th., 1937 and relating to the water and sewerage system at the Lejac Indian Residential School.

After all these months I got a report on the whole system from the Rev. Principal and which was compiled by him on information received from the plumber who went over the whole sewerage system from one end to the other.

In so far as the water system is concerned, I inspected it myself along with the Rev. Principal and the School Engineer and found the facts in accordance with those outlined in the Principal's letter attached herewith and which I trust you will find self explanatory.

You will please note from the Principal's letter that to repair both the sewerage system and the water system a sum of approximately $500-00 will be required and which exceeds the amount authorised by the Department by $200-00. After taking this whole matter into consideration I would be pleased to receive further instructions regarding same as it might be possible to have the water system repaired and completed this fall before freezeup.

Your obedient servant,

R.H.Moore

Lejac Indian Residential School

Under Direction of The Oblate Fathers

LEJAC, B.C.

Sept. 27, 1937

Mr. R. H. Moore,
Indian Agent,
Vanderhoof, B.C.

Dear Mr. Moore:

Re. Septic Tank and Water Supply.

With reference to previous correspondence and our recent conversation concerning the water supply and the Septic Tank I beg to report as follows:

WATER TANK.

You will recall that early this spring before the break up of the ice our engineer installed a box resevoir in order to prevent sand and dirt from entering into the pipes leading into the pumps. Further work was prevented by the break-up of the ice and the subsequent rise of the lake level now that the water has gone down we are in a position to report on the steps necessary to safequard the purity of our water supply.

a. It will be necessary to dig a trench 6' deep and 36' long between the pump house and the resevoir.

b. Another trench 30' long will be required to reach the end of the pipe now lying at the bottom of the lake. We estimate that this will require one weeks work for one man.

The material required will be 36' of the special pipe recommended by the Department and 30' of six inch iron pipe to connect with the 200' now at the bottom of the lake. I have been unable to find any estimate of the cost of these pipes in any of our cataloques.

Once these two pipes have been installed I think that the purity of our water supply will be assured.

(2)

SEPTIC TANK

To remedy the defect in our septic tank caused by the action of the laundry water, we recommend the following solution:

The drain pipe of the laundry can be connected with the drain from the boiler room which runs from the school to the hillside without passing through the Septic Tank. To do this it will be necessary to break up ~~1-2~~ 10 feet of the cement floor in the basement so as to bring the laundry drain outside the building and to dig a trench one hundred feet long and eight feet deep from that point to the drain from the boiler room. The material required will be one hundred and ten feet of four inch iron pipe which according to the cataloque would be worth about $1.25 per foot.

I believe that counting labour and material this work would cost about $175.

You will recall that the Department instructed us to refer these questions back to them if the estimate of the costs shoud be over $300. We have already expended close to $200 this summer in connection with the Septic Tank and Water Supply, the chief item being the services of an experienced plumber for seventeen days at $8.00 a day and the purchase of a Diaphram Pump and twenty five feet of hose at the cost of $70. If the Department is prepared to include these two items in their estimate of the cost of the necessary repairs to the two systems I believe that the total cost would be in the neighbourhood of $500 and I feel that the expenditure of this amount would be well justified since it would mean the permanent of a problem that has been a source of trouble for many years past.

(3)

The only problem untouched would be that of the accumalation of foul smelling water in the pasture field below the Septic Tank. Possiblly this problem will no longer exist if the Septic Tank functions properly and nothing but pure water flows from its second chamber. I understand that according to the original plans the water from the Septic Tank was to be conducted underground to the ditch along the railway trucks but perhaps because the pipes were not laid deep enough to withstand the heaving caused by the frost this pipe system has never functioned and part of the pasture used by the dairy cows of the school has always been a foul smelling bog. Certain amount of criticism has been made on this point and I suppose that the Department should be informed of this situation.

I hope that the details contained in this report will be sufficient to enable the Department to understand the solution that we recommend.

Yours very sincerely,

W Byrne-Grant O.M.I.

Ottawa, July 20, 1937.

Dear Sir,-

With reference to your 23/49530 of the 3rd instant regarding the water, sewerage and heating systems at the Lejac Indian Residential School, it is noted that the Boiler Inspector, Mr. T. J. Arnall, will inspect the boilers and heating plant at this school on the 7th proximo.

In connection with Mr. Moore's letter in which he requests a plan of the heating system at the school, our records do not show a very comprehensive one. However, a copy of what we have on hand is being forwarded to Mr. Moore and will be available when Mr. Arnall reaches the Lejac School.

Yours truly,

R. A. Hoey.

Dear Sir:

I have received your S-2-127 of November 30th with which you forwarded correspondence relating to the proposed piggery at Lejac Indian Residential School. It is noted that the proposed construction provides accommodation for a production of two litters per year. It has occurred to me that the climate there may be somewhat severe to do this successfully, and I would appreciate your Farming Instructor's views as to this before submitting your letter to the Department for consideration. Should Mr. Rae not have had experience himself in this line, he may be able to obtain for me the views of someone who is in a position to speak from practical experience.

Yours faithfully,

D.M. MacKay.

Vanderhoof, B.C., December 14th, 1937.

Dear Sir:-

I beg to acknowledge receipt of your letter, date and File No. above noted regarding the proposed piggery at the Lejac Indian Residential School. In reply I wish to point out that with a piggery equipped for this climate, as it is proposed to have the one at the School, it is perfectly feasible and practicable to get two litters each year. As a matter of fact except two litters are raised annually swine raising for an institution like the school is not a profitable venture.

Under Direction of The Oblate Fathers

LEJAC, B.C.

November 26th, 1937

Mr. R. H. Moore,
Indian Agent,
Vanderhoof, B.C.

Dear Mr. Moore:

I am enclosing for your information a draft of our estimates for the construction of a new pigery at the school.

Our estimates are based on the experience we had with the building which burned down three years ago and the careful analysis of our books to show the amount of pork and pork products used at the school during the past year.

Yours very sincerely,

W Byrne-Grant O.M.I.

Rev. W Byrne-Grant, O.M.I.

www.collectionscanada.gc.ca

PROPOSED PIGERY AT LEJAC SCHOOL

The figures included in these estimates are based on three major considerations:

1. The quantity of pork and pork products consumed the the school.

2. The climate with its long and severe winter.

3. The probable wishes of the Department that the new building be permanent, well equipped and in keeping with the other farm buildings.

1. The quality of pork and pork products consumed at the school. A study of our books shows that the consumption of pork can be grouped under three headings

A. Fresh pork, ham and bacon consumed in the school.
B. Lard and other by-products
C. Bacon and lard given to the Indians in payment for work done.

These three items work out at about 30lbs a day. During the past year we have purchased nearly one thousand pounds of lard , and an average of one hundred pounds of ham and bacon per month.

Some of this goes to the Indians who work for the school from time to time. Experience has proven that this system is far better than that of paying cash to the Indians since in most cases the cash is usually wasted. This heavy purchase of pork and pork products shows that to meet the requirements of theschool at least eight sows are required. The four sows that we keep at present do not supply half our needs.

2. The climate with the long and severe winter. The climate effects both the size and cost of the building.

A. The size, because without adequate protection it is impossible to have more than one litter a year from each sow instead of the two litters required for ecomical production.

B. The cost, because experience has proven that the concrete footings and foundations usually found in the plans and specifications for buildings of this kind are not deep enough or strong enough to withstand the severe frost and theresultant heaving which takes place in the spring. We find that we use double the amount of cement and gravel in order to assure foundations strong enough to withstand the rigors of our climate.

~~new buildThe probable wishes of the Department that the~~ new building

POOR-COPY

Indian Affairs. (RG 10, Volume 6444, file 881-5, part 5)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

Library and Archives Canada / Bibliothèque et Archives Canada
www.collectionscanada.gc.ca

3. The probable wishes of the Department that the new building be permanent, well equipped and in keeping with the other farm buildings.

We have already several fine looking buildings on the farm including a big modern barn, three poultry houses and a calf barn. These are good buildings, well put up, and nicely painted. The new pigery therefore, we think be built along the same lines and with the same pleasing appearance.

CONCLUSION

We therefor recommend to the Department the construction of a building somewhat larger than the one which was burnt down three years ago. This building was thirty by forty and was far too small for our needs. Endless trouble was caused by having to constantly change the pigs from one pen to another and the crowding together of so many pigs in one small building caused a very high mortality among the young pigs at farrowing time.

ESTIMATES

Dimensions 30 X 70 X 16 Gable Roof.
Capacity 8 Brood Sows and 40 fattening hogs.

Concrete footing and foundations:

Cement	212 sacks @ $1.30	$275.60
Gravel	50 Cubic yards @ $3.50	$175.00
Floor:		
Cement	123 sacks @ $1.30	$159.90
Gravel	22 Cubic yards @ $3.50	$ 77.00
Lumber:		
	16000 feet @ $25.00 per 100	$400.00
Roofing:		
	3 ply best quality 30 rolls @ $4.90	$147.00
Nails:		
	500 pounds @ 7¢	$ 35.00
Plumbing and water connections		$150.00
Heating, cooking and interior fixtures, ventilators etc.		$350.00
Paint		$ 50.00
Total		$1820.10

COPY: / INDIAN COMMISSIONER MACKAY.

163-1-5

Ottawa, January 22, 1938.

Dear Sir:-

EXD.

Indian Commissioner MacKay has forwarded the Department copy of your letter to him of November 30th and his reply to you of December 8th; also Reverend Byrne-Grant's letter of November 26th in connection with the proposed construction of a new piggery at the Le Jac Indian Residential School.

While the Department is anxious to assist the Principal in the cost of the construction of this building; at the same time I feel that a much less expensive building than the one suggested by the Principal would fill the requirements of the Lejac School.

I would appreciate, therefore, your discussing this matter again with him with a view to deciding on a less costly building. Expensive fittings are not by any means necessary.

As a matter of fact, the Department will only have available in next year's appropriation an amount of $500 which can be allowed the Lejac School, but we have some funds in the current year's appropriation which we could use, if you consider it advisable.

I note in the Principal's letter that approximately a carload of cement will be necessary. If this was purchased and shipped to the school before the end of March, would it be possible to store it where it would not be exposed to the weather.

The Principal's .....

The Principal's letter refers to the necessity of purchasing sixteen feet of lumber. Can this be secured locally; if so, let me know the name and address of the firm from whom purchase should be made.

I would appreciate hearing from you by the middle of February in order that, if it is decided to make any purchase from the current year's appropriation, arrangements can be made to that end.

In considering this whole matter, the point to be kept in mind is that while a serviceable building should be provided, there is no occasion to erect a showy building.

I enclose an extra copy of this letter, which you can show the Principal and may I add that copy of this letter is also being sent to Indian Commissioner MacKay.

Yours truly,

R.A. Hoey,
Supt. of Welfare & Training.

LEJAC INDIAN RESIDENTIAL SCHOOL

February 16th, 1938

Report and recommendations of the school engineer concerning Fire Fighting equipment at the School

1. Material needed for refilling for present equipment

   a. Two gallons of Co mercial Sulphuric Acid.
   b. Fifty pounds of Bi-carbonate of Soda.

2. New Equipment.

   a. Half dozen Pyrene Extinguishers without wall brackets.
   b. Six- - fifty feet lenghs of ordinary ¾ inch Garden Hose with Nozzles and Faucets.

This garden hose is for the four domitories and the two recreation rooms which are some distance from the main fire hoses and the engineer feels that these extra hose are really needed in order to have water available in every part of the building.

   c. Fifty feet of one and a half inch fire hose with couplings and water valve for girls side of building on second floor to correspond with same equipment on boys side. At present to use the equipment now stationed on boys side in case of fire on the girls side it would be necessary to break through two doors or through the wall.

   d. Three hydrants with two inch connections.

One of these hydrants is needed to replace one broken by the frost. The other two will be used for the barn and out buildings.

   e. Twelve fire axes, about one and three quarter pound, and handles to be enclosed in glass faced box for school and out buildings, and twelve fire pails for the same purpose.

Recently a fire occurred in one of the poultry houses and as the fire was inside the walls a considerable occurred in extinguishing it on account of the lack of the axes and water pails.

   f. One of the problems that has always worried us in connection with fire excapes is that during the winter months the dripping of melting snow from the roof not only covers the fire escapes with a sheet of ice but also completely seals the windows leading on to the fire escape, prevents the lowering of the bottom landing and on the North side of the building covers the ground at the bottom of the fire escape with sheer ice. The result is that it is impossible to have

fire drills during the winter months and in the event of fire the use of the fire escapes would almost certainly lead to serious injury on account of their slipery condition.

The remedy recommended by the engineer is that a roof be constructed over each of the fire escapes so as to carry the melting snow beyond the limits of the fire escapes. This would mean the construction of four roofs, each one approximately thirty by eight.

On more than one occasion the question of this melting snow has been discussed but I do not know whether the suggestion of building roofs over the fire escapes has ever been submitted to the Department

Memorandum:

DEPUTY MINISTER

The piggery at the Lejac Indian Residential School, Stuart Lake, B. C. (Electoral District of Cariboo) was destroyed by fire some three years ago and has not been replaced.

An urgent request for a new piggery has been received from the Principal of the Lejac School and this application has received the approval of Indian Agent Moore and Indian Commissioner MacKay.

The school authorities will do the work but it is necessary to supply the required material. A carload of cement will be needed and I was under the impression that this would cost less than $500.00. Accordingly a requisition was forwarded to the Purchasing Agent.

Funds are available in the current year's appropriation and I would appreciate your authorizing the Purchasing Agent to proceed with the purchase of the cement.

Copy sent to Major MacKay

Ottawa,
February 15, 1938.

Dear Sir:

With reference to your letter of the 5th instant, addressed to Indian Commissioner MacKay, regarding the erection of a piggery at the Lejac Indian Residential School, I am requesting the Purchasing Agent to order a carload of cement and have it shipped to the Lejac School at an early date. The account covering the cost of the cement will also be sent to the Principal and you should instruct him to certify it and return it to the Department as soon as the cement arrives as we wish to pay this account from the current fiscal year's appropriation.

In the Principal's letter he refers to the fact that 16,000 feet of lumber will be required and that it can be purchased at a sawmill located four miles from the school. Please let me have more definite information regarding this lumber in order that I can place the matter before the Purchasing Agent in an intelligent manner. Also give estimate of cost of purchasing from local mill mentioned by Principal.

Yours truly,

R. A. Hoey,
Supt. of Welfare & Training.

REGISTRY

Dear Sir:

I beg to transmit herewith a letter from Indian Agent Moore, together with a copy of a letter from Rev. W. Byrne-Grant, O.M.I., Principal of Lejac Indian Residential School, regarding an application forwarded with my 182/13/1586 of December 31st for funds to construct a piggery at Lejac School. I may say that my recommendation to the Department was not intended to include the $1200 item covering the cost of the modern equipment and installation of same, referred to by the Reverend Principal in the penultimate paragraph of his letter, but was based on an estimate submitted by the Agent of $1820.

Yours faithfully,

D. M. MacKay.

DEPARTMENT OF INDIAN AFFAIRS
CANADA

OFFICE OF
INDIAN AGENT

Vanderhoof, B.C., February 5th. 1938.

Sir:-

I beg to acknowledge receipt of official letter No.163-1-5 and dated January the 22nd. ultimo with reference to the erection of a piggery, and estimates for same at the Lejac Indian Residential School.

In this connection I beg to submit herewith a letter received from the Rev. Principal which is, I trust, self explanatary. I might say that I discussed this matter at some length with the Principal but felt it desirable that the gist of our conversation be submitted in writing so that the Department would have first hand information on the views of the Principal.

I think that the various points mentioned in the Department's letter are covered fully by the Principal, especially in so far as the storage of the cement and the purchasing of the 16000 feet of lumber is concerned. I would, however, respectfully point out that no intention of erecting an elaborate or showy building is anticipated, but rather one that will be serviceable and give protection to the pigs during the winter months. It was not intended to include the expensive fixtures mentioned in the original report of the Principal but rather to show what these fixtures would cost if procured, however, we can get along just as well and just as efficiently by using ordinary wooden gates, feeding troughs and partitions, and the 16000 feet of lumber will be sufficient for that purpose. I trust that the question is better understood with this added information.

Your obedient servant,

R.H.Moore,
Indian Agent.

(C O P Y)

LEJAC INDIAN RESIDENTIAL SCHOOL

LEJAC, B.C.

February 4th, 1938

Mr. R.H. Moore,
Indian Agent,
Vanderhoof, B.C.

Dear Mr. Moore;

I beg to acknowledge receipt of your letter enclosing one dated Jany. 22nd concerning the construction of a new piggery.

In this letter the Department suggests a less expensive building than the one recommended in the original report.

The original report suggested a building at an estimated cost of $1820 and while reference was made of the estimates furnished by the Beatty Co. of $1200 for modern interior fixtures this item was not considered as part of the original recommendation. By striking out this item altogether the building would cost only $1820.

This estimate is not high and perhaps the Department would be willing to go as far as possible in contributing towards this amount and the school would pay for the balance out of its own funds and possibly the Department could see its way to reimburse us next year or before the end of the fiscal year 1938-39.

Another solution would be to figure that on the basis of $1820 for a building 70 feet long, the cost would be $260 for every ten feet and the length of the building could be limited to the amount of money available and provision made in its construction for an increase in length at a latter date.

In these estimates there is nothing included that could be considered to be showy or unnecessary and the plans therefore would meet the wishes of the Department on this point.

With regard .....

With regard to the storage of cement we are fortunate in having a warehouse that is well suited for this purpose and there would be no difficulty in storing the quantity we would need.

The sixteen thousand feet of lumber can be purchased at a mill four miles from the school. It is known as the Fraser Lake Sawmills, Fraser Lake, B.C., and the manager is Mr. M. M. Connelly, M.L.A., the provincial member for the Omineca riding.

I hope that this additional information and suggestions will be sufficient to enable the Department to come to a decision.

Yours sincerely,

"W. Byrne-Grant, O.M.I."

Principal.

Dear Mr. Moore:-

Re Fire Protection at School

Recently I asked the school engineer to make a through survey of the fire fighting equipment at the school in order to be perfectly sure that every precaution is been taken to enable us to handle any out break of fire in the school building, barn and other out buildings.

As a result of this survey I beg to submit the accompaning recommendations for the information of the Department.

Yours very sincerely,

W Byrne-Grant O.M.I.

Vanderhoof, B.C., February 28th. 1938.

Department of Mines & Resources
Indian Affairs Branch
FEB 24 1938
RECORDS

Sir:-

I beg to attach hereto a letter with certain recommendations by the Principal of the Lejac Indian Residential School regarding necessary improvements to and additions to the fire fighting equipment at Lejac .

In commenting on the various points mentioned by the Principal I would respectfully point out that the icy condition of the fire escapes seems to be the worst feature that the successive Principals at the School have had to deal with over a period of years. It was thought that by keeping the snow swept off the fire escapes themselves that we would overcome some of the difficulty but the continual dripping of the roof made the fire escapes next to impossible to use except in case of emergency. However, if the emergency did arise the children could always get down although one or two of them might happen to fall and get hurt, but to use the escapes for fire drill during winter months, it is not considered advisable or even necessary. With reference to the windows which lead unto the fire escapes; these did get sealed up with ice but like the escapes in the case of an emergency the windows would be broken anyway as no one would take time to open them.

No doubt a similar situation to this must exist in some other schools and I would appreciate information from the Department as to what would be the best procedure to follow during fire drill.

We did put in some new fire fighting equipment at the School about a year ago but from the information given by the Rev. Principal it would appear as if we should replenish and replace some of the equipment that is faulty and out of condition.

Your obedient servant,

R.H. Moore

Under Direction of The Oblate Fathers

LEJAC, B.C.

February 26th, 1938

Mr. R. H. Moore,
Indian Agent,
Vanderhoof, B.C.

Dear Mr. Moore:-

I am enclosing the estimates submitted by Mr. M.M. Connelly, M.L.A. for the lumber required for the new piggery.

At first sight the estimate seems to be considerably higher than the item of 16,000 ft of lumber first submitted to the Department but in fact it includes several items listed separately in the original estimate.

It includes for instance the roofing, I had suggested three ply roofing but I have been informed by the carpenter that roofing will not stand up under the freezing and thawing of our severe winters and is easily torn if snow has to removed from the roof. We have therefore substituted shingles.

In our first list I had forgotten altoghether about doors and windows and this item is found in the enclosed estimates.

Mr. Connelly has also included the lumber necessery for the interior fixtures which was listed as a separate item in the original list.

I am to-day writing to Marshall-Wells to ask them to quote a price for the pipe and drain tile required for the drainage and water fixtures.

Yours sincerely,

W Byrne-Grant O.M.I.

HY'D.

Ottawa,
March 9, 1938.

Memorandum:

DEPUTY MINISTER

I desire to refer you to my memorandum of March 1 with reference to the new piggery at the Lejac Indian Residential School, Stuart Lake, B. C., Electoral District of Cariboo.

Arrangements have already been made for the Purchasing Agent to secure the cement.

Lumber and nails are also required and the Principal has secured a quotation from Fraser Lake Sawmills, Fraser Lake, B. C., of $1001.27 for the lumber and $35.00 for the nails.

Funds for the purchase of the above are available in our appropriation for the current fiscal year and I would appreciate if the Honourable the Minister would authorize the Purchasing Agent to secure the lumber and nails required at once in order that payment can be made before the end of March.

I enclose requisition for purchase of the lumber and nails required.

I might add that the Fraser Lake Sawmills are located only a few miles from the Lejac School.

Director.

Department of Mines & Resources
Indian Affairs Branch.
MAR 21 1938
RECORDS

Vanderhoof, B.C., March 16th. 1938.

Sir:-

I would respectfully direct your attention to Official letter No. 163-1-5 of February the 15th. ultimo with reference to the erection of a piggery at the Lejac Indian Residential School.

In this connection I wish to enclose herewith a copy of a letter from the Rev. Principal which I trust you will find self explanatory. I am also enclosing an estimate of the plumbing and water fixtures in connection with the piggery. I thought it advisable to send you this quotation now so that you will be in a better position to know the exact material that is required.

Your obedient servant,

R. H. Moore

COPY

LEJAC INDIAN RESIDENTIAL SCHOOL.
Under direction of the Oblate Fathers
Lejac, B.C.

March 8th., 1938.

Dear Mr. Moore:-

With reference to the estimates for Plumbing submitted by Marshall-Wells, the reason for the increase over the original estimate is due to the fact that in my first figures I did not allow for the necessary drain pipe and water pipe to connect the new piggery with the existing water and drainage system.

It was only when we began to consider the details that I discovered that the building would be 200 feet away from the water and drainage system and that the extra pumping would have to be allowed for.

Now that we have gone into the details, the figures read something like this :-

1. Lumber and bricks	$1100-00
2. Plumbing	350-00
3. Gravel and cement	680-00
Total	$ 2130-00

If this is more than the Department can see its way to spend, we can fall back on one of the suggestions already made to the Department, Viz. to shorten the building, or let the school absorb the difference out of the current revenue, with the possibility of being re-embursed later.

Yours sincerely,

Signed:- W. Byrne Grant, O.M.I.

RECORDS

August 9 1938.

Philip Phalen Esq.,
Dept. of Indian Affairs,
Ottawa, Ont.

Dear Mr. Phalen :

We are wondering about our pig pens. You will remember that the Dept. ordered and paid for the lumber and cement, but nothing has been done about the plumbing and the sand and the gravel. The Dept. has already received the estimates for the plumbing as submitted by Marshall-Wells. The amount of sand and gravel is indicated in the original estimates sent to the Dept. It can be brought to the school by C.N.R.freight car or by truck. We usually get it through Mr. Connelly of Fraser Lake Saw Mills to whom the Dept. already gave the contract for the lumber. His price is $3.50 per yard delivered at the school . This would be better for us than to get it by C.N.R. as we would not have to haul it up from the station.

We have already purchased the brood sows and we shall be in a quandry this winter, if permission to go ahead with the building is not given soon. You know how early our winters come . Would it be possible to hasten action by telegram,so that we can get started ? The gravel and the plumbing are necessary for the first part of the work.

Yours very sincerely

W Byrne Fran[illegible] O.M.I.

EXD.

Ottawa, September 12, 1938.

Dear Mr. Turgeon:

I have for acknowledgment your letter of August 31, in which you intimate that the Reverend T. Byrne Grant is anxious to proceed with the construction of a piggery at the Lejac Indian Residential School.

The records here indicate that the Principal of the Lejac School was authorized to proceed with the construction of a piggery in the early months of this year. The following supplies were purchased by the Department during the month of March:- lumber $1187.77, cement $168.30, with freight charges amounting to $273.70. The Principal's letter to Mr. Phelan dated August 9, 1938, was the first communication received by the Department since March, with respect to the construction of the Lejac piggery. In the absence of any letters, the officials of the Indian Affairs Branch were naturally under the impression that the pig pens had either been completed or were at least in the process of construction. We still find it somewhat difficult to understand why construction work was not started toward the end of March or early in April.

In a departmental letter dated August 24, the Indian agent was informed that the sum of $500.00 was included in this year's estimates for repairs and improvements at the Lejac school. The agent was informed that this amount could be utilized for the

installation of plumbing, etc., at the piggery, but that any additional amount required would have to be provided from school funds. It is altogether likely that the construction of this building has already been started and that the work will be completed prior to the approach of the winter season.

Yours sincerely,

RAH

124 Pacific Building,
Vancouver, B. C.,

August 31, 1938.

Mr. C. W. Jackson,
Chief Executive Assistant,
Department of Mines and Resources,
Ottawa, Ontario

Dear Clarence:

Rev. W. Byrne-Grant, O.M.I., Principal of the Lejac Indian Residential School at Lejac, B.C., is anxious about construction of their pig-pen. He informs me that the Department ordered and paid for the lumber and cement for the pig-pen but have not yet done anything about the plumbing, and the sand and gravel.

He wrote Philip Phelan of the Department on August 20th. It is possible that action has already been taken. If they do not start work on the pig-pen very soon, it will be too late for this year as the cement foundations and the cement floor should be in before any heavy frost occurs.

Would you kindly make enquiries and if definite instructions have not already issued, will you please do what you can to hasten the matter.

With best personal regards,

Yours faithfully,

(sgd.) J. G. Turgeon, (M.P.)

EX'D.

Ottawa,
August 24, 1938.

Dear Sir:

The Department is in receipt of the following letter from the Reverend Principal of the Lejac Indian Residential School:

"We are wondering about our pig pens. You will remember that the Dept. ordered and paid for the lumber and cement, but nothing has been done about the plumbing and the sand and the gravel. The Dept. has already received the estimates for the plumbing as submitted by Marshall-Wells. The amount of sand and gravel is indicated in the original estimates sent to the Dept. It can be brought to the school by C.N.R. freight car or by truck. We usually get it through Mr. Connelly of Fraser Lake Saw Mills to whom the Dept. already gave the contract for the lumber. His price is $3.50 per yard delivered at the school. This would be better for us than to get it by C.N.R. as we would not have to haul it up from the station."

This is the first correspondence that we have received since last March regarding the pig pens at the Lejac Indian Residential School. In the absence of any letters we were under the impression that the pig pens had either been completed or were in process of construction.

In the Principal's letter of March 8, which was forwarded under cover of your letter of March 16, he estimated the cost of the plumbing at $350.00 and the cost of the gravel and cement at $680.00 or a total

R. H. Moore, Esq.,
Indian Agent,
Vanderhoof, B. C.

POOR-COPY

of $1030.00. In preparing our appropriation for the current fiscal year it was found possible to include an amount of $500.00 only for repairs and improvements at the Lejac School. You may authorize the Principal to proceed with the construction of the pig pens on the understanding that we can only provide $500.00 toward the cost of the plumbing and the gravel and cement. The balance will have to be provided from school funds.

As you are aware we have already expended the following amounts in connection with the pig pens:

Lumber	$ 1127.77
Cement	163.30
Freight	273.70

Yours truly,

R. A. Hoey,
Supt. of Welfare & Training.

Ottawa,
September 14, 1938.

Dear Sir:

In reporting on his inspection of the machinery at the Lejac Residential School Mr. T.J. Arnall writes as follows:

"Main drive shaft worn at end where pulley has been slipped. Should be turned down and a split bushing installed. Cost would be very slight and should not exceed $5.00."

Mr. Arnall does not state the exact machine to which he refers but no doubt you are aware of this and the repairs recommended by Mr. Arnall should be made at once.

Yours truly,

R. A. Hoey,
Supt. of Welfare & Training.

Ottawa,
October 27, 1938.

Dear Sir:

I desire to refer to your letter of the 23rd ultimo in connection with the letter of the Principal of the Lejac Residential School dated February 16 last regarding the fire escapes. Since receipt of your letter the Principal's suggestion has been discussed on several occasions with the Engineering Branch. However, it is difficult at this distance to decide whether or not the erection of roofs over the fire escapes would remedy the difficulty that has been experienced. You might review this matter again with the new Principal and if you consider that this work would be a permanent improvement you should let me know the probable cost that would be involved. Possibly if the Department supplied the material the school staff could do the labour. In this event full particulars should be given with regard to material required as, if the cost exceeds $50.00, purchase will have to be made through our Purchasing Branch.

Yours truly,

R. A. Hoey,
Supt. of Welfare & Training.

R

Sir:-

I beg to acknowledge receipt of your letter of the 14th. ultimo File No. 163-1-5 with reference to the recent inspection report submitted by Mr. T.J.Arnall in connection with the machinery at the Lejac Indian Residential School.

In the above connection I wish to point out that these repairs have already been attended to by Mr. Leslie, the School Engineer, It was not necessary in this case to have the shaft in question sent out to be turned down.

While on the matter of this inspection of Mr. Arnall's I would like to point out that the boiler in the laundry at the School was much too small for all practical purposes, and it was suggested by Mr. Arnall that the size of the boiler which would be suitable would be 18 or 20 horse power, and of the horizontal, tubular, locomotive type. The present boiler is much too small to heat water and work the clothes dryer, whereas if it was the proper size it would carry the clothes dryer as well as being capable of handling a sterilizer, which I think you will agree is a necessity in an institution where children subject to tuberculosis are in attendance, as well as the odd case of trachoma. Please take this matter into consideration at your convenience and advise.

Your obedient servant,

R.H.Moore,
Indian Agent.

Vanderhoof, B.C., September 23rd. 1938.

Sir:-

I beg to acknowledge receipt of Official Letter No.163-1-5 of August the 24th. ultimo with reference to previous correspondence in connection with the construction of a piggery at the Lejac Indian Residential School.

Owing to the fact that this letter arrived during my absence from the Agency I did not have an opportunity of discussing it with the Rev. Principal at the time of its arrival. In doing so since, however, the Rev. Father has agreed to proceed with the construction of the pig pen immediately, having in mind the sum of $500-00 which will be available from the Department to assist in the work. The amount necessary over and above this $500-00 will be put up by the School authorities with the hope that he can be reimbursed to this extent out of the new funds next spring.

I feel that this suggestion by the School Principal is only fair and I have no hesitation in recommending that the Department be good enough to agree to this arrangement. In the meantime construction will proceed as rapidly as possible.

Your obedient servant,

R.H.Moore,
Indian Agent.

EX'D

Ottawa, September 12, 1938.

Dear Mr. Turgeon:

I have for acknowledgment your letter of August 31, in which you intimate that the Reverend W. Byrne Grant is anxious to proceed with the construction of a piggery at the Lejac Indian Residential School.

The records here indicate that the Principal of the Lejac School was authorized to proceed with the construction of a piggery in the early months of this year. The following supplies were purchased by the Department during the month of March:- lumber $1187.77, cement $163.30, with freight charges amounting to $273.70. The Principal's letter to Mr. Phelan dated August 9, 1938, was the first communication received by the Department since March, with respect to the construction of the Lejac piggery. In the absence of any letters, the officials of the Indian Affairs Branch were naturally under the impression that the pig pens had either been completed or were at least in the process of construction. We still find it somewhat difficult to understand why construction work was not started toward the end of March or early in April.

In a departmental letter dated August 24, the Indian agent was informed that the sum of $500.00 was included in this year's estimates for repairs and improvements at the Lejac school. The agent was informed that this amount could be utilized for the

installation of plumbing, etc., at the piggery, but that any additional amount required would have to be provided from school funds. It is altogether likely that the construction of this building has already been started and that the work will be completed prior to the approach of the winter season.

Yours sincerely,

Acting Deputy Minister.

RAH

Lejac Indian Residential School

Under Direction of The Oblate Fathers

LEJAC, B.C.

October 25th., 1938.

D. M. MacKay, Esq.,
Indian Commissioner For B.C.
P.O. Box 8,
Vancouver, B.C.

Dear Sir:

I wish to apply for formal permission to move our two electric generators from the room in the basement, in which they are now located, to a small and separate building behind the main building of the school.

There are several reasons which prompt this request:

1. Due to the proximity of the new root cellar to the power room, the exhaust pipe, instead of being in a horizontal position, has to be raised about twleve feet into the air; the resulting back pressure cuts the efficiency of the engines by atleast ten per cent, and the engine becomes fouled very quickly.
2. Due to the position of the exhaust pipe, the silencers cannot be used, and the resulting noise is a great nuisance.
3. When the generators are running there is a great deal of vibration and noise in the chapel, which is situated directly overhead.
4. When the generators are removed we will have a good sized room in which to store cordwood for the furnaces. At present this wood has to be stored very close to the fireboxes, thereby causing a serious fire hazard, which was remarked upon by the Inspector on his recent visit.

Since this is a comparatively small undertaking we do not ask any special financial assistance from the Department in order to carry it out; we can do the whole thing by ourselves. The separate building already exists and needs very little alteration to fit it for its new use.

Captain Barry, who was here last week, heartily endorses this proposal; as also does our engineer, Mr. Leslie.

In order that we may go ahead with the job, an early repaly will be greatly appreciated.

Very sincerely yours,

Rev. Alex. R. Simpson, O.M.I.

PLEASE QUOTE 22791-15-20-1
FILE.....

March 4, 1939.

Gentlemen,-

COPY

With further reference to your letter of August 8th, 1938, (reference EADS/EP) in which you quoted as follows:

1 - #127-3-2 Brown Mission Singer Sewing Machine -
f.o.b. Vanderhoof, B.C. $72.25
Less 45% $39.74

I may say that the Vancouver Branch of the Singer Sewing Machine Company are claiming payment of freight charges of $3.08 on above machine supplied on purchase order #6812. As your quotation was definitely $39.74 net f.o.b. Vanderhoof, we assumed that you had a company shop at Vanderhoof, or within a 15-mile radius of same, and that there would be no extra freight charges. Under the circumstances, I see no reason why this extra charge of $3.08 should apply.

Copy of this letter is being sent your Vancouver Branch. I would appreciate your advice regarding this transaction.

Yours very truly,

W. M. BAILEY.

Memorandum:

MR. BAILEY

The piggery at the Lejac Indian residential school was destroyed by fire last year.

As you are aware this school is situated in northern British Columbia and the Agent stated that the necessary lumber for building the new piggery could be secured locally at reasonable cost and thus save freighting. He was authorized to purchase the lumber shown on the attached account and it would be appreciated if you would issue purchase order so that the account may be paid.

Ottawa,
May 31, 1939.

Dear Sir:

I am in receipt of your letters of the 16th and 22nd instant enclosing requisitions for battleship linoleum, gyproc and paint for use at the Lejac Indian residential school.

In the current year's appropriation an amount of $750.00 was provided for repairs, improvements and purchase of new equipment at this school. The requisitions that you have forwarded amount to $406.20 and the Purchasing Agent is being requested to secure the material.

This will mean that there will be approximately $343.80 remaining. Owing to the present setup of our appropriation it is impossible to exceed in any fiscal year the amount specifically provided for any residential school. You should, therefore, advise me later in what manner you consider the above balance should be expended.

Yours truly,

R. A. Hoey,
Supt. of Welfare & Training.

MAY 27 1939
RECORDS

Sir:-

I beg to enclose herewith requisition forms 37½ covering a proposed expenditure of $98-00 for the purchase of 38 pieces of 4' x 10' Gyproc for the Lejac Indian Residential School.

The Gyproc is required to repair the walls and ceilings of the boys and girl's infirmarys. At present the walls are in bad repair where the plaster has chipped and fallen leaving large patches of bare lath showing. Mr. Hess, the General Factotum at the School will perform the labour placing the Gyproc without cost to the Department. I have inspected some Gyproc patchwork undertaken by Mr. Hess in the School class rooms and an excellent job has been made, in fact when kalsomined the patches will not be visible.

I attach hereto original tenders from Andersen's Lumber Yard at Prince George for $98-00 and Matthews' Lumber Yard, Vanderhoof, B.C. for $102-75.

Your obedient servant,

Robert Howe,
Acting Indian Agent.

R

Sir:-

I beg to enclose herewith requisition forms 37½ and quotations from Marshall- Wells , Ltd., wholesale dealers, Prince George, B.C. for the purchase of material amounting to $308-00 for the Lejac Indian Residential School, Lejac, B.C.

Painting of the kitchen and redecorating the interior of the school is very necessary, the walls are discolored and dirty and present a dismal appearance. Battleship linoleum is required for the main corridor on the first floor, at present it is covered with an inferior grade of congoleum which was laid four years ago and is now completely worn out.

There is considerable wear and tear on the linoleum and I am sure that battleship grade will be more economical in the long run. It is understood that the labour will be undertaken by the school staff, without cost to the Department.

I should also mention that it will be necessary to repair the four lavatory floors this year. The floors are composed of Asphalt, approximately one inch thick which is badly cracked and unsanitary. I am making inquiries from various sources as to the best method of repairing the floors in question and a report will be submitted in the near future.

Your obedient servant,

Robert Howe,
Acting Indian Agent.

Lejac Indian Residential School

Under Direction of The Oblate Fathers

LEJAC, B.C.

June 2nd., 1939.

Richard Howe, Esq.,
Acting Indian Agent,
Vanderhoof, B.C.

Dear Sir:

When making the requisitions to be included in the estimates for the current year, one of the items we asked for was three sewing machines for the instruction of the children. These machines are intended to replace equipment that is worn out beyond repair.

Having made inquiries, I wish to inform you that the Singer Sewing Machine Co. of Vancouver, has offered to supply three of their machines at a cost of $39.74 each, f.o.b. Vancouver. The cost of transportation to this point would be about $5.00 each machine.

This equipment will be urgently needed at the beginning of the new school year; so I request that you do all in your power to induce the Department to authorize the purchases of these machines as soon as possible.

Yours truly,

Rev. Alex. R. Simpson, O.M.I.

Rev. Alex. R. Simpson, O.M.I.,

R

Vanderhoof, B.C.,
June 5th. 1939.

Sir:-

I beg to enclose herewith a letter received from the Principal of the Lejac Indian Residential School, Lejac, B.C., requesting the Department to purchase three Singer Sewing Machines to replace equipment which is completely worn out and beyond repair.

Father Simpson states in his letter the urgent need of this equipment for the beginning of the new school year . It is noted that provision was made in the current year's estimates for the purchase of three machines and in view of the worn out condition of the old equipment I would recommend the expenditure be approved. Please find attached hereto requisition forms No. 37½ in triplicate.

Your obedient servant,

Robert Howe

Dear Sir:- Your File No. I63-I-5.

With reference to my requisition of May 22nd., for battleship linoleum, paint and alabastine for use at the Lejac Indian Residential School, I beg to advise the Rev. Principal is very anxious to complete the painting of the interior before the children return to School at the end of next month, and I would respectfully request the material be secured at an early date.

Yours faithfully,

Robert Howe,
Acting Indian Agent.

EX'D.
A.

Ottawa,
August 2, 1939.

Dear Sir:

With reference to your letter of the 26th ultimo Indian Commissioner MacKay is being requested to purchase the material required for resurfacing the floors of the lavatories at the Lejac Indian residential school.

With reference to your other letter of July 26 I would refer you to purchase requisitions No. 26456, 26445 and 24537, copies of which have been forwarded to you, covering all the materials previously requested for the Lejac school.

Taking into consideration the cost of the materials already ordered and the cost of the material for resurfacing the floors the amount provided in the current year's appropriation for repairs and improvements at this school is now exhausted and it will not be possible to consider further requests.

Yours truly,

R. A. Hoey,
Supt. of Welfare & Training.

Robt. Howe, Esq.,
Acting Indian Agent,
Vanderhoof, B. C.

Ottawa,
August 2, 1939.

Dear Sir:

Enclosed is a copy of a requisition received from Acting Agent Howe with reference to material required for resurfacing the floors of the lavatories in the Lejac Indian residential school. I should appreciate it if you would arrange to purchase this material and ship it to Lejac at the earliest possible date.

I am securing an encumbrance requisition and will forward you the number of this in the near future.

Yours truly,

R. A. Hoey,
Supt. of Welfare & Training.

Major D. M. MacKay,
Indian Commissioner,
P.O. Box 70,
Vancouver, B. C.

Dear Sir:-

I beg to enclose herewith requisition forms 37 for material required for re-surfacing the floors of four lavatories in the Lejac Indian Residential School.

The existing lavatory floors are covered with an asphaltic composition which is badly cracked and unsanitary. Tremco Mulsomastic Fibrated is highly recommended for re-surfacing old floors of this type and may be applied by a practical cement finisher. The Rev. Principal assures me, that the handy man at the School is qualified to perform the work.

It will be appreciated if the purchase of the material could be arranged as soon as possible in order the work may be completed before the children return to School.

Tenders in duplicate attached hereto from Fred M. Beatty Ltd., sole agents for Tremco products in B.C.

Yours faithfully,

Robert Howe,
Acting Indian Agent.

Vanderhoof, B.C.,

September 26th. 1939.

Sir:-

I beg to advise that yesterday afternoon the Rev. Father A.R.Simpson, Principal of the Lejac Indian Residential School, sent word to me through the telephone operator at Endako that a fire had occurred at the School and to come up at once. I left at once in company with Constable A.J.F.Rae and arrived at the School about an hour later.

The Reverend Principal showed us where the fire had broken out in the chimney at the back of the laundry. The fire was brought under control before it had done any damage. The only damage done was where the fire fighters broke through the roof to get at the inside of the chimney in the attic above the laundry.

We found that Mr. Gerald H. Barry , Inspector of Indian Schools had arrived at the School and was making his inspection when the fire happened. Mr. Barry is making a detailed report of the fire and making his recommendations to avoid any further happening of this kind , if possible.

Your obedient servant,

Jas. H. F. Lacey.

Ottawa,
September 27, 1939.

Dear Sir:

I am in receipt of your letter of the 18th instant with reference to the claim of E.C. McGeachy of Vanderhoof for an additional amount for the linoleum he supplied to the Lejac Indian residential school.

In this regard I may say that Mr. McGeachy has already written to our Purchasing Branch and he was sent the following reply on September 19:

"I have your letter of the 11th instant, advising us of an error in your quotation and requesting extra payment of an additional $105.00 for the 50 lineal yards of linoleum. To allow you this additional $105.00 would bring your quotation much above that of your competitors and would be unfair to them.

"Taking all the facts into consideration we are prepared to allow you the difference between the total amount of your tender $241.15 and the next lowest tender, this amounts to $35.10.

"It will be in order for you to invoice accordingly, quoting our Purchase Order No. 26445."

You will note from the above that the Department offers to allow him an additional amount of $35.10. This amount will be paid on receipt from you of a certified voucher.

Yours truly,

J.H.F. Lacey, Esq.,
Acting Indian Agent,
Vanderhoof, B. C.

Sir:-

During the month of August Mr. E.C.McGeachy of Vanderhoof supplied fifty yards of linoleum to the Lejac Indian Residential School. He tendered for this linoleum at $105-00 but claims that he stands to lose $105-00 on the deal as he thought he was tendering for linoleum one yard wide, whereas, the linoleum called for in the tender was two yards wide. I explained to Mr. McGeachy that the tender clearly called for linoleum two yards wide and that the account had already gone forward for payment. I also told him that I did not think that his claim for an additional $105-00 would be favourably considered by the Department. He insisted, however, that I take the matter up with the Department. In this matter I would respectfully refer you to Voucher No. 230 which went forward from this office under date of August 17th. 1939, in favour of Mr. E.C.McGeachy for a total amount of $241-15. Please advise what action the Department wishes to take in regard to Mr. McGeachey's claim.

Victoria, B. C.,

Date: September 9, 1939.

Mr. C. F. Dawson,
District Resident Architect,
Dept. Public Works, Canada;
Victoria, B. C.

Dear Sir:

I beg to report that I inspected Boiler No.: 44411

on the 25th day of August 1939, and have found it in the following condition:

Owned by the Department of: Mines & Resources, Indian Branch
Located at: Indian Residential School, Le Jac, B. C.
Manufactured by: Vancouver Iron Works, Vancouver, B. C.
Date: 28/12/29 H.P. 7 Size: 37" x 60"

Type: Vertical Tubular	Condition of Plates: Fair
Condition of Stays: Good	Condition of Rivets: Some leaking
Condition of Tubes: Fair	Working Pressure Allowed: 100 lbs.
Safety Valves Set at: 100	Condition: Tight
Hydrostatic Test: 200	Hammer Test: Sound
Deflection Test: Light	Condition under Test: Fair
Steam Valves: Tight	Feed Valves & Checks: Tight
Steam Gauge: Correct	Water Gauge: Good
Test Cocks: Good	Fusible Plug: Good
Blow-off Cock: Good	Blow-down Pipe: Good
Side Walls: / Front Walls: / Front Arches: — Not bricked Plates Fair	Bridges: / Back Walls: / Back Arches: — Not bricked Plates Fair
Smoke Pipe & Breechings: Good	Firebars: Fair
Stokers: None	
Amount of ~~Coal~~ Used: No record	Kind: Alder Cordwood
Quality: Fair	B.T.U. per lb. 4,000

REMARKS: During test longitudinal seam showed a weakness and also 6 rivets in circumferential seam started to leak. Some of the tubes have been renewed. Steam pressure has been reduced from 125 to 100 lbs. After this firing season boiler must be replaced with a 15 H.P. boiler. 1935-37-38 reports stated boiler was much too small.

Ottawa,
November 6, 1939.

Dear Sir:

With reference to the Lejac Indian residential school Inspector Barry reports as follows:

"Wooden rails should be placed on the top of the iron hand rails of the outside escapes. It is impossible for small children to make their way down such escapes at night in sub zero weather as their hands would stick to the iron rails and the skin would be torn off each time they tried to catch hold of the guiding rails."

Please bring the Inspector's suggestion to the attention of the Principal with a view to having it put into effect. The work can be done by the boys in the manual training class.

Yours truly,

R. A. Hoey,
Supt. of Welfare & Training.

Mr. J.H.F. Lacey,
Acting Indian Agent,

Extract for

Original on 154-0-6

Extract from Inspector Barry's report dated October 16, 1939.

Wooden rails should be placed on the top of the iron hand rails of the outside escapes. It is impossible for small children to make their way down such escapes at night in sub zero weather as their hands would stick to the iron rails and the skin would be torn off each time they tried to catch hold of the guiding rails.

The provision of such wooden strips over iron hand rails is also necessary at St. George's School, Lytton, at Lejac residential school and at the Kootenay Indian residential school, and I would ask the officials of the Department to take particular note of this suggestion.

"permanent solution for the removal of this fire hazard is to tear down the whole chimney and rebuild it with high quality bricks. Also, a separate chimney should be erected on the other side of the building for the high pressure boiler and the hot water heater recommended by the Inspector of Schools."

The Indian Agent was requested by wire to advise the cost of erecting two new chimneys at this school. On the recommendation of Commissioner MacKay he secured the services of a competent contractor, Mr. A.P. Andersen, who has quoted as follows:

1. New chimney 18 x 18 flue with 8" wall lined with firebrick -- 60' high .....$ 1,080.00

2. Tear down old chimney and rebuild 12 x 12 flue to be lined with ordinary flue lining .....$ 580.00

The above quotations have been supplied on the understanding that both chimneys will be built at the same time and the prices include concrete foundations for the chimneys.

The Lejac residential school was constructed in the fiscal year 1921-22 at an approximate cost of $185,000.00. In view of the two fires that have occurred as a result of the defective chimney it is considered that it would be advisable to erect two new chimneys immediately. The officers of the Surveys & Engineering Branch were consulted this morning and they expressed the opinion that the prices quoted by Mr. Andersen are reasonable.

Funds for the erection of the chimneys can be provided from the appropriation for the current fiscal year and I should appreciate receiving the approval of the Minister to accept Mr. Andersen's tender for the immediate construction of these two chimneys.

Sept. 28th. 1939.

S-2-57

Stuart Lake Agency.

Vanderhoof, B.C., October 10th. 1939.

Dear Sir:-

I beg to acknowledge receipt of your above mentioned letter of the 28th. utlimo. I have received authority from the Department since the receipt of your letter to have a competent local contractor give a price on the erection of a new chimney and wire them at once. Mr. A.P.Andersen went to the School yesterday and looked the situation over and then returned to Prince George to make his estimate on the cost. I have just received his estimate by wire and have now sent the information on to the Department at Ottawa by wire copy of which is attached. I believe Mr. Andersen's estimate to be the best possible to obtain and if he does the job it will be done right. What he means by "both chimneys must be built at the same time " is that he will first construct the new chimney and it will take care of both boilers until he takes the old chimney down and constructs another new one in its place. Inspector Barry has explained why this is necessary in his report. The Rev. Principal has also recommended the same procedure in his report which I am returning herewith. If Mr. Andersen only build one chimney and then had to return at another time with his men to build the second one he would of course have to charge more for the work.

Trusting that this report is satisfactory.

Your obedient servant,

Jas. H.F.Lacey,
Acting Indian Agent.

Dear Sir:

Following receipt of report from Acting Agent Lacey on the fire which recently occurred at Le Jac Indian Residential School, I immediately instructed him to obtain an estimate of costs involved in rebuilding the existing chimney and the construction of a new chimney. I informed Mr. Lacey that Mr. H. P. Anderson of Prince George was fully competent to make the necessary survey and give an estimate of costs.

I understand that Mr. Lacey has submitted the necessary information direct to the Department.

Yours faithfully,

AIR MAIL EX'D. A.

Dear Sir:

I desire to acknowledge the receipt of your letters of the 26th and 27th ultimo in connection with the fire in the chimney at the Lejac Indian residential school.

Please secure at once the services of a competent local contractor and take him to the school and advise us by wire what it would cost to erect a new chimney of fire brick and fire clay. Please give this matter your immediate attention.

Yours truly,

R. A. Hoey,
Supt. of Welfare & Training.

Mr. J.H.F. Lacey,
Acting Indian Agent,
Vanderhoof, B. C.

D.M.MacKay, Esq.,
Indian Commissioner for, B.C.
Vancouver, B.C.

Dear Sir:-

Once more I am obliged to send you a report of a fire having broken out in this school. The cause is substantially the same as that which caused the fire reported in my letter to the Department on December 19th., 1938, namely the high-pressure boiler for the laundry.

After the previous fire I moved this boiler to another location, and piped it into the flue intended for the hot water heater and the bakery ovens. But this additional load has proved to be too much for the chimney and it overheated, cracked in many places, and had already charred the roof and the shingles when it was discovered. The house became filled with smoke that escaped through the cracks and holes in the chimney this morning, during the washing, and when we investigated we discovered the above mentioned condition.

The Inspector of Schools, Captain Barry, was here at the time and was a witness of the whole affair; which I am sure he will describe at length in his report.

The chimney is built of home made brick, made of the local clay, and is not suitable for standing the heat from the fires. It is our opinion that the only permanent solution for the removal of this fire hazard is to tear down the whole chimney and rebuild it with high quality bricks. Also, a separate chimney should be erected on the other side of the building for the high pressure boiler and the hot water heater recommended by the Inspector of schools.

For the present, however, in order that we may carry on, we will make temporary repairs with cement wherever possible. Inside the attic, for example, we found no less than thirteen holes in the brickwork of the chimney, these can be stopped up, for the present, with cement. But, until this matter is remedied, it will be a constant source of denger to the building; and of anxiety to us.

Therefore, I beg that you will give this matter your prompt attention. I would suggest that a competent person be sent here to make a first hand investigation of the situation; and make suggestions that will entirely remove any danger of a third, or perhaps more serious,fire from the same source .

Yours very truly,

Signed:- Rev. Alex. R.Simpson,
O.M.I.
Principal.

Ottawa, December 2nd, 1939.

Dear Sir:

In your letter of November 7th you submitted an account in favour of Hoffars, Limited, in connection with repairs to the Deisel engine at the Lejac Indian Residential School. Present regulations require that we obtain a purchase order and, when the account was submitted to our Purchasing Agent, he replied as follows:

> "With reference to your memorandum of the 22nd inst., your file No. 163-1-15, submitting invoices of Hoffars Ltd., Vancouver, B.C., for amounts of $74.30 and 10.05 respectively, covering repairs to Lister Deisel engines at Lejac Indian Residential School.
>
> Comparative prices were obtained from Welch & Johnston, Ottawa, and it would appear that retail rates have been charged. The greatest difference appears in the first item of "1 cylinder liner 8-1/B2 @ $39.50, which should be charged at approx. $28.50.
>
> It might be advisable to have Mr. Jas. H. F. Lacey, Acting Indian Agent at Vancouver, communicate with Hoffars, Limited, with a view of obtaining amended invoices as the Dominion Government is generally entitled to consideration and favourable discounts."

Please carry out the request of the Purchasing Agent and advise me.

Yours truly,

R. A. Hoey,
Supt. of Welfare & Training.

Sir:-

I beg to acknowledge receipt of your letter of the 6th. instant, File No. 163-1-5 regarding a recommendation made by Inspector Barry regarding the fire escapes at the Lejac Indian Residential School. I have taken this matter up with the Rev. Father A.R.Simpson, Principal of the School and he replies as follows:-

"With reference to the remarks of the Inspector of Schools concerning the fire escapes, as contained in your letter of the 13th. inst., I wish to make the following observations:-

1. Due to the narrowness of the hand rail it would be rather difficult to put wooden rails on top so that they would remain permanently.

2. This precaution seems to me to be unnecessary, since the metal of the escapes is well covered with paint, which would prevent the metal from sticking to the hands of the school children, even in sub-zero weather, as the Inspector suggests.

Any further observations from yourself or the Department concerning this matter will be welcomed, by,

Yours truly,
Signed:- Rev.Alex.R.Simpson, O.M.I., ""

In discussing this matter with Constable Rae I found that his opinion was that the wood rails, on account of being exposed to the weather, would likely soon splinter and become equally as dangerous to the pupils as the iron railings. The Principal agrees that the boys of the Manual Training Class could do the work alright but that they have no material on hand that could be used for this purpose. Please advise, if in view of the Principal's remarks given above, the Department considers that the suggestion of the Inspector of Schools should be put into effect.

Your obedient servant,

Jas. H. F. Lacey

Stuart Lake Agency.

Vanderhoof, B.C.,
December 5th. 1939.

Sir:-

I beg to attach hereto Voucher No. 451 for $1660-00 in favour of Andersen's Lumber Yard, C/O of A.P.Andersen, Prince George, B.C. This covers Mr. Andersen's tender of October 10th. 1939 to build two chimneys at the Lejac Indian Residential School as instructed in your Night letter of October 19th. 1939. which read as follows:-

" Department accepts Andersen's offer to construct two chimneys at Lejac School at cost of ten hundred eighty and five hundred eighty dollars respectively STOP. Have construction of chimneys commenced immediately and you should supervise work and make certain that chimneys are properly constructed according to tenders."

This work was completed on the 20th. of November ahd the contractor made an excellent job of it. It would have been difficult to have obtained better workmen and we were most fortunate in the weather ; for there was no frost and it is still quite mild even at this late date. Mr. Andersen when submitting his account states that:- "We were asked by Father Simpson to plaster the chimney on one side in the basement and on three sides in the room behind the altar where the chimney comes through, this amounted to $8-00. Will I send this account to the Department or will the School pay for it?". Please advise me regarding this $8-00 extra account.

Your obedient servant,

Memorandum:

MR. BAILEY

I desire to refer to your memorandum of November 28 in connection with the invoice of Hoffars Limited covering repairs to the Lister Diesel engine at the Lejac Indian Residential School.

On receipt of your memorandum I wrote to the Indian Agent and I enclose, for your information, a copy of his reply together with credit note from Hoffars Limited authorizing a deduction of $11.00 from the account which they previously submitted.

Sir:-

I beg to acknowledge receipt of your letter of the 2nd. instant, File No. 163-1-5 regarding an account of Hoffars, Limited, of Vancouver, B.C. As requested by the Purchasing Agent I have taken this matter up with the Company and they have replied as follows:-

"You will note by referring to our invoice that the cylinder liner supplied for the Lister engine at this school is a special liner part #8-1/B2. The price of this part is $39-50 and this can be confirmed by your Ottawa Correspondents as the same price that is used throughout Canada by the Lister Organization. However, in view of the fact that the Lejac Indian School were under the impression that a cheaper type of liner was used in their engine, we are agreeable in this case to reduce the price of this item to $28-50, and our credit note for $11-00 is enclosed herewith. Trusting that this is satisfactory and that we will be put in line for payment in due course."

The Credit Note for $11-00 mentioned above is attached hereto. Only one copy of this was received from the Hoffars Limited.

Your obedient servant,

Jas. H. F. Lacey

Vancouver, B. C.,
January 24, 1940.

Sir:

An inspection of the sewage disposal system of the Lejac Indian Residential School, near Fraser Lake, B.C., was made on December 22, 1939, according to your instructions of November 27, 1939. The following is a report of the condition of the system. This report includes general information pertaining to the septic tank, a description of the condition of system at the time of inspection and suggested alterations. A detailed estimated cost of the proposed alterations is appended.

GENERAL

The Lejac School, built in 1920-21, is situated on the south side of Fraser Lake, a few hundred yards from the C.N.Railway track. The school is of considerable size and this year there are about 200 persons in residence, including students and staff. Water for the institution is obtained from Fraser Lake.

According to the school caretaker, approximately 3500 gals. are used in the school during an average day. A large percentage of this water is used for baths and for the flush toilets. There are approximately 20 flush toilets, 6 baths and 6 showers located in various parts of the building. On Saturdays, bath day at the school, 600 gals. of water are used in a period of 4 hours.

Waste water from the kitchen passes through a grease trap before reaching the septic tank. An inspection showed that the trap was working satisfactorily.

The following disinfectants are used: Lysol for disinfecting baths and sinks, chloride of lime for cleaning sinks and toilets and drain cleaner, elsewhere.

Several years ago a bunkhouse was built for the farm and school workmen. This building is situated about a hundred yards west of the school. Approximately 10 years ago two flush toilets were installed and a four inch sewer laid from the bunkhouse to a point 180 feet from the school septic tank.

CONDITIONS AS FOUND ON DECEMBER 22, 1939.

General

The condition of the sewage disposal system of the school is not satisfactory. The filter bed is not operating and the effluent flows over the surface of the ground. Although the septic tank is functioning fairly well it can be improved. No objectionable odor was noticed in the vicinity of the septic tank at the time of inspection. Raw sewage from the bunkhouse is deposited on the ground within 250 feet of the school. Following is detailed description of the condition of the system and suggested improvements.

SEPTIC TANK AND FILTER BED

The capacity of the septic tank is rather small for an institution housing 200 people. However, the tank will operate satisfactorily if it receives reasonable attention.

At the time of inspection the septic tank was in an unsatisfactory condition. This condition was due partly to the need of cleaning. According to the school caretaker it was cleaned in July, 1938, seventeen months ago, which under normal conditions may

Indian Affairs. (RG 10, Volume 6444, file 881-5, part 6)

ARCHIVES PUBLIQUES
CANADA

POOR-COPY

Library and Archives Canada / Bibliothèque et Archives Canada
www.collectionscanada.gc.ca

not be too long a period. Under the circumstances this is too long an interval and in the future it would be advisable to clean the tank more frequently.

The installation of a distribution gallery and baffle suggested later in the report, will improve the action of the tank and may lengthen the interval between cleanings.

Measurements were made of the thickness of scum and depth of sludge. There were two feet of scum on top and about three feet of sludge at the bottom of the tank. The sludge was in a well decayed condition and of good color.

An inspection showed the effluent compartment to be fairly clean and the effluent clear.

For the past six years the Miller syphon in the effluent compartment has not been operating and last year it was removed. The outlet was plugged with cement and now the effluent passes through the overflow pipe. The present state of the tank is shown on the attached whiteprint.

The filter bed has not been functioning for the past six years. Effluent runs from the tank to the distribution chamber at the head of the filter bed and then flows over the surface of the ground.

SEWAGE FROM THE BUNKHOUSE

There are two flush toilets in the bunkhouse. Sewage from them is carried in a 4" pipe and deposited on the ground at a point approximately 180 feet from the septic tank. This highly unsanitary condition has existed for the past ten years. The location of the sewer from the bunkhouse is shown on the attached whiteprint.

CHANGES IN SYSTEM

The following changes have been made in the system since it was installed:

1. Removal of Miller syphon last year.
2. Filter bed no longer operating.
3. Formerly the waste from the laundry passed through the septic tank but last year the pipe from the laundry was connected to the boiler blowdown pipe and laundry wastes no longer go through the tank. As 2500 gallons of water are used in the laundry ever Monday this change should improve the action of the septic tank.

SUGGESTED ALTERATIONS AND IMPROVEMENTS

1. Sewage from the bunkhouse should either be carried to the school septic tank or treated in a separate tank. Owing to the long distance from the bunkhouse to the school tank it would be advisable to install a small septic tank adjacent to the bunkhouse even though the cost is slightly greater. The effluent may be carried to the proposed drain from the school septic tank by extending the present 4" sewer a hundred feet. The proposed extension of the drain is shown on the attached whiteprint. A detailed drawing of the proposed septic tank is appended.

2. Install a distribution gallery and baffle board in lieu of present inlet to the school septic tank. This would reduce the inlet velocity and consequently there would be less disturbance of the sludge during periods of heavy flow. The action of the septic tank would be improved by the proposed distribution gallery.

3. Replace the manhole over the sludge compartment with a cleanout opening the full width of the tank. If the proposed distribution gallery is installed the existing manhole will have to be moved.

POOR-COPY

Indian Affairs. (RG 10, Volume 6444, file 881-5, part 6)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

Library and Archives Canada / Bibliothèque et Archives Canada
www.collectionscanada.gc.ca

Rather than build the same size manhole a larger opening would be advisable. With the larger opening the tank could be cleaned more easily. A detailed drawing of the proposed distribution gallery and cleanout opening is appended.

4. At the present time the effluent from the septic tank is running over the surface of the ground. This condition could be remedied by reconditioning the filter bed and replacing the Miller syphon. If this policy were followed the system would operate satisfactorily until such time as the filter required further attention. Cleaning a filter 75 ft. x 50 ft. every few years would be expensive and consequently it may be advisable to dispose of the effluent by other means.

Proposed method of disposing of effluent:

Lay a 4" vitrified pipe from the existing 6" effluent drainpipe to a point about 500 feet away. The 4" drain should have about 4 feet of cover. (The location of this pipe is shown on the attached whiteprint). From the end of the drain the effluent would be carried in a shallow trench and distributed over a ploughed area. Two acres would be a large enough area. It would be advisable to build a fence around the ploughed area to prevent the school children from coming in contact with the contaminated soil. The effluent should be distributed over one part of this field for a few months and then over an other part. The proposed disposal field would be entirely satisfactory and would not cause any objectionable nuisance.

POOR COPY

Indian Affairs. (RG 10, Volume 6444, file 881-5, part 6)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

Library and Archives Canada / Bibliothèque et Archives Canada
www.collectionscanada.gc.ca

The only attention required would be blocking off the distribution ditch every few months to allow the effluent to run over a new area and ploughing the field every year.

5. Large quantities of disinfectant hinder the action of the tank. The school authorities should be requested to use disinfectant in weak solutions which are quite effective.

The suggested alterations can be made at an estimated cost of $884.00. A detailed estimate of the proposed alterations is appended.

If the proposed alterations are made it would be advisable to do the work during the month of May or during the period September 1st to October 15th.

Your obedient servant,

WDM Donald

163-1-5

Ottawa,
May 22, 1940.

Dear Sir:

I am in receipt of your letter of the 16th instant regarding the amount provided in the current year's appropriation for repairs and new equipment at the Lejac Indian Residential School.

In reporting on his inspection of the Lejac School last fall Inspector Barry stated that the septic tank was in a very unsatisfactory condition. Later we arranged with the Surveys & Engineering Branch to have one of their officers visit the school and he reports that certain work is necessary at an estimated cost of $884.00. We are, therefore, instructing the Surveys & Engineering Branch to proceed with this work and this expenditure will exhause practically all the funds provided in the current year's appropriation for repairs and improvements at this school.

We have also included an item of $750.00 for a high pressure steam boiler. Possibly some other equipment is more necessary. In any case you should consult the Principal and let me have your recommendation regarding what should be supplied. Detailed information should be given in connection with any equipment in order that the matter may be handled by our Purchasing Branch.

As you state in the last paragraph of your letter it is necessary for all officials to keep expenditures as low as possible.

Yours truly,

Mr. Robt. Howe,
Indian Agent,
Vanderhoof, B. C.

Memorandum:

Dr. McGill

Re: Sewage disposal, Lejac Indian Residential School, Fraser Lake, B.C.

I am attaching herewith a copy of a report of Mr. W.V. McDonald, of our engineering staff at Vancouver, following an inspection he made of septic tank facilities on December 22nd last. Mr. McDonald's report contains photographs and a sketch plan.

His recommendations have been concurred in by our Chief Engineer, and are also approved by the undersigned. His recommendations might be summarized as follows:-

(1) While the septic tank for the school is small, it will operate satisfactorily if given reasonable attention, and if the filter bed is put in proper condition.

(2) Local conditions make possible the construction of a small septic tank adjacent to the bunkhouse which can be connected to a disposal pipeline which will carry the effluent from the school septic tank as well. The disposal area would be divided in two lots which would be used alternatively.

Our Chief District Engineer at Vancouver, Mr. Webb, also approves of Mr. McDonald's recommendations.

Memorandum:

Mr. Wardle

Re - Septic Tank, Lejac Indian Residential School, Fraser Lake, British Columbia.

I am in receipt of your memorandum of the 4th instant, in which you advise that the Director of Indian Affairs Branch has reported that $884.00 is being provided in the current year's vote for work on the sewage disposal system of the Lejac Indian Residential School at Fraser Lake, British Columbia.

In reference to your request to be advised when this work can be put in hand, I quote the following extract from the report of Engineer McDonald which was transmitted to you with our memorandum of February 5th last,-

> "If the proposed alterations are made it would be advisable to do the work during the month of May or during the period September 1st to October 15th."

The matter of proceeding with the work at the earliest date has been taken up with Mr. Webb who reports that same will be put in hand when the Port Simpson water supply system is receiving attention which will be in the fall when the Indians have returned from their fishing. Instructions have been issued to Mr. Webb to arrange for the purchase of the necessary materials as soon as possible. As mentioned in your memorandum possibly an engineer of our Service could undertake this work early in the fall and this will be kept in mind.

Respectfully submitted,

F. A. Mills

AIR MAIL

Dear Sir:

I am in receipt of your letter of the 30th ultimo in the first paragraph of which you refer to the necessity of installing a 20 h.p. boiler in the Lejac Indian Residential School.

In your letter of April 24, addressed to Indian Commissioner MacKay and which was forwarded to the Department, you distinctly state that a 15 h.p. boiler is required and that this size boiler was recommended by Inspector Arnall. Funds for the purchase of this boiler have just been provided but the Department cannot understand why you now request a 20 h.p. boiler when formerly you stated a 15 h.p. boiler was sufficient. I may add that quotations have already been obtained for the 15 h.p. boiler.

Please let me have your explanation of this matter at the earliest possible date.

Yours truly,

Mr. R. Howe,
Indian Agent,
Vanderhoof, B. C.

Vanderhoof, B.C., May 30th. 1940.

Sir:-

Re. Your File 153-1-5,(22-5-40)

Replying to your letter of the 22nd. inst. with reference to repairs and new equipment for the Lejac Indian Residential School for the current fiscal year, I would advise that the installation of a new 20 H.P. boiler is very necessary.

The old boiler now in use was condemned by Mr. Arnall, the Boiler Inspector, last year. A requisition for purchase of a new boiler was forwarded through the Commissioner's Office on the 24th. ultimo.

In addition to the new boiler and repairs to septic tank it is necessary in order to have adequate fire protection to provide six fire extinguishers 12- - 2½ gal. refills and 2 lengths of 50' hose with couplings and nozzels. In this regard would refer you to Inspector Barry's reports for 1937-38-39 covering fire protection at the School.

I inspected the fire fighting equipment a short time ago and am of the opinion new equipment should be provided without delay. Therefore, please find enclosed herewith a requisition for the material required together with quotations from McLennan, McFeely and Prior, Wholesale Firm, Vancouver, B.C.

I may say that the Rev. Principal concurs with these recommendations.

Your obedient servant,

Robert Howe

JUN 1 1940
REGISTERED

P.O. BOX 70
VANCOUVER, B.C. 27th May, 1940.

Dear Sir:-

Mr. T. J. Arnall, S.P.P. Engineer of the Dominion Department of Public Works, in his report dated September 9th, 1939, recommended that the 7 H.P. Boiler No. 44411 now in use in the laundry at the Lejac Indian Residential School, Stuart Lake Agency, be replaced with a 15 H.P. unit. An amount of $750.00 was placed in the 1940-41 Estimates for this purpose.

I have now received the attached application from Mr. Indian Agent Howe, together with tenders from the Vancouver Iron Works Ltd., Patterson Boiler Works, and the Vancouver Engineering Works Ltd., all of Vancouver, B. C. for this boiler.

It will be seen that the Vancouver Iron Works Ltd. tender at a total price of $585.00, f.o.b. Vanderhoof, is the lowest, and, when money is available, I would recommend that their tender be accepted and the boiler purchased. It will be noted that they can not guarantee this price for any lengthy period so that I would suggest that action be taken to purchase this boiler as early as possible.

Yours faithfully,

D.M.MacKay.
Indian Commissioner for B.C.

Vanderhoof, , B.C. April 24th. 1940.

Dear Sir:-

I enclose herewith requisition for one 15 H.P. boiler to replace old 7 H.P. boiler No. 44411 in the laundry at the Lejac Indian Residential School.

With reference to this expenditure I would refer you to the report of Boiler Inspector T.G.Arnall under date of September 9th., 1939 in which the Inspector states the 7 H.P. Boiler No. 44411 now in use must be replaced with a 15 H.P. unit this year. The expenditure was anticipated last year and I included an amount of $750-00 in the 1940-41 estimates.

Attached herewith is a tender from Vancouver Iron Works, Vancouver, B.C. for one 15 H.P. boiler complete, F.O.B. Lejac, B.C. for $585-00 . Boiler can be installed by Engineer at the School without cost to the Department.

AGENT'S REPORT ON STUART LAKE AGENCY FOR JULY.

x x x

Fisheries

SCHOOLS

Visit and inspection made to Takla Landing school on the 6th. The attendance is good, pupils clean and some improvement is shown in reading, writing and arithmetic. Since my previous visit a month ago, Lejac Residential school pupils are at present on holidays and the staff are busy with the usual clean up, redecorating, etc. work commenced on the sewerage and septic tank on the 29th. A full Indian work crew was obtained for Mr. W.C. Warren, Engineer in charge.

Lejac, B. C.,
August 17, 1940.

Sir:

While carrying out work on the sewage system of the Lejac Indian School, which was completed on the above date and left in good order, I took occasion to inspect the other services at the school and in this connection I wish to report as follows.

Water Supply

Water is obtained from Fraser lake, situated about ¼ mile from the school. The water is good and the supply abundant. The supply is pumped to an elevated tank situated about ⅛ mile from the lake and about 1000 feet from the school, through a 4 inch wood stave pipe. Originally the installation was made with 2 pneumatic tanks, 1500 gallons normal capicity, situated in the basement of the school, proba bly about 1923, but was altered to the elevated tank at a later date, pressure about 40 pounds static.

The pumping plant consists of 2 Fairbanks Morse horizontal type double acting 3⅛" x 6" stroke pumps, #116995 and #95463 - belt connected to each side of Fairbanks Morse. 10 H.P. 350 RPM "Z" type horizontal gas engine #C26287, pulleys 16" Dng. to 23⅜ pump. Plant will deliver 100 U.S. g. p. m. against 100 lbs. pressure. Pump house is frame building on concrete foundation over concrete well - 13 feet deep and on bedrock, into which a 6 foot pipe line leads from the lake.

C. E. Webb, Esq.,
District Chief Engineer,
VANCOUVER, B.C.

Indian Affairs. (RG 10, Volume 6444, file 881-5, part 6)

POOR-COPY

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

Library and Archives Canada / Bibliothèque et Archives Canada
www.collectionscanada.gc.ca

The intake is situated at a distance of about 350 feet from pump house and lake depth at intake was 4 feet 9 inches on August 15th. Normally the pipe line extends about 300 feet into the lake. There is a screen on the intake. A wooden settling box, 5 feet by 20 feet, is situated on the intake line a short distance from the pump house, to interrupt the flow of sand into the well by wave action. Pumping is not done when the wind is blowing if sufficient supply can be maintained. It is necessary to heat the pump house in winter. This is done by means of a stove.

Water Supply

It was noted that the gear covers on the pumps were missing. These should be replaced to guard against accidents. It was also noted that hold down bolts on one pump had no nuts, and that one bearing on #95463 pump had a broken housing cover, also that the crank guard on the engine was missing. This should be replaced.

Storage Tank

Wooden storage tank, 20000 gallons capacity, built on wooden tower about 20 feet high, all enclosed in frame building, provided with stove for heating in winter. Tank building appears to be in good condition, no leaks evident. Ashes are allowed to accumulate around the wooden pedestals supporting the tank and the walls of the building. These should be removed to prevent decay.

Fire Protection System

3 outside fire hydrants and about 200 feet of 2 inch cotton rubberlined hose on a reel. Inside hydrants and hose, also hand bomb fire extinguishers.

POOR-COPY

Indian Affairs. (RG 10, Volume 6444, file 881-5, part 6)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

Library and Archives Canada / Bibliothèque et Archives Canada
www.collectionscanada.gc.ca

All appear to be kept in fair order. Iron fire escapes appear to be in good order - said to be dangerous due to ice and snow in winter.

Heating System

This is said to be operating satisfactorily. Wood fuel used. There is thought to be a leak in return line to boilers under concrete floors, possibly due to corrosion. This probably needs replacement as shows no signs of replacement in approximately 20 years school has been built.

Electric Light Plant

Consists of 1 - 5 (4½) horsepower and 1 - 9 horsepower Lister oil engine generator plant. Connected for individual or multiple operation, with switchboard. Appear to be in good operating condition.

Laundry Machinery

The laundry machinery consisting of a horizontal barrel washer and an extractor appear to be operating satisfactorily. A new 15 horsepower steam boiler was being installed at the time of my visit.

Refrigeration Plant

This plant was not in operating condition at the time of my visit although work was being carried out to put it in operating condition in part. It consists of 1 ton ammonia plant with 2 cooling chambers. Congealing tank and coils of larger chamber in bad condition. Leaks were evident in the high pressure circuit as well. There should not be the necessity for a plant of this nature at Lejac as there is always an abundance of ice

in Fraser lake about ¼ mile from the school which, with adequate storage capacity, should provide for all cooling requirements of the school probably at less cost than for artificial cooling.

The school building appears to be in good condition and reasonably well maintained. Outside painting will probably be necessary within the next two years.

Your obedient servant,

W.C. Warren

Dear Sir:

The Department is in receipt of a report from Mr. W. C. Warren, of the Engineering Staff, in regard to the Lejac Indian Residential School. Please direct the Principal's attention to the following extracts from the report:-

"Water Supply:

"It was noted that the gear covers on the pumps were missing. These should be replaced to guard against accidents. It was also noted that hold down bolts on one pump had no nuts, and that one bearing on #95463 pump had a broken housing cover, also that the crank guard on the engine was missing. This should be replaced."

"Storage Tank:

"Ashes are allowed to accumulate around the wooden pedestals supporting the tank and the walls of the building. These should be removed to prevent decay."

On your next visit to the school you should bring the above matters to the attention of the Principal and instruct him to carry out Mr. Warren's suggestions.

Yours truly,

Philip Phelan,
Chief, Training Division.

OFFICE OF
INDIAN AGENT

Stuart Lake Agency,
Vanderhoof, B.C.,
October 16th. 1940.

Dear Sir:-

Your File:- 15/13/8148.Oct. 3-40

Replying to your letter of the 3rd. inst. with reference to the proposed construction of an ice house at the Lejac Indian Residential School would advise this matter was discussed with Mr. Warren and the Rev. Principal last July and may say that I concur fully with their views in this regard.

The old ammonia plant is not in working order and the cost of repairs and maintenance is excessive therefore would recommend the present plant be replaced with an ice house. Construction has commenced on the foundation of the ice house as it is desirable to pour concrete before frosty weather.

The building will be of frame construction 12'x20'x18' outside and 11'x18'x12' inside inside lined with asbestos felt and walls and ceiling filled with shavings, concrete foundation and floors with shingled roof. Total cost approximately $400-00. I understand, however, that the Rev. Principal would be satisified if the Department would assist to the extent of $250-00.

Your obedient servant,

Robert Howe

EXD.

Dear Sir:

I have your letter of the 19th instant with reference to the refrigeration plant at the Lejac Indian Residential School. It is noted that you recommend the abandonment of the present ammonia plant and the construction of a new ice house.

The Department will allow an amount of $250.00 toward the cost of the items. It is presumed that this amount will be spent in the purchase of materials and you should issue the necessary purchase order for what is purchased and attach same to your voucher. An encumbrance requisition will be secured when the account is received here.

If there are any parts in the plant that is being abandoned which can be sold you should let me have full particulars in order that the necessary permission for their sale can be secured from the Salvage Officer.

Yours truly,

R.A. Hoey,
Supt. of Welfare & Training.

P.O. BOX 70
VANCOUVER, B.C. October 19, 1940.

AIRMAIL

Dear Sir:

In his report dated August 17, 1940, on the Lejac Indian Residential School, Mr. W. C. Warren of the Dominion Water and Power Bureau made the following comment on the refrigeration plant:

> " This plant was not in operating condition at the time of my visit although work was being carried out to put it in operating condition in part. It consists of one ton ammonia plant with two cooling chambers. Congealing tank and coils of larger chamber in bad condition. Leaks were evident in the high pressure circuit as well. There should not be the necessity for a plant of this nature at Lejac as there is always an abundance of ice in Fraser Lake about one-quarter mile from the school which, with adequate storage capacity, should provide for all cooling requirements of the school probably at less cost than for artificial cooling."

The abandonment of the existing ammonia plant and its replacement by an ice house with adequate storage capacity was discussed a short time ago with Rev. Father Simpson, Principal of Lejac School, when he called at this office. Ammonia plants are not generally regarded as satisfactory nowadays and it is highly doubtful if the Department would be justified in making any large outlay in putting the existing plant in shape in view of the opportunity to secure the service required by the erection of a non-expensive ice house and storage of ice from Fraser Lake.

The Secretary,
Indian Affairs Branch,
Department of Mines and Resources,
Ottawa, Ont.

It is ...

www.collectionscanada.gc.ca

It is estimated that the costs of the proposed ice house would be $400. Of this amount the Department is asked to provide $250, the balance to be furnished by the school.

I would recommend that the existing plant be abandoned and that the Department assist in the construction of an ice house to the extent of $250.00.

A copy of a letter from Mr. Indian Agent Howe relating to the matter is enclosed.

Yours faithfully,

D. M. MacKay.
Indian Commissioner for B.C.

Lejac Indian Residential School

Under Direction of The Oblate Fathers

LEJAC, B.C.

October 18th.,1940.

R. Howe, Esq.,
Indian Agent,
Vanderhoof, B.C.

Dear Mr. Howe:

I wish to make formal report of a fire which occurred here last night. About ten-thirty one of the farm help discovered that the chicken house was on fire and gave the alarm. The fire had already taken firm hold of the west end of the chicken house, and our efforts had to be confined to trying to save as much of the remainder as possible.

About two thirds of the building was totally destroyed. The third section of the building was slightly damaged. We had been preparing the buildings in order to put the chickens inside for the winter and had started a fire in the stove to dry out the interior of the chicken house. Somehow, we cannot determine exactly just how it happened, the roof caught fire and the blaze spread very rapidly, despite all of our efforts to check it.

Our estimate of the damage is about $1200.00 for the buildings, and about $350.00 for equipment. The chickens were still on summer range, so none of them were lost. Rebuilding will have to be done immediately, so as to provide shelter for our 1100 birds before freeze-up.

This represents quite a serious loss for the school. We have found chicken and egg producing to be quite profitable, and of great assistance to the school. Will you kindly bring this matter to the attention of the department at once; and earnestly request that we might obtain some assistance in making good the loss that we have suffered through this unfortunate fire?

Thanking you for your valued cooperation in this matter, I remain,

Very truly yours,

Rev. Alex. R. Simpson, O.M.I.

Rev. Alex. R. Simpson, O.M.I.

Dear Sir:

I have your letter of the 4th instant with reference to the parts of the ammonia plant which is being abandoned at the Lejac Indian Residential School.

I note that you consider the pump is in fair condition and might be sold. Please let me have more detailed information regarding this pump as the Salvage Officer will require such information before advertising it for sale.

Yours truly,

R.A. Hoey,
Supt. of Welfare & Training.

Dear Sir:- Your File 163-1-5.

With reference to the last paragraph of your letter of 22nd October, which authorized an expenditure of $250.00 towards the cost of an ice house for the Lejac Indian Residential School, I have now received from Mr. Indian Agent Howe, Stuart Lake Agency, the following information:-

"With reference to the abandoned ammonia plant the Principal is anxious to retain the motor which can be utilized for the air compressor, cement mixer and small portable sawmill.

"The remaining parts, such as tanks, pipes and valves are badly corroded and practically useless. The pump is in fair condition and may be sold if a purchaser could be found."

Your instructions with regarding to this material would be appreciated.

Yours faithfully,

D. M. MacKay.

OFFICE OF
INDIAN AGENT

Stuart Lake Agency,
Vanderhoof, B.C.,
October 24th. 1940.

Dear Sir:-

I beg to report that a fire occurred at the Lejac Indian Residential School Farm on the 17th. instant completely destroying two thirds and damaging the third section of the poultry house. Attached hereto is a report from the Rev. Principal covering the fire.

According to my investigation the fire started about 10-30 P.M. on the 17th. The alarm was sounded immediately and a fire hose from the nearest hydrant brought into action. Apparently a strong wind was blowing and they were only able to save a part of one section. The other two sections were totally destroyed. The cause of the fire is difficult to determine. There is no doubt it originated from the stove which had been lighted to air the house ready for transfer of the chickens from the summer pens to winter quarters. The stove is encased in cement with an iron firebox door and about three lengths of 6" stove pipe to brick chimney. It is quite possible the fire started from a loose stove pipe connection or the fire box door may have been carelessly left ajar.

The building destroyed measured 120' X 30' X 8' built in three sections 40 feet to a section of frame construction, double sheeting with sawdust filling, Ruberoid roofing and concrete foundation which is undamaged.

There is no other building available to house the chickens for the winter. It is therefore necessary to rebuild immediately. The damage is estimated at $1550-00. This sum includes $350-00 for loss of equipment, brooders, incubators, troughs, etc.

The Rev. Principal earnestly requests some financial assistance from the Department to make good the loss. No definite amount is stated in his letter but would recommend that an amount equivalent to half the damage sustained be granted for rebuilding purposes.

Your obedient servant,

Robert Howe,
Indian Agent.

Dear Sir:

I beg to forward herewith a letter from Mr. Indian Agent Howe reporting the destruction by fire of most of the chicken house at the Le Jac Indian Residential School. Copies of letters from Reverend Father Simpson and Inspector Barry relative to the matter are attached.

Reverend Father Bryne-Grant was greatly interested in poultry raising and it was under his Principalship that the school went into the business on a fairly large scale. I am under the impression that the cost of the buildings, extensions and equipment was met from school funds.

It would appear from Principal Simpson's letter that the business was quite profitable.

Under the circumstances, I consider the school should be required to meet the costs of replacement without Departmental assistance.

Yours faithfully,

D.M.MacKay,
Indian Commissioner for B.C.

Major D.M.MacKay,
Indian Commissioner for B.C.,
Box 70,
Vancouver, B.C.

Dear Major MacKay:

With reference to Mr. Indian Agent Howe's Letter S-2-41 of the 24th instant, I have noted that considerable damage was done by fire to the chicken house at the Le Jac Indian Day School on the 17th instant.

The erection of the chicken house in question was, I believe, undertaken by the Reverend Father Bryne-Grant, O.M.I., while Principal of the school, though I do not know that the Department made any special grant for such construction, which was undertaken in 1937 mainly by the Manual Training class.

The keeping of chickens, as described in my report on the Le Jac School, dated October 26, 1937, is no doubt a profitable project as the authorities are provided at small cost with an important part of the childrens' diet.

I am, however, of the opinion that the Department should not be called upon for any special grant with respect to the replacement of the buildings destroyed by fire. Should the Reverend Principal wish to continue the keeping of chickens at Le Jac, he will no doubt be able to finance any necessary rebuilding out of the per capita grant, or from the funds of the Oblate Order.

Yours very truly,

Gerald H. Barry

~~Gerald~~ H. Barry,
Inspector of Indian Schools.

Dear Sir:- Your File 163-1-5.

With reference to your letter of December 10th last, I have been in communication with the Indian Residential Schools in British Columbia and, as the Principal of the Alert Bay Indian Residential School is the only one who has agreed to use the pump from the Lejac ammonia plant, I am having it sent by prepaid freight to him. He proposes to use this pump in an installation, planned next summer, of a sump pump in the boiler room.

I hope that the above arrangement is satisfactory to the Department.

Yours faithfully,

D. M. MacKay.
Indian Commissioner for B.C.

Stuart Lake Agency,
Vanderhoof, B.C.,
June 23rd. 1941.

Your File :- 15/13/2508.

Dear Sir:-

Complying with instructions contained in your letter of the 11th. instant I beg to enclose new requisition for material required for repairs to buildings at the Lejac Indian Residential School. I discussed the matter with the Rev. Principal this morning and we decided the best plan would be to proceed with the repairs as itemised in the attached requisition and leave the repairs for the school building with the exception of Gyproc required for inside plastered walls until next year. Provision will be made in the forthcoming estimates for this expenditure. The labour, painting and repairing the buildings itemized will be performed by the school without cost to the Department.

Tenders for paint and stain attached from Gordon Belyea, Ltd., and McLennan, McFeely and Prior, Vancouver, B.C. Tenders for Gyproc and flooring attached from Fraser Lake Sawmills, Ltd., Fraser Lake, B.C.

Your obedient servant,

Robert Howe,
Indian Agent.

Dear Sir:

I enclose herewith application of Mr. Indian Agent Howe, dated the 2nd instant, to purchase 74 boiler tubes at a cost of $424.70 for boiler number 22460 at Lejac Indian Residential School, which the Public Work's S.P.P. Engineer, Mr. T.J. Arnall, stated in his report of September 25, 1941, should be retubed.

I also enclose quotations from Messrs. Gordon Belyea Ltd., $424.70; Crane Ltd., $424.70; and Blain Boiler Works Ltd., $461.02; and would recommend purchase from one of the two firms giving the lowest tender for the tubes if the funds are available for this purpose.

Yours faithfully,

D.M. MacKay,
Indian Commissioner for B.C.

OFFICE OF
INDIAN AGENT

Stuart Lake Agency,
Vanderhoof, B.C.,
May 2nd. 1942.

Re. your File 15/13/4718. Oct. 22nd. 1941.

Dear Sir:-

I beg to enclose herewith a requisition for 74 only 3" x 14' boiler tubes required for replacement purposes for boiler No. 22460 No. 2. right hand at Lejac Indian Residential School. Reference report of Mr. T.D. Arnall , S.P.P. Engineer D.P.W., dated Sept. 25-41.

Attached hereto tender from Gordon & Belyea, Lts., Vancouver, B.C. quoting $ 41-00 per one hundred ft., sales tax included, net 30 days, F.O.B., Vancouver. Also attached a letter from McLennan, McFeely & Prior stating they are unable to quote on tubes as their stocks are entirely depleted and replacement stocks are indefinite.

It would appear from the attached letters that this class of material is extremely scarce, therefore, may I suggest that Gordon & Belyea Ltd. be advised to reserve 74 tubes pending receipt of the Department's approval for the expenditure.

Your obedient servant,

Robert Howe,
Indian Agent.

163-1-5

Ottawa,
May 9, 1942.

Dear Sir:

I have your letter of the 30th ultimo, with reference to the boiler tubes required at the Lejac Indian Residential School. As stated in my letter of October 28, 1941, an amount of $1000.00 has been included in the current year's appropriation for repairs, improvements and purchase of new equipment at this school. At the time the estimates were prepared the amount stated was included as we were informed by the Agent that the roof required considerable repairs. However, in view of your letter it now appears that the providing of new tubes is very urgent. On referring to your letter of October 22, 1941, it is noted that you estimate the cost of the tubes at $700.00. It will be necessary to make this purchase through our Purchasing Branch and consequently you should forward detailed information regarding the size and type of tubes required.

Yours truly,

R.A. Hoey,
Supt. of Welfare & Training.

Major D.M. MacKay,
Indian Commissioner,

Dear Sir:

On receipt of your letter of the 23rd ultimo, in connection with a discarded boiler and fittings for sale at the Lejac School, I communicated with the Salvage Officer and received the following reply:

"In this connection I wish to advise that the matter was referred to the Salvage Officer for an explanation as to what actually transpired in regard to the sale of this equipment, and a copy of his reply is attached, which is self-explanatory.

"The Salvage Officer does not offer any reason for forwarding Tender No. G.S.4998 for buildings at Bowden, Alberta, to Mr. H.E. Rose, Vanderhoof, B.C.

"The offer of Mr. Rose for the old boiler and fittings was duly forwarded to the Salvage Officer and he apparently accepted the higher bid, $17.50, from the Fraser Lake Saw Mills, Fraser Lake, B.C.

"Under the circumstances, it might be advisable to have Mr. Robert Howe, Indian Agent, Vanderhoof, explain to Mr. Rose that the sale has been completed with a higher bidder."

Yours truly,

R.A. Hoey,
Supt. of Welfare & Training.

Memorandum:

Mr. R.A.Hoey.

I acknowledge the receipt of your memorandum of the 27th ultimo, your file 163-1-5, in connection with the sale of the old boiler and fittings at the Lejac Indian Residential School, Lejac, British Columbia.

In this connection I wish to advise that the matter was referred to the Salvage Officer for an explanation as to what actually transpired in regard to the sale of this equipment, and a copy of his reply is attached, which is self-explanatory.

The Salvage Officer does not offer any reason for forwarding Tender No. G.S.4998 for buildings at Bowden, Alberta, to Mr. H.E.Rose, Vanderhoof, B.C.

The offer of Mr. Rose for the old boiler and fittings was duly forwarded to the Salvage Officer and he apparently accepted the higher bid, $17.50, from the Fraser Lake Saw Mills, Fraser Lake, B.C.

Under the circumstances, it might be advisable to have Mr. Robert Howe, Indian Agent, Vanderhoof, explain to Mr. Rose that the sale has been completed with a higher bidder.

Dear Sir:

I desire to refer to your letter of the 11th ultimo enclosing letter from Indian Agent Howe with reference to the discarded boiler at the Lejac Indian Residential School. This matter was referred to the Salvage Branch and I am now in receipt of the following reply:

"Regarding the disposal of an old boiler and fittings at the Lejac Indian Residential School, I wish to advise that approval has been granted by the Deputy Minister to arrange for the sale of the boiler through the Government Salvage Officer.

"The offer of $15.00 received from Mr. H.E. Rose, Vanderhoof, B.C., through the office of Mr. R.H. Howe, Indian Agent, Vanderhoof, is being forwarded to the Salvage Officer, and no doubt Mr. Rose will be given an opportunity of submitting another bid or confirming his present bid when tenders are called on the sale of the boiler and fittings in question.

"As soon as I am in receipt of a Salvage Minute confirming the sale I shall be glad to let you have a copy in order that the equipment may be written off charge."

Yours truly,

Memorandum:

ACTING DEPARTMENTAL PURCHASING AGENT

I am advised by Mr. R. Howe, Indian Agent, Vanderhoof, B.C., that the following discarded boiler is surplus to requirements at the Lejac Indian Residential School:

"No. 44411: 7 H.P., size 37" x 60".
Type, Verticle tubing.
Manufactured by Vancouver Iron Works,
Vancouver, B.C., date 28/12/29.
Complete with fittings.

"This boiler was condemned for pressure and replaced in 1940. Reference report T.J. Arnall, S.P.F. Engineer, D.P.W., September 9th, 1939.

"The Principal informs me that they have no further use for the boiler, therefore, I would suggest that the boiler be placed in the hands of the Salvage Officer for disposal."

With reference to the above, the Agent has also forwarded the attached offer from Mr. H.E. Rose to purchase the boiler for $15.00. The Indian Agent considers that this is a fair offer. Please let me know your wishes in the matter.

R.A. Hoey,
Supt. of Welfare & Training.

Vanderhoof, B.C.,
Jan. 21st. 1942.

Department of Mines & Resources
Indian Affairs Branch
JAN 29 1942
REGISTERED

Sir:-

The Rev.Father A.R.Simpson, O.M.I., Principal of the Lejac School has turned a letter over to me which he has received from Gordon & Belyea, Ltd., of Vancouver, B.C.; to me for attention. This has to do with my Voucher No. 685 in their favour for $375-73. The cheque sent in payment of this account, the Company claims, was No. 4707 and for $368-37, leaving a balance of $7-36. The Company wish to know how this difference is made up.

Your obedient servant,

Robert Howe,
Indian Agent.

/L.

The Secretary,
Indian Affairs Branch,
Department of Mines and Resources,
Ottawa, Ont.

A discount of $7.36 - 2% on $367.85, was deducted in accordance with the terms of the purchase order which stated less 2% - 30 days. The company rendered their account on August 30, 1941, but it did not reach this Branch for payment until on or about December 29, 1941.

Dear Sir:-

I beg to forward herewith Stuart Lake Agency Voucher No. 685, in favour of Gordon & Belyea Ltd., Vancouver, B. C., for $375.73, for paint and stain for use on buildings at the Lejac Indian Residential School.

The Department must have dealt direct with the Principal of the School in this matter, as this Office was not instructed to place the order. It would appear that Purchase Orders were placed with the Fraser Lake Sawmills Ltd., Fraser Lake, B.C. and Gordon & Belyea Ltd., Vancouver, direct by the Departmental Purchasing Agent, and copies of the Orders furnished to Rev. A. R. Simpson, Principal of the Lejac Indian Residential School.

Yours faithfully,

D. M. MacKay.
Indian Commissioner for B. C.

Reverend Sir:

On July 6 last purchase order 8087 was issued to Gordon & Belyea Limited, 101 Powell Street, Vancouver, covering paint for the Lejac Residential School. The firm was instructed to forward their account to you but as yet the account has not been received for payment. No doubt you have it in your office and if the paint has arrived at the school you should certify the account and forward it for payment.

Yours truly,

R.A. Hoey,
Supt. of Welfare & Training.

Dear Sir:

I have your letter of the 22nd instant with reference to the necessity for installing new tubes in the boilers at the Lejac Residential School.

In our estimates for the fiscal year 1942-43 we have requested an amount of $1000.00 for repairs, improvements and purchase of new equipment at the Lejac School. At the present time I am not in a position to state definitely if this amount will be allowed. However, there will likely be sufficient for the new tubes. You should again bring this matter to my attention in April or May of 1942.

Yours truly,

R.A. Hoey,
Supt. of Welfare & Training.

AIR MAIL

Dear Sir:

In his report on his inspection dated September 25th of the heating plant at the Lejac Indian Residential School, Mr. T.J.Arnall, S.P.P., Engineer, Department of Public Works, has recommended that new tubes be placed in Boiler No. 22460 No. 2 Right Hand after the next firing season. Mr. Arnall observes that the present tubes have been in use twenty-one years and should be replaced.

I would, therefore, recommend that an amount of $700 be included in the 1942-43 Estimates to provide for this expenditure.

Yours faithfully,

D.M.MacKay,
Indian Commissioner for B.C.

Dear Sir:

I have your letter of the 13th instant, in connection with tubes required for the boiler at the Lejac Indian Residential School. Purchase of these tubes is authorized from either Gordon Belyea Ltd. or Crane Ltd. Possibly this business should be awarded to whichever firm is in a position to supply the tubes at the earliest possible date. When forwarding the account you should attach copy of your purchase order.

Purchase of these tubes would have been authorized in my letter of the 9th instant, which replied to yours of the 30th ultimo, but from the information contained in your letter of October 22, 1941, we thought that the price would be approximately $700.00.

Yours truly,

R.A. Hoey,
Supt. of Welfare & Training.

DEPARTMENT OF INDIAN AFFAIRS
CANADA

S-2-905

OFFICE OF
INDIAN AGENT

Stuart Lake Agency,
Vanderhoof, B.C.,
May 4th. 1942.

Your File :- 15/13/2508, June 11th. 1941.

Dear Sir:-

I beg to enclose herewith requisition for a proposed expenditure of $1985-00 for much needed repairs to the exterior of Lejac Indian Residential School Block. The repairs considered necessary are intemised on the requisition.

The roof and exterios of the School has not been painted since construction over 20 years ago. Quite a number of the shingles are rotted and curled up. The outside casings, eve troughs and drain pipesare badly weathered and practically devoid of paint. Mr. Engineer Warren of the Dominion Water and Power Bureau in the last paragraph of his report dated August 17th., 1940 mentions that the repairs in question should be undertaken within the space of two years.

Attached hereto a tender from Mr. P.A.Andersen, General Contractor, Prince George, B.C., who, as far as I can ascertain is the only Contractor in the District equipped and capable of handling this class of work. Mr. Andersen built the chimneys at the School in 1939 and other buildings in previous years. His services were considered very satisfactory.

Included in the tender are two alternatives, 1st. one coat of paint on casings, roof, and shingle replacements at a cost of $1190-00. 2nd. shingle replacements and two coats of stain on roof only $765-00. In the opinion of Mr. Andersen and the writer the first alternative should be ruled out completely. A single coat of paint on the roof and casings in its present condition would be ineffective.

However, if the amount $1985-00 for shingle replacements and two coats of paint throughout is not available it is recommended that the second alternative be accepted for repairs to roof only. This is considered urgent, as yet no leaks have been noted, but unless repairs to the roof are carried out soon leakages can be expected. You will note from a letter attached to the requisition that Mr. Andersen will probably be able to do the job, but due to the scarcity of labour and circumstances beyond his control would not care to guarantee it.

Your obedient servant,

Robert Howe,
Indian Agent.

Dear Sirs,

Subject: File S-2-853.

Reference your letter of April 22nd and further to ours of April 25th regarding your enquiry for

74 only 3" x 14 ft. Boiler Tubes:

since writing you under date of April 25th we are in receipt of word from the Factory to the effect that 100 only 3" OD x 14 ft. Boiler Tubes will likely be shipped to us on or about May 15th, to arrive Vancouver on or about June 1st. On the basis of this delivery we quote you $41.00 per 100 ft., Sales Tax included, Net 30 days, F.O.B. our Warehouse, Vancouver, B.C.

The delivery date above mentioned is subject to delay beyond our control, as from previous experience the Factory have not always been able to live up to delivery promises. The price quoted is also subject to any change that might become effective prior to shipping date.

Should you wish us to reserve 74 of these Tubes for you, we would appreciate your advice by return mail Your further word is assured of our close attention.

Yours very truly,

GORDON & BELYEA LIMITED,

J.D. Thomson.

Ottawa,
June 2, 1942.

Dear Sir:

I am in receipt of your letter of the 21st ultimo, with reference to the Lejac Indian Residential School. In the current year's appropriation an amount of $1000.00 was provided for repairs, improvements and new equipment for this school. We have already authorized an expenditure of $424.70 for boiler tubes. This leaves less than $600.00 still available in the amount specifically provided for Lejac. However, we have a small unallotted amount in our appropriation and we can handle the expenditure of $765.00 which, it is noted from Indian Agent Howe's letter, will repair the roof and allow for two coats of stain. You may authorize Indian Agent Howe to have Mr. A.P. Andersen, General Contractor, Prince George, B.C., proceed with this work immediately.

Yours truly,

R.A. Hoey,
Supt. of Welfare & Training.

Memorandum:

DEPUTY MINISTER

Re: Lejac Indian Residential School,
Stuart Lake Indian Agency,
Electoral District of Cariboo.

The above-mentioned school was erected about 20 years ago and the roof is urgently in need of extensive repairs. Mr. Warren, of the Surveys & Engineering Branch, visited this school in August, 1940, and at that time mentioned that the repairs to the roof would have to be undertaken within two years.

The Indian Agent has submitted a report regarding the work that has to be done and states that Mr. A.P. Andersen, General Contractor, Prince George, B.C., is prepared to do the necessary work for an amount of $765.00.

Funds are available in the current year's appropriation for the expenditure mentioned above and I should appreciate your advising if you approve the employment of Mr. Andersen.

Approved

Dear Sir:-

I enclose herewith copy of Mr. Indian Agent Howe's letter of the 4th instant, requesting authority to expend the sum of $1,985.00 for repainting the exterior of the Lejac Indian Residential School buildings, and carrying out repairs to the roof. Also enclosed is Requisition covering the expenditure and a tender dated the 30th ultimo by Mr. A. P. Anderson, who appears to be the only Contractor available for the work, and a further letter from Mr. Anderson regarding the quality of material to be used.

It will be observed that his alternative is given in the Requisition for a lessor amount of work but, if funds are available, I would recommend that the entire work be completed during the present fiscal year, and would appreciate your advice in the matter.

Yours faithfully,

James Coleman

AIR MAIL

Ottawa, Sept. 8, 1942.

Re: Engine repairs,
Lejac Residential School.

Dear Sir:

I have for acknowledgment your letter of the 4th instant, in which you intimate that the cost of the repairs necessary to the engine at the above-noted school will amount to $235.00, f.o.b. Vancouver.

In view of your recommendation, it is difficult for me to see how we can do other than proceed with these repairs. I should point out, however, that there is an amount of $1,000 for repairs and equipment at the Lejac School in the estimates of this year. We have already expended $1,200, so that it is difficult for me to discover a source from which this repair bill can be paid. Such repairs, of course, are a necessity and are inevitable in the very nature of things. It would be appreciated by the officials here, however, if we could get, prior to the preparation of our estimates each year, a fairly accurate estimate of the amounts needed for such repairs at our schools. It so happens that this year the cost of repair work at practically all our schools is in excess of the amounts provided.

Yours truly,

R. A. Hoey,
Supt. of Welfare & Training.

Major D. M. Ma cKay,
Indian Commissioner for B. C.,

AIR MAIL

Dear Sir:

I would refer to your letter of July 21, 1942, file 163-1-5, approving of repairs to the Lister engine and generator from Lejac Indian Residential School.

Enclosed herewith is a copy of a letter received from the B.C. Equipment Company dated the 3rd instant, from which it will be observed that the cost of this work will amount to $235.00, f.o.b. Vancouver.

It would be appreciated if you would kindly confirm by airmail your approval of this expenditure.

It has been found that the work of the Company has been very satisfactory and I consider the engine worth the expenditure.

Yours faithfully,

D.M. MacKay,
Indian Commissioner for B.C.

COPY

Indian Commissioner for B.C.,
P.O. Box 70,
Vancouver, B.C.

Attn: Mr. D.M. MacKay,

RE: Lejac Indian School.

Dear Sir:

Please refer to your favor of July 28th, file 215-13-9514, on the subject of inspection of the 5 H.P. Lister Engine which was sent in from the above school.

We have now received a report from our Diesel Mechanic, who has dismantled this engine completely, and we are able to give below, an estimate on the cost of re-fitting.

We are glad to report that the crankshaft, and main bearings appear to be in good shape, as we cannot detect any deflection, so that it would appear to be profitable to rebuild the engine.

The cylinder head has a crack along side one of the valve seats, and the cost of replacing this head is $60.00.

Another large item is the reboring of the cylinder and fitting an oversize piston, and it will be necessary to make a pattern for the piston. After these repairs are completed, the engine could be expected to give satisfactory operation for a number of years.

We would quote as follows:

Overhauling and refitting 5 H.P. Diesel Engine, supplying new head, reboring cylinder and making and fitting new piston, complete with rings; overhauling fuel pump and atomizer; making and fitting new fly-wheel keys; repairing governor, building up and replacing parts on same; supplying new gaskets, assembling and testing on the load -

Dear Sir:

I enclose herewith Mr. Indian Agent Howe's letter of the 4th instant together with that of the Principal of the Lejac Indian Residential School requesting that the 5 horse power Lister Engine and generator be shipped to Vancouver for overhaul and necessary repairs.

In the absence of expert opinion on the condition of the engine, it is impossible to determine the nature and cost of the repairs necessary and I can only suggest that authority be given for its shipment to Vancouver for examination by a competent firm of engineers, preferably other than Hoffars Limited who have not given very much satisfaction in the past.

I would appreciate your advice in the matter.

Yours faithfully,

For D.M. MacKay,
Indian Commissioner for B.C.

Lejac Indian Residential School

Under Direction of The Oblate Fathers

Lejac, B.C.

June 30th., 1942.

Robert Howe, Esq.,
Indian Agent,
Vanderhoof, B.C.

Dear Mr. Howe:

It has been found that our small (5 h.p.) Lister Engine and generator, is in bad shape and needs immediate repairs.

The main shaft is bent, and the cylinder needs to be honed out and fitted with new piston. I would suggest that this engine be sent down to Hoffars in Vancouver and given a complete overhaul.

This work should be considered in the nature of emergency repairs, and should be done as soon as possible. For a great deal of our work we use only this small engine, and while it is out of commission we shall have to use the larger one, thereby consuming quite a lot more diesel fuel than would otherwise be necessary.

Therefore, will you please take the necessary steps to have this work authorised as soon as possible by the Indian Department.

Yours truly,

Rev. Alex. R. Simpson, O.M.I.

OFFICE OF
INDIAN AGENT

Stuart Lake Agency,
Vanderhoof, B.C.,
July 8th. 1942.

Your File No. 215-13-8521.
May 27-1942.

Dear Sir:-

With reference to the installation of 74 boiler tubes for use in boiler No. 22460 #2 Right hand at the Lejac Indian Residential School, the Rev. Principal now advises that Mr. Leslie, the Engineer at the School has neither the experience nor the equipment to install boiler tubes and that it is necessary to employ an experienced man for this work.

It is suggested that Mr. J. Leslie, Engineer at the Fraser Lake Mills and son of the Engineer at the School be engaged. Mr. Leslie Jr. advises that he has the necessary equipment and experience to install boiler tubes. Mr. Mark Connelly his employer also advises that this Engineer is quite capable of doing the work.

It is anticipated it will take about eight days to install the tubes at a daily rate of $8-00, $1-00 per hour. Total expenses $64-00. Experienced men for this type of work are extremely scarce and I think we would be well advised to employ Mr. Leslie.

Your obedient servant,

Robert Howe,
Indian Agent.

Stuart Lake Agency,
Vanderhoof, B.C.,
December 2nd. 1942

Sir:-

x x x

SCHOOLS:-

Rev. A.R. Simpson, Principal, Lejac Indian Residential School was absent for ten days during the month obtaining medical treatment at Vancouver.

A disastrous fire occurred at the School on the 18th. inst. destroying poultry houses and 500 laying hens. The origin[illegible] of the fire is unknown. It is presumed the blaze was started by a spark from the stove or pipes leading to chimney. Two runaways were reported from Lejac November 12th. Albert Prince 13 years, Stuart Lake and Moise Prince, 15 years, Stony Creek. These boys are reported to be a Prince Ruper. The Police at that point have been notified and we expect to have them back in school shortly.

x x x

Your obedient servant,

Robert Howe,
Indian Agent.

EX D

Major D.M. MacKay, Indian Commissioner, P.O. Box 70, Vancouver, B.C.

I am in receipt of your voucher No. 29-A requesting payment of $133.13 to the B.C. Equipment Company as part of the cost of overhauling and refitting the Diesel engine for the Lejac Indian Residential School. The account includes an item of $25.63 for freight and, while the school is paying part of the account, the Treasury Office points out that we have no guarantee that the freight was paid and consequently, before we can pay the amount of $133.13, it will be necessary for us to have a receipted freight bill for $25.63. As soon as this is received our share of the cost will be paid.

R.A. Hoey,
Supt. of Welfare & Training.

Major D.M.MacKay, Indian Commissioner for, B.C., Vancouver, B.C.

I beg to enclose herewith requisition with a tender attached from Hoffars, Ltd., Vancouver, B.C. for a list of parts required for repairs to the 9 H.P. Lister Engine which operates the lighting plant at the Lejac Indian Residential School .

Provision was made in the current year's estimates for this engine to be sent to Vancouver for a complete overhaul, however , the Rev. Principal informed me recently the necessary repairs may be done at Lejac by Mr. Leslie, the School Engineer.

FILE S-2-155

Stuart Lake Agency,
Vanderhoof, B.C.,
April 15th. 1943.

Major D.M.MacKay, Indian Commissioner for, B.C., Vancouver, B.C.

I beg to enclose herewith a requisition for material and labour for repairs to boiler No. 22461 #1, Right hand, at the Lejac Indian Residential School. It is essential for these repairs to be done before the next firing season. Please refer to the report of T.J.Arnall, S.P.P.Engineer, dated September 25th., 1941.

Tenders for 74 boiler tubes are attached from Crane and Company, Ltd., and Gordon Belyea, Ltd., Vancouver, B.C., whose prices are exactly the same. Please note the quotations are for immediate acceptance only, and subject to confirmation at the time the order is received. May I suggest that one of the firms be advised to hold the material, pending the Department's approval of the expenditure .

Tenders for fire bricks and clay are enclosed from Andersen's Lumber Yard, Prince George , B.C., the only available source of supply in the district. The installation of the new brick in the fire box will be done by Mr. Leslie, the engineer at the School without cost to the Department. It takes approximately 1000 bricks to reline the fire box.

We are fortunate in obtaining the services of Mr. R. Telford, an experienced boiler maker, who is employed at the Fraser Lake Sawmills, Ltd., Fraser Lake, B.C. to take out the old boiler tubes and install the new tubes. Mr. Telford's tender is attached hereto. Mr. M.M.Connelly, Manager of the Fraser Lake Sawmills has agreed to give Mr. Telford leave of absence to do this work. Mr.Leslie, the School Engineer is not qualified to perform work of this nature.

R. Howe,
Indian Agent.

	Tenders attached from Crane Co. Ltd., and Gordon Belyea Co., Ltd., Vancouver, B.C.					
1000	Fire brick 8½" x 4" x 2½" per 100			17	00	170.00
50	Fire brick wedge or thin edge per 100			17	00	8.50
500	Lbs. fire clay, per 100 lbs.			2	50	12.50
	F.O.B. Lejac tender attached from Andersen Lumber Yard, Prince George, B.C.					
	Note: I also attach copy of Mr. Arnall's report of September 25, 1941, in which he stated that the tubes of this boiler would have to be renewed in 1943. In forwarding the quotations attached it is stated that these quotations are for immediate acceptance only and consequently Commissioner MacKay advises that the order be placed at the earliest possible date. The installation of the new brick in the fire-box will be done by the engineer at the school without cost to the Department.					

I hereby certify that I have personal knowledge that all the above articles are required in the Department and for Departmental purposes only. The expenditure required by this requisition is strictly unavoidable and the public interest will suffer if it is not made.

Referring to my requisition dated April 16th., 1943 for material and labour for repairs to Right Hand Boiler No. 22461 at Lejac Indian Residential School, I wish to advise that I have received copies of purchase orders Nos. 18069, File No. 47814-15-2, May 4th. 1943 and 18068, File No. 47814 also of May 4th., for boiler tubes, fire brick and clay, but no authority has been received to employ Mr. R. Telford at Fraser Lake, B.C. to take out the old tubes and install new tubes at a cost of $92-50.

Please bring this to the attention of the Department. We are anxious to proceed with the boiler repairs at an early date.

Stuart Lake Agency
Vanderhoof, B.C.,
May 29th. 1943.

Major D.M.MacKay, Indian Commissioner for, B.C., Vancouver, B.C.

The Rev. Principal of the Lejac Indian Residential School reported on the 27th. inst. that the sewage disposal system at the School is out of order and that immediate repairs are necessary. It was also reported that underpinnings supporting the water tank are rotten and should be replaced.

I inspected the sewage system yesterday and it would appear the field pipe from the cesspool is broken, probably at several points, causing a leakage in two places about 150 yards from the School building. The stench is horrible and certainly not sanitary.

The 12' X 12" underpinning supporting the water tower are quite decayed at the ends and should be either spliced or replaced altogether. The tank holds a heavy load of water and is liable to collapse if repairs are not done in the near future.

Mr. Engineer Warren of the Dominion Water Power Branch repaired the sewage system at the School three years ago and I would suggest he be sent to Lejac as soon as possible to inspect and report on the system and the water tower.

At the same time I would like to have a report on necessary repairs to the foundation of the girls' playroom in the main school building. This item was included in the estimates for the current year.

R. Howe,
Indian Agent.

Ottawa,
June 4, 1943.

Major D.M. MacKay, Indian Commissioner, P.O. Box 70, Vancouver, B.C.

I have your letter of the 1st instant, enclosing copy of letter received from Indian Agent Howe. I am bringing the contents of this letter to the attention of the Surveys & Engineering Branch, as it is evident that the sewage disposal system and the underpinning supporting the water tower will have to receive immediate attention. For your information I may say that in the current year's appropriation an amount of $875.00 was provided for repairs, improvements and purchase of new material at this school. We have already either authorized or expended the following amounts:

1. Repairs to Lister engine .....$ 66.55
2. Purchase of new boiler tubes 615.76
3. Taking out old tubes and installing new tubes 92.50

You will note from the above that the amount specifically provided for this school has practically been expended. We are only allowed a very small amount for unforeseen expenditures and consequently it is only possible to do the most urgent work this year.

R.A. Hoey,
Supt. of Welfare & Training.

Memorandum:

DIRECTOR

Surveys & Engineering Branch

Re: Lejac Indian Residential School

I enclose, for your information, a copy of a letter from the Indian Agent regarding the above-mentioned school.

It would be appreciated if you would arrange to have one of your staff visit this school at an early date with reference to the sewage disposal system and the underpinning supporting the water tank.

The funds at our disposal are limited and consequently, if it is cheaper to splice the underpinning and if your officer feels that this would be satisfactory, I suggest that the replacement of the underpinning be deferred to a later date. As soon as your officer visits the school I would appreciate having his report.

H. Howard

Director.

Major D.M.MacKay, Indian Commissioner for, B.C., Vancouver, B.C.

I beg to enclose herewith requisition for material requested by the Rev. A.R.Simpson, Principal of the Lejac Indian Residential School.

The enamel is required for painting the interior walls of the School kitchen and the alabastine for interior walls throughout. Gyproc is required for repairs to plastered walls and the red barn paint and shingle stain is for the cow barn, piggery, play shed and water tower.

These buildings and interior surfaces are badly in need of repainting and I would recommend approval of the expenditure. The labour will be done by the out side staff at the School without cost to the Department.

Tenders for paint, stain and alabastine attached hereto, from McLennan, McFeely and Prior, Vancouver, B.C. and Gordon and Belyea, Vancouver, B.C. Tender for gyproc from P.E.Andersen, General Contractor, Prince George, B.C.

Vanderhoof, B.C., June 1st, 1943.

REPORT FOR MONTH OF MAY.

x x x

Lejac Indian Residential school was visited on the 12th, 22nd and 28th of May. The tonsil Clinic by Dr. Holmes was held on the 11th, 14th and 20th. - 43 pupils had their tonsils removed. No ill effects were reported. The principal reported a break in the pipe line leading from the cesspool. I inspected the sewage system on the 28th of May. The odor is very unpleasant and unsanitary. A report was submitted to Major MacKay on the 29th.

REPORT ON STUART LAKE INDIAN AGENCY FOR THE MONTH OF JUNE, 1943.

x x x

Schools;

I visited Lejac Indian Residential School twice during June. Mr. Engineer W. Warren, inspected the sewage system, water tower and School foundation on the 21st.

The School term closed on the 25th and the children left for their homes the same date. The health of the children was reported to be good.

Re: Lejac Indian Residential School

I have your memorandum of June 28 with reference to improvements required at this school. I understand from the last paragraph of your letter that you will forward to us specifications for repairs to the water tank supports and as soon as these are received we will arrange to have the Indian Agent secure bids from a local contractor.

Director.

Ottawa,
July 2, 1943.

Major D.M. MacKay, Indian Commissioner, P.O. Box 70,
Vancouver, B.C.

On receipt of your letter of the 1st ultimo, regarding improvements required at the Lejac Residential School, the Department wrote to the Surveys & Engineering Branch and they have just supplied us with the following information:

"Warren visited Lejac School last week end and reports sewage system now in good working order STOP Foundation girls' wing only minor repairs needed which can be done by school staff STOP Water tank supports in bad condition immediate repairs indicated probable cost about five hundred dollars STOP Suggest Indian Agent be authorized secure bids on this work from local contractors following specifications to be supplied by this office STOP Labour very scarce in locality STOP Report will follow in due course."

You will note from the above that the sewage disposal system is again in good working order and the necessary repairs to the foundation of the girls' playroom will be looked after by the school staff.

As soon as the Surveys & Engineering Branch forward us the specifications for the repairs to the water tank supports we will write to you in order that you can arrange to have the Indian Agent secure bids on the work from local contractors.

R.A. Hoey,
Supt. of Welfare & Training.

Re: Lejac Indian Residential School

On receipt of your memorandum of June 4th, relative to the above, I telephoned Mr. Phelan of your staff who suggested that in view of the condition of the sewage disposal system, as reported by Indan Agent Howe, Mr. Warren should be authorized to have it repaired at once.

Mr. Phelan agreed to this procedure and from Mr. Mills' memorandum of June 25th, copy of which is enclosed, you will note that the sewage disposal system is again in good working order.

It would appear that the necessary repairs to the foundation of the girls' playroom will be taken care of by the school staff.

We will advise you further as soon as the specifications for the repairs to the water tank supports are available.

JUN 25 1943
SURVEYS & ENGINEERING

DCM IA-1772-2

June 25, 1943.

Memorandum:

Re: Lajac Indian Residential School

In reference to your memorandum of the 7th instant regarding an inspection to be made at the Lejac School, Mr. Webb has wired under date of the 24th instant as follows:

> "Warren visited Lejac School last week end and reports sewage system now in good working order STOP Foundation girls wing only minor repairs needed which can be done by school staff STOP Water tank supports in bad condition immediate repairs indicated probable cost about five hundred dollars STOP Suggest Indian Agent be authorized secure bids on this work from local contractors following specifications to be supplied by this office STOP Labour very scarce in locality Report will follow in due course."

It will be noted that the sewage disposal system is functioning properly again and that any necessary repairs to the foundation of the girls' playroom can be carried out by the school staff. Regarding the water tank supports Mr. Warren considers that they should be repaired at once and that as labour is very scarce in the locality, the work should be done by a local contractor in accordance with specifications to be prepared by him. We concur in this and suggest that the Indian Affairs Branch be advised so that arrangements may be made to provide the $500.00 which will be required.

July 8th. 1943.

Major D. M. MacKay, Indian Commissioner for B.C.
Vancouver, B.C.

I beg to acknowledge receipt of your letter of the 2nd. inst. your file, No. 215-I3-5263, enclosing Mr. Warren's report together with a copy of Mr. Webb's letter of the 30th. ultimo with regard to the sewage system, water tower, and girls playroom at Lejac Indian Residential School. In this connection I wish to report as follows:-

Sewage System:- The system has been throughly cleaned and is now working satisfactorily. The Rev. Principal has been instructed to clean the system at intervals of not more than two years, as recommended by Mr. Warren.

Basement wall, girls playroom:-

The repairs to the basement wall and the grading recommended will be carried out as soon as possible by the school staff.

Water tank foundations:-

It is noted Mr. Warren recommends that repairs to the water tower foundation should be carried out in July, at an approximate cost of $500.00. It is suggested that tenders be obtained from local contractors for this work.

On receipt of the specifications tenders may be obtained from Mr. S. W. Cooker, Vanderhoof, B.C., and Mr. O. J. Reid, also of Vanderhoof. Both these men are qualified mechanic's and capable of doing the work.

Your File:- 163-1-5, May 28th, 1943.

Indian Affairs Branch, Department of Mines and Resources, Ottawa:-

I beg to enclose herewith Voucher No. 63 for $125-00 in favour of R. Telford, Fraser Lake, B.C. for cutting out old tubes and replacing new tubes in the boiler at Lejac Indian Residential School.

Mr. Telford's tender and the authority granted was for $92-50 for completion of this work. However, as Mr. Telford points out in the attached letter unforeseen difficulties were encountered and the work took twice as long as formerly anticipated.

Taking the hours of work expended by Mr. Telofrd installing the tubes his wages are very low indeed. I would strongly recommend that the account be paid in full.

I might add that failing to obtain Mr. Telford's services it would have been necessary to send to Vancouver for a mechanic at double the present cost.

Copy sent to Major MacKay

Ottawa,
July 30, 1943.

Mr. R. Howe, Indian Agent, Vanderhoof, B.C.

With reference to your letter of July 8 to Indian Commissioner MacKay, regarding the repairs required to the water tower at the Lejac Indian Residential School, I enclose, for your guidance, specifications and blueprint covering the repairs to the water tank supports.

As you have been previously advised, quotations should be obtained from local contractors to do the necessary work, the cost of which is estimated at approximately $500.00. When you obtain the quotations they should be submitted to Indian Commissioner MacKay for his decision regarding what firm is to do the work.

Re: Lejac Indian Residential School

In your memorandum of June 28 you stated that you would forward later specifications for repairs to the water tank supports. I have already communicated with the Indian Agent and he knows two men from whom quotations may be obtained. However, before obtaining the quotations he is awaiting the specifications and, as the summer is advancing, it would be appreciated if the latter could be forwarded to me at an early date.

Director.

July 21/43.

AIR MAIL

Indian Affairs Branch, Department of Mines and Resources,
Ottawa, Ontario.

I would refer to your letter of the 2nd instant file 163-1-5 regarding repairs to the Lejac Indian Residential School.

In this connection, I enclose herewith Mr. Indian Agent Howe's letter of the 8th instant advising that the sewerage system is now working satisfactorily after being cleaned in accordance with Mr. Warren's instructions. Mr. Howe also advises that repairs to the basement wall and the grading will be carried out by the school staff as soon as possible.

In connection with required repairs to the water tower foundation at a cost of about $500.00, it is suggested that tenders be obtained from local contractors as soon as specifications are available.

For D.M. MacKay,
Indian Commissioner for B.C.

Memorandum:

DEPARTMENTAL PURCHASING AGENT

I attach account amounting to $125.00, covering the cost of supplying and installing 74 boiler tubes in the boiler at the Lejac Residential School. The Indian Agent reports that the work has been well done and he considers the account very reasonable. It would, therefore, be appreciated if you would issue purchase order so that the account may be paid. The coding is as follows: 881-76-10-691.

EXD.

OTTAWA, March 24, 1944.

Major D. M. MacKay, Indian Commissioner, Vancouver, B.C.

I return herewith the Special Category Application for gasoline ration submitted on behalf of the Principal of Lejac School.

You will note there is no certificate on this form that could conscientiously be signed by anyone in the department here.

The only certificate that could be considered applicable is No. 2 and this must be signed by some one having personal knowledge of the facts deposed to. It is suggested that you could sign this as Indian Commissioner and it is noted that no trouble was experienced last year.

Dear Sir: Your file S-2-82

I have to thank you for your letter of the 18th ultimo enclosing copy of letter from your Commissioner, and now comply with Major MacKay's request and herewith file a statement of costs covering the whole job of work done at the Lejac Indian School.

My only reason for withholding a detailed statement was that I would make known a fault in judgement when I estimated the cost of work to be done, and that is a matter in the building business we do not care to mention, but rather suffer the loss and hope to square it next time.

Yours very truly,

"S. W. Cocker"

Your File 163-1-5

I have to refer to your letter of July 30th, addressed to Mr. Indian Agent Howe, (copy of which was sent to this Office) authorizing repairs to the water tower at the Lejac Indian Residential School.

Purchase Order No. 23001-A, was issued to Mr. S. W. Cocker, of Vanderhoof, in the amount of $460.00, in accordance with his tender but, on completion of the work, Mr. Cocker submitted an account for $545.00; the amount in addition to the contract price to cover work and materials not called for in the specifications.

I enclose herewith, for your information, copies of correspondence from Mr. Indian Agent Howe and Mr. C. E. Webb, District Chief Engineer of the Dominion Water and Power Bureau, and from Mr. Cocker, in connection with this additional amount over and above the contract price.

You will note from Mr. Indian Agent Howe's letter of November 15th that Mr. Cocker does not feel disposed to submit a detailed statement of costs for the whole job, and I would recommend that, pending receipt of this statement, the Department pay Mr. Cocker the amount of his tender only, i.e., $460.00.

I am enclosing herewith Voucher No. 115 received from Mr. Indian Agent Howe, in favour of Mr. S. W. Cocker, together with copies of the Purchase Order.

November 13, 1943.

Mr. Robert Howe,
Indian Agent,
Vanderhoof, B.C.

Dear Sir:

Further to our conversation re your Department seeking a detailed statement of extra costs for work done at LeJac Indian School water tower I now submit the following:

16	Extra Bolts & Washers	$16.00
2	Trips to Vanderhoof for same @ $.10 per mile	16.80
50	hrs. labour @$1.00 and $1.25 per hour	54.00
	Supervision fee	10.00
		$96.80

If there is to be further unnecessary delay in payment of the above extra costs would you please have your Department issue a separate voucher for the original contract price of $460.00 as I have already paid all labour charges and other bills in connection with this job. Then the $85.00 extra charge could by your officials be considered later.

Yours faithfully,

S.W. Cocker.

Robert Howe Esq.,
Indian Agent,
Vanderhoof, B.C.

Dear Sir:

Further to our conversation re your Department wishing a detailed statement of my extra costs in connection with job at LeJac Indian School, I would first state that the sum of $460, my original tender was not a liberal amount for that work.

I did inspect the work in a general way before pricing the job, more particularly with respect to suitable gravel and dry jackpine poles for false work etc. From the look of the country one would expect to get eighteen poles twenty feet long in that district, but found I had to haul them a distance of twenty-five miles. The gravel at the beach looked o.k., but upon closer examination found it too dirty for cement work, so had to cut out an old gravel road some ten miles away.

The additional cost, as explained in my last letter, was caused by the extra bolts, both top and bottom. The bottom, because of the small space to work in, and the top caused additional staging, for the reason that I could not swing the braces as I had figured, but had to take the entire brace off.

I naturally figured the job from the plan and specification.

I had to make two trips to Vanderhoof with a truck (the only unit I had on the job) to get the extra bolts.

The shortage of labor was an important factor in the additional costs. I paid three carpenters $1.25 per hour to do this work.

Yours truly,

"S. W. Cocker."

D. M. MacKay, Esq., Indian Commissioner, Vancouver, B.C.

Re: Water Tank- Lejac Indian School.

With reference to your inquiry of October 13 regarding additional work on the above performed by contractor S.V.Cocker, there is no doubt that the plan is misleading in that it showed only one bolt where two existed. However, the difficulties mentioned by Mr. Cocker would likely only be encountered at the four lower corners next to the concrete pedestals and would not apply to all joints. If Mr. Cocker inspected the work to be done before making his tender he no doubt made an estimate of all of the material to be supplied and work to be performed and consequently noted the deficiency referred to.

Although the estimate of $500.00 for the work is considered liberal, I would suggest that if Mr. Cocker supplies a statement showing the outlay for labour and material on the whole job and what he asserts was extra to the contract in support of his claim, as well as a statement that he did not inspect the work to be performed before signing a contract, I believe you would be fully justified in recommending his claim for payment.

(SGD.) C. E.Webb
District Chief Engineer.

Per: W.C.Warren.

Major D.M.MacKay, Indian Commissioner for, B.C., Vancouver, B.C.

I beg to enclose herewith Voucher No. 115 for $545-00 in favour of Mr. S.V. Cocker for repairs to the supporting framework of the water tower at the Lejac Indian Residential School.

Mr. Cocker tendered to complete the work according to specifications for $460-00 but additional labour and material was entailed, as described in the attached letter, which was not included in the specifications or shown on the sketch plan.

Mr. Cocker had to pay extremely high wages for three skilled men to assist him in this work and there is no doubt that considerable extra time was spent in removing the bolts referred to.

I inspected the work on the 28th. inst. and am pleased to report the results are very satisfactory.

I would recommend payment of the account in full.

Vanderhoof, B.C.
September 27,1943.

R. Howe,Esq.,
Indian Agent,
Vanderhoof, B.C.

Dear Sir:

I am pleased to be able to report that my contract to repair water tank supporting framework at Lejac Industrial School is now completed.

You will observe from Drawing No.202 from which I estimated this job that the ends of all braces and girts, only one bolt is shown, but when I arrived on the job, to do the work, I found two bolts at ends of all braces and girts.

This entailed considerable extra work as the water tank supporting framework was of course erected before the tower was built, and many of the bolts were driven from the inside, so that at the bottom we had to hacksaw off the heads of the bolts.

To drive those bolts (which for the most part were badly rusted) from their original awkward position, took considerable time and since I had to pay my carpenters $1.25 per hour, I respectfully request that you recommend to your Department an extra sum of Eighty-five ($85.00) dollars to cover this extra work and additional bolts.

Yours faithfully,
(Sgd.) S. W. Cooker.

Copy sent to Major MacKay

163-1-5

Ottawa,
May 5, 1944.

Mr. R. Howe, Indian Agent, Vanderhoof, B.C.

I desire to advise you that in the current year's appropriation an amount of $1200 has been provided for repairs and improvements at the Lejac Indian Residential School. Please consult the Principal at once and advise the Department, through the office of Indian Commissioner MacKay, regarding the manner in which you recommend this amount should be expended. In the event of materials being required, the usual requisition should be attached to your letter.

R.A. Hoey,
Supt. of Welfare & Training.

Your file - 163-1-5

I wish to acknowledge receipt of your letter of the 12th instant having reference to my requisition of May 5th for materials for the Lejac Indian Residential School amounting to approximately $400.

Your letter of same date advising that $1200 has been appropriated for repairs and improvements at Lejac School for the current fiscal year was received and discussed with the Reverend Principal.

It was made clear to the Principal that the amount of $400 involved in my requisition of the 5th would be deducted from the $1200.

The requisition for material covering the balance of the appropriation will be submitted to Major MacKay in the near future.

R. Howe,
Indian Agent.

Mr. R. Howe, Indian Agent, Vanderhoof, B.C.

I have your letter of the 5th instant, enclosing requisition for materials for the Lejac Residential School. Your letter crossed my letter of the same date, in which you were advised of the amount that is provided in the current year's appropriation for repairs and improvements at the Lejac School. The materials requested in your letter of the 5th instant will cost approximately $400 and before proceeding with their purchase we would like the Principal to understand that in the event of our making the purchase the cost of the materials will be deducted from the amount of $1200 provided in the appropriation. Please discuss this matter with him and advise me that he understands the situation thoroughly.

Major D.M. MacKay, Indian Commissioner for B.C.,
Vancouver, B.C.

I beg to enclose herewith requisition for material required for repairs at Lejac Indian Residential School amounting to $390.69.

Under date of May 12, 1944, file 163-1-5, the Department advised that the sum of $1,200.00 had been set aside for repairs and improvements at Lejac Indian Residential School for the current fiscal year and that requisitions should be forwarded through your office as soon as possible.

With the amount included on the attached requisition we have expended $809.74 from this allottment. Requisitions for the balance of the appropriation, $390.26, will be submitted in due course.

The Masonite is required to cover dining room tables 4" x 12", planking to replace worn out barn floors, Dres-a-Floor paint for play room floors and the varnish for interior woodwork.

Schools;

The majority of the pupils at Lejac Indian Residential School are on vacation. About 30, underprivileged including orphans and children from Stikine Agency remain at the School. Twelve children from the Stikine Agency arrived recently.

Advantage is being taken of the vacation period to redecorate the interior surfaces of the main school block and other necessary repairs.

FILE E-2-6

Stuart Lake Agency,

Vanderhoof, B.C.,
November 24th, 1944.

Major D.M. MacKay, Indian Commissioner for B.C.,
Vancouver, B.C.

I beg to enclose herewith requisition for material for use at the Lejac Indian Residential School. This equipment is badly required and I would recommend approval of the expenditure.

According to our records there is sufficient funds from the appropriation of $1,200.00 set aside for repairs and improvements for the current fiscal year to cover this expenditure.

R. Howe,
Indian Agent.

EX'D A

With reference to your letter of the 28th ultimo, the Department approves the purchase of the closets and window shades required at the Lejac Residential School. It is noted that the total cost of these will not exceed $382.14. When forwarding the account you should attach copy of your purchase order.

I am enclosing the quotations which you submitted, as you may require them.

Philip Phelan,
Chief, Training Division.

Your File 163-1-5

As requested in Mr. Phelan's letter of December 18th, I enclose herewith the following listed quotations on the new generating plant for the Lejac Indian Residential school:

Canadian Atlas Diesel - Atlas-Lanova Diesel 12-1800 R.P.M.
9 K.W. Delivery by April....$2195.00

Canadian Fairbanks Morse - 2 Cyl. 14.5 H.P. diesel, 900 R.P.M.
7½ K.W. Generator, Electric starter
....$2773.00

War Assets Corporation - Waukesha Gas Engine, 7½ K.W. Generator,
Electric starter, switchboard, etc.
....$1420.00

B.C. Equipment Co. - Petter "S" type 12/14 H.P. diesel, USED
6½ K.W. Generator, switchboard, etc.
....$1073.00

Vivian Engine Works Ltd. - 2 Cyl. 30 H.P. diesel, 5-600 R.P.M.
10 K.W. Generator, with compressed air
starter..... $3000.00

It is thought that the equipment quoted on by either Canadian Atlas Diesel or Canadian Fairbanks Morse would be more suitable than the others and if funds are available I would recommend that consideration be given to placing the order with either of these two Firms.

Ottawa, December 18, 1945.

Major D. M. MacKay, Indian Commissioner for B.C.,
P.O. Box 70, Vancouver, B.C.

I have your letter of the 12th instant, with reference to the generating plants at the Lejac Indian Residential School.

In view of the contents of your letter, I would like you to make enquiries to determine the cost of the new generating engine which you consider is necessary. In the event of your securing quotations, these should be forwarded for our consideration.

Philip Phelan,
Chief, Training Division.

Ottawa, 1st December, 1945.

Major D.M. MacKay, Indian Commissioner for B.C.,
P.O. Box 70, Vancouver, B.C.

In your letter of October 6th you enclosed a report from Mr. T.J. Arnall with reference to the Lejac Residential School. This report read as follows:

"The electric generating plants are very much overloaded. Should a breakdown occur, considerable inconvenience will be felt. I would suggest that consideration be given to the purchase and installation of a new unit of 14 H.P. cold starting Diesel D.C. to a 7 K.W. D.C. generator to operate in conjunction with the present plant."

Subsequently we have not received any further communication from you regarding this matter. I would appreciate hearing from you.

Philip Phelan,
Chief, Training Division.

163-1-5

Extract from Report of Rev. Alex. R. Simpson, O.M.I., dated September 30, 1945, re LEJAC RESIDENTIAL SCHOOL

PROPERTY

A considerable amount of painting and kalsomining in the halls and dormitories and dining rooms was done during the summer. Once again we have to face the winter with a building that is almost impossible to heat due to the looseness of windows and doors. For several years we have been trying to get the exterior wood surfaces of the house painted, but have been unable to do so owing to the shortage of labour.

We find that our electrical output is now insufficient for our needs, and suggest that a larger Diesel generator be obtained by the Department from the War Assets Corporation. An output of at least 15 kw. would be desirable.

The boiler inspector made certain recommendations regarding our hot water supply which I hope will be accepted, because we are woefully short of hot water on bath days.

Requisition No. ....

Order No. ....

Ottawa, January 17, 1946.

To The Depar. nental Purchasing Agent, Ottawa, (File 163-1-5)

PLEASE FURNISH THE FOLLOWING SUPPLIES FOR USE OF

Lejac Indian Residential School

VOTE 76 ALLOTMENT ALLOCATION SYMBOLS

SHIP TO Rev. A. R. Simpson, Principal, Indian Residential School,
Lejac, British Columbia.

Purpose for which required

QUANTITY		UNIT PRICE	TOTAL
1	Generating Plant (cold starting Diesel)		

Following his inspection of the mechanical plant at the Lejac School, Mr. T. J. Arnall, Boiler Inspector for the Department of Public Works, reported that the electric generating plant at the Lejac School was much overloaded and if a breakdown occurred considerable inconvenience would be caused. He recommended that immediate consideration be given to the purchase and installation of a new unit of approximately 14 H.P. cold starting Diesel D.C. to a 7 K.W. D.C. generator to operate in conjunction with the present plant.

I enclose quotations received by Indian Commissioner MacKay and in forwarding them he states that the equipment on which either CANADIAN ATLAS DIESEL or CANADIAN FAIRBANKS MORSE quote would be more suitable than the others.

P.O. 1044 1. Vulcan Iron Works Vancouver Engine Works after 27/4 6

I hereby certify that I have personal knowledge that all the above articles are required in the Department and for Departmental purposes only. The expenditure required by this requisition is strictly unavoidable and the public interest will suffer if it is not made.

Re: Dough Mixer for the Lejac School.

Attention: Mr. Phelan.

Dear Mr. Phelan:

I am in receipt this morning of a letter from Reverend Father A.R. Simpson, O.M.I., principal of the above school, in which he requests me to ask for a dough mixer for his school.

The authorized pupilage of this school is 160 and if we add the staff and the personnel, along with the extra pupils that they always have, the number of persons for whom the baking is done, is at least 200. That number corresponds with the figures of 1200 lbs. of flour which is being used weekly in the school. As baking four times a week is about the general practice in our residential schools, I believe that a dough mixer capable of handling three bags of flour, would be the proper one to buy.

The older girls of the school were in the habit of doing all the work in the baking room but due to war conditions the girls are now much younger and unable to perform this task satisfactorily. I, therefore, hope that you will be able to meet with Father Simpson's wishes in this matter.

Yours very truly,

J.O. Plourde, O.M.I.

Memorandum:

DIRECTOR, SURVEYS & ENGINEERING BRANCH

Re: Lejac Indian Residential School,
Stuart Lake Indian Agency,
Province of British Columbia.

Following his inspection of the mechanical plant at the Lejac School, Mr. T. J. Arnall, Boiler Inspector for the Department of Public Works, reported that the electric generating plant at the Lejac School was much overloaded and if a breakdown occurred considerable inconvenience would be caused. He recommended that immediate consideration be given to the purchase and installation of a new unit of approximately 14 H.P. cold starting Diesel D.C. to a 7 K.W. D.C. generator to operate in conjunction with the present plant.

Indian Commissioner MacKay forwarded the enclosed quotations and stated that in his opinion the equipment on which either Canadian Atlas Diesel or Canadian Fairbanks Morse quoted would be more suitable than the others. Subsequently we received a letter from the Vivian Engine Works, Limited, and this was also submitted to our Purchasing Branch.

For your information I enclose a copy of a memorandum just received from the Departmental Purchasing Agent, also the tenders originally received and the letter of January 23 from Vivian Engine Works, Limited.

I would appreciate it if you would review these quotations and let me have a recommendation regarding what equipment should be secured.

Indian Affairs Branch

Re generating plant for Lejac I.R.School
I.A.B. File 163-1-5

In reply to Mr. Phelan's memorandum of the 30th instant, with accompanying letter from Vivian Gas Engine Works Ltd., Vancouver, and excerpt of Commissioner Mackay's letter, dated Jan. 26th, I may say that prior to receipt of the above, Ministerial approval has been secured to purchase an engine and generator from Canadian Atlas Diesel Engines Ltd., Vancouver, in accordance with Major Mackay's recommendation. Purchase order has not been issued as yet.

If you wish to give further consideration to purchase of the unit offered by Vivian Engine Works Ltd., I would suggest that the tenders herewith be referred to the Engineering and Surveys Branch for consideration and recommendation, after contacting Mr. H.V.Anderson of the Department of Transport, Ottawa.

The "Atlas" unit is priced at $2,195.00, the the "Vivian" at $2970.00, and if you wish to purchase the latter, we would require your recommendation supported by engineering advice, with adequate reasons for ordering the higher priced equipment.

Kindly return the tenders with your reply.

Memorandum:

DEPARTMENTAL PURCHASING AGENT.

I desire to refer to our requisition of January 17, 1946, ordering a generating plant for the Lejac Residential School. Today I am in receipt of a letter from Indian Commissioner MacKay, dated January 26, 1946, reading as follows:-

"With reference to my letter of January 5th and quotations on a new generating plant for the Lejac Residential School, a further letter has been received from Vivian Engine Works dated January 23rd and is enclosed herewith for your information. Unless the matter has already been dealt with it might be advisable to contact Mr. H. V. Anderson of the Department of Transport, Ottawa, and obtain his views regarding the Vivian Engine."

I enclose, for your information, the letter of the Vivian Engine Works, Limited, dated January 23, to which Major MacKay makes reference.

Vancouver, B.C.
December 29, 1945.

Memorandum to Mr. Webb:-

Re: Water Supply, Lejac Indian Residential School, Lejac, B. C.

Introduction

Following instructions received in your letter of November 14, 1945, I made an inspection of the intake and pumping plant at Lejac Indian Residential School on November 21.

Present Water Supply

Lejac Indian School is situated on the shore of Fraser Lake about three miles east of Fraser Lake railway station and about ten miles east of Endako, a divisional point on the Jasper-Prince Rupert Branch of the Canadian National Railway. The water supply for the school is obtained from the lake by means of pumps which pump the water from a well on the lake shore to a 20,000 gallon elevated wood stave tank situated about 1,000 feet from the school and a half-mile from the lake.

The pump house is of frame construction on a concrete foundation over a concrete well thirteen feet deep to bed rock. The pumping is done by two Fairbanks Morse horizontal type double-acting 3⅛" x 6" stroke pumps, belt connected to each side of a 10 H.P. Fairbanks Morse horizontal gas engine. This plant will deliver 100 U.S. gallons per minute against 100-pounds pressure.

The water enters the pump house well through an intake pipe, the screened intake being in the lake about 300 feet from the well. On the intake line and about 40 feet from the well is a wooden settling box, 5 feet wide and

ARCHIVES PUBLIQUES
CANADA

Library and Archives Canada / Bibliothèque et Archives Canada
www.collectionscanada.gc.ca

16 feet long to interrupt the flow of sand and gravel into the well. From this box the water is carried into the well by an 8-inch pipe.

The intake system has been working satisfactorily and ordinarily there is no drop in the water level of the well when both pumps are operating.

Reason for Inspection

On November 8 of this year the Principal of the School reported to the Indian Agent at Vanderhoof that owing to the low level of Fraser Lake, the intake pipe from the lake was exposed to frost and there was a grave danger of the domestic water supply for the school being cut off completely by freezing in the near future.

Inspection November 21, 1945.

On examining the well I found it to be 14½ feet deep, measured from the floor of the pump house, with a depth of water of 8½ feet. There appeared to be gravel on the well bottom.

Both pumps were put in operation and after about an hour's pumping the water in the well had been lowered eighteen inches and the pumps were starting to suck air. I was informed that the intake pipes from the pumps used to extend deeper into the well, but were shortened because of the tendency to suck up gravel from the well bottom. As this shortage of water coming into the well could only be caused by a plugging up of the intake pipe from the lake, and as under those circumstances the school did not have adequate water for fire protection, I suggested that the intake pipe be uncovered without delay so that the obstruction could be found and removed.

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

POOR COPY

Library and Archives Canada / Bibliothèque et Archives Canada
www.collectionscanada.gc.ca

An examination of the intake showed the following arrangement (see plan attached):-

1. A wooden settling box 5 feet wide and 16 feet long, divided into two 5 x 8 sections by a cross partition, is placed on the intake line about forty feet from the pump house. The box was originally eight feet deep but during the high water of last spring floating logs knocked off the top two feet and the plank cover. The bottom of the box was 4½ feet below the water surface. This box is necessary to allow the sand which is stirred up by wave action to settle out before the water goes into the well.

2. The settling box was connected to the pump house well by an 8-inch iron pipe about four feet below the water level.

3. An 8-inch iron pipe about 200 feet long extended out into the lake with a screen arrangement on the lake end. It was difficult to see exactly what the intake arrangement was but the screen appeared to be partially blocked with fungus and slime. The water was 3.5 feet deep at the intake, with the top of the pipe 2.6 feet below the surface. All of this pipe except the last sixty feet in the lake was underground and it is presumed that this was originally laid level, but that the shore end has gradually been heaved up by the frost since at this end the top of the pipe is only 1.6 feet below the water surface.

4. Between the shore end of the iron pipe and the settling box was a space of about twenty feet, which I was informed was left as a filter. Subsequently this was opened up and there was found to be a wooden box pipe made of 2 x 10 plank between the end of the iron pipe and the settling box, but though it was connected to the box, there was no connection with the iron pipe; the ends of the two being separated by about three feet of gravel. This wooden box pipe was 21 inches below the level of the water.

Indian Affairs. (RG 10, Volume 6444, file 881-5, part 7)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

Library and Archives Canada / Bibliothèque et Archives Canada
www.collectionscanada.gc.ca

Inspection November 26.

Another call was made at the school on November 26. In the meantime the wooden box pipe between the iron intake pipe and the settling box had been opened up and was found to be blocked up with gravel. This condition had been corrected and the water was running freely into the well. As this part of the intake was definitely subject to freezing during a severe winter it was decided to cover it over with a big bank of snow for protection until the system could be put into proper working order at a later date.

From these inspections it was evident that the iron intake pipe in the lake was not functioning at all, the water evidently entering the settling box through the wooden box pipe which, being unscreened, eventually became full of sand and gravel.

Inspection of Lake Outlet

With the idea of determining whether or not it might be feasible to raise the level of Fraser Lake by a small dam at the outlet and also to find out how much lower the lake could drop, an examination was made of the lake outlet.

The water leaves Fraser Lake in two channels, separated by a low willow-covered island, evidently flooded at higher stages. (See attached sketch plan). The right hand channel was about 700 feet wide at the narrowest point, with a maximum depth of 0.3 feet. The left hand channel was 164 feet wide, with a maximum depth of 2.8 feet. The bottom was sandy for one to one and a half feet, and below that was hard blue clay.

These two channels come together into one stream about three-quarters of a mile below the lake outlet and just above the highway bridge. Here the stream is about 200 feet wide with a maximum depth of three feet. The fall

www.collectionscanada.gc.ca

from the lake outlet to the highway bridge is 0.4 feet. An excellent aerial view of this outlet is shown in the attached photograph from "Report on Aerial Reconnaissance of Water Resources in the North Pacific Region", by C.E. Webb and dated February 12, 1944.

Previous Reports

In a report by Mr. E.H. Tredcroft, dated June, 1923, he proposes a well and pumping plant similar to that now in operation, with an intake from the lake, but no details of the intake are given. The system was apparently installed along the lines of this proposal in the latter part of 1923, under the supervision of the Department of Indian Affairs.

Recommendations

Since the present system has been working satisfactorily except for the accumulation of gravel in the wooden box pipe (which can be cleaned without any great difficulty) the only requirement is to adequately protect the intake system from frost. This could be accomplished in two ways:-

1. Raising the lake level
2. Changing the intake layout.

The first of these alternatives is not recommended because of the expense of building and maintaining the necessary dam, the possibility of interfering with the movement of spawning fish and the possible objection of farmers who have hay meadows on the lake shore.

I would therefore recommend that the intake be remodelled in the following manner(see plan attached):-

1. Discard the iron pipe in the lake. The system has been working satisfactorily without it and it is therefore not necessary. It is also likely that this pipe would fill with sand and would require flushing out from time to time.

Indian Affairs. (RG 10, Volume 6444, file 881-5, part 7)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

POOR-COPY

Library and Archives Canada / Bibliothèque et Archives Canada
www.collectionscanada.gc.ca

2. Repair the present settling box by replacing the part that has been broken off.

3. Place or drive ten 2-inch sand points horizontally toward the lake and connect each one to the settling box by a 20-foot length of 2-inch galvanized iron pipe. By this means the necessary volume of water will be supplied to the settling box, from which it will enter the well by the present installation.

This work should be undertaken during the present low water and after the extreme cold weather.

Estimate of Cost

The total cost of this work is estimated at $625.00. Details of the anticipated expenditure supporting this estimate are shown in Appendix 1.

31st January 1946.

Re WATER SUPPLY - LEJAC INDIAN RESIDENTIAL SCHOOL, STUART LAKE AGENCY, B. C.

Attached in duplicate is a report by Mr. T.H.Boyd, dealing with suggested changes in the intake works for the water supply from Fraser Lake serving the Lejac Indian Residential School.

It would appear that the present water supply is being successfully obtained from the saturated gravel along the shore of the Lake. It is proposed to eliminate the intake pipe which is not connected directly to the intake well, and substitute a battery of ten sand points to draw and conduct the water into the settling box and thence via the present pipe to the intake well. The settling box is also to be repaired.

The sand points are to be placed about a foot lower in elevation than the present extrance to the settling box, which should give extra protection from the effects of frost.

The cost of the work is $625.00, and we concur in the proposal to carry out the work as soon as the present severe weather moderates.

Lejac Indian Residential School

Under Direction of The Oblate Fathers

Lejac, B.C. January 12th., 1946.

L.J.C.
ET
M.I.

Robert Howe, Esq.,
Indian Agent,
Vanderhoof, B.C.

Dear Sir:

Due to the fact that most of the men now on our staff are married and have families, there is a shortage of suitable living quarters for these men at this school. In order to alleviate this situation, I would like to build a four room cottage, which would also be a valuable project in manual training for the boys. It is not proposed to use any outside help in the construction of this cottage.

We would ask the Department for the following list of materials:

1500 ft. Drop Siding, Fir. No. 2.
6000 ft. Shiplap, No. 1. Spruce
1000 ft. Flooring, 2" Fir, No. 1 Clear
120 pieces No. 1 Fir, 2 x 6 x 10ft.
30 " " " 2 x 6 x 14
40 " " " 2 x 6 x 20
50 " " " 2 x 4 x 10
500 ft. " " 1 x 6
100 ft " " 1 x 4

7 Doors, 2'6" x 6'8"
10 Windows, 56 x 28
8 bundles Shingles, No. 1.
1280 common Bricks,
10 rolls Black felt Building Paper.
100 lbs. 3½" Common nails,
100 " 2½" " "
25 " Shingle nails,
25 " Finishing Nails, 2",
50 " Box Nails, 2½".
25 sacks Cement
1 barrel Lime, unslaked,

Yours very truly,

Rev. Alex. R. Simpson, O.M.I.

Major D. M. MacKay, Indian Commissioner for B.C.,
P.O. Box 70, Vancouver, B.C.

I desire to refer to your letter of January 29 and previous correspondence, with regard to securing a new generating plant for the Lejac Indian Residential School. We submitted the quotations to the Purchasing Branch and they requested us to obtain the opinion of the officials of the Surveys and Engineering Branch.

I enclose, for your information, a copy of our memorandum to the latter Branch on February 5 and a copy of their reply, dated February 11.

I would like you to discuss the whole matter again with Mr. Arnall and let me have the information that is required in order to answer the last paragraph of Mr. Wardle's memorandum.

Philip Phelan,
Chief, Training Division.

Department of Mines & [illegible]
Indian Affairs Branch
FEB 13 1946
REGISTERED

This will acknowledge receipt of your memorandum of February 5th, with enclosures relative to the above.

We have had no recent request for any report on this plant, but note from Mr. Warren's report of August 17th 1940 that it then consisted of two Lister oil engine generator plants, one of 5 h.p., 2½ kw, and one of 9 h.p., 4½ kw. This equipment was reported to be in good operating condition at that time.

It is noted from your memorandum that Mr. T.J. Arnall, Boiler Inspector for the Department of Public Works, has recommended the installation of a new unit consisting of a 14 h.p. diesel engine with a 7 kw. D.C. generator. This would double the capacity of the plant.

We have no information as to the load the power plant has to carry at the present time, nor what additional amounts of electrical power may probably be required in the near future. We are, therefore, not in a position to assume responsibility as to whether the size of the additional unit recommended by Mr. Arnall is the size that should be secured.

Ottawa, February 11, 1946.

Major D. M. MacKay, Indian Commissioner for B.C.,
P.O. Box 70, Vancouver, B.C.

I have your letter of the 1st instant, with reference to a request from the Principal of the Lejac Residential School for material costing approximately $865.00 to erect additional accommodation for the staff at the school.

I regret that this request cannot be considered between now and the end of March. As you are aware from previous correspondence, we are endeavouring to secure a new generating plant for the Lejac School and hope to be successful. In that event the expenditure at Lejac will exceed the amount specifically provided for this school in the current year's appropriation. Consequently we are unable to approve any further commitments.

Philip Phelan,
Chief, Training Division.

January 28th, 1946.

Major D.M. MacKay, Indian Commissioner for B. C.,
Vancouver, B. C.

I beg to enclose herewith requisition for material totalling $865.78, requested by the Principal of the Lejac Indian Residential School for the purpose of constructing a new four roomed cottage, living quarters for married help at the School.

I am also enclosing a letter from the Principal in this connection, together with a quotation from Mr. M.M. Connelly, Manager of the Fraser Lake Sawmills, Fraser Lake, B. C.

Additional living accommodation is urgently required at Lejac School for the help, and in view of the fact that the labour will be done by the older pupils under the supervision of the manual training instructor without cost to the Department, I would recommend that the material be supplied.

R. Howe,
Indian Agent.

March 18th, 1946.

Mr. C. F. Dawson,
Dist. Res. Architect,
Dept. Public Works, Canada,
Victoria, B. C.

Dear Sir: Re: Mechanical and Electrical Plant -
Indian Residential School, Le Jac, B.C.

With reference to the letter of March 13th, 1946 from Mr. D. M. MacKay, Indian Commissioner for B. C., enclosing letters from Surveys and Engineering Branch, dated February 11th and March 7th, 1946, regarding the above and requesting further information, I beg to report as follows:

This plant was installed in 1933 and at that time, the estimated peak load was 6 K.W.. What the actual peak load at the present time is, I cannot definitely say, but would be safe in assuming an increase of 30%. This will bring the present peak load to 7.8 K.W.

What the future requirements will be is quite hard to say, when you take into consideration an institution of this type where the student body and staff numbers over 190, and all modern appliances are electrically operated. You can readily assume that the electric load will gradually increase until it reaches the capacity of the supply.

When I recommended a 14 H.P. cold starting Diesel and a 7 K.W. 120 V. D.C. generator, I took the following into consideration:

> In my report, dated August 29th, 1934, after the first season's operation, I pointed out that the plant was too small for peak load requirements. It has been operating under these conditions for the past 13 years.
>
> The present plant is of English manufacture, and I doubt if there is a new spare part available at the present time anywhere in Canada or even at the factory. It has given remarkable service and reflects great credit on the manufacture and the operating Engineer, but has reached the stage where a complete overhaul and renewal of parts are required.

I recommended the 7 K.W. plant because when it is running in conjunction with either of the two present units, it will give a 9½ or a 11½ K.W. electric supply and in case either of the present units are out of commission, could take most of the load.

I must also call your attention to the very isolated position of this school. The nearest point where supplies can be obtained is Edmonton, Alberta -- 30 train hours away and Vancouver, B. C. -- 38 train hours.

You can readily see the importance of getting a new unit, even if it is a K.W. or two over my recommendation.

Yours sincerely,

T. J. Arnall

T. J. Arnall,
S.P.P. Engineer.

Mr. Hoey

Re: Mechanical and electrical plant,
Lejac Indian Residential School,
Stuart Lake Indian Agency,
Province of British Columbia.

This will acknowledge receipt of your memorandum of March 1st, with enclosures, relative to the above, in reply to ours of February 11th last. Neither in your memorandum, however, nor in its enclosures, is found the information for which we asked. Since we had not been asked for some years to make any inspection of this electrical plant, we had no information as to its present load nor any information on which an estimate of the probable future load could be based. We asked therefore to be advised that responsibility for the selection of the proper size of the unit had already been assumed.

If you will kindly advise us that this is the case, we will then be glad to make a recommendation as to which unit should be purchased.

Mr. C.F. Dawson,
Resident Architect,
Dept.Public Works,Canada,
Victoria,B.C.

Dear Sir, Re: Electric Lighting Plant -
Indian Residential School,
LeJac, B.C.

In answer to the letter of the 22nd instant from Mr.D.M. MacKay, Indian Commissioner for B.C., re the above mentioned subject, I will make comments on quotations as requested.

Canadian Atlas Diesel.

The Unit quoted by this firm, although slightly large, could be used, satisfactorily.

Canadian Fairbanks Morse.

This Unit is quite satisfactory, except for the Electric starter. There are no batteries at this school. Power for starting would have to be obtained from one of the other Units.

War Assets Corporation

This is a used Unit. Condition unknown. And being operated with a gas Engine it will make the operation quite expensive at Le Jac school particularly when the other Units are operated with Diesel Engine fuel oil and should have a first class guarantee.

B.C. Equipment Co.

The unit quoted by this firm is a used unit and although the Petter Engine is considered a good reliable Engine, the Dept.of Public Works have had considerable difficulty in obtaining spare parts. Again a used unit for a place like LeJac, unless fully guaranteed to be in first class condition, should not be considered.

Vivian Engine Works, Ltd.

This Unit is much too large for present requirements, but being manufactured in Vancouver and spare parts being easily obtained, I would suggest that it receive consideration.

Yours truly,

"T. J. Arnall"
S.P.P. Engineer.

EXTRACT FROM GENERAL REPORT OF REV. ALEX. R. SIMPSON, O.M.I.,
PRINCIPAL, LEJAC INDIAN RESIDENTIAL SCHOOL,
FOR QUARTER ENDED MARCH 31, 1946.

Original on 163-1-10

GENERAL REMARKS

The following items have been brought to the attention of the Department before in these quarterly reports without producing any reaction whatsoever; but I will repeat them again now.

1. The hot water supply is absolutely inadequate for the needs of the children.

2. Additional space is required at this school in the form of more dormitory and dining-room facilities; and a hall for indoor recreation. All this could be taken care of by the addition of a single wing to the present building.

3. Due to the increasing difficulty in obtaining cordwood and the oft repeated objections of the parents to their children having to work with firewood, it is suggested that the Department consider the possibility of converting the present heating system to an oil-burning installation.

Department of Mines and Resources

Surveys and Engineering Branch

April 9th, 1946.

Mr. Hoey:

Re: Mechanical and Electrical Plant,
Lejac Indian Residential School,
Stuart Lake Indian Agency,
Province of British Columbia.

Reference is made to your memorandum of March 22nd last, with attachments, and to previous correspondence relative to the above.

This matter was taken up with our Engineering and Construction Service and with regard to the tenders for equipment our Chief Engineer, Mr. Mills, states in part:

> "In discussing the tenders submitted it should be borne in mind that no details of the existing electrical plant installation are available, other than the capacity of the generators, and it is assumed that all units tendered on, will fit the installed equipment in every respect.
>
> "We consider that of the units for which tenders were received, the Vivian Gas Engine Works, Limited, offers that best adapted to the conditions at this school. This opinion is based on a consideration of the capacity and speed characteristics of the units described in the tenders. The Vivian plant using a 10 K.W. generator has, in itself, a capacity which is 3 K.W. in excess of the present under-sized electrical plant, and provides flexibility in that an 18 K.W. generator may be connected to the prime mover (Diesel engine) at any time in the future when the load warrants it. This is a definite advantage in view of the fact that, as indicated in Mr. Arnall's report, the units

POOR-COPY

Indian Affairs. (RG 10, Volume 6444, file 881-5, part 7)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

Library and Archives Canada / Bibliothèque et Archives Canada
www.collectionscanada.gc.ca

now in operation, will not be of much further use, and in case of breakdown the entire load might have to be carried by the new plant. Should such a condition arise, the Vivian unit would only require that the 10 K.W. generator be replaced by an 18 K.W. generator using the same prime mover, thus saving the extra expenditure involved in obtaining a complete new unit. Maintenance is a prime factor when considering the isolated location of the school and, in our opinion, the heavier Vivian prime mover operating at a speed of between 500 and 600 R.P.M. driving a 10 K.W. generator will require less maintenance than the light weight Atlas prime mover operating at 1800 R.P.M. driving a 9 K.W. generator."

In view of Mr. Mills' report, as quoted above, it is recommended that the tender of the Vivian Gas Engine Works Limited be accepted.

The tenders, etcetera, are returned herewith.

REPRESENTATIVE OF THE TREASURY
RECEIVED
APR 4 1946
INDIAN AFFAIRS.

Memorandum:

REPRESENTATIVE OF THE TREASURY.

As the Surveys and Engineering Branch were not able to complete the work required for improving the water supply at the Lejac (881) Indian Residential School before the end of March, it will be necessary to transfer to them an amount of $500.00 from the appropriation for the fiscal year, 1946-47. The Surveys and Engineering Branch would like to secure this amount as soon as funds are available.

Director.

Memorandum:

DIRECTOR, SURVEYS and ENGINEERING BRANCH

Re: Mechanical and electrical plant,
Lejac Indian Residential School,
Stuart Lake Indian Agency,
Province of British Columbia.

With reference to your memorandum of March 7, in connection with the above, I enclose a further report submitted by Mr. T. J. Arnall, Public Works Engineer, Victoria. It is considered that the new equipment is required and I would therefore appreciate it if you would let me know which unit should be purchased.

Director.

Dear Sir:

Thank you for your inquiry of June 10 regarding a 5 H.P. 110 Volt DC motor.

Before we can quote on this particular motor, we will have to know the appliaation for which it is being used in order to determine the correct controls. Delivery dates on motors of this type are extremely uncertain and the factories are now quoting up to five months from receipt of the order. The price on this motor would be $298.20.

We also note that you require a 1/2 H.P. 110 Volt DC motor: We can supply this from stock at a cost to you of $50.65.

Yours very truly,

ELECTRIC EQUIPMENT CO. LTD.,

J. D. McOrmond,
Manager.

AIRMAIL.

Ottawa, July 24, 1946.

Major D.M. MacKay, Indian Commissioner, P.O. Box 70,
Vancouver, British Columbia.

I have your letter of the 16th instant, with reference to the enclosed requisition for equipment required at the Lejac Indian Residential School. As you aware we provided the funds from the current year's appropriation for the required new generating plant ordered on April 27th.

The cost of this plant actually exceeded the amount provided in the current year's appropriation for repairs and improvements at the Lejac School.

However, the equipment mentioned in your requisition appears necessary for the successful operation of the school and consequently the Department approves your making the following purchases:

1. 1 5 H.P. 110 volt D.C. Motor - It is noted that you can secure this for $298.20 from Electric Equipment Company Limited, Edmonton, Alberta.

2. 2 24" Airflow fans - It is noted that you can secure these for $215.00 from Certified Electric Company, Hamilton.

When forwarding the accounts covering the cost of these you should attach a copy of your Purchase Order.

At the present time, the funds at our disposal will not permit authorization of the expenditure required for the paint mentioned on your requisition.

INDIAN AFFAIRS BRANCH

PLEASE QUOTE
FILE E-2-6

Stuart Lake Agency,
Vanderhoof, B.C.,
July 16th, 1946.

Major D.M. MacKay, Indian Commissioner of B.C.,
Vancouver, B.C.

I wish to refer to my letter dated Oct. 3rd, 1945, our file E-2, enclosing a letter received from the Rev. Principal of the Lejac Indian Residential School, requesting that the Department secure a generating plant for use at the School.

Under date of April 27th, 1946, a Purchase Order was issued by the Department - No. 10441 - file 62753-15-16, for the following in favour of the Vivian Engine Works, Vancouver, B.C. :-

" 1 only generating plant consisting of:
1 ten K.W., D.C. generator
1 two cylinder Vivian stationary diesel engine,
hand-cranked, 5½" bore, 8" stroke,
600 R.P.M., with V. Belt to generator $2750.00
Plus 8% Sales Tax 220.00
$2970.00 "

Apparently the Rev. Principal has been corresponding with the Firm in connection with the installation of the Unit. I am enclosing herewith, in triplicate, copies of correspondence dated July 9th, received by Father Simpson from the Firm.

It would appear that a new Switchboard is a necessary item in conjunction with the new generator, and I am enclosing herewith, a requisition for the Switchboard.

The installation of the new plant should be done by a skilled Mechanic. There is no one at the School or to my knowledge, in the district, qualified to do the Job. I would suggest that the installation be placed in charge of the Surveys and Engineering Branch of the Department, so that we may be sure the Unit is properly installed.

R. Howe,
Indian Agent.

I am forwarding Mr. Indian Agent Howe's letter of July 16th and enclosure referred to therein in connection with a generating plant being supplied to the Lejac Indian Residential School by the Vivian Engine Works, Vancouver. I would point out that this office, aside from securing information with respect to generating plants available, has had little to do with the matter and did not receive a copy of the purchase order and consequently is unable to comment on the points raised with respect to the switchboard required and installation of the unit.

From the information available however it would appear that it would be necessary to supply a switchboard at a cost of $160.00, and in addition provide funds for the cost of installation of the generating plant and switchboard.

It would be appreciated if you would advise if you wish this office to make inquiries with respect to the latter costs.

I.A. 1772-2

MR. HOEY

Re your memorandum of April 20th last and for your information. Mr. Mills' recommendations are concurred in. Will you kindly advise of your wishes in this matter.

28/8/46. J.M.W.

, August 23, 1946.

Memorandum:

Re: Lejac Indian Residential School, Stuart Lake Agency, B. C.

Further to our memorandum of July 24, 1946, in connection with the above, you are advised that we are in receipt of a letter from Mr. C.E. Webb to which is attached a report covering an inspection of the above, as requested in our memorandum of May 11, 1946. We would direct your attention to Mr. Hoey's memorandum of April 26, 1946, in which complaints re the lack of hot water are outlined along with a request from the Principal to convert from wood fuel to oil.

Mr. T.H. Boyd, who made the inspection, submitted a report which has been condensed as follows, for your information:

1. There are 2-60" diameter x 14'-0" long horizontal return tubular brickset heating boilers and they are in first class condition. Either boiler should be able to handle the load.

2. Wood is used as fuel and Mr. Boyd states that 300 cords are used during the heating season; which is obtained at a cost of $5.00 per cord. Wood is plentiful but labour conditions make it difficult to arrange for cutting.

3. The report states that a low grade coal is obtainable from the mines at Telkwa, about 160 miles away, and could be supplied to the School at $8.00 per ton.

4. Oil is also available, but owing to the electric plant at the School being fully loaded, No. 1 grade oil or a distillate product, would have to be used. This would cost about fourteen cents per gallon. Please note that in order to burn the cheaper grades of oil, electric pre-heaters are required as part of the oil burning equipment.

5. Regarding complaints of an inadequacy in the domestic hot water supply, the report states that a jacket heater of 350 gallon capacity is used in connection with a 600 gallon storage tank.

6. Other items in the report giving data on the high pressure boiler and laundry service, do not enter into the picture. It can be stated that the report gives sufficient data to enable us to comment on the existing conditions and to recommend revisions to the plant which should overcome existing complaints.

J.M. Wardle, Esq.,
Director,
Surveys and Engineering Branch,
Department of Mines and Resources,
OTTAWA.

DIRECTOR AUG 26 1946 SURVEYS & ENGINEERING (Ottawa)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

POOR-COPY

Library and Archives Canada / Bibliothèque et Archives Canada
www.collectionscanada.gc.ca

Regarding the Principal's request that the boilers be converted to the use of oil, the following analysis is submitted:

The school has a heating load of 6000 square feet of equivalent direct radiation. This figure was obtained from a survey of the original drawings. Forecasting fuel requirements for oil, based on the latest available data and figured from 0° Fahrenheit to 70° Fahrenheit, it would seem that 45,000 gallons of oil would be required. This oil would have to be No. 1 or Diesel oil and is priced at fourteen cents per gallon, which would make the season's fuel bill $6,300.00. Combustion efficiencies of about 75 per cent could reasonably be expected.

If coal, of a type available were used, it is anticipated that 430 tons would be required for the season, which, at a cost of $8.00 per ton would amount to $3,440.00. Using coal, hand fired, combustion efficiences of about 55 per cent could be expected. Comparing the costs, therefore, we have :

300 cords of wood @ $5.00 per cord (Mr.Boyd's figures)	$1,500.00
45,000 gallons No.1 fuel oil @ .14¢ gallon	$6,300.00
430 tons low grade coal (assumed output 10,000 B.T.U. per lb.)@ $8.00	$3,440.00

It should be borne in mind that to convert to oil it is estimated that equipment including tanks, burner for one boiler; and pumping apparatus (oil must be pumped from railway siding 1000 feet away) would cost about $6,000.00. No mention is made in the report of the type of pump or its drive required to do this work.

It is also pointed out that if coal is used, apart from some relatively minor expenses in connection with possible new grates and ash removal facilities, there would be no major items. It is roughly estimated that $1,000.00 to $1,500.00 would cover such changes.

It is our opinion that until such time as electric current can be supplied to the building by a Power Company, it would be uneconomical to use oil. Heavy grades of oil are cheaper than No. 1 distillate but they require electric preheating and as previously stated, the School's electrical plant being already fully loaded could not provide current for this purpose.

Regarding the lack of hot water, it appears, after a study of the data contained in the report, that the present method of heating the water is at fault. A careful analysis reveals that a peak demand of 500 gallons of water per hour must be met according to accepted principles. One jacket heater, stated to be good for a 350 gallon tank, is in use in connection with a 600 Imperial gallon storage tank.

Since there is more than ample boiler capacity, it is recommended that an indirect steam fed heater having a capacity to heat 600 Imperial gallons of water per hour through a 100 degree raise, be provided. The existing storage tank should be retained but should be fitted with a new hot water self-contained regulating valve.

For summer.....

www.collectionscanada.gc.ca

For summer service, one new high-test jacket heater, capable of raising 450 gallons per hour through 100° raise when hand fired with coal or wood, should be provided. Some revisions of a relatively minor nature to the piping will be necessary.

Below is a summary of the recommendations with an estimate of the cost involved:

(1)	Provide new grates for boilers, ash disposal facilities and accessory items -	$ 1,500.00
(2)	Provide one new indirect steam fed heater with cast iron shell and removable copper tube element -	500.00
(3)	Provide hot water self-contained regulating valve with accessory piping connections, etc.	150.00
(4)	Provide one new high-test jacket heater -	300.00
(5)	Pressure relief valve, piping and fittings -	50.00
		$ 2,500.00
	Labour	$ 1,000.00
		$ 3,500.00
	Contingencies 10%	$ 350.00
		$ 3,850.00

Mr. Boyd's report goes on to state that some difficulty is experienced in properly heating the top floor and the reason given is that the windows are poorly fitted. It is felt that the school staff could apply weatherstripping material to alleviate this condition.

Should the above work be approved, plans and specifications will be prepared by this Service and it is felt that supervision could be provided by Mr. Webb on the basis of advice and instructions from this office.

T. S. Mills
Chief Engineer.

Memorandum:

DIRECTOR, SURVEYS and ENGINEERING BRANCH.

Re: Lejac Indian Residential School,
Stuart Lake Agency, British Columbia.

I am in receipt of your memorandum of August 23rd, with reference to your inspection of the above school.

Careful consideration has been given to the report and as it does not indicate any necessity for immediate action it has been decided to postpone any expenditure until the next fiscal year.

The Principal will be written to regarding your suggestion that the school staff apply weather-stripping on the top floor.

Director.

163-1-5 (WT1).

Copy sent to MacKay.

Ottawa, September 3, 1946.

Mr. R. Howe, Indian Agent, Vanderhoof, B.C.

The Department is now in receipt of a report from the Surveys and Engineering Branch regarding their recent inspection of the mechanical equipment at the Lejac Indian Residential School.

They have stated that the cost of heating the school and forwarded the following estimate:

1. 300 cords wood at $5.00 a cord (Mr. Boyd's figure) $1,500.00

2. 45,000 gals. fuel oil @ .14¢ a gal. 6,300.00

3. 430 tons low grade coal @ $.8.00 3,440.00.

You will note from the above that the cost of heating is much cheaper with wood than with either oil or coal.

The change from the present heating system to either oil or coal would cost approximately $3,850.00.

At the present time we are not in a position to favourably consider the expenditure that would be requested and as there does not appear to be any necessity for immediate action it has been decided to postpone further consideration until next year.

It has been reported that some difficulty has been experienced in properly heating the top floor. The reason given is that the windows are poorly fitted. The Surveys and Engineering Branch state that this can be remedied by weather-stripping being placed on the windows.

The work of putting on the weather-stripping could be done by the school staff and it is presumed that the cost of material would not be excessive. You may, therefore, purchase what is required.

Re: Improvements at Lejac Indian Res. School, B.C.
Attention: Mr. P. Phelan.

My dear Mr. Phelan:

I found Lejac to be a modern and up to date school, in good condition. It is certainly a credit to your Department.

The following have been requested by the principal and I hope that his requests will be favourably considered:

(1) The pupilage is now 170. The principal has had at least 185 on the roll and he now asks that the pupilage be increased by at least 15. In his case, as well as in the case of all the B.C. principals, it is becoming impossible to keep children for whom no grant is received.

(2) This school is without any batteries and the engine has to be started every time lights are needed. The engine, therefore, is running during the whole night. Consequently, this is very expensive and is also a fire hazard which should not exist.

(3) The school never had a frigidaire and should be provided with one out of the 1946-47 vote. One similar to that provided for Beauval, or St. Philips would be sufficient.

(4) You have been mailing, for several years past, the school cheque to the bank manager at Prince George. This is useless and is only causing delay and annoyance. I know that you are not to blame for this but you will want, I am sure, to correct this strange anomaly.

Thanking you in anticipation, I remain,

Very truly yours,

J.O. Plourde, O.M.I.

Indian Affairs Branch, Dept. of Mines & Resources,
Ottawa.

I have to refer to Mr. Neary's letter of August 1st authorizing the purchase of a switchboard for the new generating plant at Lejac Indian Residential School and in addition the expenditure necessary for the installation of the plant.

The switchboard and plant have now been delivered at the school, but despite various inquiries we have found it impossible to secure even an estimate of the cost of installing the equipment. The most attractive offer that we have had so far is from the Mott Electric Company, Prince Rupert, who have agreed to send an installation expert to Lejac to install the plant at a cost of $17.50 per 8 hour day, plus board and accommodation and travelling expenses. It is not thought that we will be able to secure a better offer than this and I would recommend the Department authorize me to instruct the Mott Electric Company Limited to proceed with the work on this basis. I may say Mr. Indian Agent Anfield secured the information for us with respect to the service of this Company.

D. M. MacKay,
Indian Commissioner for B.C.

Re: Purchase Order No. 10441

Dear Sirs:-

This order was issued on Apr. 27th, 1946, and covered a generating plant for the Lejac Indian Residential School.

We understand that the plant has not yet reached the school. Please let us know when you will be able to ship it.

Yours truly,

Bernard F. Neary,
Supt. of Welfare & Training.

EXD.
A.

Dear Father Plourde:-

We are in receipt of your letter of the 7th instant with reference to the Lejac Residential School.

Your recommendation regarding an increase in the pupilage and also with reference to supplying a frigidaire will be carefully considered when we are preparing our appropriation for the fiscal year 1947-48.

It may interest you to know that several months ago we placed an order for a new generating plant for this school at an approximate cost of $3,000. Owing to conditions beyond our control, there has been a considerable delay in shipping the plant but we have been assured that it will reach the school in the near future.

With reference to the per capita allowance cheque, our records show that the Indian Agent wrote to us on October 11th, 1938, stating that in future Rev. Father Simpson requested that this cheque be forwarded each quarter to the Canadian Bank of Commerce, Vanderhoof, B.C. We have carried out his request ever since and our file shows that the cheque has been sent as stated in the previous sentence. Consequently we don't understand your reference to Prince George. If Father Simpson wishes the cheque sent to any other address, we will be glad to do so on receipt of notice from him to that effect.

Yours truly,

Bernard F. Neary,
Supt. of Welfare & Training.

December 23rd, 1946.

Department of Mines & Resources, Indian Affairs Branch,
OTTAWA, Ontario.

The Reverend Principal of the Lejac Indian Residential School reports that due to recent extreme cold weather, several radiators, wash basins and toilet bowls burst, and also some water pipes, necessitating immediate repairs.

In view of the emergency, I am engaging a local Plumber to do the work, which I trust will meet with approval.

It is expected it will take about 7 days for the Plumber to repair the damage.

The Principal advises that there is no one at the School qualified to do the work.

Dear Sir,

Mr Freeman mentioned to-day that you were looking for a large Hot Water outfit.

If you did not procure one while here, I have a jacket heater and 300 gal hot water tank for sale.

The tank is covered in heavy asbestos and is complete with pressure reducing valve, will sell the outfit F.O.B. Prince George for $100.00 .

Yours Truly

Geo L. Tapping

Lejac Indian Residential School

Under Direction of The Oblate Fathers

Lejac, B.C.

February 21st., 1947.

Robert Howe, Esq.,
Indian Agent,
Vanderhoof, B.C.

Dear Mr. Howe:

You will recall that for several years now the hot water supply for the school has been inadequate, and that reports to this effect have been submitted to the Department by Capt. Barrie, Inspector of Schools; Mr. E. F. Arnall, Boiler Inspector; and more recently by Mr. Boyd, Dominion Engineer, who made a survey of the heating here last year at the request of the Department.

Please find enclosed letter which offers us a complete heater and tank of 300 gallon capacity for only $100.00, F.O.B. Prince George. This equipment is from the Army camp and is in good condition.

Therefore, I request that you forward this offer to the Department in Ottawa, and recommend the purchase of this equipment which is so badly needed here.

Yours very truly,

Rev. Alex. R. Simpson, O.M.I.

February 24th, 1947.

B.C.D.

Department of Mines & Resources, Indian Affairs Branch,
OTTAWA, Ontario.

I beg to enclose herewith, a letter received from the Rev. A.R. Simpson, O.M.I., Principal of the Lejac Indian Residential School, requesting that the Department purchase for use at the School, a second-hand Heater and 300 gallon tank for hot water purposes.

I can confirm the fact that the present supply is inadequate and that recommendations have been made by the various Inspectors mentioned in the Principal's letter, to increase the supply by installation of another tank unit.

In this connection, I am enclosing a requisition together with a Tender from Mr. Geo. L. Tapping, Prince George, B.C., offering to sell a complete second-hand unit for $100.00. This unit has only been in use for 2 seasons, and is in very good condition.

I would recommend the expenditure be approved.

Inspector's Office,
New Indian Boarding School,
Alberni, B. C.,
January 8, 1921.

The Secretary,
Dept. of Indian Affairs,
Ottawa.

Sir,-

On Saturday last, I went to Victoria to see Mr. Ditchburn, re Nanaimo new school.

I proceeded to Nanaimo, on Wednesday morning located the site, in presence of Mr. Kelly, Mr.OConnell and the contractors, and on Thursday gave the levels, from which the contractors have to work.

They are commencing this work at once and will be ready for concreting by January 17th when I shall be there to satisfy myself as to the foundations.

In the meantime I am making a thorough investigation as to the cause of defective water supply to the Alberni school and shall report fully on completion.

I met Mr. Moncrieff in Victoria and arranged to inspect some of the finished material for Fraser Lake school.

Your obedient servant,

Myles Morley,

Inspector of Construction.

DEPT. OF INDIAN AFFAIRS
FEB 18 1921
RECORDS

February 17, 1921.

Dear Mr.Foran,-

On the 15th of October, 1919, a certificate was issued for the employment of Mr.Myles Morley, a returned soldier, as superintendent of construction of a large boarding school being erected at Alberni, B.C. This work is just about completed, but it is proposed to retain Mr.Morley's services in the same capacity on a still larger building at Fraser Lake, on the mainline of the Grand Trunk Pacific, the contract for which has been let. A small day school building is also being erected at Nanaimo, and Mr.Morley will also superintend this as well as some other small work which the Department is undertaking. As you were previously informed, Mr.Morley is very conversant with the needs of the Department in respect to buildings which we erect, owing to his experience with us and his services have always been entirely satisfactory.

A/H

DCI

Yours very truly,

Deputy Superintendent General.

March 23rd, 1921.

Dear Mr. Foran,-

With reference to your letter of the 20th ultimo, your number 22910, I beg to say that Mr. Myles Morley was Superintendent of Construction at the Alberni School and his services were simply continued at the Stuart Lake School. As stated in my letter of the 17th ultimo, other building operations are contemplated and Mr. Morely's services will be required. If you will refer to your letter of October 15th, last, you will see that the Commission approved of the temporary employment of Mr. Morley and the Department has simply continued his services.

I trust that you will approve of this action.

Yours very truly,

DB / DCI

Deputy Superintendent General.

March 29th., 1921.

Dear Mr. Foran,-

Attention Mr. Medland.

With reference to previous correspondence regarding the appointment of Mr. Myles Morley as Inspector of Construction, I wish to advise you that Mr. Morley was appointed by the Commission on October 26th., 1919, for the Alberni School. The Department has availed itself of his services for other works and desires to further continue his services in connection with the Stuart Lake School, now under construction. I am therefore enclosing a requisition for his temporary appointment, and shall be very glad if you will kindly issue the necessary certificate. It is impossible to tell exactly how long the work will take, but it is safe to say that Mr. Morley's services will be required until next summer at least. His salary should be at the rate of $6.00 per day.

Yours truly,

Deputy Superintendent General.

Wm. Foran, Esq.,
Secretary, Civil Service Commission,
Ottawa.

Office of the Secretary,

Ottawa, April 22nd, 1921

Sir:

With reference to your letter dated the 29th ultimo, wherein you recommend the temporary appointment of Mr. Myles Morley, as I nspector of Construction at the Stuart Lake Agency of your Department, I would advise that the Commission has now approved of the temporary appointment of Mr. Morley in this capacity at prevailing rates of pay, namely $6.00 per day.

Would you be good enough to advise, please, the date of assumption of duty in this connection?

Yours truly,

Secretary

Duncan C. Scott, Esq., F.R.S.C.,

Ottawa, January 18th, 1922.

Dear Sir,-

I have your letter of the 6th inst., and note that the new Fraser Lake School will be ready to hand over to the Reverend principal on January the 17th., and that you propose leaving for Vancouver on the 19th , unless you heard to the contrary from the Department .

I have to-day wired you to remain until receipt of this letter. It is desired that you remain at the school until the Principal and the staff are settled in the new building and the furnishings all received and set in place.

Before you leave this job, I would like a report stating whether all of the work has been carried out satisfactorily and if the electric lighting plant, water supply and heating systems are in perfect working condition.

Your obedient servant,

(J. D. McLean)
Asst. Deputy and Secretary.

Myles Morley, Esq.,

October 18, 1922.

Dear Mr. Foran,-

I beg to bring to your attention the case of Mr. Myles Morley, who was appointed under temporary certificate, dated May 17, 1921, as Inspector of Construction under this Department at a salary of $6. per day. The temporary certificate was to date from April 15, and to cover a period of 6 months; this certificate covered Mr. Morley's services as Inspector of Construction during the erection of the Alberni school, but, after he completed the work there, he was engaged as Inspector of Construction for the Fraser Lake school; he worked there from October 15, 1921, until February 22, 1922, but, through inadvertence, a certificate was not obtained, covering his services. I inclose herewith a requisition for an extension, and would ask that you have this granted.

Incl.

Yours very truly,

Deputy Superintendent General.

GOVERNMENT OF CANADA

REQUISITION FOR TEMPORARY APPOINTMENT

TO [redacted] CIVIL SERVICE COMMISSION:

You are hereby notified that, because of a temporary pressure of work in this department, the employment of extra assistance is necessary. You are requested to authorize the employment of some person to fill the temporary position described below:

DESCRIPTION OF POSITION:

Title of position: Inspector of Construction.

Department: Indian Affairs Branch: Indian Agencies Division: 2a.2

Place of work: Fraser Lake (City) Indian School. (Province) Salary rate: $6. per day Appropriation: School Vote, B.C.

Date appointee should report for duty: July 16/22. Probable length of employment: 8 months

Officer to whom appointee should report: W.J.McAllan, (Name) Indian Agent, (City) Fort Fraser, (Address) B.C.

SPECIAL QUALIFICATION REQUIREMENTS FOR POSITION:

THE APPOINTEE SHOULD POSSESS THE FOLLOWING SPECIAL QUALIFICATIONS AS TO:

Education: as per classification

Experience or technical proficiency: do.

Place of residence: Sex: Man (Man, woman, or either)

Other qualifications:

EXPLANATION OF NEED FOR ASSISTANCE:

Reason extra assistance is needed: Erection of laundry and chapel at Fraser Lake school

If the position has been previously occupied, give the preceding occupant's name, salary rate, reasons for and date of leaving:

(Name) (Salary rate)

(Reasons for leaving)

Signed: [signature] (Signature of Deputy Head)

NOTES AND INSTRUCTIONS:

1. File this requisition with the Civil Service Commission as soon as the need for extra assistance is recognized. Prepare two copies; forward one and retain one awaiting "Certificate of Appointment." No letter of transmittal need accompany this requisition. If more space is required for describing the work, for stating the special qualifications, or for any other purpose, attach an extra sheet of paper.
2. "When the position to be filled is a new one, that is, one not previously occupied, this form must be accompanied by Form C. S. 100 (Requisition for classification of new position)."
3. File a separate requisition with the Civil Service Commission for each vacancy in a temporary position. For permanent or seasonal places use the special requisition forms provided.
4. Give the position the classification title. If the position is a new one give it a tentative title which, as nearly as may be, is brief and descriptive of the work to be done.
5. The Civil Service Act, 1918:

23. (1) When from a temporary pressure of work, extra assistance is required,.....the Commission may, on the written report of the deputy head that such extra assistance is required, authorize the employment of such number of temporary officers, clerks, or employees as are required to carry on the work. 1906, S. 94, amended.

(3) Temporary employment in the civil service shall only be authorized for such time, not exceeding six months, as the Commission deems necessary, and the period for which the employment is authorized shall be mentioned in the certificate of qualification issued by the Commission. One or more extensions of such period of employment may be granted by the Commission but each such extension shall be limited to a period not exceeding six months.

THIS SPACE RESERVED FOR THE USE OF THE CIVIL SERVICE COMMISSION

Form C. S. C. 61. 5m.-9-22.

Dear Mr. Foran,-

I beg to request that you will issue a certificate to cover the temporary employment of Mr. Myles Morley as Inspector of Construction at the Fraser Lake school during the building of the laundry and chapel. Mr. Morley has been employed on this work since July 16, last, and has been paid at the rate of $6.00 per day.

Incl. I inclose requisition herewith.

Mr. Morley acted as Inspector of the work during the construction of the school, but, at the time the school was built, funds were not available for the building of the laundry and the chapel, these were added later.

Wm. Foran, Esq.,
Secretary,
Civil Service Commission,
Ottawa.

FILE No. IA-IA2-362

Ottawa, January 16, 1923

Dear Sir,

I beg to acknowledge receipt of your letter of the 5th instant, with reference to the employment of Mr. Myles Morley as Inspector of Construction at the Fraser Lake School for a period of eight months. It is to be regretted that the matter of a certificate in favour of Mr. Morley was brought to the attention of the Commission only after his employment had lasted for five months instead of at the date of his assumption of duty, July 16, 1922.

May I be advised please as to whether it is anticipated that the services of Mr. Morley will be utilized in further construction work after the buildings now in course of erection have been completed.

An early reply will be greatly appreciated.

Yours truly,

Secretary.

Dear Mr. Foran,-

I beg to acknowledge the receipt of your letter of the 16th instant, with reference to the employment by this Department of Mr. Myles Morley as Inspector of Construction at the Fraser Lake Indian school.

In reply I beg to say that Mr. Morley is a resident of British Columbia and is a returned soldier, who has been employed by this Department as Inspector of the work during the construction of Indian buildings in British Columbia on and off since about the year 1916. Mr. Morley's services have always proved eminently satisfactory, he is well qualified, careful and painstaking in his work. With reference to your inquiry as to whether it is anticipated that the services of Mr. Morley will be utilized in further construction work after the buildings now in course of erection have been completed, I beg to say that we have no specific work arranged for in British Columbia, but, should we undertake any building there in the near future, Mr. Morley's services would be much more valuable to us as inspector of work under construction than those of anyone else, owing to his long experience and his satisfactory work, and, if he were available, we would desire to employ him.

Yours very truly,

Deputy Superintendent General.

Wm. Foran, Esq.,

June 6, 1923.

Dear Mr. Foran,-

Incl.

I beg to inclose herewith requisition for the extension of the temporary certificate in favour of Mr. Myles Morley as Inspector of Construction at the Fraser Lake Indian school. The last temporary certificate which was issued on his behalf expired on March 16, but, owing to the fact that some additional work had to be done, which was not foreseen, it was necessary to retain his services to May 31. He was written to, however, and advised that his services must cease on that date.

Yesterday we received a telegram to the effect that a fire had broken out in the Fraser Lake school, which had caused about $1500.00' worth of damage, and, as immediate steps had to be taken to have the repairs made, we instructed Mr. Morley to proceed to the school, and to superintend the carrying out of the necessary work by day labour. I am making the extension to cover the period for which Mr. Morley has been employed, and the time we expect it will take to repair the school.

I note from your letter of February 12, last, your File IA-IA2-362, that, if Mr. Morley's services are again to be utilized, you would like the position advertised, if considered necessary by the Commission, but it would be impossible for us to make a contract for the work, owing to the isolated location of the building and the fact that we do not call for tenders for repairs. The case is very urgent, and, as we know of no one available in British Columbia as well qualified to do the work as Mr. Morley, we trust you will favourably consider his appointment.

Yours very truly,

Wm. Foran, Esq.,
Secretary,
Civil Service Commission,
Ottawa.

Particulars of necessity for continuance of temporary position:

Duncan Scott
(Signature of Deputy Head.)

NOTES AND INSTRUCTIONS:—

1. Departments in requesting extension of temporary certificates will in each case submit four copies of this form with the above particulars accurately filled in.
2. No letter need accompany these forms.
3. Only the original need be signed by the Deputy Head.
4. The particulars requested are to be found on the original certificate issued by the C. S. Commission.
5. Departments should when possible anticipate the need for extensions and request extensions at least Three weeks prior to expiration of current certificate.

(The space below is for the use of the Civil Service Commission only.)

This is to certify that the person named above possesses the requisite knowledge and ability, and is duly qualified as to age, health, character, and habits for temporary employment in accordance with the provisions of the Civil Service Act, 1918, as amended, and the extension of the period of employment as above specified is hereby authorized at the salary shown.

Dated 19th June 1923

July 14, 1923.

Dear Mr. Foran,-

With further reference to my letter of the 6th ultimo, regarding the issue of a temporary certificate in favour of Mr. Myles Morley in connection with the superintendence of the work of repairs to the Fraser Lake Indian school, which was damaged by fire, I beg to say that, as the work is not yet finished and it will be necessary for us to retain the services of Mr. Morley for a period of two months longer, I am inclosing requisition herewith, and would ask that you give this favourable consideration.

Incl.

H'oD

Yours very truly,

Deputy Superintendent General.

Wm. Foran, Esq.,
Secretary,
Civil Service Commission,
Ottawa.

Auditor General's Office, Canada

DEPT. OF INDIAN AFFAIRS
FEB 26 1924
RECORDS

OTTAWA, February 25th, 1924.

DEPT. OF INDIAN AFFAIRS.
FEB 26 1924
ARCHITECT.

Sir,-

I beg to ask your attention to the payments made by you to Mr. Myles Morley, as Inspector of Construction at the Fraser Lake Indian Boarding School, since July, 1922.

Mr. Morley was paid during the fiscal years 1922-23 for 224 days at $6 a day, being for every day included in the period from July 16th, 1922, to February 28th, 1923, with the exception of 4 days in July. During the current fiscal year he has been paid continuously at the same rate from March 1st to May 31st. On looking over the returns for previous years I find that Mr. Morley was paid continuously at the same rate, from October 15th, 1919 to February 22nd, 1922, while engaged on inspection work on other schools.

The rates established in the Classification List for the position of Inspector of Construction are:-

Monthly - $100, 105, 110, etc., to $140.
Daily - Prevailing rates not exceeding $7 for services as required.

I understand this to mean that when the employment is not continuous the inspector may be paid up to $7 a day for those days only on which he is actually engaged on the work, but that when the employment is continuous the monthly rates shall apply. The prevailing rates paid during any month should not exceed the maximum monthly rate of $140.

I should

The Deputy Superintendent General,
Department of Indian Affairs,
OTTAWA.

ARCHIVES PUBLIQUES
CANADA

Library and Archives Canada / Bibliothèque et Archives Canada
www.collectionscanada.gc.ca

I should also like to ask your attention to the dates on which the certificates for Mr. Morley's employment were issued by the Civil Service Commission. On February 9th, 1923, a certificate for his employment for six months from July 16th, 1922, was issued, and on the same date a second certificate extending his employment to March 16th was issued; again on June 19th a certificate was issued further extending his employment to July 16th. As Mr. Morley received his pay regularly month by month it would appear that his pay cheques were issued in a number of cases prior to the authorisation of his employment. I trust you will take steps to prevent the recurrence of a like irregularity in the future.

I am, Sir,

Your obedient servant,

W. M. Kearns

a/g Auditor General.

JWR/MVT

163-1-5 X

February 27, 1924.

Dear Sir,-

I beg to acknowledge the receipt of your letter of the 25th instant, with reference to payments made by this Department to Mr. Myles Morley as Inspector of Construction at the Fraser Lake Indian boarding school since July, 1922. I have noted what you say, that is, that when an Inspector of Construction is employed continuously during the month his services should be paid at the monthly rate.

In reply I beg to say that the certificates of temporary appointment were issued by the Civil Service Commission for certain specified periods with remuneration at the rate of $6.00 per day. No mention was made of a monthly rate, and the Department paid at the rate which was provided for in the certificates. However, in the future we will be guided by your interpretation of the regulations, and, in employing men as Inspectors of Construction, we will specify that they are to be paid at the rate of $6.00 per day, but that their monthly remuneration must not exceed $140.00, the maximum provided under the classification schedule.

The last paragraph of your letter has been noted.

Yours very truly,

Wm. Kearns, Esq.,
Asst. Auditor General,
Ottawa.

Deputy Superintendent General.

C
O
P
Y - Original letter enclosed with memorandum of
March 4th to Dept. Purchasing Agent.

Our File: 163-1-5
Their E-2-6

Stuart Lake Agency,
Vanderhoof, B.C.
February 21st, 1947.

Department of Mines & Resources, Indian Affairs Branch,
OTTAWA, Ontario.

With reference to the Department's telegram dated February 11th last, I beg to enclose herewith, Voucher No. 145 for $284.00 in favour of Mr. C.E.Freeman, Prince George, B.C., for 14 second-hand radiators, replacing 13 radiators damaged beyond repair by recent severe sub-zero temperatures at the Lejac Indian Residential School.

Prior to my telegram requesting authority to purchase the radiators, I engaged Mr. R.M.Patterson, a local Mechanic and experienced Welder to inspect the damaged radiators at the Lejac School, to ascertain if it was feasable to weld the broken seams. We found that practically every seam, both inside and outside the sections, were open, and definitely beyond repair. I am enclosing Voucher No. 146 for $10.50, in favour of Mr. Patterson, for wages in this connection.

The second-hand replacements were formerly in use at the Prince George Military Camp for two seasons only, and they are in excellent condition, and very reasonably priced compared to new radiators which are practically impossible to obtain.

A Voucher covering the freighting of the radiators from Prince George to the Lejac School will be submitted shortly.

(Sgd. R. Howe,
Indian Agent.

E-2-6

Stuart Lake Agency,
Vanderhoof, B.C.,
March 31st, 1947.

Major D.M. MacKay, Indian Commissioner for B.C.,
VANCOUVER, B.C.

I beg to enclose herewith, a requisition with Tenders attached from G.H. Adomeit & Co., General Contractors, Smithers, B.C., for painting all exterior woodwork, fire escapes, screen and storm windows at the Lejac Indian Residential School, also Tender for supplying and making fifty storm windows.

The exterior facings have not been painted since the School was built in 1921, and it is in a very dilapidated condition. Re-puttying all windows and cracks and additional storm windows are urgently required in order to prevent a recurrence of conditions during the sub-zero temperatures last winter, when 18 radiators were frozen beyond repair and had to be replaced at considerable expense.

The roof of the School building was given two coats of stain 5 years ago, but judging from its' appearance, it is considered another coat is essential while the Painters are on the job.

We have been endeavoring for the past 4 years to obtain Tenders for this work, but due to circumstances beyond control, we were unable to interest any Firm in the work, until this year. As far as I am aware, the G.H. Adomeit Company is the only competent Firm available for this type of work in the entire district.

R. Howe,
Indian Agent.

Air Mail

Ottawa, April 19th, 1947.

Major D.M. MacKay, Indian Commissioner,
P.O. Box 70, Vancouver, B.C.

We have your letter of the 11th instant with reference to exterior painting and supplying of storm windows at the Lejac Residential School.

On September 3rd, 1946, we forwarded to you a copy of our letter of the same date to Indian Agent Howe with reference to a report submitted to this office by the Surveys and Engineering Branch in which they suggested major changes in the mechanical equipment at the Lejac school, involving an expenditure of $3,850.

If we proceed with the work suggested by the Surveys and Engineering Branch, the funds provided in the current year's appropriation for repairs and improvements at this school will be completely used and we would not have funds available for the work mentioned in your letter of April 11th.

Before making a decision on your letter of April 11th, we thought you might like to communicate with Indian Agent Howe with a view to ascertaining what work is considered most urgent by the Principal of the Lejac School and Mr. Howe.

Bernard F. Neary,
Supt. of Welfare & Training.

AIR MAIL.

Indian Affairs Branch, Dept. of Mines and Resources,
Ottawa, Ont.

I am enclosing Mr. Indian Agent Howe's letter of March 31st, and Tender from G. H. Adomeit & Company, for exterior painting and the supply of fifty storm windows for the Lejac Indian Residential School, at a total cost of $3,206.00.

An amount of $1,275.00 was provided in the 1947-48 estimates for exterior painting and a further amount of $980.00 for other repairs, a total of $2,255.00. It is noted that the exterior facings on the building have not been painted since the school was built in 1921 which indicates, without doubt, that in order to protect the department's investment the matter should be attended to as soon as possible. As Mr. Howe states that G. H. Adomeit and Company, is the only competent firm available to do the work, I would recommend that Mr. Howe, be authorized to instruct them to proceed with the painting and other repairs in accordance with their Tender when weather conditions permit.

If the full amount of $3,206.00, is not available, I should appreciate being advised just what funds are available so that Mr. Howe can secure from the Company information as to what painting and repairs can be completed for this amount.

Under date of July 24th, last the Department authorized an expenditure of $298.20 for the purchase of a 5 H.P. electric motor for the Lejac Indian Residential School. Although an order was placed with the Electric Equipment Co. Ltd., Edmonton, the motor was unavailable prior to the end of the fiscal year. Mr. Howe has now secured a quotation on a used 5 H.P. DC 115 volt, 40 Amp, 750 R.P.M. electric motor complete with rheostat from the B.C. Equipment Company Ltd., Vancouver who state that the motor and rheostat are in first class shape and are practically as good as new. The price asked by the Company is $200.00 and as it appears that new motors will not be available for at least three months I would recommend that authority be granted to purchase the used motor above referred to.

Memorandum:

DEPUTY MINISTER

Re: Lejac Indian Residential School,
Stuart Lake Indian Agency, British Columbia.
Electoral District of Cariboo.

Indian Agent Howe has submitted, through the office of Indian Commissioner MacKay, a recommendation that all the exterior woodwork including the roof of the above mentioned school, should be painted.

A tender for the work has been received from G.H. Adomeit & Co., General Contractors, Smithers, B.C. This firm is stated to be the only competent one to do the work. Indian Commissioner MacKay recommends acceptance of their tender for $2,731. This tender is attached.

It is also reported by the same officials that additional storm windows are required and for supplying and installing these, we have received a second tender from G.H. Adomeit & Co. This is also attached.

The Lejac School is Government-owned and has an authorized pupilage of one hundred and seventy five. The building was originally erected during the fiscal year 1922-23. Funds are available in the appropriation for the fiscal year 1947-48.

In view of the necessity for having this work done during the fine weather, and as Indian Commissioner MacKay considers that this firm will do a reliable job, I would appreciate it if the Minister would approve awarding the above contracts.

Re: Repairs, Lejac Residential School

With reference to Mr. Neary's letter of April 19th, both Mr. Indian Agent Howe and the Reverend Principal of the above mentioned school consider that the matter of painting and repairs, reference Mr. Howe's letter of March 31st, should be given priority over other requirements.

In any case, the comparative costs of heating provided by the Engineering Branch indicate to me that the school would be further ahead financially to continue using wood as fuel, even if it were necessary to have it brought in some considerably distance and to have to pay for labour in connection with handling it at the school. It is therefore recommended that the tender of G. H. Adomeit & Company, in the amount of $2,731.00, covering exterior painting be accepted and if funds are available that authority be granted for the purchase of 50 storm windows from the same Company at a cost of $475.00.

A copy of Mr. Howe's letter of May 3rd and a copy of a letter dated April 30th from the Reverend Principal in connection with these matters are enclosed for your information.

Re: your file No. 215-13-7134

I have your letter dated April 24th with respect to the urgency of the painting repairs compared with the heating requirements at the Lejac Indian Residential School. In this connection, I am enclosing herewith, a letter received from the Reverend A.R. Simpson, Principal of the School.

I concur with the Principal's comments and recommend that priority be given to the painting and repairs requested in my letter and requisition of March 31st last.

There is no question that the School would be much further ahead financially to continue using wood as fuel as compared to oil or coal, particularly in view of the fact that labour may be more plentiful from now on.

R. Howe,
Indian Agent.

Your file E-2-6

Dear Mr. Howe:

In commenting on Major MacKay's letter of April 24th. re the relative urgency of the painting and repairs required at this school, and the changes suggested in the heating system by the Surveys and Engineering Branch; there can be no question that the painting and repairs should receive top priority.

The present state of many of the windows in the building makes it impossible to heat this house, no matter what kind of heating system might be employed, or how much fuel consumed. During the cold spell of last winter we were seriously considering the possibility of having to send a number of the children home; parts of the building being absolutely uninhabitable.

Mr. Boyd, the engineer who made the survey of the heating system, stated that the heating system of the building proper was adequate, and I agree with him. I would not expect the Department to spend $10,000.00 here to install an oil-burning system. Last winter, at our own expense, we converted one of the heating boilers from wood to coal. This boiler consumed about 200 tons of coal during the winter. The other boiler burned about 150 cords of wood, and was only fired when the coal burner was unable to heat the building alone.

Yours very truly,

Rev. Alex. R. Simpson, O.M.I.

Lejac Indian Residential School

Our estimates for the above school for the 1947-48 fiscal year include the following amounts,-

1. Laundry motor and sewing machines ..... $1,000.

2. Repairs to Hot Water Supply ..... $3,850.

As you are aware, expenditures totalling approximately $3,416. have already been approved at this school. However, in view of the urgency of the repairs to the root cellar, we are prepared to meet this expenditure of $350.

We will definitely not be able to meet any labour expenditures in this regard.

Bernard F. Neary
Supt. of Welfare & Training.

Ottawa, Ont.

I am forwarding Mr. Indian Agent Howe's letter of June 4th and enclosures referred to therein in connection with the proposed supply of 174 peeled pine logs for repairs to the root cellar at the Lejac Indian Residential School at a cost of $350.00.

It is noted from our files that expenditures totalling approximately $3,416.00 have been approved for repairs and purchase of equipment at the Lejac Indian Residential School this year but I am not aware what amount is provided in the current appropriation. Repairs to the root cellar are absolutely essential and if funds can be made available it is recommended that authority be given for a further expenditure of $350.00.

PLEASE QUOTE
FILE E-2-6

Stuart Lake Agency,
Vanderhoof, B.C.,
June 4th, 1947.

Major D.M. MacKay, Indian Commissioner for B.C.,
VANCOUVER, B.C.

I beg to enclose herewith, a requisition with Tender attached from the Fraser Lake Mills, Fraser Lake, B.C., for 174 peeled pine logs for repairs to the root cellar at the Lejac Indian Residential School.

The walls of the root cellar collapsed completely last spring, and it is essential that the cellar is placed in good condition for storage of roots and vegetables before next winter.

The Rev. Principal advises that although he is short of labour at the School, he will arrange for labour re-constructing the cellar without cost to the Department.

I am enclosing a Tender for the material from the Fraser Lake Mills, Fraser Lake, B.C. In view of the long haul and the fact that Indians in the neighborhood are otherwise gainfully employed, I was unable to obtain a Tender from the Indians for the logs required.

R. Howe,
Indian Agent.

Ottawa, July 29th, 1947.

Memorandum:

DEPARTMENTAL PURCHASING AGENT

Re: Purchase Order 10441.

The above was issued on April 27th, 1946, see your file 62753-15-16 for an amount of $2,750. plus sales tax. The account was mislaid and was only forwarded to us within the last few days and you will note that it totals $3,265.36. The reason for the difference in the size of the account is explained by requisition of July 16th, 1946, covering generator control for the machine.

We authorized this purchase and would, therefore, appreciate it if you would revise the purchase order so that we may pay the account in the amount now submitted, namely $3,265.36.

Bernard F. Neary
Supt. of Welfare & Training.

Re: your file No. 163-1-5(WT1)

With reference to your letter dated July 16th, 1947. I beg to enclose herewith, voucher No. 596 in favour of the Vivian Engine Works, covering the cost of Generating Plant and extra equipment supplied to the Lejac Indian Residential School.

The Plant was received and the account rendered to the Reverend Principal, November 7th last. On receipt of your letter, I made inquiries and apparently, Father Simpson had filed the account, and forgotten all about it.

May I suggest in future, that Purchase Orders indicate accounts be rendered direct to this office rather than to the Principal of the School.

R. Howe,
Indian Agent.

Mr. R. Howe, Indian Agent,
Vanderhoof, B.C.

We have been reviewing our files and cannot find any reference to having received the account covering the cost of the generating plant supplied to the Lejac Residential School.

You will recall that this was purchased from Vivian Engine Works and reached the school either late last fall or early this spring, although the order had been placed with the company on April 27th, 1946.

Have you any record of this account?

EX'D.
A.

Dear Sirs: File No. 62,753 - 15-16

We would draw to your attention that we have not yet received payment of our Invoice of November 7, 1946, No. 1487L, which was under your Purchase Order No. 21920 of August 7, 1947, original Purchase order No. 10441 - E.R. 259 dated April 27, 1946.

We enclose copy of this invoice in quadruplicate and we should be glad if you would pass same for payment at your earliest convenience.

Yours very truly,

H. A. SNOWBALL

Form Le 212
Revised 12-42

(In the case of an Assignment of Moneys Due under an Agreement for Sale, Form Le 235 should be used)

(1) **FOR VALUABLE CONSIDERATION,** receipt whereof is hereby acknowledged, the undersigned hereby assigns, transfers and sets over unto **THE ROYAL BANK OF CANADA** (hereinafter called the "Bank") all moneys, claims, rights and demands whatsoever which the undersigned may now, or at any time hereafter have or be entitled to under or by virtue of or in respect of or incidental to a certain (a) letter (hereinafter called the "instrument") dated the 22nd day of May 1947 made between the undersigned and Indian Agent, Vancouver Agency. (hereinafter called the "debtor"), securing and/or covering (b) Painting, Building and Installing Storm Windows, etc. / Legal Interest Residential Security for $3206.

(a) Here insert "Contract," "Real Estate Mortgage" or as case may be.

(b) Here insert particulars of Contract, or Land or Chattels covered by Mortgage, and the amount, or as case may be.

the said moneys, claims, rights and demands or any of them, or any part or parts thereof, being hereinafter referred to as the "debt."

(2) The undersigned agrees that the debt shall be held by the Bank as general and continuing collateral security for the fulfilment of all obligations, present or future, direct or indirect, absolute or contingent, matured or not, of the undersigned to the Bank, whether arising from agreement or dealings between the Bank and the undersigned or from any agreement or dealings with any third person by which the Bank may be or become in any manner whatsoever a creditor of the undersigned or however otherwise arising and whether the undersigned be bound alone or with another or others and whether as principal or surety.

(3) The undersigned expressly authorizes the Bank to collect, demand, sue for, enforce, recover and receive the debt and to give valid and binding receipts and discharges therefor and in respect thereof, the whole to the same extent and with the same effect as if the Bank were the absolute owner thereof and without regard to the state of accounts between the undersigned and the Bank.

(4) All moneys received by the undersigned from the collection of the debts shall be received in trust for the Bank.

(5) The Bank may sell either by public or private sale or otherwise dispose of the debt in such manner, upon such terms and conditions, for such consideration and at such time or times as may seem to it advisable and without notice to the undersigned and without any liability for any loss resulting therefrom.

(6) The Bank may apply any moneys received by it against any obligation of the undersigned to the Bank as to the Bank seems best or hold the same in a separate collateral account for such time as it may see fit and then apply the same as aforesaid, the whole without prejudice to its claim for any deficiency.

(7) The Bank may compound, compromise, grant extensions, take and give up securities, accept compositions, grant releases and discharges and otherwise deal with the debtor, the undersigned and others, and with the debt and other securities as the Bank may see fit, without prejudice to the liability of the undersigned or the Bank's right to hold and realize this security.

(8) The Bank shall not be liable or accountable for any failure to collect and/or enforce the debt and the Bank shall not be bound to institute proceedings for the purpose of collecting and/or enforcing the same or for the purpose of preserving any rights of the Bank, the undersigned or any other person, firm or corporation in respect of the same.

(9) The Bank may charge on its own behalf and also pay to other persons, firms and corporations reasonable sums for services rendered and for expenses incurred in collecting or attempting to collect and/or enforcing or attempting to enforce the debt and may add the amount of such sums to the indebtedness of the undersigned and/or retain the said amount out of the moneys received by the Bank.

(10) The undersigned covenants and agrees with the Bank that all of the obligations of the [redacted] signed and others concerned under or in virtue of the instrument and all other agreements incidental or ancillary thereto shall be fulfilled, and the undersigned shall from time to time forthwith on the B[redacted]'s request furnish to the Bank all writings and information requested relating to the obligation in respect of which the debt is payable and the Bank shall be entitled from time to time to inspect any books, papers, documents or records evidencing or relating to such obligation and make copies thereof and for such purpose the Bank shall have access to all premises occupied by the undersigned.

(11) The undersigned agrees that on payment of the full amount secured by the instrument, the undersigned, at the request of the Bank, will do, make and execute such deeds, documents, acts, matters and things as the Bank may deem necessary to evidence the release and discharge of the instrument.

(12) The undersigned covenants and declares that neither the debt nor the instrument has been assigned to or pledged or encumbered in favour of any other person, firm or corporation and the undersigned covenants and agrees with the Bank not to assign, pledge or encumber the debt or the instrument so long as this agreement remains in force, to or in favour of any other person, firm or corporation without the written consent of the Bank.

(13) For the purpose of enforcing all rights of the undersigned in or under the instrument, the undersigned hereby nominates, constitutes and appoints the Manager for the time being of the branch of the Bank at which the account of the undersigned is being carried, the true and lawful attorney of the undersigned, irrevocable, with full power of substitution, for and in the name of and on behalf of and at the expense of the undersigned to act in relation to the instrument and in securing the enforcement of all the rights of the undersigned therein and thereunder as fully and effectually in all respects as the undersigned could do, and, without limiting the generality of the foregoing, to institute and prosecute any action or proceedings in respect of the instrument as said attorney may deem advisable and to execute on behalf of the undersigned a discharge of the instrument in favour of the debtor.

(14) The present assignment is given in addition to and not in substitution for any similar assignment heretofore given to and still held by the Bank and is taken by the Bank as additional security for the fulfilment of the aforesaid obligations of the undersigned to the Bank and shall not operate as a merger of any simple contract debt or in any way suspend the fulfilment of, or prejudice or affect the rights, remedies and powers of the Bank in respect of, the said obligations or any securities held by the Bank for the fulfilment thereof.

(15) This agreement shall be binding on the undersigned and the heirs, executors, administrators, successors and assigns of the undersigned and shall enure to the benefit of the Bank and its successors and assigns.

IN WITNESS WHEREOF this agreement has been executed under seal at SMITHERS, B. C.

this 19th day of July 19 47

Lejac Indian Residential School

Under Direction of The Oblate Fathers

Lejac, B.C.

L.J.C.
ET
M.I.

Oct.27 I947

Mr.R.Howe
Indian Agent
Vanderhoof,B.C.

Dear Sir;
I am submitting a request for an increase in grant and my reasons are as follows.

I) FARMING. In this locality,according to meteorological reports,there is an average of sixty five frost free days a year. This does not give sufficient time for crops to mature. During the past four years there have been two complete crop failures.In I945 $4000 was spent for feed for the stock at this school.The cash crop for farmers in the Prince George area is grass seed but it is not a practical crop for an Indian school.The grant given to schools that have farms is always smaller but in this case I think consideration should be taken of the fact that this farm is north of the fifty fourth parallel where farming is not a paying proposition.

2) FREIGHT RATES. The cost of bringing one hundred pounds of repacked groceries from Vancouver is $2.67 or$53.40 a ton.For sacked grain or vegetables it is $I.69 per. cwt. or $33.20 a ton.It strikes a medium of over $40.00 a ton. This is in comparison with $7.00 a ton to the Sechelt,Port Alberni,Christie and Alert Bay Schools.

3) CLOTHING. More warm clothing must be supplied in this area than on the costal schools or those in the southerly parts of the country.In this backward district where the parents do not willingly send their children to school they do not furnish any of the clothing at all.

4) VACATION. Many of the children come from far off places and do not go home during the holidays.There were over forty children here for the holidays last year. At other schools the vacation time is the period when finances can be recuperated for the remainder of the year.

5) WAGES. Wages have increased during the past year. In this isolated spot inducements must be offered to the men and we have to compete with the logging camps in the vicinity. For the four men on the farm,manager,barn man,gardener and labourer the yearly wage is $5040.For engineer,carpenterand disciplinarian the yearly wage is $4020. This does not include other staff members.

M.I.

Lejac Indian Residential School

Under Direction of The Oblate Fathers

Lejac, B.C.

6) FIRE LOSS. A fire which took place last week destroyed $3000 worth of feed and $500 worth of barn equipment. The weather in this country was so rainy during the harvest months that the hay could not be properly cured. This condition was probably the cause of this loss.

The school is gradually going deeper into debt every year and it cannot keep on at this pace. In September when I took charge there was a deficit at the bank of $1100 and outstanding bills of approximately $3000. Would it be possible for the auditor to come here in the near future and audit the books having in view an estimation of the cost of running the school.Using these figures as a basis for setting an equitable grant.

Hoping this will meet with favourable consideration.

Yours truly

LEJAC INDIAN
RESIDENTIAL SCHOOL

MEMORANDUM

TO: The Indian Commissioner for B. C.

FROM: The Inspector of Indian Schools.

RE: Lejac Indian Residential School
Application for increased grant

I refer to Mr. Indian Agent Howe's letter of November 6th and the attached letter from the Principal of the above mentioned school. I feel that I am not in a position to make any recommendation with regard to the amount of any increase that might be allotted to this school. This should be based upon the per capita cost of operation and I have no information as to how much this is. At the present time there are three schools in this Province which exceed the per capita grant of the Lejac Residential School. These are: The Alberni Residential School - per capita grant, $225, The Christie Residential School - per capita grant, $235, and the Crosby Girls Home - per capita grant $245. The present per capita grant for the Lejac School is $220. Due to the size of the Crosby Girls Home it is not a satisfactory basis for comparison. There is no doubt in my mind that the cost of operating the Lejac School is higher than either of the other two schools which may be compared with it. The reasons for this are set forth clearly in the Reverend Principal's letter.

At the present time I understand there is a debt of approximately $14,000. This undoubtedly handicaps the operation of the school which is in need of a number of improvements. It is extremely doubtful if the principal will be able to effect these improvements as long as he is handicapped by a large deficit. Whether or not this deficit is the result of higher per capita costs or because of the loss involved in the operation of rather an extensive farm I am not prepared to say. I do believe however that some assistance should be given the school to enable it to free itself of its indebtedness and I recommend that consideration be given to the request of the principal that an auditor visit the school in the near future in order that some sound basis of assistance might be arrived at.

R.F. Davey,
Dist. Inspector of Indian Schools.

EXD.

AIR MAIL

Ottawa, November 19, 1947.

Major D.M. MacKay, Indian Commissioner,
P.O. Box 70, Vancouver, B.C.

In a letter dated October 25th Indian Agent Howe advised us that the barn at the LeJac School had been completely destroyed by fire on October 23rd. In addition to the loss of the barn and silo, 110 tons of hay and alf alfa, 15 tons of grain, milking machine, grinding machine, 2 sets of harness and assorted implements were also destroyed. The estimated loss of feed is approximately $3,000. and the equipment, $500.00.

In a recent letter Indian Agent Howe advises that the principal has secured several thousand feet of lumber and renovated an old building to provide accommodation for the stock during the coming winter. Indian Agent Howe recommends that we grant an amount of $3,500. to replace the hay, grain and equipment lost in the fire.

It has not been our practice in the past to make such a grant but there may be special reasons why this action should be taken in regard to the LeJac School.

Please let me have your recommendation in the matter.

Bernard F. Neary
Supt. of Welfare & Training.

Re: your file 163-1-5(W.T.1)

I have your letter of November 12th with reference to the loss sustained at the Lejac School by the destruction of the barn and silo.

Owing to the drastic shortage of building material and labour, it is not possible to erect a new barn during the current fiscal year. The Principal has secured several thousand feet of lumber and renovated an old building to provide temporary accommodation for the Stock for the present season.

The most urgent need at present is the replacement of hay, grain and equipment amounting to approximately $3,500.00, lost in the fire. I would recommend that a special grant be made available at the earliest possible date for this purpose.

I would also recommend that the Principal be reimbursed for the material purchased for the temporary accommodation, at a cost of $350.00.

R. Howe,
Indian Agent.

Mr. R. Howe, Indian Agent,
Vanderhoof, B.C.

We received your letter of the 25th ultimo and regret very much the loss sustained at the Lejac School by the destruction of the barn by fire.

We are prepared to ask the Minister's office for funds to replace the barn but before doing so we would like to know if a new barn could be erected at the present season of the year, even if funds were made available.

Please let me have your reply by air mail.

Bernard F. Neary
Supt. of Welfare & Training.

$8000.00

I regret to report that the Cow Barn at the Lejac Indian Residential School was completely destroyed by fire of unknown origin, at 3:40 P.M. Oct. 23rd last. I am enclosing herewith, a report from the Reverend J.P. Mulvihill, Principal, giving the details.

This is indeed a severe loss to the School, and places an additional burden of debt on the new Principal's shoulders. I would strongly recommend that a special grant be made to cover the loss of Hay, Grain and equipment destroyed.

In view of the circumstances, it is difficult to define the cause of the fire,. Personally, I am inclined to believe it was spontaneous combustion in the hay loft.

R. Howe,
Indian Agent.

Oct. 24 I947

Report of fire at Lejac School - Cowbarn and silo

At 3.40 P.M.on Oct. 23rd the farm manager,Mr.J.Farrel noticed smoke coming from the loft of the barn. He gave the alarm andthe workmen and boys rushed over. The cows and horses were put out. The smoke was too dense in the loft to get a hose up from the inside so a hole was chopped in the roof and the hose was inserted. Water was played on the blaze which had started near the angle of the roof and floor of the loft. Within three or four minutes flames were leaping from both ends of the loft and an intense heat had developed. It was too late to save the barn then so I ordered them to hose the adjacent buildings. The silo which was attached to the barn burned but some of its contents were saved. The staff worked admirably, one of them a Polish Veteran manned the hose in such intense heat,saving the other buildings,that water had to be thrown on his clothing to prevent them from catching on fire.

The water pressure was sufficient but a dozen streams of water would not have quenched the fire three minutes after we had an opening made to reach the flames. The pressure at first was directly from the water pump but after half an hour it started to suck mud and sand from the lake bottom so we turned it over to gravity feed from the water tank.

The loss in addition to the barn and silo included II0 tons of hay and alfalfa, I5 tons of grain,milking machine ,grinding machine, two sets of harness and assorted imple ments. The estimated loss of feed would be approximately $3000 and $500 in equipment.

The probable cause of fire-- It was either spontaneous combustion or defective wiring.I cannot be certain but I would favour defective wiring . The lighting plant had been on less than ten minutes when the smoke was noticed. The origin of the fire was in the loft in the vicinity of the fuse box. On the other hand thevblaze developed so rapidly that it might suggest spontaneous combustion.

With reference to Mr. Neary's letter of November 19th in connection with the loss sustained by the Lejac Indian Residential School when the barn and silo were destroyed by fire, Mr. Indian Agent Howe has been forwarding copies of his communications to you to this office and the question of replacement of the loss has been under consideration in conjunction with an application from the Reverend Principal for an increase in the per capita grant. I am enclosing for your information a copy of Mr. Indian Agent Howe's letter of November 6th and application from Reverend Father Mulvihill for an increased grant, together with a memorandum from District School Inspector Davey dated November 18th. You will note that when Father Mulvihill assumed his duties as Principal of this school last September the school had a bank deficit of $11,000 and outstanding accounts totalling $3,000 and if we add to these amounts the value of buildings, equipment and forage destroyed by fire it is obvious that the school cannot possibly meet the indebtedness from the present per capita grant.

Auditor's repotts received from year to year indicate that the school farm has never been a financial asset and it is possible that the cost of operating the farm is largely responsible for the present indebtedness of the school. School Inspector Davey suggests that favourable consideration be given to the Principal's request that an auditor visit the school in the near future with a view to determining a sound basis on which financial assistance might

Ottawa, November 28, 1947.

Memorandum:

DEPUTY MINISTER

Re: Lejac Indian Residential School,
Province of British Columbia.

The above is a Government-owned school with an authorized pupilage of one hundred and seventy five.

On October 23rd, 1947, the barn at this school was destroyed by fire. We have been in communication with the Indian Agent and also with Indian Commissioner MacKay regarding the matter and we are advised that temporary accommodation has been provided for the live stock during the coming winter. However, with the destruction of the barn and silo, the school management lost 110 tons of hay and alf alfa, 15 tons of grain, milking machine, grinding machine, two sets of harness and assorted implements. Indian Commissioner MacKay states that the cost of the feed that was destroyed by fire is approximately $3,000. and the cost of the equipment $500. or a total loss to the school management of $3,500.

See approved 163/11/5 #1

In order to permit the school to continue efficient operation, it will be necessary to replace the feed and equipment at the earliest possible date. This is a special case and Major MacKay considers that we should reimburse the school management to the extent of $3,500.

At the present time we are paying the school an Emergency Grant of $35. If we allow this school an Emergency Grant of $55. for the calendar year 1947 it would mean an extra payment to them of $3,500. as their average

AIR MAIL

Ottawa, December 8, 1947.

Major D.M. MacKay, Indian Commissioner,
P.O. Box 70, Vancouver, B.C.

We received your letter of the 21st ultimo with reference to the loss sustained by the Lejac Residential School when the barn and silo were destroyed by fire.

We have now received the Deputy Minister's approval to pay this school an extra amount of $20.00 per capita based on the authorized pupilage of 175 for the calendar year 1947.

On reviewing the quarterly returns of this school it was found that for two quarters the average attendance has been above 175 and in the September quarter it was slightly below that figure.

At the end of December arrangements should be made to forward the quarterly return by air mail so as to reach this office as early as possible in January. When we have this return we will compute the amount of extra grant that we can pay for the calendar year 1947 and arrangements will be made to have cheque for this amount forwarded promptly to the school.

Public Building,
Victoria, B. C.

Date: October 17th, 1947.

Dist. Res. Architect,
Dept. Public Works, Canada.

Dear Sir:

I beg to report that I have inspected the Machinery owned by

the DEPARTMENT of Mines and Resources (Indian Affairs Branch)

and located at Indian Residential School - LeJac, B.C.

on the 17th day of October

and have found it in the following condition:

Fire Pumps: Old and out of date. Worn rods, leaky glands. Recommend
Condition: a new unit and present pumps repaired sufficiently to use in case of emergency.

Condensate Pumps: -----
Condition:

Boiler Feed Pumps: ----
Condition

Stokers: ----
Condition:

Electric Lighting Plants: The 20 H.P. Diesel requires a small air compressor
Condition: and receiver for starting purposes. The present method of slipping the belt on and off is very dangerous

Laundry Machinery: Old. Piping and woodwork failing but in fair running
Condition: condition.

Steam Engines: ----
Condition:

Gasoling Engines: Four fair.

Diesel Engines: 1 5 - 1 model Poor
Condition: 2 9 - 1 model Fair
3 20 H.P. Vivian 2 cylinder 10KW - Good

REMARKS: There must be no valves between the hot water tanks and relief valves. The present one must be removed. All the assortment of tanks old and new, and water jackets should be dismantled and the system modernized with a Government inspected all welded steel tank 36"Diameter and 6 feet long with a capacity of approximately 260 Imperial gallons. The present system of putting a boiler here and a water jacket there and burning rubbish in any of the boilers instead of an incinerator could easily cause a fire. The pipe between the wooden main and the main water tank is corroded and very thin and should be replaced as an emergency repair, and not wait for next year's estimate. A condensate pump would be a good investment now a larger electric plant has been installed.

M.I.

Jan. 9th 1948

Mr.R.Howe
Indian Office
Vanderhoof.B.C.

Dear Sir:

In reference to the Boiler Inspectors report-

The fire pump which is also the main water supply pump is out of date and in very poor repair. He recommends a new pump at the building itself.Under the present system in case of fire we have to run a quarter of a mile to turn on the pump at the lake then go another quarte of a mile in another direction to shut off the valve at the water tank.By this time the fire could be out of control.

He recommends a starter for the Diesel engine,the present system is very dangerous.

He recommends emergency repairs to be done at once on the main water line at the tank.

He finds the piping and woodwork in the laundry in bad shape.

The heating system is badly in need of repairs.The installation of this system twenty five years ago could not have been done according to contract.The return pipes were placed in such a way that it is impossible to prevent air locks.At present it is impossible to heat one wing of the building properly.The pipes in some places are paper thin,the fittings on the radiators are so badly corroded that half of them do not function properly. The Dunham Company of Edmonton states that the system is too antiquated to procure parts and suggest that it be modernized.

In view of these facts ,some of an emergency,would it not be possible to send a Heating Engineer to examine the system and take some steps to put it in working order.It is twenty five years old. In view of the fire hazardI think that it should be done with the least possible delay.

Yours truly

J.P. Mulvihill

Date: October 17th,1947.

District Resident Architect,
Dept. Public Works, Canada

Dear Sir:

I beg to report that I inspected Boiler No. 22461 LH
on the 17th day of Oct.,1947 and have found it in the
following condition:

Owned by the Department of: Mines and Resources (Indian Affairs Branch)
Located at: Indian Residential School - LeJac, B.C.
Manufactured by: Victoria Machinery Depot - Victoria, B.C.
Date: 1921 H.P. 104 Size: 60"D x 168"L
Type: H. R. T. Condition of Plates:Pitting.
Condition of Stays: Good Condition of Rivets:Good
Condition of tubes: Pitting Working Pressure Allowed15 lbs.
Safety Valves Set at: 6 lbs. Condition: Good and works freely.
Hydrostatic Test:25 lbs. Hammer Test: Sound
Deflection Test: --- Condition under Test:Leaked badly.
Steam Valves: Tight Feed Valves & Checks: Ghod.
Steam Gauge:1 lb. fast Water Gauge: Repack.
Test Cocks: Good Fusible Plug: Good
Blow-off Cock: Good Blow-Down Pipe: Good

Side Walls: } minor repairs Bridges: }
Front Walls: } Back Walls: } Minor Repairs.
Front Arches: } Back Arches: }

Smoke Pipe & Breechings: Good Firebars:
Stokers: ---

Amount of Coal Used:

Quality:

Remarks: The present system of allowing condensate from Laundry to enter this boiler the year round, and burning rubbish in firebox, has caused the sterilized water to practically ruin the tubes and plates of this boiler. The boiler should be drained and all covers taken off and air allowed to circulate through during the non-firing season. The condensate from Laundry boiler, either returned to the laundry boiler, or wasted to sewer. The present method has been in use for several years and the new engineer is not to blame for the condition of the boiler. A sample of the boiler water should be sent to a reliable firm and the treatment recommended, started right away. Four tube stoppers will have to be used for the tubes that leaked badly, and if many more fail, provision will have to be made to retube

MEMORANDUM

OTTAWA May 26th, 1948.

Re: Lejac Indian Residential School
Stuart Lake Indian Agency, B.C.

Further to our memorandum of May 17th you are advised that we are in receipt of a letter from Mr. Webb in which he states that Mr. Unsworth has not as yet submitted his report on the above.

Mr. Webb goes on to state that Mr. Unsworth has been carrying out additional work on this trip and is not expected back in Vancouver before May 24th. Upon his return he is to be requested to prepare his report and forward same to this Division without further delay.

We have reason to believe that the mechanical services at the above school are in need of a major overhaul and extensive replacements. When Mr. Unsworth's report is received and studied, it may indicate the necessity of a survey being made by our Heating Engineer.

This school is one of the projects on the list for attention by the Donald Inspection Company but it may be considered necessary to carry out repair work, etc. to the mechanical services before their report is received.

When Mr. Unsworth's report is received and analyzed, you will be further advised.

F. H. Mills
Chief Engineer.

MEMORANDUM

OTTAWA May 17, 1948.

Re: Lejac Indian Residential School.
Stuart Lake Indian Agency,
British Columbia.

In reply to your marginal notation of the 14th instant on Mr. Hoey's memorandum of the 11th, you are advised that to date we have not received Mr. Webb's report with reference to the mechanical services at the above.

On January 26th, we wrote to Mr. Webb requesting him to send one of his engineers to the above for the purpose of carrying out a general inspection along the lines of a questionnaire which formed a part of our letter; from which it was hoped that we could prepare a recommendation.

In acknowledgment of our letter, Mr. Webb stated that he was making arrangements to have Mr. Unsworth visit Lejac on route to Prince Rupert where he was being sent in connection with the Kitkatla project. It is assumed that pressure of work has interfered with Mr. Unsworth's schedule and that his report has not yet been received by Mr. Webb.

It is further pointed out that the Lejac school is one of a number of residential schools ~~which are to be covered~~ being considered for investigation by the Donald Inspection Company.

We are writing an airmail letter to Mr. Webb today, requesting that the report asked for be forwarded here as soon as possible in order that our analysis and recommendations may be made. Upon receipt of a reply, you will be further advised.

Memorandum:

DIRECTOR, LANDS & DEVELOPMENT SERVICES

Re: Lejac Indian Residential School,
Stuart Lake Indian Agency, B.C.

I desire to refer to your memorandum of January 27th, file I.A.1772-2, in which you stated that it is the intention to have Mr. Webb send one of his engineers to the above school to carry out a detailed inspection and submit a report.

We have heard nothing further from you since that time and today we received a letter from Indian Commissioner Arneil which reads as follows:

"I would refer you to Mr. Neary's letter of January 21st in connection with the proposed visit of an Engineer from the Lands & Development Services Branch to the Lejac Residential School to investigate and report on the machinery.

"Mr. Indian Agent Howe now advises that the heating and water system is deteriorating badly and it would be appreciated if you would advise me if any further action has been taken in this regard."

I would appreciate it if you would let me know when your engineers will find it possible to go to Lejac.

Director.

March 6, 1948.

Mr. W.S. Arneil, Indian Commissioner,
P.O. Box 70, Vancouver, B.C.

As you are aware, the barn at the Lejac Indian Residential School was destroyed by fire last summer. We have received a letter from Indian Agent Howe and also a letter from the principal with reference to supplying a new barn. The principal's letter reads as follows:

"In reply to your letter concerning the estimate for a new barn I have gone into the question with a competent builder and find that the cost of materials for a barn 36 x 60 together with cost of construction would be very close to $15,000. To keep sufficient cows milking to supply the needs of the school we would need a barn 36 x 60 as a minimum. The cost of a barn in this cold climate is higher than it would be in other parts of the Province. It would be very poor economy to build a smaller barn that would not take care of our needs. I hope that this request will be granted."

We would appreciate it if you could have your agricultural supervisor advise what size barn he considers should be erected at the Lejac school. We would also like to obtain plan of the barn that he considers is needed and an estimate of the cost.

Bernard F. Neary
Superintendent of Education.

Mr. R. Howe, Indian Agent,
Vanderhoof, B.C.

We have your letter of the 26th ultimo, file S-6, with reference to the new barn required at the Lejac Indian Residential School.

Our estimates were prepared some months ago and consequently we cannot now include an item for new barn in the main estimates for 1948-49. However, we will keep the matter in mind and if it is possible to do so, we will include it in the supplementary estimates but you should understand that we are not in a position to give you a definite decision at the present time regarding the matter.

In the meantime, you might consult the principal with a view to determining if a suitable barn could be erected for a sum much less than that mentioned in your letter.

Bernard F. Neary
Superintendent of Education.

Memorandum

EX'D.
A.

Re: Lejac Indian Residential School,
Stuart Lake Indian Agency, B. C.

Mr. Hoey's memorandum of January 21st, to which is attached the Department of Public Works' Boiler Inspector's report and the Principal's letter, all in connection with the above, has been considered and you are advised as follows.

The information submitted is along general lines, and is all but completely lacking in technical data of the nature required for making a specific recommendation.

It can be assumed, however, that the mechanical services and some items of equipment at the above are in extremely poor condition and the continued operation of some of these items of equipment could not be recommended.

It is felt that Mr. Webb should be called on to delegate one of his engineers to carry out a more detailed inspection and gather technical data along lines which we will suggest, and submit a complete report. His report will enable us to decide whether or not it will be necessary to send our Mr. Hargreaves to the school before a final and complete recommendation can be made by this Division.

Consequently, we are writing to Mr. Webb and requesting him to have a preliminary inspection carried out at once, and upon receipt of his reply, you will be further advised.

June II 1948

Mr.B.F.Neary
Supt.of Welfare&Training
Indian Affairs Branch
Ottawa,Ont.

Dear Sir:

I am enclosing copies of letters concerning repairs to the heating system and plumbing at this school.

In February the Engineering Department sent an engineer to make a survey of the repairs and he told me that they would have a report ready for April.Yesterday I wired Mr.Arneil and he replied that there was no report ready from that Branch.

The engineer told me that he was recommending a stoker for the boiler and an electric pump located on the school for the main water supply.You can see from the previous correspondence that the fire fighting set up is very poor.At present the pump house at the edge of the lake is under water and we have to pump the water with a hose to the main supply tank.The main pipe from the water tank is in very poor condition,this was mentioned as an emergency repair in the inspectors report.The radiators,according to the engineer,are 75% defective.

Any Building and Repairs grant for this year should be used for these repairs especially for a stoker.The cost of wood in this district and in these times of inflationary prices is prohibitive.

Would it be possible for you to see if some action could be taken in this matter before it is too late as I dont think that we can carry on for another winter under the present conditions.

Thanking you for your kind attention in the past.

Yours sincerely.

J P Mulvihill oms.

Dear Sir:

In reference to the Boiler Inspectors report-

The fire pump which is also the main water supply pump is out of date andin very poor repair. He recommends a new pump at the school building itself. Under the present system in case of fire we have to run a quarter of a mile to start the pump and then run another quarter of a mile in another direction to shut off the valve at the water tank.By this time the fire could be out of control.

He recommends a starter for the Diesel lighting plant,the present system is very dangerous.

He recommends emergency repairs to be done at once on the main water line at the tank.

He finds the piping and woodwork in the laundry in bad shape.

The heating system is badly in need of repair. The installation of this system twenty five years ago could not have been done according to contract. The return pipes were placed in such a manner that it is impossible to prevent air locks. At present it is impossible to heat one wing of the building properly. The pipes in some places are paper thin,the fittings on the radiators are so badly corroded that half of them do not function.The Dunham Company of Edmonton states that the system is so antiquated that parts are no longer procurable. They suggest modernizing the system.

In view of these facts,some of an emergency nature would it not be possible to send a heating engineer to examine the system and some steps be taken to place it in working order.In view of the fire hazard I think that it should be done with the least possible delay.

Yours truly,

J.R.Hurtubise

Public Building,
Victoria, B. C.

Date: October 17th, 1947.

Dist. Res. Architect,
Dept. Public Works, Canada.

Dear Sir:

I beg to report that I have inspected the Machinery owned by the DEPARTMENT of Mines and Resources (Indian Affairs Branch) and located at Indian Residential School - LeJac, B.C. on the 17th day of October and have found it in the following condition:

Fire Pumps: Condition: Old and out of date. Worn rods, leaky glands. Recommend a new unit and present pumps repaired sufficiently to use in case of emergency.

Condensate Pumps: ---- Condition:

Boiler Feed Pumps: ---- Condition

Stokers: ---- Condition:

Electric Lighting Plants: Condition: The 20 H.P. Diesel requires a small air compressor and receiver for starting purposes. The present method of slipping the belt on and off is very dangerous.

Laundry Machinery: Condition: Old. Piping and woodwork failing but in fair running condition.

Steam Engines: Condition: ----

Gasoline Engines: Four fair.

Diesel Engines: Condition:	1	5 - 1 model	Poor
	2	9 - 1 model	Fair
	3	20 H.P. Vivian 2 cylinder	10KW - Good

REMARKS: There must be no valves between the hot water tanks and relief valves. The present one must be removed. All the assortment of tanks old and new, and water jackets should be dismantled and the system modernized with a Government inspected all welded steel tank 36" Diameter and 6 feet long with a capacity of approximately 260 Imperial gallons. The present system of putting a boiler here and a water jacket there and burning rubbish in any of the boilers instead of an incinerator could easily cause a fire. The pipe between the wooden main and the main water tank is corroded and very thin and should be replaced as an emergency repair, and not wait for next year's estimate. A condensate pump would be a good investment now a larger electric plant has been installed.

"J. E. Halsall"
Boiler Inspector, D.P.W.

SUPERINTENDENT OF WELFARE

Re: Lejac Indian Residential School,-Acceptance of Stuart Lake Superintendency Boat.

We are quite prepared to accept your offer of the Stuart Lake Superintendency Boat "Takulli" for use at the Lejac Indian Residential School.

It is understood that in accepting this boat, no future costs with regard to the maintenance or repair will be made as a charge against Vote 511. This boat will become the property of the Education Division and all repairs will be a charge against the school management.

Bernard F. Neary
Superintendent of Education.

MEMORANDUM

- Superintendent of Education -

Re: Stuart Lake Superintendency Boat
"Takulli"

As a new boat has been ordered for the use of the Indian Superintendent at Vanderhoof, B.C. (Stuart Lake Superintendency), the recommendation has been made that the boat previously in use be transferred to the Lejac Indian Residential School.

As you are aware salvage regulations specify that all surpluses of Government-owned property must be referred to the War Assets Corporation for disposal but upon your recommendation we would be prepared, when declaring this surplus through the regular channels, to recommend that it be transferred to the Lejac Indian Residential School without charge. Such a recommendation would, of course, be on the definite understanding that no future costs with regard to maintenance or repairs would be met as a charge against Vote 511.

We enclose copies of explanatory correspondence from Mr. W.S. Arneil, Indian Commissioner for B.C. and from Mr. R. Howe, Superintendent at Vanderhoof, B.C.

D.M. MacKay,
Superintendent of Welfare.

Stuart Lake Agency,
Vanderhoof, B.C.,
June 23rd, 1948.

W.S. Arneil, Esq., Indian Commissioner for B.C., VANCOUVER, B.C.

I have been advised by the Nor-Craft Marine that the new boat for use of this Agency is being shipped June 30th.

With regard to the disposal of the old boat "Takulli." May I suggest that this boat be turned over to the Rev. J.P. Mulvihill for use of the Lejac Residential School.

If it is placed on sale, I doubt if it will bring more than $450.00. With some repairs, the boat can be used to advantage for some years, by the Residential School, transporting pupils to and from their homes on the Stuart Lake waterways.

(sgd) R. Howe,

R. Howe,
Superintendent.

Your file 19-163 (W.T. 5)

I have to refer to Mr. Armstrong's letter of December 2nd in connection with the purchase of a new boat for the Stuart Lake Agency and disposition of the old boat the "Takulli".

Superintendent Howe in his letter of June 23rd attached recommends that the "Takulli" be turned over to the Lejac Residential School. I would recommend that the Department approve this suggestion rather than have the boat disposed of through the Salvage Division on the understanding, of course, that with the transfer of the boat to the school the Department would be relieved of all responsibility in connection with it.

MEMORANDUM

Re: Lejac Indian Residential School,
Stuart Lake Agency, British Columbia.

Further to our memorandum of June 23rd with reference to the above, you are advised that we are in receipt of Mr. Unsworth's report dated June 8, 1948. This document is a twenty eight (28) page treatise, and the author has presented a great deal of information which will take some little study to digest. Two drawings and a map showing the location of the school are attached to the report.

A preliminary analysis shows that vitally essential data necessary to make definite recommendations are lacking, and this statement is in no way intended to reflect on Mr. Unsworth's effort.

Before a recommendation outling revisions or additions to the equipment can be made, it is felt that we should await result of the Donald Inspection Company's report.

In the meantime, we will prepare an interim recommendation based on Mr. Unsworth's data with reference to the possibility of increasing the efficiency of operation of the present system and we expect to submit this within the next few days.

From a preliminary study of Mr. Unsworth's report, it can be inferred that poor attention to the operation of the mechanical services, particularly the heating equipment, is responsible to some degree for lack of heat in some parts of the building.

Re: Lejac Indian Residential School
Stuart Lake Indian Agency, B.C.

With reference to Mr. Hoey's memorandum of June 18th, which bears your notation of the 19th instant, together with attached letter from Rev. J.P. Mulvihill, O.M.I., you are advised as follows.

Notwithstanding repeated follow-up letters to Mr. Webb, we have not as yet received Mr. Unsworth's report. We have sent a telegram to Mr. Webb today asking for an immediate reply stating when this report can be expected.

Upon receipt of this information, you will be further advised.

Chief Engineer.

R.A. Gibson, Esq.,
Director,
Lands and Development Services Branch,
Department of Mines and Resources,
O t t a w a, Ontario.

Mr. Hoey - As you know, Mr. Webb has been giving of his services to the Provincial Government in assisting in connection with the flood conditions at the Coast. It is understood that his staff have also been used on this work, and this is probably the reason for the delay in certain reports such as this, for which we have been pressing. We should have the information soon and you will be advised promptly.

Re: Lejac Indian Residential School
Your file 163-1-5 (E.1)

With reference to Mr. Neary's letter of July 8th it is hoped that you will by now have received a copy of Mr. Unsworth's report with respect to the heating and hot water supply systems at the above mentioned school as it would be desirable to have any repairs approved carried out prior to school opening in September.

Dear Father Mulvihill:

Lejac Residential School.

Upon the recommendation of our Field Officials, the Stuart Lake Superintendency boat "Takulli" has been transferred to the Education Division for the use of the Lejac Residential School. This has been done on the understanding that all the repairs and operational costs will be a charge against the School Management. It is also understood that ownership will remain in the Crown.

I am advised that this boat can be used to advantage for some years by your school in transporting pupils to and from their homes on the Stuart Lake waterways.

Sincerely yours,

Bernard F. Neary,
Supt. of Indian Education.

Rev. J. Mulvihill, O.M.I.,
Principal,
Lejac Indian Residential School,

MEMORANDUM

Re: Lejac Indian Residential School.
Stuart Lake Agency, B.C.

Further to our memorandum of July 7th with reference to the report submitted by Mr. A. Unsworth of Mr. Webb's office, the following preliminary analysis is presented for your information and transmission to the Indian Affairs Branch.

It can be assumed from the report that the building is equipped with a Dunham Return Heating System, and that the rear section of the installation was not installed to this principle, which has resulted in an unsatisfactory distribution of heat to this area.

The report goes on to state that the ground floor of the front section of the building is satisfactorily heated, but that difficulty is experienced with the upper floors.

It is also reported that a pressure of eight ounces per square inch is carried in the boilers. This would be in order if the piping was of consistent good design and if the firing periods were not spaced too far apart. Since no mention is made of a condensation pump, it may be assumed from Mr. Unsworth's description of the system, that in addition to air eliminators, a return trap is used. This trap is not mentioned in the report and it is likely that when revisions are made a condensation pump will be found necessary.

On January 9th, Reverend J.P. Mulvihill, Principal of the school reported that the Edmonton office of the C.A. Dunham Company stated that the system was too antiquated to procure replacement parts, and suggested that it be modernized. The Principal also stated some of the piping was "paper thin". These points were not commented on in Unsworth's report. The report does state however, that some radiator valve handles are missing and that some valves are damaged and are in a locked position, either open, closed, or partially opened. The radiator traps are said to be in good condition as far as can be observed. In addition to the foregoing, it is pointed out in the report that some rooms are overheated with all the radiators turned on while others are cold with some radiators turned off. This would indicate that either the valves are not easy to operate or that little or no attempt is made to operate them. It is evident from Mr. Unsworth's report that extensive alterations and replacements will be required to put this system into good operating condition.

In delivering coal to the boiler room from the outside, an old cauldron on a rope sling is used and is manned by the older boys. This operation takes place daily and results in the outside door being left open for approximately three hours.

R.A. Gibson,Esq.,
Director,
Lands and Development Services Branch,
Department of Mines and Resources,
Ottawa, Ontario.

POOR-COPY

Indian Affairs. (RG 10, Volume 6445, file 881-5, part 9)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

Library and Archives Canada / Bibliothèque et Archives Canada
www.collectionscanada.gc.ca

This is a source of great heat loss from the building and on occasions has caused the blow-down piping from the gauge glass on one of the boilers to freeze. It is stated that a small storage bin is being prepared to eliminate the present system of coaling.

The boilers are subjected to uneven firing and as a result a great deal of condensation forms in some parts of the system and until this is cleared by the traps and the air eliminators, steam for heating can not be satisfactorily distributed. Many other items can be cited to further explain the general unsatisfactory state of the heating system.

While there is a great deal of meticulous and detailed information in the report, some vitally essential observations are missing and lacking these data, it is not possible to definitely recommend extensive changes to the present installation.

Summing up, it can be stated that one stoker should be installed, the air eliminators removed and one condensation pump be provided. It is also likely that much of the piping will have to be replaced and some parts of the system will require redesigning. The installation is twenty five (25) years old and of a design now considered to be more or less absolete and it can be expected that a general deterioration will have taken place.

However, until more detailed technical data is available, it is not possible to prepare a design showing the full extent of the revisions which may be necessary and it is suggested that the Donald Inspection Limited's report should be available before a commitment is made by this Division.

We are writing to the Donald Inspection Limited and requesting them to amplify certain phases of Mr. Unsworth's report and to provide this Division with the necessary technical data in order that we may prepare a recommendation.

When the Donald Inspection Limited's report is received, and analyzed, you will be further advised.

J. V. Mills

Chief Engineer.

Re: your file 163-1-5(E)

I wish to refer to your letter dated July 28th, 1948, to the Reverend J.P. Mulvihill, Principal of the Lejac Residential School advising that the Agency Boat "Takulli" has been transferred to the Education Division for use of the Lejac Residential School.

I am enclosing herewith, a copy of a letter received from the Reverend Principal advising that he is now of the opinion the upkeep and responsibility of the boat would involve too great a financial burden for the School.

In view of this I would recommend the boat be placed in the hands of the Salvage Division for disposal. I believe if the boat is advertised for sale, Tenders will be submitted from several of the local residents at Fort St. James.

The boat is stored in the boat house which will be required for the new boat in October, it will therefore be appreciated if the Department will take prompt action to dispose of the "Takulli."

LEJAC INDIAN RESIDENTIAL SCHOOL

LEJAC, B.C.

Aug 3 1948

Mr. R. Howe
Indian Office
Vanderhoof, B.C.

Dear Sir:

In reference to the boat "Takulli" I have examined the boat and the situation at Stuart Lake and I feel that the upkeep and responsibility of this boat will involve too great financial expenditure for the school to undertake. The transportation of pupils can be done twice a year at a smaller expenditure to the school. The boat is eighty miles away from the school and it cannot be attended to properly from here.

Thanking you for your kind attention.

Yours very truly,

J.P. Mulvihill.

Re: Lejac Residential School Barn

Further to my letter of July 7th, we have now received from Beatty Bros. plans and specifications of a suitable barn for the above-mentioned school, copies of which are today being forwarded to you under separate cover.

Copies of these have been forwarded to Superintendent Howe, with a request that he secure from competent builders, if any are available in his vicinity, a firm tender covering erection of the building or otherwise an estimate of labour costs and an undertaking covering construction on a day labour basis.

I may say the school management has already cleared the site and are prepared to haul the required sand and gravel.

Attached hereto is a tender from McLennan McFeely & Prior on the steel equipment required and I will communicate with you further when I hear from Mr. Howe with regard to labour.

Rev. J.P. Mulvihill, O.M.I.,
Principal,
Lejac Indian Residential School,
Lejac, B.C.

Dear Father Mulvihill:

In the absence of Colonel Neary on a business trip, I discussed yesterday with the Acting Director, Major MacKay, the situation at the Lejac School as regards the barn.

Indian Commissioner Arneil has forwarded us a tender for the erection of a new barn at an approximate cost of $16,000.00.

No funds were specifically provided in the current year's appropriation for this amount, which would likely be exceeded before the building was finally completed.

If we decided to proceed with the building now, it would be necessary to secure an Order in Council and transfer funds, all of which involves considerable time, before we could definitely advise the contractor to proceed with the work.

In view of the above, we would be delayed in a manner beyond our control and as a result, it might be too late to do concrete work this fall.

Re: Barn-Lejac Residential School

Further to my letter of September 3rd, Superintendent Howe, reference his letter of September 17th and enclosures attached, has secured a tender from Bovill & Hann, Contractors, Smithers, B.C., covering the supply of materials and the erection of the above mentioned building, at a cost of $14,661.65, which amount includes the provision of concrete which will necessitate, in the event that their tender is accepted, an adjustment for sand and gravel already delivered to the site.

McLennan, McFeely & Prior Ltd., reference their quotation of July 30th attached, are in a position to supply the steel barn equipment and it is apparent from all this information that the cost of the building complete and including preparation of the site will be almost $16,000.00.

Little time remains for completion of the concrete work prior to frost and if the necessary funds can be made available I would recommend immediate acceptance of the tender from Bovill & Hann and that they be instructed to proceed with the work. In the event that their tender is accepted further information will be secured for them regarding specifications for the silo.

Re: Lejac Residential School Barn
Your file No. 14-11-3

With further reference to your letter of August 4th, 1948. I beg to enclose herewith, a Tender received from Bovill & Hann, Contractors, Smithers, B.C., for the erection of the Barn at the Lejac Residential School. It will be noted the Tender includes all the material excepting gravel, sand and steel.

Bovill & Hann in the past have done considerable work for the Federal Government, erecting buildings on Experimental Farms, Air-ports, etc., and they are considered a very reliable Firm. I am reasonably certain they will do a proper and substantial job.

I might mention that I have approached numerous Contractors who decline to Tender, consequently, I am unable to obtain competitive bids.

In event the Contract is awarded to Bovill & Hann, please forward further details in connection with the Silo.

R. Howe,
Superintendent.

Re Barn.

Dear Sir;

When the writer met you in Vanderhoof, about three weeksago, I promised you our tender on the barn about Sept., 10th. It was impossible to get this out at this time, so please excuse the delay.

You will notice that we have included everything in the tender with the exceptiom of the steel, as per quotation by Mack & Mack #4012 A.

We much prefer to quote en bloc, for a complete job, as we find from past experience that it is the most satisfactory for all parties in the end.

In the event of your considering our tender, would you please start the ball rolling and get more details on silo, and position of lower and top door?

Will try and have school tender in about Sept 25th.

Trusting this meets your approval, we are

Re: Lejac Residential School Barn
Your file No. 14-11-3

I have your letter of August 26th, 1948, requesting me to expedite the information desired in your letter of August 4th, in connection with the erection of the above building.

I have interviewed numerous competent Builders in this connection, and they all have the same reply - too busy, and are not interested on any basis, either Firm Tender or cost plus.

I am now negotiating with the Firm of Bovel and Hahnn, Smithers, B.C., I saw Mr. Hahnn yesterday, and there is a good possibility the Firm will take the job on a Firm contract basis, however, it will be on or about September 10th next before the necessary Tenders will reach this office for both material and construction costs.

R. Howe,
Superintendent.

We have your letter of the 30th ultimo regarding the barn at the Lejac Residential School. No doubt you have received by this time our letter of August 31st.

We are not in a position at the present time to state definitely if funds can be provided for the erection of a new barn at the Lejac School during the current fiscal year. However, we will allow an amount of $375.00 as it appears from the information contained in Superintendent Howe's letter of August 26th that this can be secured easily at the present time.

Bernard E. Neary
Superintendent of Education.

RE: Barn - Lejac Residential School

With reference to Superintendent Howe's letter of August 26th attached, it is presumed that authority for securing the sand and gravel required for the above-mentioned barn will be contingent upon funds being made available for the structure this year which, in turn, will depend entirely on the cost of the building, an estimate of which is not immediately available.

I would suggest, however, that if there is any possibility of construction being proceeded with this year that you authorize Mr. Howe by wire to secure the sand and gravel at a cost of $370.00, which amount includes removing the old concrete from the barn site.

Re: Barn - Lejac Residential School
Your file No. 14-11-3

With reference to your letter dated August 4th, I am having difficulty obtaining local Tenders for material and labour for constructing the new barn at the Lejac School, however, I hope to have results in the near future.

In the meantime, immediate authority is requested for an expenditure of approximately $370.00 for the following:-

60 cu. yds. gravel delivered at Site @ $3.00 per yd.	$180.00
30 cuz yds. sand " " " @ $3.00 per yd.	90.00
Hire of Bulldozer removing old concrete from Barn site -approx.	100.00
	$370.00

The Reverend Principal agreed to supply the sand and gravel, but he advises that he was under the impression it could be obtained on the Lake shore near the School. Apparently the sand and gravel available at the Lake shore is not suitable for concrete and it is necessary to haul the gravel from a pit 8 miles away. The Principal states that the financial circumstances of the School will not permit the expenditure.

At the present time, the Provincial Department of Public Works have a gasoline Shovel, Dump-trucks and Bulldozer working at the pit, and the local Superintendent has agreed to haul the gravel and Bulldoze the concrete from the old Barn site at the price mentioned above.

It will be appreciated if authority for the expenditure may be wired to me as the equipment will be moved within 10 days, and will not be available again for several months.

If this work has to be done by hand labour, I feel sure the cost will be double, at least.

R. Howe,
Superintendent.

Mr. W.S. Arneil,
Indian Commissioner,
P.O. Box 70,
Vancouver, B.C.

We have your letter of the 18th instant, file 14-11-4, with reference to the request that you have received for the installation of a stoker at the Lejac Residential School.

While we have some funds provided in the current year's appropriation for repairs and improvements at this school, we hesitate to use them until we have definite information regarding the probable cost of the barn. The amount we have in our appropriation will not cover the cost of the barn and that will necessitate our endeavouring to secure funds from some other source.

We would also like to have the report of the Donald Inspection Limited before making extensive improvements to the Lejac School.

In view of the above, we are not prepared to make a final decision at the present time regarding the installation of a stoker.

Bernard F. Neary
Superintendent of Education.

Re: Lejac Residential School.

I beg to enclose herewith, a requisition in triplicate together with Tenders attached from the Burns Lake Hardware, Burns Lake, B.C., for one only Iron Fireman Stoker, for use at the Lejac Residential School.

Also enclosed, a copy of a letter from the Reverend J.P. Mulvihill, Principal of the School, requesting the unit as soon as possible, before the cold weather commences. The Principal has agreed to install the Stoker without cost to the Department.

The installation of the Stoker was recommended by Mr. Unsworth of the Lands and Developement Services Branch, on page 12 of his report, dated June 8th, 1948, also, Mr. James Ruddick of the Donald Inspection Company, Ltd., who recently made a survey at the School, advises that he intends to strongly recommend installation of the unit in his report to the Department, which will be submitted shortly.

R. Howe,
Superintendent.

Dear Sir:

In reply to your letter concerning the barn-We could wait until early Spring but it should be commenced immediately after the close of the Fiscial year if it is to be of any use to us next Summer in storing our crops.It is unfortunate that we have a contractor now and may not have one next year.However I appreciate the difficulty in obtaining the money at this time of year.

In view of the fact that the money granted for Building & Repairs was being held pending the building of the barn.Would there be any opportunit of reviewing the request for a stoker submitted by the agent?

Yours Sincerely

Mr. W.S. Arneil, Indian Commissioner, P.O. Box 70,
Vancouver, B.C.,

I desire to refer to your letter of September 23rd forwarding tender for the erection of a barn at the Lejac Residential School. Funds to the amount required were not provided in the current year's appropriation and I recently discussed the situation with the Acting Director and it was decided to write Father Mulvihill with a view to ascertaining if he could get along for the coming winter without the barn. He has replied that he can on the understanding that it will be commenced early next year.

We intend to include the amount in our appropriation for the fiscal year 1949-50 and I have no doubt that it will be allowed.

In the meantime, we are forwarding to the Departmental Purchasing Agent a requisition for a stoker for the Lejac School which you recommended in your letter of August 18th.

Philip Phelan,
Chief, Education Division.

Re: Stoker - Lejac Residential School

COPY

Replying to your Army Signals message of October 12th, the quotation of Burns Lake Hardware and Garage Limited on a stoker for the Lejac Indian Residential School includes Sales Tax but not installation. The school has agreed, however, to install the equipment at their own expense.

With regard to competitive quotations, I regret that we have been unable to secure another tender. Fairbanks-Morse Co. Ltd., who are Agents for automatic stokers are unable to supply and state "material shortage is such that we are unable to estimate delivery date on this type of equipment."

1/12/48

EXTRACTS FROM REPORT OF THE DONALD INSPECTION LIMITED ON THEIR RECENT INSPECTION OF THE LEJAC INDIAN RESIDENTIAL SCHOOL

Type of Heating:

The building is heated by two horizontal return tubular boilers of (?) 104 h.p. each. This system is the Dunham type. It is obsolete, and consists of steam traps at each radiator and a separate line for the release of the condensate by gravity to the boilers. (This is called the line, and a separate pipe for discharging the air from the system is called the dry line). This system does not operate satisfactorily, and appears to have been messed up so that nobody seems to know where it is.

We noticed also that the inlet valves for the steam are connected at the top of each radiator instead of at the bottom.

e suggest that every steam trap in this building be examined, as we are sure all are not functioning properly; do away with the air line and run wet return back to a receiving tank and vacuum pump, which will make this system less complicated, and will give sufficient heat to make the building comfortable. You will note that this does not make very much change in the present system as the return pipes are already installed, and the only thing to be done is to disconnect the air pipes and remove t em entirely; connect the steam inlets to the bottom of the radiator and run the existing wet return to the receiving tank, which is part of the vacuum pump mentioned above. The most satisfactory pump that we know of is the Skidmore pump, which is mounted on a receiving tank and which has a vacuum pump for drawing out the condensate, and a feed pump which pumps the condensate back into the boiler.

Father Mulvihill has talked about the installation of a mechanical stoker, but at the moment it would not be possible for him to get ready to put the stoker in before the cold weather is here. For one thing, the distance between the floor and the bottom of the boiler drums is not sufficient to permit stoker being installed. The only way that this could be done would be to dig a water-proof pit two feet minimum below the existing floor. By this means the combustion chambers of the boiler would be big enough to burn the amount of coal which the stoker would supply. These boilers are fired one with coal and the other with wood. Natural draft is used.

Ventilation:

There are two large ventilators on the roof. These ventilators are piped from the various rooms, such as toilets, dormitories, etc. The main ventilators are supposed to revolve with the wind so that proper ventilation can be obtained. We found on examining these, however, that the ventilators would not turn and, probably, have not turned for years, as the wheels on which they are supposed to revolve were rusted and had evidently never been greased or oiled since they were put in. We would suggest that the existing wheels be removed and that wheels with ball-bearings be installed in their stead. With such an arrangement the wind would be able to turn the ventilators, and we are of the opinion that proper ventilation would be obtained. If this is not sufficient, then we would suggest that exhaust fans be placed in each of these ventilators which are about three feet in diameter inside. An 18" exhaust fan would be ample (1 for each ventilator).

Indian Affairs. (RG 10, Volume 6445, file 881-5, part 9)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

POOR COPY

Water Supply:

This water is pumped from Fraser Lake to an elevated tank about 2,100 feet distance from the pump to the tank. The school at which the pump connection is taken off is about 1,200 feet from the pump and 900 feet from the tank. The total head from the pump to the tank is approximately 102'. A pressure of about 40 lbs. is maintained at the school.

With regard to the statement that some of the pipes were paper thin, this, as far as we can see, only applies to two or three small pieces of pipe. These places, particularly where galvanized pipe is used, have been allowed to leak slightly and corrode. In any event, we do not think these places are numerous. The only thing to do is to replace them with black iron pipes when leaks show up.

It will be noted that the water is slightly acid.

You will note on the plans that there are two tanks which were installed for domestic hot water. These tanks are not in use, and the domestic water is heated by two water jackets and two vertical tanks. The suggestion is made that these tanks, which are now in use, should be removed from their present location and installed in the place which is now used as a coal bunker. There are also in the same place two large tanks which are not in use.

The idea is to get a larger bunker in which to store coal. As it is now, the coal is dumped just outside the boiler-house with a wooden shed covering it. This wooden shed we consider a fire hazard, and should certainly be removed. As a matter of fact, we have noticed in all the schools that wooden shacks are built in close vicinity to the school. We believe that the Department should take the necessary steps to see that this is not done in the future, and that the existing ones are removed.

The blue prints enclosed herewith show exactly how the pipe for the heating system should be installed, but, as stated previously, it has been so messed around by one and another that no one seems to know where it is.

With regard to the eliminators in the boiler room. We would say that these connections are practically as shown on the blue prints, with the exception of the fourth one from the left, which is 15" higher than the others. As stated previously all these so-called air pipes should be removed and a vacuum pump installed, when the trouble with the heating system would cease.

Please note that the pump on the edge of the lake which pumps water to the elevated tank, as heretofore mentioned, is old and should be renewed.

They have at present one 10 k.w one 2-1/2 k.w. and one 4-1/2 k.w. generator. The small generator has a burnt-out bearing, but we understand from Father Mulvihill that a new bearing has been ordered, and as soon as it arrives it should be put in working order.

Memorandum:

DIRECTOR, LANDS & DEVELOPMENT SERVICES

Re: Lejac Residential School

I would refer you to our memorandum of 4th December, 1948, in which I commented on the Donald Inspection Report on the above school. We have just received the following letter from the Principal of the School:

> "Could you tell me if the Department is going to take any action on the recommendations of the several engineers who have examined the school during the past year. They have all stated that the heating system is obsolete but so far nothing has been done about it. The heating bill is going into astronomical figures and as this is a Department owned building I think that some further action besides engineering surveys should be taken. It will be a year next month since the first report on this subject was made by Mr. A. Unsworth of Mr. Webb's office. Would you kindly advise me in this matter?"

We would appreciate it if you would arrange to have your officials meet with the officials of our Educational Division at the earliest possible date, in order that the matter may be fully discussed and our future policy decided.

Director.

Lejac Indian Residential School

Under Direction of The Oblate Fathers

Lejac, B.C.

Jan 19 1949

Mr.Philip Phelan
Indian Affairs Branch
Ottawa,Ont.

Dear Sirs:

Could you tell me if the Department is going to take any action on the recommendations of the several engineers who have examined the school during the past year.They have all stated that the heating system is obsolete but so far nothing has been done about it.The heating bill is going into astronomical figures and as this is a Department owned building I think that some further action besides engineering surveys should be taken.It will be a year next month since the first report on this subject was made by Mr.A.Unsworth of Mr.Webb's office.Would you kindly advise me in this matter?

Yours truly
J.P.Mulvihill

Mr. W.S. Arneil,
Indian Commissioner,
P.O. Box 70,
Vancouver, B.C.

We have your letter of the 12th instant regarding the Lejac Residential School. It is noted that you have written to Superintendent Howe regarding the report of the Fire Marshal, and we will wait for a further letter before making any decision.

I might add that our funds are limited at the present time, and it will be difficult if not impossible to provide any large amount of money for improvements at the Lejac School during the balance of the current fiscal year.

Bernard F. Neary,
Supt. of Indian Education

Re: Lejac Indian Residential School

I am enclosing herewith a copy of a report from the Provincial Assistant Fire Marshal covering his inspection of the above mentioned residential school.

Several of the Fire Marshal's recommendations could be carried out by the school management without any great expenditure of funds but others will be quite costly and beyond the financial ability of the school. I am writing to Supt. Howe asking that he discuss the matter with the Reverend Principal and advise me which of the items recommended can be looked after by the school. It occurs to me that some of the recommended alterations might already have been dealt with by the Donald Inspection Company in their report.

C O P Y

DEPARTMENT OF ATTORNEY-GENERAL

OFFICE OF THE FIRE MARSHAL
VANCOUVER

January 8, 1949.

To the Fire Marshal:

Re: Lejac Inspection
Lejac Indian Residential School

An inspection was made of this school in company with Constable W. Murdock. Local Assistant Fire Marshal.

OWNER - Dominion Government
Department of Mines and Resources.
SUPERVISION - Indian Commissioner
Occupancy - Residential Indian School
DESCRIPTION - 3 storey Brick construction
approximately 300 ft. in length and 100 ft. inwidth.

RECOMMENDATIONS

1. That first aid fire extinguishers be thoroughly checked and serviced.
2. That the main interior stairways be fully enclosed.
3. That access to the metal fire escapes be at floor level and through standard doorways.
4. That the outside fire escapes be protected from the weather. (At the time of inspection, certain of the escapes were useless owing to the heavy deposit of ice.)
5. Either properly protect or seal off the dumb waiter.
6. Instal a direct means of egress from the following classrooms to the fire escapes:

Primary
Grade 3 and 4 classroom
Grade 2
Senior Classroom

This may be accomplished by partitioning off the Hallway at each end of the building and installing additional doorways from the classrooms where required to give access to the fire escape opening.

7. The present means of escape from the High Dormitory (girls) which at present is through the supervisors room, should be altered to allow a direct access to the escape.

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

Library and Archives Canada / Bibliothèque et Archives Canada
www.collectionscanada.gc.ca

8. That the escape facilities from the North Dormitory (girls) be increased by installing an additional fire escape to lead directly to grade.
9. That the present furnace chamber be equipped with a standard fire door and standard fire door hardware.
10. That the boiler in the Laundry room be enclosed in a standard furnace chamber.
11. Properly instal the smokepipes from the heater installed in the laundry. At the present time this smokepipe passes through the floor above into a ventilator.

Respectfully submitted,

"H. K. Jenns"

Re: Lejac Indian Residential School

Further to my letter of November 24th enclosing District School Inspector Davey's report covering his inspection of the above mentioned school, and in particular the reference to replacement of the fire hose, the school was recently visited by the Assistant Provincial Fire Marshall who has advised that five lengths of hose are no longer serviceable and should be replaced.

This hose is available in Vancouver at an approximate cost of $175.00 and I would ask you to please advise if funds are available if it will be in order for us to make the purchase.

(2) Eff

File: 881-5

Extract from report of Inspector Davey on the Lejac Residential School dated October 20th and 21st, 1948. Original on file 881-6.

The dormitories are definitely overcrowded and in two of these several double deck beds of the type formerly used by the army are in use. It is believed that the authorized enrolment at this school should be only 150. The construction of a day school at Ft. St. James which is proposed for the coming fiscal year will help to relieve the demand for admissions to this residential school and it is hoped, reduce the enrolment.

Memorandum:

The Director,
Lands and Development Services Branch

Re: Lejac Residential School - Donald Inspection Company Report
Ref. your I.A. 1772-2 of November 23

A careful study of this report would indicate that the main problem in this school is the installation of a new heating system. The other two problems, namely, those of ventilation and water supply would seem to be capable of local repairs providing the necessary instructions were issued.

I would like to recommend that a meeting be held in the near future with officials of our Education Division and of your Engineering and Construction Service in order that a decision can be reached as to the best way of bringing this school into an effective state of repair.

It would also seem necessary to include a sum in our 1949-50 Supplementary Estimates for the carrying out of these repairs.

Gentlemen:

With further reference to our previous correspondence regarding a larger Lighting Plant for the Lejac Indian School, we are now quoting you on a 4½ K.W. D.C. Generator Set complete. We offer the following:-

1 - Model CD, 8 H.P. at 1200 R.P.M. single cylinder Lister Diesel Engine arranged for hand starting and tank cooling, connected through multiple Vee belt drive to a 4½ K.W., 110 Volt, D.C. Generator all mounted on strong structural steel base complete with switchboard.
PRICE, crated, F.O.B. our Warehouse . . . . . $ 1395.00

Radiator cooling . . . . . $ ~~1495.00~~

These prices are subject to 3% Provincial Tax.

Regarding the cost of repairs on the 5/1 Lister, these have now been completed and it was necessary to fit a new cylinder block, crankshaft, new piston and rings, as well as new bearings throughout, and to rebush the flywheels which were loose on the crankshaft. This has been completed and the total cost is $ 350.00, and the maximum we could allow you would be $ 200.00 and absorb the cost of the repairs.

We trust that you will take this up with Ottawa as soon as possible and let us have an early decision in order that we might close this repair job up and either sell the plant or return it to you.

Yours very truly,

HOFFARS LIMITED

Dear Sir:

In further reference to our conversation concerning the Lighting plant I am enclosing the correspondence from Hoffars Ltd. They have given quotations on the repair of the present 2½ K.W. plant which is too small for any unit in this school and will not run a 3 H.P. electric motor on the stoker unit.They have given a quotation on a 4½ K.W. plant which would be large enough for a 3 H.P. motor.

Would you kindly present these quotations to the Department pointing out that it would be more practical to obtain the larger plant.

Thanking you for your kind attention I remain

Yours very truly

Re: Lejac Indian Residential
School No. 881

Attached is a copy of a requisition which we recently received from Superintendent Howe, and also a copy of Indian Commissioner Arneil's comments on the requisition. We have reviewed the Donald Inspection Report, but were unable to obtain any information from it which is useful in this particular instance.

It would be appreciated if you would arrange to have one of your officers visit this school and advise if you consider that the new equipment is essential.

You will note that in the last paragraph of his letter, Mr. Arneil refers to a new K.W. generator supplied recently. In this connection, he is referring to 1 10 K.W. D.C. generator plant and 2 cylinder diesel engine and other accessories, purchased at a total cost of $3,265.36 from Vivian Engine Works Limited, Vancouver, B.C. This was delivered to the school in November of 1947.

Re: Generating Plants - Lejac Indian
Residential School.

I am forwarding Supt. Howe's letter of February 1st and enclosures referred to therein in connection with the proposed supply of a new 4½ K.W.,D.C. generating unit to replace a 2½ K.W. unit, the condition of which is such that its repair would not be economical. Reference is made to the condition of the 2½ K.W. unit in the report of Mr. J.E. Halsall, Boiler Inspector of the Dominion Department of Public Works, which report was forwarded to you under cover of my letter of November 9th.

I am unable to comment with regard to the need for a 4½ K.W. generator, having in mind that a new 10 K.W. unit was supplied quite recently, but possibly the report of Donald Inspection Service Ltd., which is not available to us may be helpful. Should the report referred to indicate the need for a new and larger unit this office can secure quotations additional to that of Hoffars Limited which is enclosed.

Re: Lejac Residential School
Your File 881-5 (E.1)

With reference to Mr. Neary's letter of January 17th, 1949, and the Provincial Fire Marshal's report regarding the above-mentioned school building, I am forwarding Superintendent Howe's letter of February 12th, in which you will note that a considerable expenditure will be involved in meeting the Fire Marshal's recommendations.

In view of the contents of Mr. Neary's letter referred to, it is presumed that nothing can be done this fiscal year and in any case, in view of the extent of the changes proposed, it is felt that the matter should be investigated and reported upon by the Engineering Branch, unless the Donald Inspection Company can be helpful, as a result of their inspection of this School. I may say it is not clear to this Office just what we can expect as a result of the inspection of school buildings made by the above-mentioned Engineering firm.

R. F. Davey.

Re: Lejac Res. School - your file 14-11-4

I wish to refer to your letter dated January 12th and the report of the Assistant Fire Marshal covering his inspection of the above mentioned School.

The matter has been discussed with the Principal of the School and I wish to advise that items 1 & 5 - servicing Fire Extinguishers and removal of the Dumb Waiter has been accomplished. The Reverend Principal advises that this is all the School management can do towards meeting the Fire Marshall's recommendations.

Mr. E. Hann, a local building contractor and myself, inspected the proposed alterations recommended by the Fire Marshal and it is our opinion they are extensive, intricate and costly, and would require the services of a fully qualified Construction Engineer.

Regarding item No. 8 - installation of new fire escape in the Girl's North Dormitory. If this is necessary, then another escape should be installed in the Boy's North Dormitory, which is similar to the Girl's Dormitory.

I understand that new steel fire escapes are very difficult to obtain. It has occurred to me that second-hand equipment of this nature may be obtained from the old Hotel Vancouver, which is now under demolition. Mr. C.E. Webb has a complete set of the Lejac School plans in his office and particulars as to the type and dimensions of the fire escapes required, could be obtained from him.

Memorandum

Re: Lejac Indian Residential School,
Stuart Lake Agency, B.C.

Further to our memorandum of February 24th, 1949, and to previous memoranda from Major MacKay bearing your notations in connection with the above, you are advised as follows:-

We have reviewed and considered the correspondence and reports received from Mr. Webb's office early last year on which Indian Affairs took no action and the Donald Inspection Company report prepared as part of their assignment last fall. Conflicting opinions as to the condition of the heating system and the proposed remedies, raise doubts regarding the technical value of the recommendations.

Mr. Unsworth's report dated June 8th, 1948, states that the piping is of good design. This is not borne out by his detailed description of the distribution system and the application of various traps and other accessories. In one instance, it is stated that ½" thermostatic traps are used to drip the ends of various steam mains. Such traps are not considered satisfactory for this application.

In a letter dated July 13th, 1948, to the Donald Inspection Company, we requested them to have their inspecting engineer clarify and amplify several phases of the work in connection with the heating system. Their report is along general lines and the specific questions raised in our letter, are not dealt with. However, their engineer describes the system to be "messed up so that nobody seems to know where it is".

From a study of the Unsworth and Donald Inspection Company's reports, we gather that the system is a complicated arrangement of several composite designs, and that in itself would indicate faulty distribution and unequal heating.

It is our considered opinion that the reports are inconclusive and that in spite of the amount of information received, many essential data are lacking. As a consequence, it is not possible to offer recommendations which would correct the present installation.

It can be expected however, that as the system has been installed for twenty-five years and taking into consideration that during this time, it has given a great deal of trouble, nothing short of major changes can be expected to bring about an improvement.

R.A. Gibson, Esq.,
Director,
Lands and Development Services Branch,
Department of Mines and Resources,
O t t a w a, Ontario.

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

Library and Archives Canada / Bibliothèque et Archives Canada
www.collectionscanada.gc.ca

It is felt that in order to make an intelligent recommendation, an officer from this Division should be sent to the school as soon as he can be spared from the office for the required time. As the situation stands at present our one heating engineer has just returned from an inspection trip of residential schools at Sioux Lookout, Sault Ste. Marie and Kenora, which occupied his time for as long as his office duties permitted him to be absent from Ottawa.

As you are aware, priority projects, such as the work on the Wabasca Residential School, the Hay Lakes Residential School, and heating designs for other Indian Affairs and Parks buildings, present difficulties in assigning this officer to distant inspections at any particular time, a situation we hope to remedy as soon as additional assistance can be obtained.

The matter has been discussed with officers of the Indian Affairs Branch, who realize that the western inspections they have requested must be fitted into our programme to the best advantage.

We will endeavour to make the best arrangements we can, but we are unable at present to say just when the inspections will be carried out.

T. S. Mills
Chief Engineer.

Stuart Lake Agency,
Vanderhoof, B.C.,
February 1st, 1949.

W.S. Arneil, Esq., Indian Commissioner for B.C., VANCOUVER, B.C.

I beg to enclose herewith, a requisition with Tenders attached from Hoffars Ltd., Vancouver, B.C., for one only 4½ K.W. D.C. Generator set, complete, for use at the Lejac Residential School. Also attached, a letter from the Reverend Principal, J.P. Mulvihill, C.M.I., in this connection.

The old 2½ K.W. Unit, which has been in use ever since the School was built, over twenty-five years ago, was sent direct to Hoffars Ltd., for repairs, by the Principal. The Firm advises that the 2½ plant is definitely too small for requirements and advises installation of a new 4½ K.W. unit.

Both the Principal and myself concur and feel it is more practicable, and strongly recommend trading the old unit for the 4½ plant as per Hoffar's Tender.

R. Howe,
Superintendent.

LEJAC INDIAN RESIDENTIAL SCHOOL

Lejac, B.C.

Jan.28, 1949.

Mr. R. Howe,
Indian Office,
Vanderhoof, B.C.

Dear Sir:

In further reference to our conversation concerning the Lighting plant, I am enclosing the correspondence from Hoffars Ltd.

They have given quotations on the repair of the present 2½ K.W. plant which is too small for any unit in this school and will not run a 3 H.P. electric motor on the stoker unit. They have given a quotation on a 4½ K.W. plant which would be large enough for a 3 H.P. motor.

Would you kindly present these quotations to the Department pointing out that it would be more practical to obtain the larger plant.

Thanking you for your kind attention, I remain

Yours very truly,

"J.P. MULVIHILL"

C O P Y

January 24, 1949.

Lejac Indian School,
Lejac, B.C.

Gentlemen:

With further reference to our previous correspondence regarding a larger Lighting Plant for the Lejac Indian School, we are now quoting you on a 4½ K.W. D.C. Generator Set complete. We offer the following:-

1 - Model CD, 8 H.P. at 1200 R.P.M. single cylinder Lister Diesel Engine arranged for hand starting and tank cooling, connected through multiple Vee belt drive to a 4½ K.W., 110 Volt, D.C. Generator all mounted on strong structural steel base complete with switchboard.
PRICE, crated, F.O.B. our Warehouse . . . . . $ 1395.00

~~Radiator cooling . . . . . $ 1495.00~~

These prices are subject to 3% Provincial Tax.

Regarding the cost of repairs on the 5/1 Lister, these have now been completed and it was necessary to fit a new cylinder block, crankshaft, new piston and rings, as well as new bearings throughout, and to rebush the flywheels which were loose on the Crankshaft. This has been completed and the total cost is $ 350.00, and the maximum we could allow you would be $ 200.00 and absorb the cost of the repairs.

We trust that you will take this up with Ottawa as soon as possible and let us have an early decision in order that we might close this repair job up and either sell the plant or return it to you.

Yours very truly,

HOFFARS LIMITED

WATER SUPPLY SYSTEM OF THE LE JAC INDIAN RESIDENTIAL SCHOOL

Date of Examination - January 15, 1949.

Location

Le Jac Indian Residential School is situated on the shore of Fraser Lake 3.9 miles east of the village of Fraser Lake and 3.5 miles west of Fort Fraser on the Jasper-Prince Rupert Branch of the Canadian National Railways.

Water Supply Source

Fraser Lake, the source of the school's water supply, receives water from three sources. The Stellako and Endako Rivers, which are the chief sources, flow into the lake from the west. Water from Ormonde Lake enters the north side of the lake at a point opposite the Le Jac school. The Nechako River drains the lake at its west end. Fraser Lake is approximately 12 miles long and has an average width of 1½ miles.

Description of Water System

General - the water system was installed in 1923 one year after construction of the school was completed. Water flows by gravity from the lake through a system of pipes and settling chamber to the pumphouse well and is then pumped through a main to an elevated storage tank. Water used at the school is tapped from the main and received on the first floor of the school at an average pressure of approximately 48 p.s.i.

Intake - water enters the screened intake through 207 ft. of 8-inch iron pipe and then flows through 18 ft. of 10-inch by 10-inch wooden box pipe to a timber settling chamber. The chamber is 16 ft. long, 5 ft. wide, and 8 ft. deep and is composed of two 8 ft. sections in series. After having the heavy sand particles removed by the settling chamber the water passes through 39 ft. of 8-inch iron pipe to a concrete well located below the pumphouse. Water can rise in the well to a maximum depth of 13 ft. without flooding.

Pumphouse - the 10 ft. by 14 ft. pumphouse is of frame construction on a concrete foundation. Pumping equipment includes one 10 H.P. Fairbanks Morse horizontal gasoline engine, belt connected on each of its sides to two 3½"x6" stroke, double-acting, horizontal Fairbanks Morse pumps which are rated to deliver a total of 100 gallons per minute under a pressure of 100 p.s.i. Actual pressure during pumping varies between 66 and 73 p.s.i. depending on the elevation of the water in the storage tank.

Storage Tank - Water is received at the elevated storage tank through 2,100 ft. of 4-inch wood stave main. The tank is supported by 21 ft. timber bents which sit on concrete pedestals that rise 2 ft. above the ground's surface. A 4-inch galvanized iron pipe connects the storage tank with the main. The tank is 16 ft. deep and 16 ft. in diameter, giving a storage capacity of 20,000 gallons.

Conclusions and Recommendations

1. The Fraser Lake water supply appears to be of good chemical quality.

2. The negative results obtained from the bacteriological analysis cannot be interpreted as meaning that the water supply is safe at all times of the year.

3. The Stellaco and Endako Rivers are open to contamination but some natural purification by storage takes place since the supply intake is situated 5½ miles from the rivers' entrance to the lake.

4. It seems improbable that the current caused by the water's entrance to and exit from the lake would be strong enough to carry any appreciable amount of pollution to the school's intake.

5. A regular shore line on the intake side of the lake aids in preventing the formation of stagnant water areas.

6. Animals should be kept from grazing on the school's pasture land at the edge of the lake to minimize chance pollution from surface drainage.

7. Bathing in the lake should not be allowed above a point located at least ½ mile from the downstream side of the intake.

8. It is recommended that arrangements be made for taking water samples from the intake and water supply during the summer months for bacteriological analysis. The results of these will indicate the necessity or otherwise of disinfection of the supply.

Field Work by Mr. M.J. Stewart, Asst. Sanitary Engineer.

This water is slightly on the acid side. It may be necessary to treat it with a little lime for best results as boiler feed supply. It may require chlorination as a domestic supply. I do not think the iron content should give any appreciable trouble (laundry) etc.

Ottawa,Ont.

Dear Mr.Phelan:

I am writing you again about the promise of a barn at this school.In your letter of September 30th (163-I-5(E1() you mentioned that construction would start early in the spring.It is now only about a month before we will be cutting Alfalfa and this means that another year will pass without storage space for our feed.

Mr.Ruddick wrote here asking if any action had been taken on his recommendations.I referred him to the Department as I have no knowledge of their plans.I received a letter from Mr.Howe on May 3rd stating that another engineer was coming here for a survey of the school.??

I will probably see you in Ottawa at the end of June.

Yours sincerely

J.P. Mulvenhill omi

Re: Your File 881-5 (E.1)

With reference to Mr. Neary's Army Signals Message of April 27th, regarding the proposed purchase of a generating plant for the Lejac Residential School, although Superintendent Howe has advised that the Reverend Principal is anxious to have the new unit early in June, it would appear to me that, as we are so close to the end of the academic year that there can be no particular urgency in the matter, action should be withheld until a report is secured from Mr. Hargreaves, of the Lands and Development Services Branch, following his visit to British Columbia.

Rev. J.P. Mulvihill, O.M.I.,
Principal,
Lejac Residential School,
Lejac, British Columbia.

Dear Father Mulvihill:

We have your letter of the 11th instant with reference to the new barn at the Lejac School. In the current year's appropriation, an amount of $12,000.00 was included. This is less than the amount quoted last fall by Bovill & Hann.

However, it must be kept in mind that we will likely be obliged to incur a large expenditure to improve the heating system. It is for that reason particularly that Mr. Hargreaves, the heating engineer of the Lands & Development Services Branch, intends to visit your school either the last week of this month or very early in June.

We are today writing to Mr. Arneil and you will no doubt hear from him soon.

Yours sincerely,

Bernard F. Neary,
Supt. of Indian Education

Re: Barn - Lejac Residential School

We have just received a letter from Father Mulvihill with reference to the erection of a new barn at the above school.

In this connection we have reviewed your letter of September 23rd, 1948, in which you enclosed a tender received from Bovill & Hann. That tender was considerably higher than the amount we found possible to include in the appropriation for the fiscal year 1949-50.

The amount we have available for the erection of a new barn is $12,000.00, and it would be appreciated if you would make immediate enquiries from the Reverend Principal with a view to ascertaining if he can supply any labour without cost to the Department.

Bovill & Hann in their letter referred to Beatty Bros. Plan #F.5937. If possible, we would like to receive a copy of this plan.

For your information, I may add that from reports received it is evident we will be obliged to spend a considerable amount of money at Lejac this year to improve the heating system.

MEMORANDUM

Re: Lejac Indian Residential School,
British Columbia.

In connection with Major Mackay's request contained in his memorandum to you of March 10th last to have an officer from this Division visit the above school and advise if new electrical equipment requisitioned by Superintendent Howe is essential, you are advised as follows:-

It has been impossible up to this time to answer with any degree of certainty your marginal query as to when this inspection could be arranged, due to the volume of work on hand demanding the attention of our electrical engineer.

We have indicated in our memorandum to you of the 20th instant, that we are arranging an electrical inspection trip for the Indian Affairs Branch at Cape Croker, Christian Island and Brantford, Ontario. We anticipate that it will be possible to make arrangements for a Western trip at the end of July, following the processing of plans and specifications necessary for carrying out the electrical work at Cape Croker Indian Reserve, together with other work pending which, we expect will be in hand and demand attention in the near future.

In connection with this proposed Western trip, it is noted in Major Mackay's memorandum to you of December 4th last, that the electrical system at Kootenay Residential School, is in need of attention and that the existing direct current battery charging generating system will be replaced by alternating current service, provided by the local power company. This will involve considerable work in rewiring and lighting improvements recommended by the Donald Inspection Company and, as indicated in Major Mackay's memorandum, an inspection and subsequent preparation of plans and specifications will be necessary.

It is our suggestion that this work be carried out in addition to any other investigations that the Indian Affairs Branch are considering in British Columbia at the same time our officer visits Lejac Indian Residential School.

Lejac Indian Residential School,
Lejac, B. C.

Attention: Mr. J. P. Mulvihill

Dear Sir:

We duly received your letter of the 10th instant, and we note that you are interested in two Washers similar to the one which we supplied recently to St. John Hospital at Vanderhoof.

You mention that you will not need motors as you have a 5 HP DC electric motor on your old machine, and we are taking it for granted that you also have the necessary line shaft and belting which will be required to drive these machines from your motor. That being so, we are giving you the price on the washer itself, fitted with end header and suitable for belt drive.

We can supply you with two of these Canadian Globe Wood Washers with 36" x 36" Inner Cylinder for a price of $750.00 each, or $1500.00 for the two, Dominion Government Sales Tax of 8% included in the above price, F.O.B. Factory, Toronto.

Each machine weighs approximately 1600 lbs., so that your freight on a total of 3200 lbs., which you would pay to the railroad in addition to the above price, should be approximately $220.00, as near as we can estimate it. You will be subject to the 3% Provincial S.S. & M.A. Tax payable on the F.O.B. factory price of $1500.00, and this would be shown as a separate item for Government purposes.

We can make shipment of these machines promptly from the factory.

We hope that you will be able to place the order with us, and you can rest assured we will give it our very best attention.

Yours very truly,

STANLEY BROCK LIMITED

Washer
Laundry—Wood
Style
Globe 30-inch
File AB 642-300
Almco 2-43

Globe Washer—30, 36, 40-Inch Diameters

Belt Drive **Belted Motor Drive**

End and Elevated Header

30x48" GLOBE WASHER
ELEVATED HEADER
SINGLE END DRIVE

Machine shall be constructed with such characteristics and shall be equipped with such accessories as specified in our letter of proposal, to which this specification is attached, and as described below.

CYLINDER — Shall have heads, staves, and ribs of selected, long leaf yellow pine.

Staves and lifting ribs shall be rabbeted at heads. Staves shall be secured to the heads by wooden dowels.

Heads shall be gained to receive the three lifting ribs.

The above shall be cut from stock as follows:

	Diameter of Cylinder		
	30	*36*	*40*
Heads	2	3	3
Staves	1½	1½	1½
Lifting Ribs	3 by 5	3 by 7	3 by 7
Door Closing Ribs	3 by 3½	3 by 4	3 by 4

Lifting ribs shall be secured to each cylinder head by a galvanized bolt through cylinder hoop, rib, and extending into recess in the head.

Door hinges shall be wide, well ribbed, galvanized, and shall rest on cylinder the full length of hinge. Hinge battens shall be galvanized.

Door latches shall be galvanized, heavy, with wide lips and provided with suitable finger grips.

Cylinder shall be banded with wide, heavy metal hoops fitted with turnbuckle. Where the door is 27 inches long or longer, a hoop shall be fitted between the heads and shall encircle the cylinder completely, except at the door opening.

Door openings on 30-inch diameter shall be 12 inches wide; on 36 and 40-inch, shall be 16 inches wide.

Meehanite Metal trunnions shall be attached securely to cylinder heads.

TUB — Shall have heads and staves of clear or better fir. Staves shall be tongued, grooved, and rabbeted to fit over heads to which they shall be secured by wooden dowels.

Heads and staves shall be cut from clear or better stock, sizes of which follow:

	Diameter of Cylinder		
	30	*36*	*40*
	Size of Stock		
Heads	2	2	2
Staves 30 and 36 inches long	1½	1½	—
Staves over 36 inches long	2	2	2

An upwardly sliding tub door, equipped with a supply door, shall operate in guides provided on adjustable, encircling hoops, fitted with take-up bolts.

A water-level gage glass shall be suitably fitted into left end of tub to indicate the height of the liquid in the cylinder.

A metal splash apron shall be provided at bottom of door opening to protect the staves.

FRAMES — Shall be cast iron of one-piece, heavy construction, rigidly bolted to tub heads, and shall support weight of the cylinder, tub, and driving mechanism. Also see Belted Motor Drive.

BEARINGS — Journals of cylinder trunnions shall operate in solid-bored cast-iron bearings supported by the frame and equipped with easily-accessible lubricators.

GEARS — Shall be machine-cut from solid blanks and covered with a narrow, paneled gear guard.

Cylinder-drive gears shall be furnished at right end of machine only; except on 40-inch diameter with elevated header, double gearing shall be furnished, when so ordered.

On 30-inch diameter, 30 and 36-inch lengths, main gear shall be of solid-hub type; on all other sizes main gear shall be of split-hub type. All main gears shall be keyed to trunnion.

WATER INLET — A 2-inch water inlet-connection shall be provided at rear of tub; lengths over 54 inches shall have two inlets connected by a mainfold.

OUTLET VALVE — Shall be of the foot-operated, positive-closing, self-cleaning type, 4 inches in diameter on the 30, 6 inches on the 36 and 40-inch diameter machines.

GEAR LOCK — A gear-lock, for locking cylinder in stationary position while the washer is being loaded or unloaded, shall be provided.

INCHING DEVICE — On 36 and 40-inch diameters, gear lock shall be combined with a handwheel on worm-gear shaft for bringing the cylinder door into alignment with the tub door.

Globe Washer—30, 36, 40-Inch Diameters—Belt and Belted Motor Drives

AUTOMATIC REVERSE-HEADER MECHANISM—Shall consist of three pulleys and a worm-and-cam movement to assure that the number of cylinder revolutions between reversals shall be uniform with but slight difference in either direction of rotation. Pulleys shall be of such widths as to carry belt of the widths shown below:

	Diameter of Cylinder		
	30	*36*	*40*
Diameter of Pulley —			
30 and 36-inch lengths	12"	16"	—
Over 36-inch length....	14"	16"	16"
Belt Widths —			
30 and 36-inch lengths	1¼" & 1½"	1¾" & 2"	—
Over 36-inch length....	1¾" & 2"	1¾" & 2"	—
54 and 64-inch lengths	—	—	2" & 2½"
72-inch length and over	—	—	2½" & 3"

Belt-shifting mechanism shall be mounted on a heavy, cast-iron swiveling arm, adjustable to belt at various angles.

Header mechanism shall be supported by a bracket arm bolted to cast-iron frames of the washer. Header shall embody strength, simplicity, and reliability.

BELTED MOTOR DRIVE

Machine shall be belt driven type, with end header, to which motor and transmission equipment shall be attached.

FRAMES — Two heavy iron uprights bolted to frames at each end of machines shall provide bearings for an overhead drive shaft; motor and starting device shall be attached to these uprights. A through tie bolt shall act as a stiffener for the two uprights.

ELECTRICAL EQUIPMENT — Shall conform to applicable sections of standards of the National Electrical Manufacturers' Association. All wiring between electrical units mounted on the machine shall be furnished installed in accordance with the National Electrical Code.

MOTOR — The drive motor shall be ball-bearing, grease-lubricated type, of ample capacity to operate the washer under continuous operating conditions without the motor temperature rise exceeding the limits allowed by N.E.M.A.

CONTROLLER — A magnetic-type controller in a sheet-metal enclosure with a removable cover shall be furnished mounted on the machine, for control of the drive motor. Needed operating push buttons will be furnished.

Where needed, controller shall incorporate protective resistance and relays.

WIRING — In conduit, shall be furnished connecting motor, operating switch, and controller, with provision at controller for service connections. Service disconnect switch shall be furnished by customer.

SPECIAL ITEMS (Furnished When Ordered)

DIAL WATER-LEVEL GAGE — Shall be a hydrostatic-type indicator, located in a position convenient for observation. The gage shall be calibrated to indicate the height of water in the cylinder, in inches. The water-level gage glass shall be omitted.

OVERHEAD PIPING — Water inlet-connections, at the rear of the tub, shall be connected with galvanized piping, extending beyond the end and toward the front of the washer, branching into two separate inlets, one for hot and one for cold water. Inlet valves shall be mounted at the front of the machine, at a convenient height.

BACK PIPING — Water inlet-connections, at the rear of the tub, shall be connected with galvanized piping, extending beyond the end of the Washer, branching into two separate inlets, one for hot and one for cold water. Controls for the inlet valves shall be mounted at the front of the machine, at a convenient height.

AMERICAN QUICK-OPENING VALVES — Each water inlet shall be fitted with a quick-opening globe valve with renewable disks, so designed that only one complete turn of the valve handle is necessary to open the valve wide.

AMERICAN-YATES, HUEBSCH TUWAY, CHASE FLOATLESS DIAL, OR CHASE FLOAT VALVES — Shall be fitted to the hot and cold water inlet-piping and shall automatically close when the predetermined quantity of water has entered the cylinder.

HUEBSCH WASHOMETER — Shall be connected so as to cause at a predetermined time, the outlet valve to open and a bell, contained within Washometer housing, to ring.

When Recording Device is furnished, shall consist of a stylus and tape to record washing cycle and operations of outlet valve.

STEAM VALVE AND PIPING — Brass piping, extending beyond the end of the machine, shall be connected to the spray-head type steam inlet-connection at the bottom of the tub. Machines over 54-inch length shall have two inlets. The piping shall be fitted with a globe valve, the control for which shall be mounted at the front of the machine, at a convenient height.

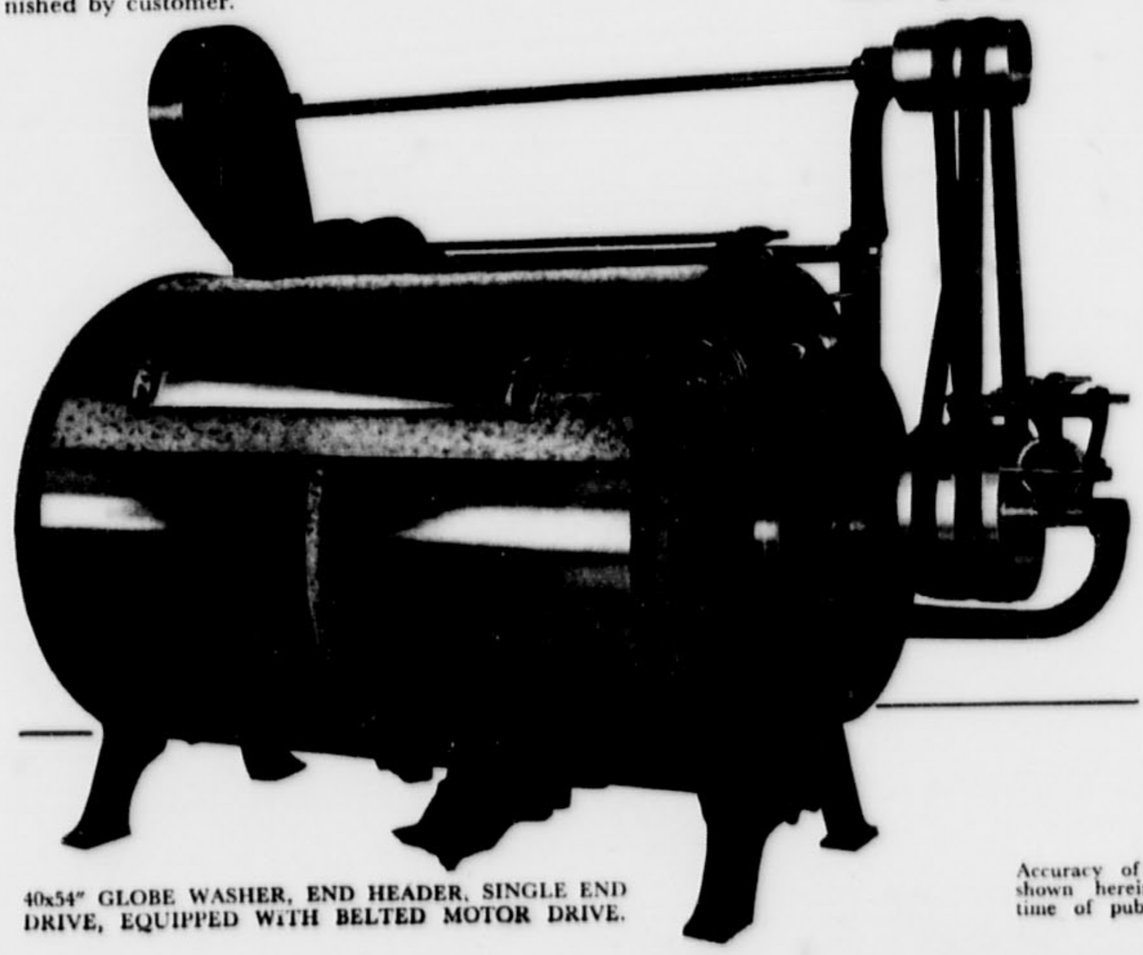

THERMOMETER—Shall be located in a position convenient for observation. The bulb shall extend into the waterspace between the bottom of the cylinder and the tub, and be connected to the thermometer by a tube

SAFETY DEVICES

END HEADER WASHER — Shall consist of a hook for holding cylinder doors open, tub door interlock, and fully enclosed gear guard.

ELEVATED HEADER — Shall consist of a hook for holding cylinder door open, tub door interlock, covered drive shaft and fully enclosed gear guard.

BELTED MOTOR DRIVE — Shall consist of hooks for holding the cylinder door open, tub door interlock, covered drive shaft, fully enclosed gear guard and fully enclosed belt guards.

40x54" GLOBE WASHER, END HEADER, SINGLE END DRIVE, EQUIPPED WITH BELTED MOTOR DRIVE.

Dear Sir:

In reply to your letter I am submitting requests under the Building and Repairs grant.

I/ Two washing machines to take the place of the one 72x36 machine on hand.The present one is 25 years old and in a very poor state of repair.One large machine is not suitable for this institution on account of the different type of clothes to be washed,they can ot be mixed in the one machine.

2/ One kitchen range to replace the present one which is also 25 years old.The oven linings and the fire box is burnt out and we have replaced the fire box twice in the past year but it will not last for any lenght of time due to the poor condition of the stove.

3/ Fifteen gallons of grey floor paint for the basement floors.

The above items are badly needed during the present term.

Yours truly

J.P.Mulvihill

DIRECTOR,
LANDS and DEVELOPMENT SERVICES BRANCH

Re: Lejac Residential School

Your file I.A. 1772-2

We are in receipt of your memorandum of July 5th with reference to the recent inspection trip of your Heating Engineer.

It is noted that the improvements to the heating system at this school will necessitate the expenditure of $12,000. to $15,000.

Funds for this purpose are available in the current year's appropriation, and it is hoped that you will find it possible to have the work carried out before the heating season commences.

Acting Director.

MEMORANDUM

Ottawa, July 5, 1949.

Re: Lejac Indian Residential School,
British Columbia.

On his recent inspection trip through British Columbia and Alberta, our heating engineer visited the above and surveyed the mechanical services.

The school is heated by a two pipe gravity low pressure vapour steam heating system, powered by two horizontal return tubular brick set boilers, each rated at 104 horsepower. These boilers are over 28 years old. Up till recently wood had been the principal fuel used, but some coal was burned last year which resulted in a slight improvement in the efficiency of the heating system. The use of coal even though hand fired, naturally brought about a somewhat steadier pressure.

The condensation is returned by gravity through a system of wet and dry return piping and is admitted to the boilers through combination air eliminators and boiler return trap. This combination is badly rusted and is not in satisfactory operating condition.

The piping connections at the boilers is of extremely poor design, resulting in a contribution to faulty circulation and unsteady water-line. The boiler shells, independently suspended by steel members, are in fair condition, but the brick work is in an exceptionally poor state of repair and the top covering of the exposed part of the shells, is practically non-existent.

The piping distribution system is more or less correctly laid out, to what is known as a vapour system, but is not the correct design for a building of this size. There are no traps at the end of the mains and branch mains. In lieu of traps, these mains are dripped at the end by means of bleeder connections into the wet return and in some cases by dry returns overhead back to the boiler return trap and it is this phase of the design which is responsible for a major part of the faulty circulation. In addition, run-out connections from risers to radiators and from mains and risers to first floor radiators, are all badly graded. This is due in part to the settlement of the building through the passage of time. These improperly graded run-outs and spring pieces form pockets where the condensation and air collect and circulation to the radiators is very difficult to obtain. When the pressure is raised in the boilers to overcome these conditions, short circuiting results, and the steam, taking the line of least resistance, travels back to the boilers through the return piping instead of passing through the radiators as it should.

To complete the picture, it is judged that 90% of the radiator traps and valves are defective, which also contributes to short circuiting in many areas.

Generally speaking the building is in a fairly good state of repair and appears to be well looked after especially on the inside.

R.A. Gibson, Esq.,
Director,
Lands and Development Services Branch,
Department of Mines and Resources,
Ottawa, Ontario.

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

Library and Archives Canada / Bibliothèque et Archives Canada
www.collectionscanada.gc.ca

The domestic hot water service is inadequate to meet the needs of the pupils and staff. Two small jacket heaters and two domestic hot water storage tanks connected in series have capacities which are far short of the requirements.

It can be stated however, that in spite of previous pessimistic reports submitted in the past, the heating and domestic hot water systems are by no means so far gone that satisfactory revisions are impossible short of a complete re-installation. All the previous reports having been considered together with the survey carried out by our officer, would lead to the following recommendations.

(a) Install some additional radiation where required.

(b) Re-grade mains where necessary and re-grade all laterals and spring pieces to risers and radiators throughout the building.

(c) Provide new float and thermostatic traps on ends of all steam mains and connect to return mains as will be detailed on drawing.

(d) Provide new horizontal condensation pump to replace old and worn out boiler return trap and air eliminator assembly.

(e) Make necessary piping revision at the boiler as will be detailed on drawing.

(f) Provide one new steel portable fire box type low pressure steam heating boiler and make repairs to brick setting on remaining existing boiler.

(g) Install new stoker (at present in storage at the school) under new boiler.

(h) Provide new domestic hot water storage tank of 900 gal. capacity.

(i) Provide new indirect steam fed heater consisting of cast iron shell and copper tubes with self contained regulating valve.

(j) In addition to the above, it will likely be found that some sections of piping will have to be replaced as the work is in progress. This can only be determined when the work actually gets under way. Owing to the nature of this work and to the somewhat isolated location of this school, it is expected that no contractors would be willing to submit a firm tender. It is felt that this particular work should be awarded on the basis of cost plus, which in our opinion, would result in a more favourable cost to the Department than a firm tender.

The foregoing recommendations can not be closely estimated, until the layout has been prepared, but it is felt that the sum of $12,000.00 to $15,000.00 will be required.

Upon receiving approval and the instructions to proceed with the layout, we will prepare plans and specifications and call for tenders.

Chas. H. Buck.
For Chief, Engineering and Construction Division.

AIR MAIL

, June 22, 1949

Mr. W.S. Arneil,
Indian Commissioner for B. C.,
P.O. Box 70,
Vancouver, B. C.

Re: Lejack Indian Residential School
Your File No. 14-11-3 (163)

We have your letter of the 15th instant, enclosing a requisition for certain equipment requested by the principal of the above school. We approve the purchase of 15 gallons of gray floor paint, as it is presumed that it is required for interior paint, and that the labour will be done by the school staff as you did not request any expenditure for labour.

As you mentioned in your letter, it is expected that Mr. Hargreaves report will recommend considerable expenditure. Consequently, it has been decided to defer action on the request for the range and the washers until we have received the complete report from Mr. Hargreaves.

I suggest that you communicate with us again about the equipment by July 15th. At that time you might mention if the range or the washers should receive priority.

Philip Phelan,

Chief, Education Division.

Re: Maintenance - Lejac Residential School

With reference to the amount of $6,000 provided in the current estimates for equipment and repairs, Lejac Residential School, Supt. Howe, reference his letter of June 6th and enclosure attached, has requisitioned for a new institutional range, two washing machines and 15 gallons of floor paint, which items are available at a cost of $2091.75.

I understand from Mr. Hargreaves that fairly extensive changes and improvements are required to the heating system at Lejac and it may be that the Department will wish to first determine the cost of these changes before approving other expenditures but I would recommend that consideration be given to the attached requisitions at an early date as replacement of the range, installation of the washing machines and painting of the floors should be carried out during the months of July and August.

Memorandum:

DEPARTMENTAL PURCHASING AGENT

In reference to the attached requisition we attach quotations received by Indian Commissioner Arneil. In regard to the request for two washing machines Mr. Arneil writes:

> Two washing machines should be supplied to replace the 72x36 machine on hand at the present time. This machine is 25 years old and in a very poor state. One large machine is not suitable at this institution on account of the different types of clothes to be washed.
>
> The kitchen range at present in use was also supplied 25 years ago. The oven linings and the fire box is burnt out, and during the past year the school management has been advised to replace the fire box twice as it will not last for any length of tiem due to the poor condition of the stove.

You will note that a top header washer is requested. While the above machine should be shipped to the principal ofthe school, the account should be forwarded to Indian Supt. R. Howe, Stuart Lake Agency, Vanderhoof, B.C.

Re: Generating Plants - Lejac Indian Residential School

We are advised that the 2½ k.w. plant from the Lejac school has been forwarded to Vancouver for repairs. Mr. Webb's office has been requested to investigate and report with regard to repairs necessary and the approximate cost but we do not intend to have these proceeded with until the electrical engineer of the Lands and Development Services Branch visits the school and his report is received.

IAB File 881-5 (E1)

Attached please find copy of self-explanatory letter from Beaver Laundry Machinery Company Limited regarding two laundry washers for Lejac Indian Residential School, Lejac, British Columbia.

When calling for tenders, we erroneously asked for washers fitted with end headers instead of top headers specified in your requisition of 13th July last. In telephone conversation with Beaver's Ottawa representative, we were given to understand that there was no difference in price between a machine equipped with a top header and one with end header. We therefore made out the order in accordance with specifications shown on your requisition.

Kindly let us have your comments as soon as possible.

Mr. W. M. Vincent,
Departmental Purchasing Agent,
Dept. of Mines and Resources,
Ottawa, Ontario.

Dear Sir:-

Re Your Purchase Order #95991-4-20-1

Messrs. Harrisons & Crosfield (Canada) Ltd., Vancouver, B. C. who are our western representatives have forwarded to us your above order for two 36 x 36 Beaver V type laundry washers as well as a copy of their letter to you of September 26th in which they point out that our tender stipulated two 36 x 36 V type Beaver Laundry Washers, belt driven, with header on end. Your order calls for these washers to be supplied with top header or elevated header movement, by which it is correctly known. If you wish us to fill this order with the elevated belt driven header instead of the header on end, there will be an extra charge of $80.00 per washer. In other words, the price of these washers will be $690.00 each instead of $615.00 each for the header on end type. May we point out that the elevated header type of drive is a much better drive than the header on end. Also, there is a matter of 27" in floor space saved by the use of the elevated header type driven washer.

Will you kindly advise us your wishes regarding this order.

Yours very truly,
BEAVER LAUNDRY MACHINERY CO. LTD.

August I6th I949

Mr.B.F.Neary
Supt.of Indian Education
Indian Affairs Branch

Dear Sir:

In further reference to the repairs to the heating system at this school-

Mr.Buck told me that in all probability there would not be time to make the repairs to the system this Autumn before we turned on the heat.However there is some allotment in their estimates for insulation to the ceilings.If it is at all possible I would like to have this insulation laid down for this winter.It would make a great difference in the warmth of the building this winter.If the Department would put through this part of the cost and furnish the insulation we could lay it ourselves.I believe that it is II,000 square feet to be covered and this type of insulation is the same price all over Canada.

Would you take this up with Mr.Buck and ascertain his views on the subject.

Yours very truly

Dear Sir:

As the result of a phone conversation between Mr.Howe and Mr.Arneil I have placed a firm bid on the remodelling of a building for a new barn and other works.They have been unable to obtain any further bids for this time of year.

If this bid is accepted would you be kind enough to wire the result to Mr.Arneil as there is very little time left to pour cement in this cold climate.This contract will give me a few headaches but it is the only way that I will be able to get a barn for the winter.

Yours very truly

Re: Lejac Residential School

Two of the hydrants at the above-mentioned School have been out of operation for some time and although the Engineering Branch were successful in arranging for the repair of one, the other is not repairable and should be replaced.

Cost of replacement is $98.50, f.o.b. Vancouver, and as the hydrant is essential for fire protection at the School, I would recommend that an expenditure of this amount be approved.

Re: Lejac School Barn
Your file 14-11-3

With reference to your letter of August 17th and our phone conversation of the 24th instant. I have to advise that A.P. Andersen & Co. of Prince George are unable to do the work of remodelling the Piggery for use as a Cow Barn at the Lejac Residential School, until the Spring of 1950;

As you are aware, the Reverend Principal is most concerned about the housing of the Milch Stock for the fast approaching winter, and in view of the fact we cannot secure satisfactory Tenders from any source, he is prepared to employ experienced Carpenters and necessary unskilled workmen, and submit a Firm Tender, which is enclosed herewith, for remodelling present Piggery for use as a Milch Cow Barn, construct new Piggery, remodel present Machine Shed for use as a granary, and build new Machine Shed as well as a new Silo, for the overall sum of $8,500.00, excluding steel equipment, which is estimated will cost approximately $1,800.00, total expenditure of $10,300.00.

It will be appreciated if you will obtain a quotation from Vancouver sources for the steel equipment listed.

Father Mulvihill intends to employ local Carpenters of good repute, and I am reasonably sure the work will be carried out in a satisfactory manner. I would strongly urge acceptance of the Tender, and in view of the early winter season, it will be appreciated if the Department will wire authority to proceed with the work.

R. Howe,
Superintendent.

Sept 7th I949

Mr.W.S.Arneil
Indian Commissioner
Vancouver,B.C.

Dear Sir:

I am enclosing two letters from Mr.Howe.It has been two months since the request for hydrants has gone in to your office and now that the children are back at school I refuse to take any further responsibility for fire hazards here when we have no hydrants to attach fire hose.

There has been no visit from the promised Electrical Engineer and they are still holding our lighting plant in Vancouver.

There has been no word on the kitchen stove or washers and now that the children are back they will have to be installed under the most difficult circumstances.

There has been no word from Ottawa concerning the barn and there is only one month of building weather left.

Dear Father Mulvihill:

Re: Fire Hydrants

I am in receipt of the following letter from Mr. W. S. Arneil, -

"Referring to your letter of June 22nd (file E*2-6) relative to fire hydrants at the Lejac Residential School, will you kindly arrange to forward these hydrants at the earliest possible date to the Terminal City Iron Works, Ltd., 1909 Franklin Street, Vancouver, and advise C. E. Webb, district Engineer, of shipment. As soon as the hydrants arrive they will be examined and if possible repaired and returned. If repair is not warranted you will be advised. Will you kindly forward a copy of your letter to Mr. Webb's office to this office for our information."

Will you kindly ship the hydrants as soon as possible and advise me by phone, so that I may inform Mr. Webb.

Yours truly,

R. Howe,
Superintendant.

Re: Lejac Indian Residential School
Your File 881-5 (E)

With reference to Mr. Neary's Army Signals of August 10th, we have as yet heard nothing from Mr. V. Kosnar, Electrical Engineer, who is to visit the above-mentioned School, nor, reference Father Mulvihill's letter of September 7th attached, has any word been received with regard to the kitchen range, washing-machines and potato peeler.

With regard to the barn, I have yet to receive a reply to my letter of August 31st and as pointed out by the Reverend Principal, there is only one month of building weather left.

Will you please advise if there is anything this Office can do to expedite provision of the requirements of this School.

I might mention that one of the fire hydrants referred to by the Reverend Principal has been repaired and returned to the School but we have encountered some difficulty in securing a replacement of the second which is unrepairable.

Dear Sir:

I am hereby submitting a request to the Department for II,000 sq.feet of 2 inch rock wool insulation to insulate the ceilings of this school.The measurements were made by the Department engineer,Mr.A.Unsworth last year. The heat loss through the present lath and plaster is about 0.224 B.T.U.per degree per hour per sq.foot. With rock wool insulation the loss would only be 0.080 per degree difference per sq,foot per hour.This would save an estimated I5 to 20 tons of coal each year.

Yours truly

J.P.Mulvihill

Re: Barn - Lejac Residential School

This Office has endeavoured for the past eighteen months to obtain a reasonable tender on the construction of a new barn at Lejac.

Plans and specifications were received from Beatty Brothers Limited, which were forwarded to the only contractor in the area interested, Messrs. Bovil & Hann, Contractors, Smithers, B.C., who submitted a tender which was forwarded to the Department with my letter of September 23rd, 1948, wherein the estimated total cost of the barn was approximately $16,000.00. This tender was not accepted due to no funds having been appropriated for this purpose for the 1948-49 fiscal year.

Having been advised that $12,000.00 had been appropriated for the 1949-50 fiscal year, tenders were again called for in the area; two were received, one from Bovil & Hann, Smithers, B.C., for approximately $19,000.00, and one from A.P. Anderson, Prince George, B.C., for approximately $20,100.00. The above figures include the cost of the steel barn equipment which was to be supplied by the Department at a cost of approximately $1,500.00. The above contractors have since advised that they could not start construction until 1950.

The B. & A. Power and Construction Company, of Vancouver, were asked to submit a tender, which has just been received, amounting to $23,522.00, plus the cost of the steel equipment.

As the above tenders are exceedingly high and as it is

POOR COPY

Indian Affairs. (RG 10, Volume 6445, file 881-5, part 9)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

Library and Archives Canada / Bibliothèque et Archives Canada
www.collectionscanada.gc.ca

essential that construction be completed as soon as possible, the following alternative proposal is submitted for your consideration and approval:

(1) Convert present piggery into a dairy barn and build silo.
(2) Convert present implement shed into a granary.
(3) Build new piggery.
(4) Build new implement shed.

Our Regional Supervisor, Mr. W.J. McGregor, investigated and discussed this proposal on the ground with Father J.P. Mulvihill and Superintendent Howe and he definitely recommends that it be carried out.

I am enclosing herewith Superintendent Howe's letter of August 25th, 1949, and attached tenders and plans in duplicate submitted by Father J.P. Mulvihill, for remodelling the present piggery for use as a dairy barn, constructing new piggery, remodelling present implement shed for use as a granary and building new implement shed as well as a new silo, for the overall sum of $8,500.00, excluding steel barn equipment, which it is estimated will cost approximately $1,800.00, total expenditure of $10,300.00.

Father J.P. Mulvihill is the Principal of the Lejac Indian Residential School at Lejac, a practical man, and we are confident that he can secure the necessary carpenters and labourers locally and that the construction can be carried out successfully, under the supervision of Superintendent R. Howe.

The Finning Tractor & Equipment Company, of Vancouver, are sending their Prince George representative to Lejac immediately. He will submit a complete quotation on the steel equipment and hardware which will be forwarded to the Department when received.

It is recommended that each of the enclosed tenders totalling $8,500.00 be approved and that $1,800.00 be set aside to cover the cost of the steel equipment. As little time remains for the completion of the concrete work prior to frost, I would appreciate receiving your instructions by wire as soon as possible.

W.S. Arneil,
Indian Commissioner for B.C.

Gentlemen:

Re: Purchase Order No. 48254

We acknowledge receipt of your letter of the 30th ultimo regarding the above order placed with your western representatives, Messrs. Harrisons and Crosfield (Canada) Limited, for two washers for Lejac Indian Residential School, Lejac, British Columbia.

When calling for tenders, we inadvertently asked for washers fitted with an end header. In conversation with your Ottawa representative we understood that there was no difference in price between a machine with top header and one with end header. We, therefore, made out an order in accordance with specifications requested. Will you please supply the two washers equipped with elevated headers.

You state that there is an extra charge of $60.00 per washer. This will increase the price of $615.00 to $675.00, although you have shown the increased price to be $690.00. Please let us know if this last figure was shown in error.

Yours very truly,

W. M. Vincent

Memorandum

Re: Lejac Indian Residential School,
Lejac, British Columbia.

Further to our memorandum of July 5th in connection with the above, you are advised as follows:-

Plans and specifications covering the necessary extensive revisions and additions to the mechanical services have been prepared and competitive tenders secured through the medium of W.S. Arneil, Indian Commissioner, Vancouver, B.C. Of the three firms invited to bid on this work, only two were in a position to submit a price. The prices received are as follows:-

Mitchell Brothers Limited,
1990 Burrard Street,
Vancouver, B.C.....$26,923.00

Barr and Anderson Limited,
1060 Homer Street,
Vancouver, B.C.....$28,300.00

Each of these firm tenders was accompanied by a security deposit for ten per cent (10%) of the tender price in accordance with the requirements of the tendering documents.

These prices are considerably higher than our rough estimate of $12,000.00 to $15,000.00 mentioned in our memorandum of July 5th. After the complete analysis of field notes and inspection data had been made, it became apparent that more extensive operations would be involved than originally anticipated, if the mechanical services were to be brought up to acceptable standards.

This added work, together with the remote location of the school, which involves unusual transportation difficulties, would in a large measure account for the difference between our estimate and the lowest tender of $26,923.00.

It is felt that if the Indian Affairs Branch decide to proceed with this work, consideration should be given to Mitchell Brothers Limited tender. If advised that this work is to be undertaken, we will prepare a Memorandum to Council and Contract Agreements and will arrange to have operations started.

AIR MAIL

November 3rd, 1949.

Mr. W.S. Arneil,
Indian Commissioner,
P.O. Box70,
Vancouver, B.C.

Re: Lejac Indian Residential School

Attached for your information is a copy of a memorandum dated October 15th from the Lands & Development Services Branch. We have approved the acceptance of Mitchell Brothers' tender, but I am not yet certain that the tender has been awarded, because the Lands & Development Services Branch would first have to obtain the necessary Order-in-Council.

The Departmental Purchasing Agent is being requested to secure the rock wool for insulation purposes, as requested in your letter of September 16th.

With reference to certain equipment for this school, the following Purchase Orders have been issued:

P.O. 48253 - Potato Peeler. Issued to the Grimsby Concrete Company.
P.O. 48254 - Two laundry washers. Issued to Harrison's & Crossfield, Vancouver, B.C. on September 14th.
P.O. 48255 - Commercial Range. Issued to McLennan, McFeely and Prior, Vancouver, B.C., on September 14th.

We have already received the account covering the potato peeler, but we have not received the accounts for the range and the washers. As both firms are located

Memorandum:

DEPARTMENTAL PURCHASING AGENT

Re: Lejac Indian Residential School #881

On November 3rd we forwarded to you a requisition for 11,000 sq. ft. 2" rock wool for insulation purposes at the above school, and we also forwarded quotations that had been received from Indian Commissioner Arneil.

On reviewing this requisition it is found that for the purpose for which the rock wool is required, the batts should be 3 3/4" instead of 2".

Please change our requisition accordingly. This will necessitate obtaining new quotations on the size just stated.

Philip Phelan,
Chief, Education Division

November 2, 1949.

TO HIS EXCELLENCY

THE GOVERNOR GENERAL IN COUNCIL

The undersigned has the honour to report:-

That in the 1949-50 estimates of the Indian Affairs Branch Department of Mines and Resources, funds were provided for the revisions and additions to the Plumbing and Heating Systems at the Lejac Indian Residential School at Lejac, British Columbia.

That tenders were invited through the medium of W.S. Arneil, Indian Commissioner for British Columbia, Vancouver, British Columbia, for carrying out this work by contract on the basis of drawings, specifications and other tendering data, prepared by the Department.

That bona-fide lump sum tenders were received from firms, and in amounts as follows:-

Contractor	Amount of Tender
Mitchell Brothers Limited, 1980 Burrard Street, Vancouver, British Columbia	$26,923.00
Barr and Anderson Limited, 1060 Homer Street, Vancouver, British Columbia	$28,300.00

That the tender submitted by Mitchell Brothers Limited, was investigated and found to be in accordance with drawings and specifications prepared by the Department, and that said tender was accompanied by a marked cheque drawn in favour of the Receiver General of Canada for ten per cent (10%) of the amount of the tender.

The undersigned is of the opinion that the work is of pressing emergency in which delay would be injurious to the public interest and has the honour to recommend that he be authorized to enter into an agreement with Mitchell Brothers Limited of Vancouver, British Columbia, for the revisions and additions to the plumbing and heating systems at the Lejac Indian Residential School, Lejac, British Columbia, at their tendered price of Twenty Six Thousand Nine Hundred and Twenty Three Dollars ($26,923.00) and the cost of the work to be charged to funds provided in the estimates of the Indian Affairs Branch, Department of Mines and Resources, for Indian Agencies.

Respectfully submitted,

Minister of Mines and Resources.

Re: Lejac Residential School
Your File 881-5 (E1)

We are informed that the Reliance Lumber Company, Vancouver, and presumably other firms, have been requested by the Purchasing Agent to tender on the supply of 11,000 sq. ft. of 3¼" Rock Wool Insulation, for the Lejac School.

This matter has already been the subject of correspondence with you, reference my letter of September 16th, and Mr. Phelan's letter of November 3rd. With my letter I submitted quotations on 2" Rock Wool, which is the thickness asked for by the Principal and, as a matter of fact, we are not aware that there is such a thing as 3¼" Insulating Batts; these come in 2" and 3" sizes and in British Columbia, there is very little demand for the 3" size.

We have been informed of previous instances where the Purchasing Agent requested Vancouver firms to quote on materials which were already covered by quotations to this Office, which quotations were forwarded to you, and it appears to me that we are wasting not only our time but the time of local firms if the quotations secured by us are not acceptable to the Purchasing Agent, as a basis for the issuance of a Purchase Order.I should like to be advised if in future we should secure quotations on materials, the ordering of which must necessarily be referred to the Purchasing Agent, or if we should leave it to him to call for tenders. In the case of the Insulation for the Lejac School, I have suggested to the Reliance Lumber Company that they quote to the Purchasing Agent on 3" Batts.

W J McLeyn

Rev. J. Mulvihill, O.M.I.,
Principal,
Lejac Indian Residential School,
Lejac, B.C.

Lejac Indian Residential School

Dear Father Mulvihill:

As you are probably aware, I have been absent from my office inspecting schools and am just now beginning to answer some of the accumulated correspondence.

I was sorry to read of the difficulties encountered in securing tenders for the erection of the barn and Father Birch spoke to me about your tender. (Since withdrawn due to the lateness of the season.)

When I last discussed this matter with him, I suggested that we prepare a bill of materials for the building which you intend to erect. This requisition could be submitted through Mr. Arneil to here and we could get the Departmental Purchasing Agent to work on it immediately. I presume that all of the materials, with possibly the exception of the cement, could be stored at your school until spring permits erection of the barn.

We will include an amount for labour in our next year's Estimates so that, with the materials on hand, work can begin early in May or as soon as weather conditions permit.

I would suggest the hiring of a foreman carpenter as was done by Father O'Grady at Kamloops. With the materials already on hand, the building could then be erected without delays

during the spring and summer.

I am sending copies of this letter to both Mr. Howe and Mr. Arneil so that they will be aware of our plans. In fact, we would like to expend as much as possible of the funds available for this project before the end of the fiscal year and naturally the best way to do this is by the purchase of all materials.

In fact we could order the cement for delivery by the 20th of March and still be within this year's vote.

I understand that the Lands and Development Services Branch have just made a submission to Council recommending the acceptance of the lowest tender submitted by the firms bidding on the revisions and additions to the plumbing and heating at this school. This amounts to very close to $27,000.00 and should put your school in good condition. With regard to the other items, I believe that Purchase Orders have been issued for the potato peeler, the two laundry washers and the commercial range.

Bernard F. Neary,
Supt. of Indian Education.

Re: Lejac Residential School

We are advised by the Department that the following listed Purchase Orders were issued covering the supply of certain equipment for the above school:

P.O.#48253 Potato Peeler. Issued to the Grimsby Concrete Company

" #48254 Two laundry washers. Issued to Harrison's & Crossfield, Vancouver, B.C. on Sept.14th.

" #48255 Commercial Range. Issued to McLennan, McFeely and Prior, Vancouver, B.C., on Sept. 14th.

We have been in touch with Harrison's and Crossfield, Vancouver and were advised that the two laundry washers will be shipped at an early date, and with Mc & Mc who advise that the commercial range was shipped October 26th. Will you please submit vouchers as soon as the equipment and invoices are received.

It is anticipated that an order for insulation will be placed in the near future and that the contract for improvements to the heating system will be awarded at an early date.

W. S. Arneil,
Indian Commissioner for B.C.

Rev. J.P. Mulvihill, O.M.I.,
Principal,
Lejac Indian Residential School,
Lejac, B.C.

Lejac Indian Residential School

Dear Father Mulvihill:

I have for answer your letter of November 16th and wish to advise that the plan we intended to recommend was that outlined by you for converting the piggery into a barn, the replacement of the piggery and the remodelling of the implement shed.

I am sending a copy of this letter to Mr. Howe and to Mr. Arneil and I would suggest that you discuss with Mr. Howe the submitting of a requisition through Mr. Arneil's office for all the lumber, cement, hardware, etc., which will be required in accordance with the bill of materials which you have already drawn up. This requisition should also include such items as electrical wiring, hay chute, stanchions, aluminum sheet roofing, insulation, drinking bowls, litter carrier, etc.

I would suggest that the requisition be divided into separate sections covering the following items:

(a) lumber and building materials
(b) standard hardware
(c) barn hardware such as drinking bowls, stanchions, etc.
(d) paint

.....2

INDIAN
AFFAIRS

Nov.16th 1949

Mr.B.F.Neary
Supt.of Indian Education
Indian Affairs Branch.

Dear Sir:

Thank you for your letter of Nov.5th.I did not know that you were absent on an inspection tour until I received your letter.

Yesterday I was speaking to Mr.Howe and he suggested that I should write to you and have this point clarified.The materials to be purchased-Are they for the plan that I suggested in my tender or for a new barn?I think that it would be a great deal cheaper to build according to the plan I submitted and also it would be more servicable to the school.

I had already drawn up a list of materials for this project and if it is the mind of the Department then I will submit this list to Mr.Howe and discuss the matter with him.I am firml y convinced that this plan of building will be of greater service to the school.

Mr.Kosnar,the electrical engineer,has just completed a survey of the building.He feels that we should not install a stoker in the proposed heating boiler until some changes are made in the electrical system.Things get more complicated as we go along.

I was very pleased to hear that there would be some action on the heating system.However the tenders seem to be very high.

Thank you for all your kindness and attention.

Yours very truly

J.P.Mulvihill

Certified to be a true copy of a Minute of a Meeting of the Committee of the Privy Council, approved by His Excellency The Governor General on the 8 November 1949

The Committee of the Privy Council have had before them a report, dated 2nd November, 1949, from the Minister of Mines and Resources, representing:

That in the 1949-50 estimates of the Indian Affairs Branch Department of Mines and Resources, funds were provided for the revisions and additions to the Plumbing and Heating Systems at the Lejac Indian Residential School at Lejac, British Columbia;

That tenders were invited through the medium of W.S. Arneil, Indian Commissioner for British Columbia, Vancouver, British Columbia, for carrying out this work by contract on the basis of drawings, specifications and other tendering data, prepared by the Department;

That bona-fide lump sum tenders were received from firms, and in amounts as follows:-

Contractor	Amount of Tender
Mitchell Brothers Limited, 1980 Burrard Street, Vancouver, British Columbia	$26,923.00
Barr and Anderson Limited, 1060 Homer Street, Vancouver, British Columbia	$28,300.00

Department of Mines & Resources Indian Affairs Branch RECEIVED DEC 3 1949 A.M. REGISTERED

That the tender submitted by Mitchell Brothers Limited, was investigated and found to be in accordance with drawings and specifications prepared by the Department, and that said tender was accompanied by a marked cheque drawn in favour of the Receiver General of Canada for ten per cent (10%) of the amount of the tender.

That the work is of pressing emergency in which delay would be injurious to the public interest.

The Committee, therefore, on the recommendation of the Minister of Mines and Resources, advise that authority be granted to enter into an agreement with Mitchell Brothers Limited of Vancouver, British Columbia, for the revisions and additions to the plumbing and heating systems at the Lejac Indian Residential School, Lejac, British Columbia, at their tendered price of $26, 923, chargeable to funds provided in the estimates of the Indian Affairs Branch, Department of Mines and Resources, for Indian Agencies.

(Sgd.) N.A. Robertson

Clerk of the Privy Council.

The Honourable
the Minister of Mines and Resources.

DIRECTOR, LANDS & DEVELOPMENT SERVICES

Re: Revisions and Additions to Plumbing and Heating Systems, Lejac Indian Residential School.
Your File I.A. 1772-2

With reference to previous correspondence regarding the above, we have received the following signal this morning from Indian Commissioner Arneil:

"Reference exchange correspondence between local office Engineering Division and their head office regarding location boilers.

Lejac School Principal's insistance that boilers be moved back to make available for fuel storage 12 ft. of waste space.

Objection raised by head office Engineering Division not applicable to type of boiler being installed and local office and this office agree they should be moved from location shown on plan.

Will you please discuss with Engineering Branch and signal your concurrence."

I would appreciate it if your Engineering Division would give the above immediate attention, and advise what reply we can make to Mr. Arneil.

Memorandum

Re: Lejac Indian Residential School,
Lejac, British Columbia.

In connection with Major MacKay's memorandum of December 7th bearing your marginal notation of the 8th instant you are advised as follows.

Mr. Webb brought up the question of re-locating the boilers in his letter of November 29th and we replied on December 2nd fully explaining our reasons for locating the new boilers in the position shown on our drawings. It would appear that Mr. Webb's response to our letter has been directed to Major MacKay through Mr. Arneil.

We have wired Mr. Webb pointing out that boiler manufacturers' drawings must be submitted for approval by this office before the units are shipped. We have specified the type and capacity of the boilers required for this work and any proposed changes should of course be submitted to this Division for final analysis and approval before being proceeded with.

An examination of the original building plans shows that insufficient fuel storage and boiler room space was provided in the original design and there is evidence that a change was made at a later date in an attempt to improve the situation. Owing to the character of the building as now constituted, major basic changes to the structure involving an unwarrantable sum of money would be necessary in order to bring the fuel storage facilities up to a reasonable capacity.

Therefore it is highly important from our viewpoint that no encroachment of the boiler room itself be made without approval from this Division which can only be given following a full consideration of all features involved.

When the boiler manufacturer's drawings have been received and analyzed, we will be in a position to judge whether or not it will be possible to re-locate these units closer to the rear wall of the boiler room. At such time you will be further advised.

Victor F. Weaver
Chief, Engineering and
Construction Division.

Re: Lejac Residential School
Your file 881-5 (E1)

With reference to Mr. Phelan's letter of December 19th and memorandum dated December 9th from the Chief, Engineering and Construction Division, regarding the location of the boilers in the above-mentioned school. Mr. Weir is incorrect in assuming that Mr. Webb's response to the letter from his head office was directed to Major MacKay through this office. Our submission was based on representations made by the Rev. Principal through the contractors. We, of course, contacted Mr. Webb's office for his views before communicating with you.

It is hoped that a decision with regard to the location of these boilers will be reached at an early date.

Lejac, British Columbia.

You will have received our Army Message of the 23rd of December last which, in the main answers your letter of the same date.

Having full boiler data for the above project, we now are able to furnish definite comment regarding boiler location. It will be permissible to move the boilers back dependent upon proper erection of the smoke breeching. This is detailed on the accompanying sketch. Please note that the minimum distance from the rear wall to the back of the boiler base is 79 inches and that the inside radius of 30 inches on the bend of the smoke breeching must not be altered.

We note that the new position of the boilers will interfere with the piping as shown on our design, however, any changes in this piping must be carried out within the scheme shown in the isometric detail.

Your letters infer that boiler room space is to be used for coal storage. It appears that due to changes and allocation of space by the school officers to purposes other than intended, and whereby considerable fire hazard has already been created, no alternative exists, unless steps are taken to restore the original fuel storage room to its proper use. We must state emphatically that we do not approve of any encroachment on the boiler room space.

The above and the fact that 11'-0" must be left clear in front of the boilers to permit withdrawal of the stoker worm, should be brought to the attention of those concerned.

The Indian Affairs Branch and W.S. Arneil, will receive copies of this letter.

C. Victor F. Weir,
Chief.

Re: your file No. 14-11-1

I have your letter of April 17th having reference to an expenditure of $154.77 for repairs to the spur track at Lejac.

The spur track is used for unloading about 8 cars of coal a year for heating purposes at the Lejac Residential School, also an occasional car of flour, Stock feed and fertilizer.

The spur is essential for unloaded cars of fuel coal, and the School would be greatly inconvenienced without it.

R. Howe,
Indian Agent.

I beg to enclose herewith, a requisition for an expenditute of $154.77, estimated costs of repairs to the Spur Track at Lejac, B.C.

I understand the Spur was build at our expense for the sole use of the Lejac Residential School some twenty years ago, and that the Department is responsible for maintenance and repairs.

The track is in extremely poor shape and pending necessary repairs, the switch has been spiked and cannot be used until the repairs have been completed.

R. Howe,
Indian Agent.

I.A.1772-2

3 January, 1950.

Lejac Indian Residential School,
Lejac, British Columbia.

Enclosed is a copy of our letter to Mr. Webb for your information. May we add that any money that the Principal intended to spend on making a coal storage bin in the boiler room might better be spent in putting the original fuel storage room back into commission.

Unauthorized construction is not only hazardous but generally poorly planned. It is plainly evident that this is the reason that the original fuel storage room is not being used as such today.

Re: Material for Lejac Barn

We are returning herewith two of your Requisitions covering materials for the new farm buildings to be erected at the Lejac Residential School, as they do not contain sufficient detail to enable us to ask for quotations here.

You are requested to have a local electrician draw up a detailed bill of materials complying with the B.C. Electrical Code with which you should be able to obtain local quotations in Vanderhoof or Prince George. The same applies to the plumbing materials required, also the nails, roofing, paint, etc.

With regard to the Requisition covering the steel barn equipment we understand that Mr. J.J. Mulvaney, Finning Tractor Company representative in Prince George, discussed the requirements with Father J.P. Mulvihill and we would, therefore, ask that you obtain a quotation direct from Mr. Mulvaney.

Department's file 881-5 (E)

With reference to the Department's letter to the Reverend J.P. Mulvihill, Principal, Lejac Residential School, dated November 24, 1949. I beg to enclose herewith the following requisitions for material for the new barn, Silo, Piggery and Machine Shed.

1. Requisition for wood staves for Silo, tender attached from Canadian Wood Pipe and Tanks Ltd.,Vancouver,B.C.

2. Requisition for Barn and Piggery fittings, which may be obtained from the Finning Tractor Co. Vancouver. See attached letter from Reverend J.P. Mulvihill.

3. Requisition for Hardware, Roofing, water and electrical supplies, paint, etc.

Local tenders for the last two Bill of materials are not available. It will be appreciated if you will obtain quotations from Vancouver sources and forward copies to this office for our records.

Local quotations will be submitted in due course for the lumber, cement and other materials required for the new buildings.

Re: Generating Plant Lejac School

During our exchange of correspondence with regard to the necessity for an additional generating unit at the Lejac School or alternatively the repair of the 5 H.P. Lister previously used, either the school management or Superintendent Howe shipped the 5 H.P. plant to Hoffars Limited and presumably instructed them to submit an estimate of the cost of overhauling the unit. Due to some misunderstanding, however, the Company proceeded with repairs and when Mr. Kosnar, Electrical Engineer from the Lands and Development Services Branch, made inquiries about the plant it was found that the repairs had been completed.

We are not aware of what Mr. Kosnar intends to recommend to best meet the electrical requirements of the school, but the Lister plant is now in good shape and if not required at Lejac can possibly be traded in on a larger plant if necessary or used elsewhere, in view of which I would recommend payment of Hoffars' account as covered by Voucher No. 174 attached.

Memorandum:

DEPARTMENTAL PURCHASING AGENT

Re: Lejac Indian Residential School No. 881

Attached are 4 requisitions covering materials required for the erection of a new barn at the above mentioned school. The barn at this school was destroyed by fire in 1947.

We are providing funds in the appropriation for the fiscal year 1950-51 for labour to erect this barn. We desire to secure the items shown on the attached requisitions as soon as possible so that their cost may be paid from the appropriation for the fiscal year 1949-50.

Re: Lejac Indian Residential School Barn
Your file 881-5 (E)

With reference to Mr. Neary's letter of November 24th to Father Mulvihill, we have now secured from Supt. Howe requisitions covering all materials required for conversion of the piggery at the above-mentioned school, construction of a new piggery and remodelling of the implement shed. Requisitions covering the following are enclosed in triplicate, with quotations as listed:

(1) Wood staves for Silo - Canadian Wood Pipe and Tanks Ltd.

(2) Lumber, cement, insulation, window sash, doors, etc.,- Bowman's Lumber Yard, Vanderhoof, and Fort Fraser Planing Mill, Fort Fraser, B.C.

(3) Electrical supplies, plumbing, paint, nails, roofing, etc.- Taylor Brothers, Vanderhoof, B.C.

(4) Steel barn equipment - L.C. French, Vanderhoof, Agent for the Finning Tractor Company.

Various communications with Supt. Howe in connection with these requisitions and quotations are also enclosed for your information. It is understood that the Purchasing Agent will be requested to secure materials prior to March 31st and that funds will be provided in the coming fiscal year to meet labour costs.

Toronto 3, Ontario.

Gentlemen:

Re: Purchase Order No. 48254

We acknowledge receipt of your letter of the 30th ultimo regarding the above order placed with your western representatives, Messrs. Harrisons and Crosfield (Canada) Limited, for two washers for Lejac Indian Residential School, Lejac, British Columbia.

When calling for tenders, we inadvertently asked for washers fitted with an end header. In conversation with your Ottawa representative we understood that there was no difference in price between a machine with top header and one with end header. We, therefore, made out an order in accordance with specifications requested. Will you please supply the two washers equipped with elevated headers.

You state that there is an extra charge of $60.00 per washer. This will increase the price of $615.00 to $675.00, although you have shown the increased price to be $690.00. Please let us know if this last figure was shown in error.

Yours very truly,

W. M. Vincent,
Departmental Purchasing Agent.

Ottawa, February 9, 1950.

Dear Sirs:

Attached are copies of your credit notes, dated December 14, 1949, totalling $20.37. In order to complete our records, it would be appreciated if you would arrange to let us have your cheque for $15.99 issued in favour of the Receiver General of Canada.

Will you please note that we have deducted the railway charges which were inadvertently included in your bills of lading, Nos. W.7380 and W.3781, and shown in your credit note for $18.15. A cheque for $4.38 issued in favour of the Receiver General of Canada might be forwarded to the Indian Affairs Branch, Booth Building, Sparks Street, Ottawa, to cover refund on the cost of the railway charges.

We are advising the Indian Affairs Branch by copy of this letter with a supporting copy of the credit note in question.

Yours very truly,

R. A. Gibson,
Director.

AIR MAIL , March 23, 1950.

Mr. R. Howe,
Supt. of Indian Agency,
Vanderhoof, B.C.

Lejac Indian Residential School

We have not yet received any accounts covering purchases made on the undermentioned Purchase Orders for various supplies and equipment for the Lejac Residential School.

1. P.O.#56868, issued to Canadian Wood Pipe and Tanks Limited for silo in an amount of $405.00.

2. P.O.#56888, issued to Fort Fraser Planing Mill for shiplap, flooring, etc. in an amount of $1,943.85.

3. P.O.#56973, issued to L.C. French for equipment for barn in an amount of $1,390.70.

4. P.O.#56976, issued to McLennan, McFeely and Prior Limited for nails and other materials for barn in an amount of $1,056.23.

When the above Purchase Orders were issued the amounts were immediately charged to our appropriation for the fiscal year 1949-50 and if we do not receive invoices dated previous to March 31st the funds will lapse and we will have to charge the account to the appropriation for the year 1950-51.

You will therefore see the necessity of having the accounts forwarded at the earliest possible date and if the supplies mentioned on the Purchase Orders have not been received you should immediately get in touch with the firms concerned and arrange for immediate delivery and invoices dated prior to March 31st. It is hoped that this matter

Dear Mr.Neary:

I wish to thank you and Mr.Phelan for all the help and kindness that you have shown during the past year.This school certainly benefited by the improvements and equipment.

All the supplies for the constuction are now on hand and we are ready to commence work in the course of the next two weeks.In referring to your letter of Nov.5th (File 881-5 E) you mention that a grant for labour will be included in this years estimates.What would be approximately the earliest date when this money will be available?

Enc

The heating plant has been installed and it is a very good system.I am certain that it will heat the building adequately and will save a considerable amount on the coal bill.

Thank you again for all the help.

Yours truly
J.P.Mulvihill ours

Dear Father Mulvihill:

I have for answer your letter of March 24 and wish to advise that an amount has been included in our 1950-51 Estimates for the completion of the barn at your school.

I understand that this barn is to be built by day labour and presume that you have a foreman-carpenter in mind to supervise its construction.

I am glad that the materials are on hand and will expect a reply from Mr. Howe or yourself by return mail concerning the method of construction.

Yours sincerely,

Bernard F. Neary,
Superintendent of Education.

Memorandum:

DEPUTY MINISTER

Re: Lejac Indian Residential School,
Stuart Lake Agency, British Columbia.

The pipe line carrying water from the lake to the Lejac Residential School, crosses the Grand Trunk Pacific Railway near Fort Fraser Station, B.C.

For several years in the past, the annual rental has been at the rate of $1.00, but it will be noted from the attached letter dated March 29th, 1950, from the Canadian National Railways, that they have decided to increase the rental.

Attached is a new Agreement in triplicate which the Company wishes to have signed. The annual rental in future will be at the rate of $5.00 a year.

It would be appreciated if the Minister would sign the three forms.

Re: Lejac Indian Residential School

I beg to enclose herewith, for the Department's attention, a letter and enclosures received from the Canadian National Railways, covering the termination and renewal of the agreement for the pipe line crossing at the above mentioned school.

The crossing is used for piping water from Fraser Lake to the water tank, providing water for the School. Renewal of the agreement is essential.

CANADIAN NATIONAL RAILWAYS
WESTERN REGION

D. V. GONDER.
GENERAL MANAGER

WINNIPEG, MANITOBA
March 29th, 1950,
File: Agt. No. 1914.

Department of Indian Affairs,
% Indian Agent,
VANDERHOOF, British Columbia.

Dear Sirs:

The present rentals for private crossings and pipeline crossings on Railway right-of-way and station grounds which have been in effect for upwards of thirty years, have been reviewed, and it has been decided that these rentals together with other rentals for the use of Railway property, must be increased to bring them more in line with present day values and costs.

In order to comply with legal requirements, and to implement this increase with the least possible inconvenience to both parties, enclosed herewith is formal Notice terminating your existing License. However, on the assumption that you will wish to maintain this crossing, also attached, in triplicate, is Agreement for New License, indicating the new rental.

It will be appreciated if you will arrange for this latter document to be signed in the space provided on the Form and return prior to the termination date of existing License. After execution by the Railway, one fully executed copy of Agreement for New License will be sent you for your record.

Your co-operation in early handling of this matter will be appreciated.

Yours truly,

D. V. Gonder

3010
File 881-5 E

Dear Mr.Neary:

In reply to your letter of April 3rd-I have spoken to Mr.Howe on this matter and he suggested that I write toyou.

I will be able to secure the services of an expert carpenter who has just completed a school for the Provincial Government in this district.I would employ local labour and quite a lot of work could be done by the boys as a manual training programme.This would cut the cost of construction considerably.

You have a copy of the details of construction sent to your office last Autumn.These details would be under the supervision of Mr.Howe.

Would it be possible to start the construction and submit vouchers for the pay-roll.If the money is not available yet could I pay it from school funds and be reimbursed later on when the vouchers are presented. This should all go through Mr. Howe's office.

If this plan is acceptable would you let me know as soon as possible.

I wish to thank you for the generous increase in the per capita grant.It will be of great help during the coming year.

Yours sincerely
J.P Mulvihill

Re: Lejac Indian Residential
School. Your File 163/32-1

We are in receipt of your letter of April 1st enclosing letters received from the Canadian National Railways, Western Region, in connection with the Agreement for the pipe line from the Lejac Residential School.

Enclosed are triplicate copies of the new Agreement which have been signed by our Minister, The Honourable W.E. Harris. It is understood from the letter of March 29th, 1950, from the Canadian National Railways, which you forwarded with your communication, that one copy of the Agreement will be signed by the Railway and returned for our file. If this copy is returned to you, you should immediately forward it to this office.

Re: Lejac Indian Residential School

We are in receipt of your army signal of the 14th instant with regard to the 5 HP lister generator which is now at Hoffars Limited, Vancouver.

I was talking to Mr. Kosner yesterday and he states that this generator will not be required at the Lejac School. Would it be possible to sell this generator? If so, to whom could it be sold and at what price. In the event of our deciding to sell it, it will be necessary to have this information so that we may obtain the approval of the Salvage Officer.

Possibly, there is some other school or agency in British Columbia at which it could be used. In that event, we could give you authority to transfer it immediately.

You can forward the account covering the cost of the repairs to the generator.

Rev. J.P. Mulvihill, O.M.I.,
Principal,
Lejac Indian Residential School,
Lejac, B.C.

Dear Father Mulvihill:

We have your letter of the 6th instant with reference to completing the barn at your school.

Please let us know the name and address of the carpenter you can secure as foreman. You should also advise the rate of pay which he will require. It will be necessary for us to submit his name for the Minister's approval.

As soon as we have this, we will be able to give you further instructions as to the manner in which you can proceed with the work.

Yours sincerely,

Bernard F. Neary,
Supt. of Indian Education

Heating Installation
Lejac Indian Residential School,
Stuart Lake Agency, British Columbia.

Attached are copies of correspondence exchanged between officers of the Indian Affairs Branch in British Columbia, together with a copy of Indian Commissioner Arneil's covering letter to the Chief of our Engineering and Construction Service, regarding action taken by the school principal, with the contractor now carrying out work on the heating system at the above residential school.

Under date of the 3rd January last, a letter was written to District Engineer Webb, copies of which were sent to Commissioner Arneil and yourself, containing comment regarding difficulties created by school officers when unauthorized changes are made in diverting space to purposes other than intended.

You will note by the latest correspondence that the principal has taken it on himself to make changes to the boiler room layout. Comment by our field officers indicates that these changes are an attempt to locate coal storage space nearer to the boilers than at present, which is necessitated by the previous diversion of the coal storage space provided in the original design, to use as a root cellar.

On numerous occasions it has been found that school principals undertake structural changes in schools under their control from funds at their disposal, without referring the matter to Ottawa for approval. These changes are often poorly conceived and present obstacles to the economical solution of technical problems which may arise at a later date.

Commissioner Arneil has taken action at the Lejac school which he has probably reported to you, but it is of prime importance that school principals be restrained from carrying out structural revisions before such matters have been studied by responsible technical officers, thus avoiding infractions of the National Building Code, and preventing the creation of fire and other hazards.

The matter is drawn to your attention for your consideration and comment.

Re: Mitchell Brothers Heating Contract
Lejac Residential School

I am enclosing Progress Payment No. 3 in the amount of $8,280.90 in connection with the above-mentioned contract, together with a memorandum from Mr. N,P. Robinson. You will note that the Rev. Principal of the school took it upon himself to issue instructions to the contractor which prevented him from completing the work. I am writing to Father Mulvihill informing him that he has exceeded his authority in this regard and that the changes presently being made to the boiler room by the school management must be discontinued until his proposals are submitted to us in detail and approved but in the meantime I feel that it would only be reasonable to consider Mitchell Brothers contract as satisfactorily completed.

I might mention that the Rev. Principal notified us by wire on March 23rd that the 13 valves and traps referred to in Mr. Martin's memorandum were installed.

The work of which the Principal has relieved the contractor of responsibility consists of:

(1) Patching the holes in the walls

(2) Painting of hot water storage tank and heater.

(3) Closing of opening in wall of boiler room.

(Sgd) W.S. Arneil,

Memorandum to Mr. Arneil:

Re: Lejac Indian Residential School
Inspection Report

Attached is a memorandum by Mr. R.M. Martin based on his recent inspection of the mechanical services revision at the above mentioned school now being carried out by Mitchell Brothers of Vancouver.

You will note that there are four parts of the work that are not completed. Three of these, namely, 1st, patching of the holes in the wall, 2nd, painting of hot water storage tank and heater, 3rd, closing of opening in wall of boiler room, should have been completed.

As on a previous inspection, Mr. Martin had left instruction with the Contractor to have these repairs made as they fall within the scope of the Contract, However, the Principal of the institution had, on his own responsibility, made arrangements with the Contractor that he would look after this work. Although there is probably nothing serious in this arrangement, it is certainly a practice that should be discouraged. This type of interference prevents the inspecting engineer from making a concise report on final inspection and leads to general dissatisfaction and misunderstanding between the inspector and the Contractor.

You will also note that the Principal of the school is carrying out alterations to the boiler room. I am not aware on what authority these alterations are being made, but in this particular instance the alteration will interfere with removal of the coal stoker worm provided the boal bin, which is now being built, is full or only partially full of coal.

As a general rule it would not be advisable for the local school authority to make changes or alterations to these buildings without first referring the subject to some authority on such matters.

Memorandum to Mr. Robinson:

Re: Lejac Indian Residential School
Inspection Report

On March 21 I made an inspection of the heating installations put in by Mitchell Brothers Limited.

This contract is now complete except for the following:-

(1) Patching of holes in walls.
(2) Painting of hot water storage tank and heater.
(3) Closing of opening in wall of boiler room.
(4) Installation of 13 valves and traps in the sleeping quarters.

An arrangement has been made between the contractor and the Father in charge of the school for the Father to complete the first three items.

The 13 valves and traps were to be installed on March 22 and the Father will notify this office by wire when this is done.

In addition to the contract, the following extra work has been satisfactorily completed.

(1) Installing 8" main steam valve.
(2) Installing by-pass system on condensation pump.
(3) Installing condensation drip line in laundry corridor.

At the present time the Father is carrying out alterations in the boiler room. A coal bin is being constructed with concrete walls. There is a wall being constructed just clear of the hopper of the stoker with an opening for withdrawal of the worm. If the bin is full of coal, difficulty would be encountered removing the worm. It is the intention of the Father to close the existing boiler room entrance on the outside wall. I do not think it wise to do this.

Memorandum:

DEPUTY MINISTER

Re: Lejac Indian Residential School,
Stuart Lake Agency, British Columbia,
Electoral District of Cariboo

Funds have been provided in the 1950-51 appropriation for the completion of a barn at the Lejac Indian Residential School.

The Principal reports that he can secure the services of a competent foreman, Mr. Gust Johnson, Fraser Lake, B.C., at the union rate of $1.65 per hour. We are advised that competent foremen are scarce in the district near the school, and if we wish to employ Mr. Johnson, he will have to be notified immediately.

I recommend for the Minister's approval, the appointment of Mr. Gust Johnson as foreman, at the rate of $1.65 per hour.

Ottawa, April 22nd, 1950.

R.A. Gibson, Esq.,
Director,
Development Services Branch,
Department of Resources and Development,
Norlite Building, Ottawa, Ontario.

Dear Mr. Gibson:

Re: Lejac Indian Residential School

I am in receipt of your letter of April 4th in which you mention that the Principal of the above school made certain changes in the boiler room layout without receiving approval.

On receipt of your letter, the following telegram was sent to the Principal on April 20th:

"We are informed you are making alterations to boiler room Lejac School. Would appreciate your advising immediately your reasons for proceeding with work without first securing official authority. Structural alterations to government owned buildings should not be made without first receiving our approval."

Today we received the following reply:

"Retel what constitutes structural change. If building a coal bin in unused part of furnace room without change to foundation or walls is structural change, then I have overstepped regulations. This work completed three weeks ago. Commissioner told me to stop March 27th work completed then. Letter following."

Yours sincerely,

Director.

April 20th 1950

Mr.B.F.Neary
Supt.of Education
Indian Affairs Branch.

Dear Mr.Neary:

In further reference to your telegram of April 20th- I wish to quote the last paragraph of Mr.Arneil's letter of March 27th-'I NOTE ALSO FROM MR.MARTINS REPORT THAT YOU ARE CARRYING OUT CERTAIN ALTERATIONS IN THE BOILER ROOM.THE LEJAC SCHOOL IS A DOMINION GOVERNMENT BUILDING AND NO ALTERATIONS MAY BE MADE THERETO WITHOUT SPECIFIC AUTHORITY FROM THE DEPARTMENT.I HAVE ,THEREFORE,TO REQUEST THAT YOU DISCONTINUE THE WORK AND IN THE MEANTIME PROVIDE COMPLETE DETAILS OF THE CHANGES YOU PROPOSE IN ORDER THAT THEY MAY BE REVIEWED BY OUR ENGINEERING STAFF'

I replied to this letter on March 28th stating.'IN YOUR LAST PARAGRAPH YOU ADVISE ME TO DISCONTINUE THE WORK ON THE COAL BIN. THAT WORK HAS BEEN COMPLETED AND I AM ENCLOSING A SKETCH OF THE WORK DONE.THERE HAS BEEN NO CHANGES MADE TO THE FOUNDATIONS NOR HAVE ANY PARTITIONS BEEN REMOVED.THERE HAD TO BE SOME PROVISION MADE FOR COAL STORAGE.SO FAR IT HAS BEEN PILED OUTSIDE IN THE YARD OPEN TO THE WEATHER AND A GREAT EYESORE.'

I do not know what report Mr.Martin made to the Department but it seems to me to be greatly exaggerated from all the excitement it is causing.I waited two years from the time Mr.Unsworth made his recommentations for changes in the heating system until the work was started.If I had to wait two years more for a simple matter of a coal bin it would be ridiculous.

According to Mr.Arneil's letter no alterations can be made without specific authority from the Department.Does this mean that a floor cannot be repaired or a wall painted without specific authority from the Department.I brought Major Davies down a few weeks ago to look at the coal bin and explain the matter to Mr.Arneil.He did not think that any grave breach of Red Tape had been made.I had intended to do some painting this summer and patch up walls where the plaster has fallen off.The cement floors in the basement need repairing but if this work has to reviewed by the Engineering Department there is little hope of having it done this year.

The work on the coal bin has been completed three weeks ago so there is nothing much I can do at present except await further developments.

Yours very truly
J.P.Mulvihill

Dear Sir:

I hereby submit a list of materials for this years Building and Repairs Grant.

5 Gallons Grey Porch Paint

I5 Gallons of Grey Cement Paint (Cretone) Gordon & Belyea.

20 Gallons of Floor Sealer (Rez) Marshall-Wells

38 Gallons of Floor Varnish.

The above list of materials are to be used in decorating the school during the Summer Holidays.There are I6,000 sq.feet of floor space to be varnished in the classrooms and dormitories.These floors have not been varnished for many years and there is a great amount of dust collecting in the old worn floors.This is a health hazard and should be rectified this year.The cement floors in the play rooms have to be painted also.

Yours truly
J.P.Mulvihill

Your File 163/6-1-881

We have your letter of the 15th instant with reference to the 5 H.P. Lister Generator which is not required at the above school.

If you can obtain a firm offer for it, you should submit same to us by army signal, stating the name and address of the purchaser. We will have to obtain the approval of the Salvage Officer before finally authorizing disposal.

Re: 5 H.P.Lister Generator, Lejac School.

With reference to Mr. Neary's letter of April 18th., there would appear to be no point in British Columbia at which the above mentioned generating plant can be used to advantage. We have investigated the possibility of converting the machine for use in a day school but find this would cost approximately $1,000.00 which we feel is not warranted. Mr. Robinson estimates the value of the machine at the present time at from $450.00 to $500.00.

I would recommend that it be disposed of.

LEJAC INDIAN RESIDENTIAL SCHOOL

Under Direction of The Oblate Fathers

LEJAC, B.C.

May 22nd, 1950

Mr. R. Howe,
Indian Office,
VANDERHOOF, B. C.

Dear Sir:-

I am submitting a request for a new Lighting Plant for this school.

We have a 10 K.W. Plant at present but during the winter the Heating plant was changed and a 3.H.P. motor was installed on the stoker and a 3/4 H.P. on the return pump, this has placed too heavy a load on our present plant.

With the present installations and the number of lights in the building we need an 18 K.W. Plant to prevent overloading.

This building was inspected by an electrical engineer from the Department on November 11th, 1949, and his report will confirm this necessity. In fact he told me that he would not let them install the stoker with the present Plant but this did not take effect and the contractors installed the stoker.

This engineer investigated the possibility of a Power Line passing through this part of the country, but I have been informed by the Provincial Member of Parliament that this will not be in effect for some years yet.

The present Plant is a Vivian Diesel installment with 10 K.W. DC rating. For the most economical operation this plant can be used during the daytime when the load is light and an 18 K.W. plant operated at night when the load is too heavy for this smaller unit. Therefore, I think that a Vivian Plant would be the most suitable for the 18 K.W. unit. However the electrical enginner has all the data on this school and will be able to recommend the proper installment.

Yours truly,

"J. P. MULVIHILL"

Dear Mr. Gibson:

Re: Lejac Indian Residential
School, Lejac, B.C.

Attached for your information is a copy of a letter received from the Principal of the above school.

Mr. Kosner visited Lejac last fall and is, therefore, familiar with conditions. I would appreciate it if we could have your report regarding the Principal's request as mentioned in the attached letter.

Yours sincerely,

Director.

RE: Lighting Plant - Lejac Residential School

With reference to Supt. Howe's letter of May 25th enclosure attached, we had anticipated that Mr. Kosner would report with regard to the electrical requirements at the above mentioned school.

Has his report been prepared and is it intended to provide a new Generating Plant?

W. S. Arneil, Esq., Indian Commissioner for B. C., VANCOUVER, B. C.

I beg to enclose herewith, a letter received from the Reverend Principal of the Lejac Residantial School, requesting a new lighting plant for the school.

I can confirm that it may be years before the B. C. Power Commission may install a plant and power lines to serve this district.

I would suggest the matter of installing a new plant be referred to the Egineering Division for attention.

R. Howe,
Superintendent

Re: Lejac Residential School Barn

I beg to enclose herewith, Voucher No. 755 in favour of the Reverend J. P. Mulvihill, Principal of the Lejac Residential School, covering labor costs for alterations and erection of farm buildings at the above mentioned School, together with supporting paylists.

I understand from the Principal that Authority was received direct from the Department to proceed with construction of these buildings. The Reverend Principal also advises that he is leaving for Ottawa today and will see Colonel Neary in this connection.

Memorandum:

DEPARTMENTAL PURCHASING AGENT

Re: Lejac Indian Residential School

The 5 HP Lister Generator which was purchased several years ago required repairs and was sent to Hoffars Limited, 1790 Georgia Street West, Vancouver, B.C.

This generator is no longer required at the Lejac School, and the firm mentioned above have offered to buy it for an amount of $375.00. Mr. Arneil approves the sale of the plant for the amount mentioned, as there is very little demand for DC plants and an expenditure of approximately $1,000.00 for batteries will be necessary to put the plant into operation.

Please let us know if we may accept the offer of Hoffars Limited.

RE: Lejac Residential School

With reference to Mr. Neary's letter of May 18th regarding disposal of the 5 H.P. Lister Generator which is not now required at the above mentioned school, Hoffars Limited, reference their letter of June 15th attached, have offered $375.00 for this plant.

This is very little more than the freight and overhaul costs paid by this Department recently, but nevertheless it is believed to represent a reasonable present day value, having in mind that there is very little demand for D.C. Plants, and an expenditure of approximately $1000.00 for batteries, would be necessary to put the plant into operation.

Dear Sir,
Herewith I beg to submit the report for the Quarter ending June 3ist. 1938.

HEALTH. The General health of the children has been very good. There have been two or three cases of active T.B. and the children were sent home at once.

Trachoma. We were worried about the possible spread of this disease among the children but the report of Dr. Wahl was very encouraging. He finds a marked improvment among the children and feels that if the present treatment is continued, most of the children will leave the school practically cured.

Discipline A part from the restlessness at the approach of the holiday season, we are well pleased with the conduct of the children. There have been no run aways and the children seem quite contented.

VISITS OF PARENTS In previous reports I have called attention to the necessity of stric ter regulations to control the visits of the parents and other Indians to the School. The Department approved of the regulations submitted for this purpose and I am glad to be able to report that since the regulations have been in force, we have had no trouble at all. All that is needed now in order to have complete control of this point, is a housenear the school for Indians coming from a long distance during the winter. At present there is no building available except the railway Station and I do not think that the C.N.R officials take very kindly to the use of the station for this purpose.

Classrooms. The program of studies had been followed closely and we hope that the Inspector will find that the matter covered has been well learned by the children. One of the great difficulties we have is to get the children to speak correct English. The majority of the children come to the School without knowing any English at all and the result is that the English spoken during recreation is so poor that the standard is lowered for the whole School. I believe that it might be well to suggest to the Inspector certain modification in the amount of matter to be covered during the school term, so that more time could be devoted to the teaching of correct speech. No doubt the Inspector has met this problem before and would be able to make prwctical suggestions.
Manual training.

MANUAL TRAINING. We have not done as much this year in this Department as we had hoped. We only had about a dozen big boys altogether and by the time they had been divided up for the various works, it was extremely difficult to give the Manual Training Instructor sufficient time with each group. However of the twelve big boys at least nine were able to learn a great deal about practical carpentry, cement and concrete work etc. Two of the boys have become quite proficient in this work.

www.collectionscanada.gc.ca

DOMESTIC SCIENCE. As the girls are more numerous it has been easier to divide them into fairly large groups and the work has been very successful. To the usual program two new items have been added, the preparation of wool from our own sheep and the knitting of Indian woolen sweaters from natural wool prepared at the school. This is just a beginning. The girls are also learning to make mattresses from Sheep wool. This year we have had for this purpose about 250lbs of wool and as our flock increases, we hope to develope this branch of the training given to the girls.

Improvements. We are expecting the final approval of the specifications for the new piggery and this work will be started assson as the permission is given.

We are planning this year to make the grounds as attractive aspossible. A nicely decorated gate has been built on the Highway and we are hoping to be able to plant trees and shrubberies from the Highway to the School. A great deal of fencing is being done and every effort will be made this summer to make the whole farm and the outbuilding look as neat as possible. Each year there seems to be an increase in the number of visitors during the summer months and the School is looked upon by many as a kind of experimental farm.

Agriculture. A week ago it looked as if our crops were going to b be a complete failure. We had no rain for ninetydays and nothing was growing except the Alfalfa and it was beginning to to turn yellow. However we had a good heavy rain four days ago and things look more hopeful. It is doubtful if we shall be able to thresh any grain as the season is now very late and the oats and wheat are barely out of the ground. But we shall have plenty of grren feed if we get a little more moisture.

The experience we have had this spring has naturally turned out thoughts to irrigation. We had already begun to build and install the necessary flumes to irrigate the poteatoes when the rain came. Everyone agrees that in most years we could almost double our Alfalfa and other crops, if we had irrigation. The official statistics give the annual rain-fall for the distric as 12 inches, whic h means that the school is situated in what is know as the semi-arid part of British Columbia. This means that no matter how well we may prepare the land in the spring or no matter how good the seed may be, we cannot under normal conditio expect sufficient rain at the right time to guarantee a good cr Our land is easy to irrigate, we have a hugh lake at our front door, we have the water tank necessary for irrigation but we lac a pumping system sufficiently economical for the purpose. If it were possible to change the present pumping system and instal a modern diesel engine, it would be easy for us to irrigate the whole farm at a very reason able cost. Our present engine costs 50¢ an hour to pump 100 American gallons a minute and I am told that the modern diesel engine could do the same or even better work for $1.00 a day. It would be a big saving even in the cost of supplying the water required for the daily use of the School.

The various branches of the farm work are doing we The Dairy, the poultry, the sheep and beef cattle are all helping to provide the school will good wholesome food and eve the bees(we have twelve hives) are contributing thier share. We have started in a small way to developean interst in rabbi so that the children , when they leave school, will have seen the many ways in which they can help to provide food and reve for themselves later on.

Yours sincerely,

W Byrne-Grant O.M.I.

163-1-10.

Ottawa, Sept. 1, 1938.

Dear Sir:

Right Rev. E. M. Buncz, O.M.I., Prince Rupert, has forwarded applications and certificates of health for the admission of Dick Davey Johnson and Elizabeth Davey Johnson to the Lejac Indian Residential School. Please inform the Principal that the admission of these two children is approved.

Yours truly,

Philip Phelan,
Chief, Training Division.

Dear Mr Reed,

It's amerciful Dispensation to send those two children to Lejac therefore I have most willingly signed the petitions and sent two copies of each to the Deputy Superintendent Ottawa.

When I arrived at Liard Post the Indians were all away,so I could not do much for them.

Yours very,truly

+E. M. Bunoz oms

Dear Sir:

With reference to your letter of the 30th instant you may make the necessary arrangements to place Elizabeth and Dick Johnson in the Lejac Indian Residential School. The application forms for these children reached the Department on September 1 and quite possibly you have already received our letter of that date.

Yours truly,

Philip Phelan,
Chief, Training Division.

DEPARTMENT OF INDIAN AFFAIRS
CANADA

OFFICE OF
INDIAN AGENT

Stikine.

Department of Mines & Resources
Indian Affairs Branch.
SEP 13 1938
RECORDS

Telegraph Creek. B.C.
August 30 th. 1938.

Sir,

Upon my recent visit to the Atlin end of the Agency, the affairs of the Davey Johnson Family was again gone into and found to be even worse than ever. Drink has been the ruination of this family.

In this family however are two children :- Elizabeth age 10 years, very fine little girl, and clean - and her brother Dick age 7. years, also well worth saving. The older daughter has now two illegitimates, and the other children (three) are under school age.

His Lordship Bishop Bunoz O.M.I. has requested that the above two children be sent to LEJACK Indian School, and as the case is so drastic, your agent wishes to back up his application. These youngsters must be sent out of that district if more trouble is to be avoided as they grow up, and Lejack seems to be the only place to send them.

Therefore, their papers were made out and signed by Dr Roth. M.D. of Atlin, who was warned to take every effort to find traces of T.B. He states they are clear and can be sent to school. The papers were then forwarded to His Lordship Bishop Bunoz, requesting him to forward direct to The Department, two copies and the third copy to be sent to this Office.

This copy has not yet arrived, no doubt His Lordship has not yet returned from his Yukon Inspection, but the other two copies might have arrived in Ottawa by now.

This is to request that authority be allowed at once to move these youngsters out of Atlin and to Lejack School, and that all neccessary paper routine be caught up with at a later date. The reason for such hurry being that the Fall is fast approaching and transportation is shutting down.

I am.

Sir,

Your obedient servant.

Harper Reed

October 3rd, 1938.

Dear Sir,-

re - Applications for Admittance to the Lejac Indian Residential School.

I wish to advise you that the Principal of the Lejac Indian Residential School has forwarded me the enclosed forms for the admission of Andrew, Mabel and Philip Sam.

As these children reside some 120 miles East of Hazelton in a district where there is no Medical Practitioner, the Principal of Lejac had the children sent to the school and there examined by the Doctor.

Although I have signed these applications I will leave the matter in the hands of the Department and would kindly ask to be advised in due course.

I may say that I have received an apology from the Principal of the school for his actions before an approval has been received from the Department.

Your obedient servant,

October 20, 1938.

Dear Sir:

With reference to your letter of the 5th instant enclosing the September return of the Lejac Residential School you may inform the Principal that the admission of the following children is approved:

Donald LeHuille
Frank George
Alexander Charlie
Alex C. Prince
Matthew W. George
Moise Antoine
Thomas Pierre
Louis M. John
William Joseph
Peter Bill
Peter Sutherland
Louise I. Patrick
Mabel Charlie
Cecilia Joseph
Helen Joseph
Matilda David
Bridget Patrick John
Abella Antoine

Yours truly,

Philip Phelan,
Chief, Training Division.

R. H. Moore, Esq.,
Indian Agent,
Vanderhoof, B. C.

Lejac Indian Residential School

Under Direction of The Oblate Fathers

LEJAC, B.C.

October 28th., 1938.

R. H. Moore, Esq.,
Indian Agent,
Vanderhoof, B.C.

Dear Sir:

Sylvester Patrick, an Indian of the Fort Fraser Reserve, has approached me with the request that I take his two young children into the school. The children are Elizabeth, 6 years old, and Holland, about 5 years old.

As you are aware, Amelia Patrick, the mother of the children in question, died last May; so there is no one in the family who can give proper care to the children. Sylvester, of course, has to work and is away from home the greater part of the time.

However, I told Sylvester that I would refer the case to you. At the present time we have 168 children residing at the school, 8 over our per capita allowance; and there is the probability that this number will be increased by the return to the school of some of the children who did not come back after the holidays.

Nevertheless, I would be willing to accept these two children if the Department will give me some pecuniary assistance in taking care of them. Otherwise it would mean depriving other children, perhaps, who have a legal right to be at the school, of some of the things that they need.

So, if you think it well to recommend the admission of these children to the Department, will you do your best to persuade them to allow me an extra grant to take care of them?

With kindest personal regards, I remain,

Yours very sincerely,

Rev. Alex. R. Simpson, O.M.I.

Rev. Alex. R. Simpson, O.M.I.,
Principal.

Ottawa,
November 17, 1938.

Dear Sir:

It has been brought to the Department's attention that the number of children of school age in the Stuart Lake Agency is increasing and consequently it is found difficult to provide accommodation for children from other Agencies.

In future, therefore, when you receive an application for the admission of any child from your Agency to the Lejac school you should first communicate with the Principal and ascertain if he can provide accommodation. In this event you should forward the application form and certificate of health to the Department for our approval.

Yours truly,

Philip Phelan,
Chief, Training Division.

163-1-10

Ottawa,
November 17, 1938.

Dear Sir:

I desire to acknowledge the receipt of your letter of the 3rd instant with reference to the pupilage at the Lejac Indian Residential School.

I note your recommendation that the pupilage be increased to 175. No provision was made in the current year's appropriation for this increase nor was it found possible to provide grant for an increased pupilage at this school in our estimates for the fiscal year 1939-40. However, if you consider that the two children of Sylvester Patrick require institutional care you may place them in the school provided the Principal has accommodation for them and is willing to accept them. Supernumerary grant will be allowed for these two children from the date of their admission to the end of June, 1939. At that time in view of pupils being discharged it should be possible to absorb them among the regular grant earning pupils. In the event of the children entering the school a special note should be made on the December, March and June returns quoting the date and file number of this letter authorizing payment of supernumerary grant for them.

With special reference to the second paragraph of your letter I am writing to Indian Agent Mortimer advising him that in future he should not apply for admission of children to the Lejac Residential School until he has first written to the Principal and ascertained if accommodation can be provided for them. This procedure will permit the Principal to first provide for the children from the Stuart Lake Agency.

Yours truly,

R.H. Moore, Esq.,
Indian Agent,
Vanderhoof, B. C.

DEPARTMENT OF INDIAN AFFAIRS
CANADA

OFFICE OF
INDIAN AGENT

Vanderhoof, B.C., November 3rd. 1938.

Sir:-

I wish to bring the attention of the Department to the condition of affairs which exists at the Lejac Indian Residential School this year in so far as the number of pupils attending the school is concerned.

At present the school authorities receive a grant for 160 children while at the present time there are 168 there and several more who should be there and whose parents have asked that they be accepted. The point that I wish to bring to your attention is the system which exists at present whereby the Department authorises Agents of other Agencies to send children from their Agencies to school and which I know nothing about until after they arrive. I refer particularly to six or eight children whose applications for admission were sent in by Agent Mortimer and approved by the Department, and again in the case of Agent Reed of the Stikine Agency having received authority direct from the Department to send two children from his Agency down here.

The point is that these children from other Agencies come to school and owing to the fact that the school is not receiving a grant for a large enough number of the children of this Agency are being allowed, of necessity, to remain at home with their parents or guardians when they really should be at the school. The school authorities are not against taking a certain number of children over and above the number that they are given a grant for but it is unreasonable to expect them to take too many, especially as crowding is likely to result.

Personally I am of the opinion that we could handle confortably at the school a maximum number of pupils totaling 175 and I feel that of that number the Department would only be doing the right thing to the school authorities, as well as the children themselves, if you could see your way clear to raise the per capita grant from 160 to 165. It is either a case of doing that or else not allowing children from other Agencies to go to the school unless the time arrives when this Agency cannot keep up the quota required.

Having this in mind I wish to attach hereto a letter received from the Rev. Principal which I trust you will find self explanatory. The two children of Sylvester Patrick mentioned in the Principal's letter should really be at the school, although one of them is only five years old. There was T.B. in this family on both of the parent's sides and while these children are perfectly healthy with no sign of T.B. it will only be a metter of time until they are affected unless properly cared for, and this cannot be done by their father alone and there are no suitable relatives on the father's side to look after them and certainly none on the mother's side.

I would be greatly obliged if you would kindly give this question consideration and advise me fully on the subject. At the moment I am not taking any action in so far as these two children, mentioned by the Rev. Principal, are concerned.

Your obedient servant,

R.H.Moore,
Indian Agent.

RHM/L.

The Secretary,
Indian Affairs Branch,

Lejac # 10

March 25, 1939.

Memorandum for file:

In his report for the month of February, 1939, copy of which was placed on file 64-158, Indian Agent Reed recommends that another son of David Johnson of Atlin be placed in the Lejac Indian residential school.

The mother died recently and the father is unable to care for this boy.

Two other children of this family were sent to the Lejac school in the fall of 1938.

Indian Agent Harper Reed should be authorized to arrange for the admission of the boy mentioned in his February report to the Lejac school.

Ottawa,
January 6, 1939.

Dear Sir:

I desire to acknowledge the receipt of your letter of the 31st ultimo enclosing the December quarter return of the Lejac Indian residential school.

You may inform the Principal that the discharge of Rose J. Prince, No. 0110, and Z. M. John, No. 240, is approved.

The usual application form and certificate of health should be submitted for Elizabeth Patrick, No. 0358. Her admission was approved by official letter of November 17 but the application form has not yet been forwarded for our file.

Yours truly,

Philip Phelan,
Chief, Training Division.

R

Sir.

Re:- Schooling - Peter. Davey JOHNSON -age 5½.

In the Agency's Monthly Report for February, the sad case of the Davey Johnson Family of Atlin B.C. was mentioned. Therein is mentioned the fact that it was necessary to send two of their children to LeJack Industrial School in the Fall of 1938, which turned out to be the correct action, to have been taken. Since then the mother with her twins have died, leaving the distracted father Davey Johnson with his eldest daughter and her three illegitimate children, and also the above very nice little lad - on his hands to mantain.

Therefore His Lordship Bishop Coudert. O.M.I. was asked if he would accept the lad at Lejack School, so that he could be there with his brother and sister -- providing of course that the Doctor in Atlin can pass the lad as entirely free from T.B. etc His Lordship's reply was as follows :-

" In regard to Davey Johnson's boy, I think for the time being it is certainly a wise move to have the said child sent to the Lejack School, providing his admittance is arranged by you with the Department, as I have nothing to say in the matter. I know that actually the school is crowded to capacity with an excess number of more than ten children; the Principal however will always be glad to harbour - even free of charge, such orphans as the one you are referring to "

The Principal of the Lejack was also written to, explaining the matter, to which no reply has as yet been received, but there is little doubt but what room will be made for the above lad, if required.

Therefore may the necessary authority be granted for the above lad to be removed from Atlin B.C. and placed within the Lejack Industrial School. Such movement will take place when some white person from Atlin B.C. will be able to see the lad down to Prince Rupert, on their way to Vancouver B.C. for business purposes.

The necessary papers will of course have their due attention over the movement.

I am.

Sir,

Your obedient servant.

Telegraph Creek. B.C.
May. 22. nd. 1939.

R.

Sir,

In the Fall of 1932, whilst in Atlin B.C. an Indian youngster was found about the Town that was not on our Census. Going into this matter it was found that an Indian Telegraph Jack had brought him in by way of the Taku River - from Juneau. S. E. Alaska, without any authority what-so-ever.

An effort was made to send him back to Juneau, but the lad about 10 years old, was taken out into the bush for the winter. Later the Jack Family somehow or another managed to have Father A Allard then in charge of Atlin R.C. Missions, send the lad to Lejack School.

As far as is known no papers have ever been signed to cove this lad, as he was a U.S.A Citizen. Much correspondance has passed over the matter with the Lejack School Authorities, and no definite reply has been received as to if the papers were ever signed or not. Might this matter be looked into.

To day the School Authorities wish to return this lad to Atlin, and it is thought that any other place would be better than to that point. Really he should be returned to Juneau, where he would be able to follow up his training received at Le-jack school. There will be nothing for him to do in Atlin and the fur trapping has nearly gone, with no more traplines for him to take up.

In the meanwhile the Mission have been requested to not return this Lad, until such a time as can be arranged. Mrs Telegraph Jack of Atlin claims to be the lad's Aunt, but it is thought he is an illegitimate, however there is a lot of drinking going on with the Jack Family, and no place for this lad to return to.

I am.

Sir,

Your obedient servant.

163-1-10

Ottawa, June 8, 1939.

Dear Sir:

I have for acknowledgment your letter of the 22nd ultimo, in which you submit for departmental consideration the case of a boy now enrolled at the Lejac Indian Residential School, who formerly entered Canada from Juneau, Alaska.

It is exceedingly difficult to state exactly what action should be taken with respect to the boy at this date. If he really came from Juneau, he should have been returned to that point at the time he was enrolled at the Lejac school. The school authorities should be prepared to accept some responsibility at this date for placing him in a reputable home.

It the school authorities know of no such home, would it be possible for you to communicate with a missionary or an Indian administrator in Alaska, asking if the relatives of the boy at Juneau would be prepared to accept him. If the Juneau authorities are not prepared to receive the boy, it will be somewhat difficult for you to ignore the claims of Mrs. Telegraph Jack for the custody of this boy. You should exercise your own best judgment in respect to the matter. Any recommendation you care to make will be acceptable to the Department.

Yours truly,

R. A. Hoey,
Supt. of Welfare & Training.

163-1-10

Ottawa,
September 30, 1939.

Dear Sir:

I am in receipt of your letter of the 20th instant with reference to James Oliver.

It is noted that this boy has been admitted to the Lejac residential school on the understanding that the mother will pay for his maintenance. In this connection I would point out that even though she does this there are numerous free services such as medical attention and books that he will receive. In addition no child can be admitted to a residential school without the Department's approval.

We have already considered the case of this boy and he is not considered one of our wards. Therefore this Department is not responsible for his education. If Principals were allowed to admit children who are not eligible as grant-earning pupils on the condition that those interested would pay for their maintenance it would have the effect of using accommodation in residential schools that is necessary for recognized Indian children.

I feel certain that if you show this letter to the Principal of the Lejac residential school he will appreciate our position in the matter and have the boy returned to his mother immediately.

Yours truly,

J.H.F. Lacey, Esq.,
Acting Indian Agent,
Vanderhoof, B. C.

Sir:-

I beg to acknowledge receipt of your letter of the 11th. instant, File No. 163-1-10 regarding James Oliver, the son of Mrs. Antoine J. Antoine of the Stony Creek Band of Indians. I have informed the Rev. Father A.R.Simpson, Principal of the Indian Residential School, at Lejac , of your ruling in the matter. He has informed me that before your reply was received the mother of the boy took him to the Indian School and agreed to pay for his maintenance there out of her monthly allowance from the boy's father. He states that the mother of the boy wishes to have him brought up in a Roman Catholic School and not in the Public School. He also points out that the boy would have to walk three miles to school at the Public School from his home on the Stony Creek Indian Reserve, which he considers too far for a boy of seven years.

Owing to the fact that the Rev. Principal is asking for an additional grant to cover children already at the school over and above the number paid Per Capita Grant and that the father of the boy wishes to have him brought up in the Public School; I would not recommend that he be admitted to the Lejac Residential School but would respectfully request your further instructions in this case.

Your obedient servant,

Jas. H. F. Lacey

August 20th. 1939.

Sir:-

Mrs. Antoine J. Antoine, a member of the Stony Creek Band of Indians has a son named James Oliver who was born August 6th. 1932. His father, J. Gregg, is a Whiteman and lives in the Yukon. He has always paid $15-00 a month to the mother to support the child. The mother of the child married A.J.Antoine of the Stony Creek Band in 1934 and they now have two other children.

The Indian woman wishes to know if she may send James Oliver to the Indian Residential School at Lejac or if he will have to attend the Public School. I would be pleased to receive a ruling from the Department in this case as the child is now seven years old and should be attending school.

Your obedient servant,

Jas. H. F. Lacey

Per Air Mail.

Dear Sir,

re - Application for Admission to Residential School.

I enclose an application for admission of Francis Isadore, age 12, to the Lejac Indian Residential School.

This boy came before the Juvenile Court Judge in Smithers on August 11th on a charge of theft. Sentence was reserved pending the Department's consideration of the case. If approval for the admission of the boy to Lejac be granted and he remain there for three or more years, the Juvenile Court Judge would give sentence accordingly.

I would strongly recommend the application be approved in this case. The home environment of this boy is by no means good. The mother is serving sentence in Oakalla at the present time. The father, although industrious, has no control over his wife or family and trouble has been caused on the Moricetown Reserve - to which they belong - by one member or another.

I feel sure the boy's future will be greatly benefitted by his removal from his home surroundings at this time.

May I ask if the Department will forward me a reply by air mail, and oblige?

Your obedient servant,

S. Mallinson

REGISTERED

Sir:-

On November 23rd. last His Excellency, Bishop Coudert, of Smithers, B.C. took a pupil of the Lejac Indian Residential School, named Holland Thomas, to the Hospital at Smithers and paid his way on the train himself. The fare amounted to $2-45. The boy was in the Hospital for a few days and then returned to the School his fare back being paid by the Hospital authorities. Bishop Coudert has requested a refund of the $2-45 paid by him for the boy's ticket. There was no opportunity to get a regular transportation warrant to the School for the boy to catch the train in time. I am attaching hereto Voucher No. 495 for $2-45, in favour of Bishop Coudert and trust that payment will be made direct to him at Smithers, B.C. Receipt from the Railway Company No. 288717 covering the amount is attached to the Voucher.

INDIAN AFFAIRS BRANCH

PLEASE QUOTE
FILE 32A-259

February 2nd, 1940.

Dear Sir:

I enclose herewith, for your approval, an application for the admission of Susie Jimmie to the Lejac Indian Residential School.

The Rev. Alex. R. Simpson, O.M.I., Principal of the School, advises me that this child has already been admitted.

In recommending this admission, I wish to advise that the father died some eighteen months ago, leaving the mother with a large family and it will be of considerable help to her if the admission of this child can be sanctioned.

I also enclose Form 33, in duplicate, which was forwarded to this office.

Your obedient servant,

S. Mallinson

S. Mallinson,
Indian Agent.

Dear Sir:

With reference to your letter of the 2nd instant the Department has no objection to the admission of Susie Jimmie to the Lejac Indian Residential School. However, it should be understood that grant can only be paid for 160 pupils.

Yours truly,

Philip Phelan,
Chief, Training Division.

OFFICE OF
INDIAN AGENT STIKINE.

ATLIN. B.C.

January. 28. th. 1940.

Copy-

Your Reverance,

Upon arrival here, for a winter inspection, the question of sending little Peter Davey Johnson. age 6 -to The Lejack Residential School was taken up with Father Keyser O.M.I. who is now Resident in the local R.C. Mission of these parts.

We both felt that he should go down and join his brother and sister at Lejack. The Doctor was seen, and the lad has been passed as fit, having been under observation for over 6 months now.

The above authorities cover this movement, and all fares etc have been arranged, except that from Prince Rupert to Le Jack, the cost etc of which is not known here. A Warrant for this can be obtained from the Indian Office in Prince Rupert, which of course would be chargeable to this Agency. A very nice lad- Jhn Murry Junr is going to Prince Rupert also, and he has been paid some small amount to care for this indian lad en route down. LeJack has been requested to advise you of this movement, when they accepted this entrance to Lejack, in yesterday's "wire".

It is hoped that this meets with your wishes. No doubt Father De Keyser will be writing you also, on this matter, and also regarding the recent troubles of this Camp. With all the Season's Greetings for good health etc.

I am. Sir,

His LORDSHIP.

Yours sincerely.

Bishop Bunez. O.M.I.

PRINCE RUPERT. B.C.

Indian Affairs Branch
FEB 7 1940
REGISTERED

Sir,

Re:- Indian Lad. Peter JOHNSON. Atlin.

I beg to submit attached a copy of a letter directed to His Lordship Bishop Bunoz. O.M.I. of Prince Rupert B.C. in connection with sending the above indian lad to the Lejack Residential School, under the above Authorities. The lad leaves here to-morrow morning.

Father. O. DeKeyser. O.M.I. now here in Residence, with your Agent have gone into this matter very carefully, and despite the expenses involved, we shall in the long run save expenses by moving this very nice little lad, away from this rather rough mining camp of Atlin B.C.

Over Xmas and the New Year, much trouble with the Indians has again come about, which will be reported in due course, and it is hoped that within a few days now, it will be possible to have all the indians out again on their trap-grounds - and away from this Townsite.

I am. Sir,

Your obedient servant.

The Secretary
Indian Affairs Branch
Dept. Mines & Resources.
OTTAWA.
